

Pulses Domestic Fundamentals:

Today's Update:

- **Urad harvesting was completed to a large extent in Maharashtra when heavy rainfall occurred during late September.** The harvesting has progressed further, and is almost complete in the state by now. The harvesting is still ongoing in Madhya Pradesh, Rajasthan, Uttar Pradesh and Gujarat and has just started in Odisha and Jharkhand. Nominal losses in yield amounting to 2 to 5% are estimated so far in various states due to heavy rains after cyclone Gulab.
- **In Moong as around 50% sowing delayed by 10 to 15 days in major growing states due to erratic behavior of rains,** yield expectation has not been upto the mark in Mha,Kar and Odisha and there is a quality issue in Rajasthan too. Rajasthan is the largest moong producing state accounting for approximately 60% of the Kharif acreage. Crop conditions were good in most of the state until before cyclone Gulab, but excess rains over the last week of September have raised some concerns about quality and the yield may also decline marginally
- **Tur is in vegetative to flowering in different states and arrivals will start in December and peak in January.** There were heavy rains due to cyclone Gulab in Odisha, Andhra Pradesh, Telanagana, Chhattisgarh, Maharashtra and Gujarat from 26th September to 30th September. Rainfall in Maharashtra still continues. Tur crop can withstand waterlogging for four to six days, so losses so far have been nominal at 2-3% in Maharashtra, Odisha as well as Gujarat
- **Under Crop diversification scheme “Mera Pani, Meri Virasat”, Haryana farmers have slightly shifted to pulses and oilseeds from traditional Rice and millets.** Area under kharif pulses has increased by 74% this year as compared to 2020. Under crop diversification scheme incentive of 7,000 per acres has being given for opting crop other than paddy and offering incentive of 4,000 per acre to divert from Bajra. Farmers have opted crop diversification over an area about 98,000 acres all over the state.

Previous Updates

- **Ministry of Consumer Affairs said that around 11,635 stockholders have registered and declared 30.98 Lakh MT of stock of pulses** on the official portal of Department of Consumer Affairs as on September 20, 2021. The Central Government had asked States/UTs to direct all stockholders such as stockists, millers, importers and dealers to declare stocks of pulses on 17th May 2021 mainly to inspect undesirable practices of hoarding and creation of artificial scarcity and thereby monitoring prices of pulses. Stockists declare stocks they are holding on any given date portal portal <https://fcainfoweb.nic.in/psp>.
- **Cyclone Gulab has caused heavy rains in Odisha, Andhra Pradesh, Telanagana, Chhattisgarh, Maharashtra and Gujarat last week.** In Maharashtra heavy rains have badly affected Osmanabad, Latur, Parbhani, Hingoli and Nanded districts of Marathwada and kharif crop has been affected due to these heavy rains. According to preliminary estimates, 25 lakh hectare of crops have been damaged including 11 lakh hectare affected in the last few days. Latest weather alert due to cyclone Shaheen is for Bihar, West Bengal, Sikkim, Tamil Nadu, Kerala, Karnataka and Gujarat according to latest information by IMD.
- **New arrival of Kharif Urad in Harda market of MP has been not up to the mark so far and quality of the grain coming into market is very poor.** Around 1000 bags arrival has been reported which has increased from 500 bags a week ago. Out of total only 20 % is said to be of normal quality. There was no arrival of SQ variety. The fear is growing in Maharashtra, where heavy rains may occur again with formation of Shaheen storm in

the Arabian sea. Gujarat and Maharashtra may receive excess rains in next three -four days and it is not a good omen for Urad and Moong crop going through the harvesting phase.

- **Sluggish offtake from Stockists' end and weak demand from the retail markets helped Masur prices to ease further and it decreased by Rs 50 in Mumbai market.** It was quoted 7200 at Mundra & 7300 at hazira ports. Australian containers were offered at 7500-7550. Its impact was seen in various markets of India too. Desi masur was quoted at 7700 while imported at 7550 in delhi market. masur traded low by Rs 500 to 100 in Katni and Indore too. Kanpur market stayed steady at 7700. Prices may decrease further as quotes in Canada has decreased to \$950-975. There is a fear in the market that govt may interfere in the market and cut duty to zero if prices moves up again. Apart from it, nafed is trying to encourage Russian suppliers to supply lentils to Indian market, taking advantage of six months relaxation. negotiations are still on. Price monitoring agencies are watching wholesale and retail market very closely.
- **The Ministry of Agriculture & Farmer' Welfares has given green signal to buy 15,835 MT Kharif-2021-22 Moong in Haryana.** Moong would be purchased under price support scheme at MSP of Rs 7275 per qtl. It was 7196 per qtl. last year for 2020-21. Moong farmers in Haryana may start registering themselves at notified centers in the state. As per the CCEA published data the cost of Moong production for farmers is 4850. As crop is in good condition in Haryana, procurement agencies would be able to achieve the target easily in the state.
- **Ministry of Agriculture and Farmers Welfare has approved procurement of Green Gram, Black Gram and Red Gram in Andhra Pradesh, Telangana, Tamil Nadu and Karnataka under Price Support Scheme (PSS) for Kharif 2021-22.** Red Gram and Black Gram will be procured at Rs. 6,300 per quintal and Green gram will be procured at Rs. 7,275 per quintal. NAFED is getting ready to undertake procurement operations. The quantity sanctioned to be procured is given in the table below.

Sanctioned Amount of Procurement Under PSS for Kharif 2021-22			
	Quantity in MT		
State	Green Gram	Black Gram	Red Gram
Andhra Pradesh	1,315	5,930	25,425
Telangana	6,432	—	—
Tamil Nadu	3,367	4,000	—
Karnataka	30,000	10,000	—

International Market Update:

- **The Agriculture Ministry Of Pakistan has estimated kharif Moong production 2021-22 at 2.53 lakh MT against the annual domestic demand of 1.75 to 1.80 lakh MT.** Production forecast for Chickpeas and Lentils has been increased slightly
- **Global Lentils market traded weak as exporters have now shifted their attention to sell and find markets for the newly harvested crop.** According to Statistics Canada production has been pegged at 18.02 lakh MT against 28.68 lakh MT last year. Market sees this production no a little bit optimistic and may be revised down further by 1 lakh MT. Final survey report is yet to come. The federal yield estimate for Saskatchewan was 948 pounds per seeded acre, while the provincial agriculture department thinks they will be closer 817 pounds. If exporters starts selling actively, prices may decline futher. In the Indian market Lentils prices have decreased to 7300-7400 from 7500-7600.
- **Australia Chickpea production is estimated to be 8,44,000 tonnes in 2021-22 according to September update.** Last year's production was 7,33,000 tonnes while June 2021-22 estimate was 7,33,000 tonnes. Lentil

production in Australia is projected to be 6,39,000 tonnes against last years production of 6,34,000 tonnes while June 2021-22 estimate was 5,89,000 tonnes.

- **According to September update, US lentil Production is estimated to be 0.57 LMT in 2021 against 3.36 LMT in 2020** which is 83% reduction and US Chickpea production is projected at 0.77 LMT in 2021 against 1.97 LMT in 2020 which is 60% reduction. The production is less due to drought condition prevailing in US.
- **According to Agriculture and Agri Food Canada (AAFC) August report, the production of lentil is projected at 18.85 lakh tonnes for 2021-22.** July production estimate was 27.50 lakh tonnes while last year's production was 28.68 lakh tonnes. Huge decline in lentil production due to weather and drought. The end stock for season 2021-22 is expected to be only 50,000 tonnes against 4 lakh tonnes last year. Market expects production of Canadian lentil not more than 15 lakh tonnes.
- **According Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22.** July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.
- **In Manitoba grasshopper population thrive in some area due to hot and dry conditions.** It is an additional threat to the pulses production along with heat wave condition. Due to prolonged recordbreaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.
- **The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta.** As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18% good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$780-800.
- **Australia's first crop production forecast for a current season for five major pulses including chickpeas, field peas and lentils released by Pulse Australia (PA),** it is 2.28 Mt which is 23% below the 2.96 Mt produced last year. Chickpea area is forecast to increase by 11% to 5.65 lakh ha with production estimate 6.62 LMT. Forecasted area for peas is 2.38 lakh ha with production estimate of 2.7 LMT while forecasted area for lentils is 3.04 lakh ha with production estimate of 4.54 LMT. Australia's production is down this year on dry conditions.
- **According to reports from USDA state level offices Peas harvesting started in the US.** In Montana around 20% crop has been harvested. Limited progress is also reported in Washington state and Oregon, suggesting around 101,000 acres of peas have been harvested, compared to roughly 10,000 at this time last year. Markets expect the first production estimate in September, but if yields are at least within 10% of their recent five year average around 88,000 metric tons (MT) of peas are now in bin, compared to roughly 7,000 at this time last year.

Daily Outlook: -Pulses are likely to trade mixed.
