

## Pulses Domestic Fundamentals:

### Today's Update:

- **Department of Commerce, SEZ Division has issued a notification regarding clearance of pulses consignment from SEZ** in response to representations received requesting re-examination of the Department's position in the matter regarding clearance of pulses imported prior to 15th May 2021- that is before change of import duty on said pulses from "Restricted" to "Free". The import policy for Tur (Pigeon Peas), Moong (Green Gram) and Urad (Black Gram) was changed from "Restricted" to "Free" effective 15th May 2021. Through the current notification, the Department has re-iterated its existing position in the matter, originally conveyed vide a letter dated 11th Aug 2021- that the consignments with Bill of Lading from 15th May 2021 to 31st Oct 2021 shall only be considered for custom clearance under the notification dated 15th May 2021. The consignments with Bill of Lading prior to 15th May 2021 shall be treated as per the Supreme Court's order dated 17th June 2021 which directs that such goods are held liable to complete confiscation but with a relaxation of allowing re-export within two weeks from the date of order of the Court on payment of the necessary redemption fine and subject to the importers discharging other statutory obligations. The goods in question are understood to be about 2 to 2.25 lakh MT.
- **Good rains are being observed in Damoh, Ashoknagar, Vidisha, Ganj Basoda, Tikamgarh, Sagar districts of Madhya Pradesh** yesterday which can affect Urad crop in this area. Due to rains Urad crop is dull and moisture content is also high. If it rains continuously quality may get affected significantly with yield.
- **The Government has extended the deadline for import of Tur and Urad and it is 31st January 2022 whose bill of lading is on 31st December 21 or before.** Tur Moong and Urad has kept in free import regime upto 31st October earlier which has extended for Tur and Urad now upto 31st December.

### Previous Updates

- **The request has received from Embassy of the Russian Federation and Federal Service for Veterinary and Phytosanitary Surveillance (FSVPS) to allow export of lentil from Russia to India.** Now it has been decided to allow one time import of the Lentils from Russia for a period of 6 months. Earlier India were not importing lentil from Russia because of phytosanitary issues.
- **According to Ministry of Agriculture, total pulses sown on 139.64 lakh ha as on 10th Sep 21 against 136.98 lakh ha same period last year.** Overall sowing is up by 1.94% till now. Tur area is up by 3.88% and Urad is up by 1.49% while Moong area is down by 0.31%. Tur is sown on 49.84 lakh ha against 47.98 lakh ha, Urad is planted on 38.89 lakh ha which is against 38.32 lakh ha same period last year. Moong has sown on 35.10 lakh ha against 35.21 lakh ha same period last year.
- **IMD Predicted above average rainfall in September which will affect the Kharif crop if not spread equally.** If pulses crops face heavy rainfall activity during harvest period, it may damage some urad and moong crop. Rajasthan has seen a dry spell in the month of August hence we can expect reduction of moong production in the state of Rajasthan. Tur in Karnataka, which produces 20% of the country's tur, are predicted to be badly impacted if the wet weather persists.
- **Government raises MSP for Rabi crops for season 2022-23.** MSP for chana has increased by 2.5 % to Rs. 5230/qtl. against Rs. 5100/qtl previous year. Msp for Masoor has almost increased by 7.8% to Rs.5500/qtl. against Rs. 5100 for previous day.

- Directorate of Foreign Trade India issues public notice of implementation of 5 years Memorandum of Understanding (MoU) between India and Myanmar. The import quota for Urad is 2.5 LMT and for Tur is 1 LMT.
- **According to Ministry of Agriculture, total pulses sown on 136.85 lakh ha as on 2nd Sep 21 against 135.26 lakh ha same period last year.** Overall sowing is up by 1.18% till now. Tur area is up by 4.3% and Urad is lower by 0.24 % while Moong area is down 2.0%. Tur is sown on 49.49 lakh ha against 47.45 lakh ha, Urad is planted on 37.94 lakh ha which is against 37.85 lakh ha same period last year. Moong has sown on 34.22 lakh ha against 34.92 lakh ha same period last year.
- **Chana at Bikaner improved by Rs. 100 on Friday as compared to previous day and traded at Rs. 5200/qtl.** Urad FAQ Burma at Mumbai traded steady at Rs. 7000/qtl. and at Chennai traded steady at Rs. 6950/qtl. Moong at Jaipur traded steady at Rs. 7200/qtl and Moong is arriving in Karnataka, Maharashtra. Masoor at Kanpur (mill quality) traded at Rs. 7900/qtl.. Prices of lentil are high due to expected lower production in Canada.
- **Madhya Pradesh state cooperative marketing federation has been authorised to procure crops** from registered farmers for summer year 20-21 and marketing year 2021-22 informed by Agriculture minister of Madhya Pradesh. 3.29 lakh MT moong has been procured on support price till now. The procurement of crops will be done by next 15th September.
- **Good and timely rainfall supported kharif planting but lull monsoon rains in late June and first half of July impacted sowing pace.** There is significant increase in area of Tur in Karnataka and slight increment in Maharashtra and Madhya Pradesh. As of now Tur crop prospect seems good and need to look for weather in next 3 to 4 months especially at flowing and pod filling stage.
- **Infestation of yellow mosaic virus has seen on crops in Ashok Nagar (MP). Now the pods are drying and falling from plant.** Also, stress is being seen in standing crop of Rajasthan due to very less rains. In case of Moong, Rajasthan planting is slightly delayed due to late arrival of rains. Moong crop in Rajasthan struggling for rains and has become little dry too. As per trade sources there may be 20-30% yield loss in Rajasthan due to erratic monsoon.

#### **International Market Update:**

- **Australia Chickpea production is estimated to be 8,44,000 tonnes in 2021-22 according to September update.** Last year's production was 7,33,000 tonnes while June 2021-22 estimate was 7,33,000 tonnes. Lentil production in Australia is projected to be 6,39,000 tonnes against last years production of 6,34,000 tonnes while June 2021-22 estimate was 5,89,000 tonnes.
- **According to September update, US lentil Production is estimated to be 0.57 LMT in 2021 against 3.36 LMT in 2020** which is 83% reduction and US Chickpea production is projected at 0.77 LMT in 2021 against 1.97 LMT in 2020 which is 60% reduction. The production is less due to drought condition prevailing in US.
- **According to Agriculture and Agri Food Canada (AAFC) August report, the production of lentil is projected at 18.85 lakh tonnes for 2021-22.** July production estimate was 27.50 lakh tonnes while last year's production was 28.68 lakh tonnes. Huge decline in lentil production due to weather and drought. The end stock for season 2021-22 is expected to be only 50,000 tonnes against 4 lakh tonnes last year. Market expects production of Canadian lentil not more than 15 lakh tonnes.
- **According to Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22.** July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.

- **In Manitoba grasshopper population thrive in some area due to hot and dry conditions.** It is an additional threat to the pulses production along with heat wave condition. Due to prolonged recordbreaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.
- **The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta.** As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18% good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$780-800.
- **Australia's first crop production forecast for a current season for five major pulses including chickpeas, field peas and lentils released by Pulse Australia (PA),** it is 2.28 Mt which is 23% below the 2.96 Mt produced last year. Chickpea area is forecast to increase by 11% to 5.65 lakh ha with production estimate 6.62 LMT. Forecasted area for peas is 2.38 lakh ha with production estimate of 2.7 LMT while forecasted area for lentils is 3.04 lakh ha with production estimate of 4.54 LMT. Australia's production is down this year on dry conditions.
- **According to reports from USDA state level offices Peas harvesting started in the US.** In Montana around 20% crop has been harvested. Limited progress is also reported in Washington state and Oregon, suggesting around 101,000 acres of peas have been harvested, compared to roughly 10,000 at this time last year. Markets expect the first production estimate in September, but if yields are at least within 10% of their recent five year average around 88,000 metric tons (MT) of peas are now in bin, compared to roughly 7,000 at this time last year.
- **Lentils markets in the North America continued to trade firm on the back of strong export sales** and fear of low yield in major growing belts. Millers, importers and traders are expecting reduction in duty as supply side is tight in the local market. Indian gov.t too is monitoring market very closely and taking necessary actions to control the price rise. In this regard 3 steps, like freeing import of Tur, Moong & Urad from restricted to free list till October 2021 on 15th May, stock declaration and stock limit on 2nd July-2021, have been taken. All these developments go against exporting countries as prices in the Indian markets have decreased by 10 to 20 %, barring lentils, from mid-May-2021.
- **Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres,** up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

**Daily Outlook:** -Pulses are likely to trade mixed.
