

## Pulses Domestic Fundamentals:

### Today's Update:

- **Sowing of Gram has been started and farmers have covered 7.78 lakh ha so far against 9.36 lakh ha in last year till 27 Oct 21.** Area under Chana may decrease by 10% this year as farmers in Rajasthan, Madhya Pradesh and Uttar Pradesh are shifting to Mustard, Masoor from Chana this year due to their higher prevailing prices. Demand is weak despite of festive season, NAFED has ample stock and imports from LD countries continues so overall sentiment is weak in Chana cash market. Prices are expected to rule range bound.
- **Sowing of Masoor has been started and farmer's have covered 0.26 lakh ha against 0.49 lakh ha last year till 27 Oct 21.** Higher rains in the producing regions like Bihar and Uttar Pradesh at the time of sowing have delayed Masoor sowing by 15 days. There is water logging in the low land in Madhya Pradesh too. Area under Masoor is likely to increase by 5-7% this year due to higher prices.
- **Government had imposed stock limit on all pulses except Moong on 2nd July 2021 upto a time limit of 31st October 2021.** Yesterday the stock limit has ended and there is no further notification to extend stock limit orders. If limits doesn't extend more then we can see some improvement in prices of pulses. Right now prices of pulses are low due to lack of demand despite of festive season.

### Previous Updates

- **Global Lentils markets traded down by \$20 to \$1080 per MT(C&F) and may decrease further as the Australian crop is hardly 15-20 days away from now.** Demand is not up to the market as Indian buyers are not willing to purchase in bulk volume at current price as the Australian crop is at hand and there is a huge accumulation of Lentils at Indian ports. Indian buyers are trying to source it from Black Sea Region, where prices are comparatively low. Apart from it competition between Australia and Canada may increase for sale. It would pressurize the global Lentils market. As prices in Indian market is higher, farmers in India may increase area of lentils this year. Sowing is expected to start from Nov-2021, delayed by 10 days due to recent rains. Normally Indian farmers sow Lentils in 1.5 to 1.6 million ha, this year area may increase over 10 to 15 % as per the farmers pre sowing intension.
- **Nafed would purchase 50,000 MT imported lentils through bidding process in domestic markets. For this importers can bid on 5 empaneled portals online on daily basis.** Market is well aware of the fact that ample stock of lentils is available on ports. This means Nafed may not purchase from Canada, where prices are unexpectedly higher at this point of time and may wait for Australian crop, expected from mid-Nov. Nafed may try to source it from Ukraine, where prices are comparatively lower. It would build up pressure on Canadian exporters as they are expecting huge purchase from India by private and public sectors. Demand in domestic market is weak and the imported lentils lying at ports is said to be around 3.75 lakh MT. Lentil prices may come down to Rs 6800-6900 level against the market expectation.
- **Despite fresh showers of rains in the Central and North India there is no report of damage for Tur crop so far.** It may delay harvesting by 10 days for the early sown crop. Crop is in good condition and the recent rains may boost up yield for the late sown crop. Under prevailing condition crop size may increase. Arrivals will start in December and are likely to peak in January. Early arrivals are expected during second week of November from Bijapur (Karnataka) and adjoining Solapur (Maharashtra).

- **Despite of festive season there is no improvement in demand of pulses so far and that's why prices are low.** Chana at Bikaner slipped by Rs. 100 on Monday as compared to previous day and traded at Rs. 4900/qtl. Urad FAQ Burma at Mumbai traded at Rs. 7000/qtl. while in Chennai it has traded at Rs. 6900/qtl. Tur at Gulbarga market traded down by Rs 200 at Rs. 6400/qtl. Moong at Jaipur decreased by Rs. 100 and traded at Rs. 6800/qtl. Masoor mill quality at Kanpur traded at Rs. 7650/qtl.
- **As Chana prices are ruling near MSP and at some centres-below MSP, farmers may decrease Chana area by 10% this year.** Wheat and Chana farmers are shifting to Mustard and other lucrative crops like spices, Groundnuts & others. Sowing has been delayed by 15 to 20 days due to excess rains. As of now farmers have covered 2.32 lakh ha under Chana while 3.04 lakh ha under all rabi pulses. Chana area is trailing by 40% while the combined pulses area is running behind by 35.31 % so far. Rabi sowing activities are expected to increase from next month.
- **As per gossip in the market, Government may extend stock limit deadline till the end of March month.** Currently deadline for stock limit is 31<sup>st</sup> October 2021 and centre has implemented stock limit on 2<sup>nd</sup> July 2021 on all pulses except Moong. Also as per sources, Nafed may start selling Gram, Tur, Moong and Urad which was procured during 2021 season.
- **Sowing has been started for Rabi crops in Rajasthan.** This year sowing has delayed due to higher soil moisture content due to heavy rainfall. Till now 0.25 lakh ha area has been sown under Chana as compared to around 0.61 lakh ha last year at same time. Targeted area for Chana this year is 20 lakh ha for Rajasthan. Sowing of Masur in India would start from next week. Sowing condition is favorable and prices are ruling higher, so, area may increase this year.
- **Mustard may gain area from Wheat and Chana this year on account of higher prices and favourable weather.** Early sowing has been started in Rajasthan, Uttar Pradesh, Haryana and Madhya Pradesh of Mustard. Right now soil moisture is high due to heavy rainfall which mustard can tolerate and current prices are also high for Mustard.
- **According to report from Agriculture Ministry as on 14th Oct 2021, 74.81% of harvesting of Urad has been completed** as total sown area is 36.15 lakh ha from which 27.04 lakh ha has been harvested. 74.34% harvesting has been completed in case of Moong as total sown area stands at 34.42 lakh ha from which harvested area is 25.59 lakh ha. Harvesting of Tur has not started yet.
- **According to sources the centre has allocated 67,000 tonnes of DAP for Rajasthan during Oct against demand of 1.5 lakh tonne.** Madhya Pradesh has about 4 lakh tonnes and said to be facing shortage of 30-40%. Non availability of nutrients at the time of sowing may reduce yield of winter crops.
- **The state Government of Tamil Nadu has announced that it will procure 4,000 MT of black gram and 3,367 MT of green gram during 2021-22.** They will procure this amount directly from farmers at minimum support price of Rs. 63 per kg for black gram and Rs. 72.75 per kg for green gram. The desired moisture content was 12%.
- **Harvesting of Urad and Moong is going on in various states and arrivals have been started in Madhya Pradesh, Maharashtra, Karnataka, Rajasthan, Gujarat and Uttar Pradesh.** Quality of new Urad and Moong coming to the market is poor and with high moisture content of around 14-16%. Quality of new crop is reported damaged and poor due to high rains during harvesting season due to which it is fetching lower prices. Urad is trading in the range of 5,000-7,000 in various markets depending on quality while Moong is trading at Rs. 6,000-7,000 per quintal in various markets.

- **Chana at Bikaner slipped by Rs. 25 on Monday as compared to previous day and traded at Rs. 5050/qtl.** Urad FAQ Burma at Mumbai traded slightly up by Rs.25 at Rs. 7075/qtl. while in Chennai prices are steady at Rs. 6900/qtl. Tur at Gulbarga market traded steady at Rs. 6600/qtl. Moong at Jaipur improved by Rs. 200 and traded at Rs. 7200/qtl as procurement will start in Rajasthan from 1st November onwards. Masoor mill quality at Kanpur was down by Rs 75 and traded at Rs. 7725/qtl on Monday.

#### **International Market Update:**

- **The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention.** This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.
- **Global Lentils market continues to trade under pressure. Indian buying is limited while bumper crop in Australia has increased the pressure on Canadian Lentils.** There is a gossip in the market that Indian importers had imported Lentils in May-June taking advantage of low duty and now they are selling it at cheaper price, asking prices for Canadian origin product. Pressure may continue as long as India remains out of the Canadian market. Lentils stock at Indian ports are said to be around 3.75 lakh MT. Apart from it local market has stock of 4 lakh MT. So, the available stock is sufficient to meet the requirement for four months. In March new local crop would be available. So, the urgency of buying at the higher cost has mitigated.
- **Argentina has exported 202MT Kidney beans in August-2021, unchanged from the previous month.** Now the total export during the calendar year reached at 52328 MT. It is down by 78% from 2020 till August. Buyers of Kidney bean from Argentina are still unwilling to buy in bulk quantity. High price, weak demand globally and availability at other origins at competitive prices have affected the volume of import.
- **According to Agriculture and Agri Food Canada's (AAFC) October report, the production of lentil is projected at 18.02 lakh tonnes** against previous estimate of 18.85 lakh tonnes for 2021-22. Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.
- **As per the latest release by Australia Bureau of Statistics, Lentils export from Australia posted a smart gain in August-2021 to 1,19,440 MT, up by 93% exported in July-2021.** Australia had exported 61892 MT in July-2021. So far Australia has exported total 796,239 MT in the ongoing season against 604,690 MT last year till August-2020. India emerged as a top buyer in Aug, buying 61,415 MT, followed by Bangladesh at 24,271 MT and UAE at 22,758 MT. India may remain major buyers in Sep and Oct too.
- **Field Pea export from Canada increased in August-2021 to 114,798 MT, higher by 38% from July when 83,201 MT was exported.** Canada had exported 127,488 MT in Aug-2021. China, US and Venezuela were major buyers in Aug-2021, importing 52,904, 27,468 & 7,411 MT respectively. Demand from China continues and US too would continue to import for feed industries.
- **The Agriculture Ministry Of Pakistan has estimated kharif Moong production 2021-22 at 2.53 lakh MT against the annual domestic demand of 1.75 to 1.80 lakh MT.** Production forecast for Chickpeas and Lentils has been increased slightly
- **Global Lentils market traded weak as exporters have now shifted their attention to sell and find markets for the newly harvested crop.** According to Statistics Canada production has been pegged at 18.02 lakh MT

against 28.68 lakh MT last year. Market sees this production no a little bit optimistic and may be revised down further by 1 lakh MT. Final survey report is yet to come. The federal yield estimate for Saskatchewan was 948 pounds per seeded acre, while the provincial agriculture department thinks they will be closer 817 pounds. If exporters starts selling actively, prices may decline further. In the Indian market Lentils prices have decreased to 7300-7400 from 7500-7600.

- **Australia Chickpea production is estimated to be 8,44,000 tonnes in 2021-22 according to September update.** Last year's production was 7,33,000 tonnes while June 2021-22 estimate was 7,33,000 tonnes. Lentil production in Australia is projected to be 6,39,000 tonnes against last years production of 6,34,000 tonnes while June 2021-22 estimate was 5,89,000 tonnes.
- **According to September update, US lentil Production is estimated to be 0.57 LMT in 2021 against 3.36 LMT in 2020** which is 83% reduction and US Chickpea production is projected at 0.77 LMT in 2021 against 1.97 LMT in 2020 which is 60% reduction. The production is less due to drought condition prevailing in US.
- **According Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22.** July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.

**Daily Outlook:** -Pulses are likely to trade mixed.
