

## Pulses Domestic Fundamentals:

### Today's Update:

- **Indian Meteorological Department (IMD) forecasts normal monsoon this year.** As per the latest update by IMD India would receive 98% rainfall from June to Sept. It is 88 centimeters of the country's long-term average. It has increased the kharif crop production prospects including pulses too. The Major kharif pulses are Tur, Moong and Urad. However, some concerns may surface over equal distribution of rainfall. Some of the central and south Indian states may receive poor rainfall. M.P., a major kharif pulses producers, may receive lower rainfall. M.P. contributes 22% pulses production in kharif season. However, it would be very critical to see when and where the monsoon rains fall and at what extent.
- **The government has set a kharif pulse production target of 10.5 million tonnes but in the past three years actual production has been closer to eight million tonnes.** The demand for pulses starts increasing from July and continues till Diwali. During July to Oct India may face tight supply side. So, Govt. may decide to reduce duty on lentils and Bengal gram in June end –July.
- **Demand for tur daal is expected to improve despite disrupted trades due to COVID-19 increasing cases.** Sellers are unwilling to sell at Rs6800-6900 at this point of time. There is a general views in the market that COVID cases would start coming down from mid-May and the recovery in demand might be seen by then. Millers are unable to get tur at the decreased prices. So, slight recovery is expected from mid-May. Import flow is low while millers may face short supply of raw tur. So, tur may move up by Rs 100-200 from current level. It may continue to trade in the range of Rs6900-7300, depending on quality.
- **The DGFT has appointed its advocate to give its argument against the stay orders of the pulses import.** Some big players have already struck deals of lentils in bulk volume. If stay order continues, importers may face financial problems. The issue should be sorted out as soon as possible. As rabi production is low, shortage of pulses may fuel pulses prices again, once normalcy in market returns..

### Previous Update:

- **There is a gossip in the market that govt. is monitoring the market movement very closely and if market moves beyond a certain level, govt. has option to cool market down by decreasing import duty on chana, allowing peas import, decreasing duty on lentils import.** After states assembly elections and procurement drive govt. may be active to reign prices going up. The lockdown has already started affecting demand for daal. If it is extended for the next 15 days, disruption in normal trade may occur once again. The free distribution of grains too may affect price and demand.
- **As per the latest update by Ministry of Consumer Affairs ,Food & Public Distribution, additional free of cost foodgrains will be distributed to NFSA Beneficiaries under Pradhan Mantri Garib Kalyan Anna Yojna in May & June-2021.** Under this scheme 5 kg per person per month foodgrains would be provided to nearly 80 crores people, covered under National Food Security Act,2013(NFSA)over and above NFSA foodgrains for next two months(May & June-2021).
- **Masur cash market continues to trade up taking the clue from low global stock.** The new crop is six months away. The sowing of Lentil is due in July in Canada. Apart from it dollar is getting stronger. It would force importers to spend more INR in the coming weeks. Under the emerging scenario, even the importers are not ready to sell Masur at the prevailing price. Arrivals in domestic markets like Sagar, Ganjvasoda, Mungawali,

Bhopal, and Beenaganj line have decreased. Even NAFED has started procuring Masur at market price. The procured quantity remains unspecified. All these developments can push Masur's price up in the coming weeks.

#### **International Market Update:**

- **Lithuania's export of peas increased by 4 % from 6500 to 6762 MT in Feb-2021.** Total export of peas was registered at 13262 MT against 61752 MT in the previous calendar year. It is comparatively much lower than last year. It exported 3,516 MT for Netherlands, 2,279 MT for Latvia and 481 MT for Poland.
- **Peas planting is on in the US. As per the latest updates by market sources 11% planting is almost complete** at this point of time against 6% last year and the recent average of 9%. Progress remains most rapid in the U.S. Pacific northwest, with farmers in Oregon wrapping up plantings, Washington state is registering the slowest progress of the three states in the region, with 24% of the crop in the ground, compared to 48% last year but close to the recent five year average of 26% complete by the third week of April.
- **Chickpeas export from Australia decreased from 91,200 MT in February in comparison 178,951 MT in Jan-2021-** according to a recent data from Australia Bureau of Statistics. This increased exports so far during the marketing year to 439,975, up 119% last year. Pakistan was the largest destination, taking 41,946 MT, followed by Bangladesh buying 34,016 MT and U A E at 4,590 MT.
- **As per the latest data release by Federal Customs Service of Russia chickpeas export from Russia decreased** by 40% to 4,574 metric tons (MT) in Jan-2021. It was 7,674 MT in Dec-2020. The data showed movement was down 84% from the 28,284 MT recorded during the same month last year. Pakistan was the top consumer during the month, receiving 2,314 MT. Jordan was the second most important importer taking 997 MT, followed by Turkey at 460 MT.
- **Bangladesh and Pakistan continue to buy chickpeas from Australia and so prices hinge** around \$660-670 per MT basis CiF at destinations. Pakistan has been regular buyer of containerized Australian chickpeas, and its peak figure of recent years is believed to be 37,759t in December 2020, the biggest volume seen since 34,805t in April 2018. The February 2021 export figure could well be above that to reflect containerized exports as well as the 25,000t of bulk to Pakistan, and further bulk sales to Bangladesh.
- **Prices for mung beans stayed steady at previous month level at around \$1300/t for No. 1 grade, \$1200/t for processing and \$1100/t for manufacturing.** Harvesting is expected to begin soon in Queensland. Recent rains are beneficial to standing crop in the field. Production prospects have improved a lot. Chinese buyers are active and most of the mung beans booked for shipment from April onward. Containers are readily available for China right now.
- **Lentil's production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield.** Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2020-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.

- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakhMt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.

**Daily Outlook:** -Pulses are likely to trade mixed.
