

## Pulses Domestic Fundamentals:

### Today's Update:

- **Pulses cash market traded down due to the weak demand from mills and likely increase** in import in June & July. Actually, govt.'s intention is to ease supply side into the market. The new kharif crop sowing is about to start from June. The pre-monsoon rainfall has increased the moisture level in the field. So, sowing may start early this year. The forecast for good monsoon rainfall has increased prospects for bumper production in the kharif season. It may build up the pressure on prices. It would be too early to predict area under kharif pulses. However, it may exceed from last year, as per the initial intentions of farmers.
- **Department of Consumer Affairs, Ministry of Consumer Affairs, Food & Distribution, Govt. Of India** has launched a portal, where the stakeholders like importers, millers & dealers can register themselves in this portal and declare their stocks position for the pulses on the given date. They would have to create user id & pass word there.

### Previous Update:

- **Chana may improve slightly and may continue to trade in the range of Rs 5000 to 5400**, depending on the market locations. Fundamental remains strong. However, demand is weak due to the ongoing lockdown. If the lockdown is relaxed, some improvement is expected. The bearish outlook for other pulses may affect the upward momentum in Chana too.
- **After the latest decision of freeing Tur, Moong and Urad import and the compulsion of** stock declaration, stockists resorted to release stock while farmers too started selling ahead of the kharif sowing preparations. Apart from this, the availability of mango and the weak demand due to the pandemic, tur market may slip 100-200 more from the current level. Arrivals in the market is bound to increase. So, the stake holders would have to wait for improvement in the market. one thing is clear now that the price movement would depend on the import flow, its landed price and rains received during the monsoon season. Lemon tur may touch the level of Rs 5900-6000. market sources say that some tur deals have been struck at Rs 6400-6450 for June delivery. Around 1.00-1.25 lakh MT imported tur may hit the Indian market in June and July.
- **The central govt. has green signaled the procurement of Moong at MSP. It will benefit the Indian** farmers, especially, harda and Hoshangabad region, where farmers have shown 3.33 lakh ha Moong. The Moong crop in this region is in good condition and it will be worth Rs 3500 crores. Right now the pressure seems on price. If govt. starts procurement, some support is expected. The prices of moong has already come down below MSP. It is ruling in the range of Rs 6200 to 6800 in various markets.
- **Good pre-monsoon showers and lower temperatures this month across the country** will help retain soil moisture. It may help to start kharif sowing early. As good rainfall is expected in the monsoon season, kharif crop size would be good this year including Moong too. Farmers have shown 17.82 lakh ha under kharif crop so far against 10.64 lakh ha last year. Under Green gram 14.45 lakh ha have been planted against 8.31 lakh ha last year. Urad has been shown in 2.98 lakh ha against 2.01 lakh ha last year as on May-2021. Sowing area under pulses in the summer season increased by 67.48 %. Out of total Moong area increased by 73.84%, urad area increased by 48.61 % till 21<sup>st</sup> May-2021.
- **The import policy for Lentil remains unchanged. However, the market is expecting a cut** in import duty. Right now it is 30 % including cess, applicable duty is 33%. As other pulses prices have decreased, the price of Lentil

too decreased by 3.07 % from Rs 6500 to Rs 6300 in Mumbai. As arrival is low due to the lockdown, the more downward movement is unlikely until & unless duty is slashed down. We can see a sideways movement right now in the Masur cash market. There is a gossip in the market that a vessel having 29,500 MT Masur has entered in the free trade zone (Kandla Port). The importer may wait for a cut in duty. Quotes in Canada is higher at \$670-680, with 33 % duty, it comes to Rs 6300-6400 at Indian ports.

#### **International Market Update:**

- **Lithuania's export of peas increased by 4 % from 6500 to 6762 MT in Feb-2021.** Total export of peas was registered at 13262 MT against 61752 MT in the previous calendar year. It is comparatively much lower than last year. It exported 3,516 MT for Netherlands, 2,279 MT for Latvia and 481 MT for Poland.
- **Peas planting is on in the US. As per the latest updates by market sources 11% planting is almost complete** at this point of time against 6% last year and the recent average of 9%. Progress remains most rapid in the U.S. Pacific northwest, with farmers in Oregon wrapping up plantings, Washington state is registering the slowest progress of the three states in the region, with 24% of the crop in the ground, compared to 48% last year but close to the recent five year average of 26% complete by the third week of April.
- **Chickpeas export from Australia decreased from 91,200 MT in February in comparison 178,951 MT in Jan-2021-** according to a recent data from Australia Bureau of Statistics. This increased exports so far during the marketing year to 439,975, up 119% last year. Pakistan was the largest destination, taking 41,946 MT, followed by Bangladesh buying 34,016 MT and U A E at 4,590 MT.
- **As per the latest data release by Federal Customs Service of Russia chickpeas export from Russia decreased** by 40% to 4,574 metric tons (MT) in Jan-2021. It was 7,674 MT in Dec-2020. The data showed movement was down 84% from the 28,284 MT recorded during the same month last year. Pakistan was the top consumer during the month, receiving 2,314 MT. Jordan was the second most important importer taking 997 MT, followed by Turkey at 460 MT.
- **Bangladesh and Pakistan continue to buy chickpeas from Australia and so prices hinge** around \$660-670 per MT basis CiF at destinations. Pakistan has been regular buyer of containerized Australian chickpeas, and its peak figure of recent years is believed to be 37,759t in December 2020, the biggest volume seen since 34,805t in April 2018. The February 2021 export figure could well be above that to reflect containerized exports as well as the 25,000t of bulk to Pakistan, and further bulk sales to Bangladesh.
- **Prices for mung beans stayed steady at previous month level at around \$1300/t for No. 1 grade, \$1200/t for processing and \$1100/t for manufacturing.** Harvesting is expected to begin soon in Queensland. Recent rains are beneficial to standing crop in the field. Production prospects have improved a lot. Chinese buyers are active and most of the mung beans booked for shipment from April onward. Containers are readily available for China right now.
- **Lentil's production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield.** Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from

49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.

- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40 % from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.

**Daily Outlook:** -Pulses are likely to trade mixed.
