

Pulses Domestic Fundamentals:**Today's Update:**

- **Government launched Seed Minikit Programme recently by distributing high yielding varieties of seeds of pulses and oilseeds to farmers.** About 20,27,318 seed minikits of pulses, will be provided free of cost to the farmers directly under National Food Security Mission. The main purpose is to enhance production and productivity of pulses and oilseed. The distribution of seeds will be done before 15th June to reach to farmers before kharif season. Pulse's production has increased from 17.15 million tonnes in 2014-15 to 25.56 million tonnes in 2020-21 but this is not enough to meet domestic demand and that's why need more encouragement to grow pulses and oilseeds.
- **The country is most likely to face paucity of pulses this year including masoor, chana and other pulses.** A shortage of around 10 lakh tonnes in the production of tur this year could be seen. As per the 3rd Advance Estimates data sourced from the website of the Ministry of Agriculture, for the crop year 2020-21, the overall kharif production is expected to be lower by 2.12 million tonnes among which tur production is expected to be lower by almost 7 lakh tonne and urad is expected to be lower by 5.20 lakh tonne.
- **As per market sources government may cut import duties on gram and lentil.** Meeting is going on regarding this and government of India is considering this but no final decision has been taken yet. The prices of pulses were under pressure due to the lifting of quantitative restrictions on import of tur, urad and moong by the central government as well as the government's decision to ask mills for stock details on a weekly basis. Trading of pulses was being done in limited quantity due to lockdown restrictions in many states. Now corona cases are declining but overall consumption of pulses is still less due to closure of restaurants and hotels, etc.

Previous Update:

- **India is facing tight supply side on the tur availability front amid high prevailing prices, Canadian green lentils can be used as a substitute, if prices decrease in Canada & Australia.** The production size of pigeon pea is low this year and the prices are 29% higher than last year at the same time. The government had set a target of 4.82 million tonnes but the trade believes that the real number is close to 3.0 to 3.5 million tonnes and country's pigeon pea consumption is over 4 million tonnes. The govt. has increased the tur production estimate from 3.89 to 4.14 MMT in the 3rd Adv. estimate, released on 25th May-2021. India will not be able to import from Myanmar like usual due to the low availability from the 2020-21 harvest so the Indian importers may import more from Africa. African Arusha and Gazri varieties are comparatively cheaper. The new crop is due in July in the African countries.
- **Uttar Pradesh government revokes the order to know stock position in the state** regarding pulses for importers, traders & stockists from immediate effect. There were increase in prices of tur, moong, urad from Rs.8 to Rs.20 per kg in last month. After issuing order to know the stock position, prices of pulses have decreased, so government revokes order now. The other states may follow the same suit. It is a great respite for pulses trades.
- **After the recent change in import policy the cash Urad market traded down by Rs 800-1000.** The cash market has adjusted with this change now. The pressure of arrivals did not build up as expected. In south and north Indian markets prices started moving up again despite the arrivals from the local crop in Tamil Nadu and Andhra Pradesh. Prices in these markets moved up By Rs 300 from Rs 6700 to Rs 6900-7000. Imported Urad in Mumbai traded in the range of Rs 6500-7000. Myanmar has already increased the Urad price by \$100, so the

quotes there too have gone up. At the current prevailing prices import of FAQ variety comes to Rs 6600-6700 while SQ at Rs 7200. So, local market in India may move up to this level in coming weeks. Import from Myanmar is expected not before the third week of June.

- **Govt. released 3rd Adv estimates for 2020-21 food-grains production. It increased Bengal Gram production by 10 lakh MT to 126.1 lakh MT. For tur, it is 41.40 lakh MT, Urad at 23.70 lakh MT, Masur at 12.60 lakh MT, Masur production estimate has been decreased from 13.50 to 12.60 lakh MT. Trades are of the view that Bengal Gram production estimate is very optimistic.**
- **After the latest decision of freeing Tur, Moong and Urad import and the compulsion of stock declaration, stockists resorted to release stock while farmers too started selling ahead of the kharif sowing preparations. Apart from this, the availability of mango and the weak demand due to the pandemic, tur market may slip 100-200 more from the current level. Arrivals in the market is bound to increase. So, the stake holders would have to wait for improvement in the market. One thing is clear now that the price movement would depend on the import flow, its landed price and rains received during the monsoon season. Lemon tur may touch the level of Rs 5900-6000. Market sources say that some tur deals have been struck at Rs 6400-6450 for June delivery. Around 1.00-1.25 lakh MT imported tur may hit the Indian market in June and July.**

International Market Update:

- **Lithuania's export of peas increased by 4 % from 6500 to 6762 MT in Feb-2021. Total export of peas was registered at 13262 MT against 61752 MT in the previous calendar year. It is comparatively much lower than last year. It exported 3,516 MT for Netherlands, 2,279 MT for Latvia and 481 MT for Poland.**
- **Peas planting is on in the US. As per the latest updates by market sources 11% planting is almost complete at this point of time against 6% last year and the recent average of 9%. Progress remains most rapid in the U.S. Pacific Northwest, with farmers in Oregon wrapping up plantings, Washington state is registering the slowest progress of the three states in the region, with 24% of the crop in the ground, compared to 48% last year but close to the recent five year average of 26% complete by the third week of April.**
- **Chickpeas export from Australia decreased from 91,200 MT in February in comparison 178,951 MT in Jan-2021- according to a recent data from Australia Bureau of Statistics. This increased exports so far during the marketing year to 439,975, up 119% last year. Pakistan was the largest destination, taking 41,946 MT, followed by Bangladesh buying 34,016 MT and U A E at 4,590 MT.**
- **As per the latest data release by Federal Customs Service of Russia chickpeas export from Russia decreased by 40% to 4,574 metric tons (MT) in Jan-2021. It was 7,674 MT in Dec-2020. The data showed movement was down 84% from the 28,284 MT recorded during the same month last year. Pakistan was the top consumer during the month, receiving 2,314 MT. Jordan was the second most important importer taking 997 MT, followed by Turkey at 460 MT.**
- **Bangladesh and Pakistan continue to buy chickpeas from Australia and so prices hinge around \$660-670 per MT basis CiF at destinations. Pakistan has been regular buyer of containerized Australian chickpeas, and its peak figure of recent years is believed to be 37,759t in December 2020, the biggest volume seen since 34,805t in April 2018. The February 2021 export figure could well be above that to reflect containerized exports as well as the 25,000t of bulk to Pakistan, and further bulk sales to Bangladesh.**
- **Prices for mung beans stayed steady at previous month level at around \$1300/t for No. 1 grade, \$1200/t for processing and \$1100/t for manufacturing. Harvesting is expected to begin soon in Queensland. Recent rains are beneficial to standing crop in the field. Production prospects have improved a lot. Chinese buyers are active**

and most of the mung beans booked for shipment from April onward. Containers are readily available for China right now.

- **Lentil's production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield.** Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40 % from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.

Daily Outlook: -Pulses are likely to trade mixed.
