

Pulses Domestic Fundamentals:

Today's Update:

- **Standing crops on around 7.5 lakh ha has been affected in Karnataka and Andhra Pradesh due to recent excess rains.** Water logging condition is there in Anantpur, Kadappa, Chittore and Nellore districts of Andhra Pradesh. Tur crop has been affected in some parts of Karnataka. Due to these losses Tur crop is likely to trade firm in coming week. If rains continue then prices may move up more.
- **The selling pressure in Tur may get curbed and slight correction can be seen due to the demand coming out in the lower prices.** There is a possibility of delay in harvesting of new tur crop due to rains in the last 4-5 days in the growing areas of tur. Also, the tur dal procured through tender by the Tamil Nadu Civil Supplies Corporation has been approved. Retail and wholesale demand in pulses is expected to improve as the demand is expected to pick up on account of wedding season.
- **The condition of Tur crop is good so far in all major growing states especially in Maharashtra and Karnataka.** Some losses are reported from Andhra Pradesh and some districts of Karnataka due to non seasonal rains. The arrival from new crop started in Solapur and Bijapur region and may improve further in December. In other states crop is in flowering to pod filling states. With regular import and likely new arrivals may pressurize Tur cash market in coming weeks.

Previous Updates

- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 76.12 lakh ha as on 19th Nov 21 against 76.19 lakh ha same period last year.** Overall sowing is down by 0.06 lakh ha till now. Gram has been sown on 53.68 lakh ha against last year's 52.15 lakh ha, up by 1.53 lakh ha. Lentil is planted on 8.84 lakh ha, Moong on 0.25 lakh ha, Urad on 1.34 lakh ha. Peas area stands at 6.67 lakh ha against last year's acreage of 6.53 lakh ha, up by 0.14 lakh ha till 19 Nov 21.
- **The sowing activities of Chana are running behind our normal expectations.** Report from the major growing states like Rajasthan & Madhya Pradesh is not very encouraging. Farmers have shifted Chana area to Mustard in both the states. So, the area may end up with 102-103 lakh ha this year against 110 lakh ha last year.
- **The arrival of Chana in Delhi market from Rajasthan and M.P. is poor right now.** Stock with mills in Delhi is decreasing. So, prices are steady at 53-5350 in Delhi despite the low demand from retail and wholesale sectors. Under prevailing conditions any decrease in the cash market is unlikely. Right now demand for besan and dal is not satisfactory and sale by Nafed through auction continues. So, Agriwatch expects range bound movement in Chana cash market.
- **Demand for Urad Chhilka and Dhoya is weak right now and it has put a cap on the price rise in the cash Urad market.** Crop coming from the Chandausi line is said not to be in good condition quality and grain wise. Farmers and experts say that the no of grains is less than normal expectation. Apart from it arrival from Rabi crop is far away It would not be available before Feb. Import flow is slow as availability in Myanmar is not more than 75 000 MT. New crop in Myanmar would be ready only in March. So market may trade steady until demand improves. Overall tone seems firm.
- **New Tur started from Sholapur region.** Around 130 bags were reported to hit the markets. The rate received for the new crop was 6000 per qtl. As moisture level is high in the new crop, prices received by farmers was low. By the end of this month, pressure in this region may build up and prices may slip to 5600-5700. The

incoming crop is very good and supply in the market would increase. So sentiment remains weak for the Tur market. Old crop in Gulbarga market is being traded at 6350-6400. Millers may wait for bulk purchase at this point of time. This year Nafed would be able to procure good quantity as the crop size is good while prices may slip below MSP. Imported Tur is available at 5950-6000 in Mumbai.

- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 55.10 lakh ha as on 13th Nov 21 against 59.16 lakh ha same period last year.** Overall sowing is down by 4.07 lakh ha till now. Gram has been sown on 38.90 lakh ha against last year's 41.33 lakh ha, down by 2.43 lakh ha. Lentil is planted on 5.23 lakh ha, Moong on 0.14 lakh ha, Urad on 1.13 lakh ha. Peas area stands at 5.88 lakh ha against last year's acreage of 4.72 lakh ha, up by 1.17 lakh ha till 13 Nov 21.
- **Telangana Government advised farmers to cultivate Black gram during Rabi season 2021-22 and assured to purchase at minimum support price of Rs 6300 per quintal.** If in case market prices is higher than MSP then government is ready to buy at market price also. Other crops suggested to farmers for cultivation are Green gram, Groundnut, Mustard, Sesame, Safflower as these crops have good demand in the market.
- **The prices of pulses have cooled down after the Central Government recently cut the excise duty on petrol and diesel.** As the prices of the pulses have come down in wholesale markets, the retail rates are also expected to cool down in few days. Also new crop of Urad and Moong is coming to the markets and Tur crop is expected in next month, this also helps to keep prices in check.
- **Rajasthan Chana at Delhi improved by Rs. 50 on Thursday as compared to previous day and traded at Rs. 5400/qtl.** Urad FAQ Burma at Mumbai came down by Rs 75 and traded at Rs. 6675/qtl. while in Chennai prices were steady at Rs. 6750/qtl. Tur at Gulbarga market traded steady at Rs. 6400/qtl. In Jaipur market good quality Moong traded at Rs 7400/ qtl. Masoor at Kanpur (mill quality) improved by Rs 25 and traded at Rs. 7675/qtl.
- **The area under Kabuli Chana may increase due to attractive prices and good soil moisture this year.** Increase in area is expected to be in states like Madhya Pradesh, Maharashtra and Andhra Pradesh. Normal acreage lies between 2.5 to 3.00 lakh ha and expected to increase by 1 lakh ha. Kabuli Chana prices are ruling in the range of Rs. 8,000-9,000 per quintal in various mandis.
- **The price control measures has affected overall demand and price movement of pulses during the festive season.** Festival demand was only for about a fortnight and volumes were considerably down. Despite no announcement coming from the Centre on the extension of stock limits of pulses, prices have remained more or less stable in most of the markets across the country. Prices were more or less stable due to balanced supply and demand, liquidity crisis in the market.
- **According to Ministry of Agriculture, Masoor has been sown on 2.570 lakh ha against last year's acreage of 2.529 lakh ha which is up by 1.62% till 05 Nov 2021.** Rabi Urad acreage stands at 0.633 lakh ha against last year's 0.805 lakh ha. Till now Rabi Moong is at same level of last year's acreage that is 0.077 lakh ha as on 5th Nov 21.
- **Sowing of Gram has been started and farmers have covered 20.94 lakh ha so far against 20.47 lakh ha in last year till 05 Nov 21.** Area under Chana may decrease by 10% this year as farmers in Rajasthan, Madhya Pradesh and Uttar Pradesh are shifting to Mustard, Masoor from Chana this year due to their higher prevailing prices. Demand is weak despite of festive season, NAFED has ample stock and imports from LD countries continues so overall sentiment is weak in Chana cash market. Prices are expected to rule range bound.

- **Government had imposed stock limit on all pulses except Moong on 2nd July 2021 upto a time limit of 31st October 2021.** The stock limit has ended and there is no further notification to extend stock limit orders. If limits doesn't extend more then we can see some improvement in prices of pulses. Right now prices of pulses are low due to lack of demand despite of festive season.
- **Global Lentils markets traded down by \$20 to \$1080 per MT(C&F) and may decrease further as the Australian crop is hardly 15-20 days away from now.** Demand is not up to the market as Indian buyers are not willing to purchase in bulk volume at current price as the Australian crop is at hand and there is a huge accumulation of Lentils at Indian ports. Indian buyers are trying to source it from Black Sea Region, where prices are comparatively low. Apart from it competition between Australia and Canada may increase for sale. It would pressurize the global Lentils market. As prices in Indian market is higher, farmers in India may increase area of lentils this year. Sowing is expected to start from Nov-2021, delayed by 10 days due to recent rains. Normally Indian farmers sow Lentils in 1.5 to 1.6 million ha, this year area may increase over 10 to 15 % as per the farmers pre sowing intension.

International Market Update:

- **Field peas import in Spain increased by 268 % to 58127 MT in Sep-2021, as per the latest update by Eurostat data.** Spain had imported 15778 MT in Aug. Total import from Jan to Sep reached at 116257 MT against 132195 MT last year same time. Russia supplied 49970 MT in Sep, followed by Ukraine at 7591 MT.
- **As per the latest update by Statistics Canada, Green Peas export from Canada declined in Sep-2021 to 9890 MT against 17437 MT in Aug.** Canada has exported total 27327 MT during the marketing year. It is down by 29% from last year till Sep. The UAE was the biggest importer, buying 3,573 MT, followed by Colombia, taking 2,184 MT and Philippines at 865 MT.
- **So far during this marketing year added to a weaker trend, with green pea export shipments from Canada were well down, plunging relative to the previous month in September, judging from available statistics from Statistics Canada.** Export sales during the month totaled 9,890 metric tons (MT), down from 17,437 MT the previous month. This boosted shipments so far during the marketing year to 27,327, down 29% last year. United Arab Emirates was the biggest consumer, buying 3,573 MT. Colombia was the second most important importer taking 2,184 MT, followed by Philippines at 865 MT.
- **The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention.** This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.
- **Global Lentils market continues to trade under pressure. Indian buying is limited while bumper crop in Australia has increased the pressure on Canadian Lentils.** There is a gossip in the market that Indian importers had imported Lentils in May-June taking advantage of low duty and now they are selling it at cheaper price, asking prices for Canadian origin product. Pressure may continue as long as India remains out of the Canadian market. Lentils stock at Indian ports are said to be around 3.75 lakh MT. Apart from it local market has stock of 4 lakh MT. So, the available stock is sufficient to meet the requirement for four months. In March new local crop would be available. So, the urgency of buying at the higher cost has mitigated.

- **Argentina has exported 202MT Kidney beans in August-2021, unchanged from the previous month.** Now the total export during the calendar year reached at 52328 MT. It is down by 78% from 2020 till August. Buyers of Kidney bean from Argentina are still unwilling to buy in bulk quantity. High price, weak demand globally and availability at other origins at competitive prices have affected the volume of import.
- **According to Agriculture and Agri Food Canada's (AAFC) October report, the production of lentil is projected at 18.02 lakh tonnes** against previous estimate of 18.85 lakh tonnes for 2021-22. Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.
- **As per the latest release by Australia Bureau of Statistics, Lentils export from Australia posted a smart gain in August-2021 to 1,19,440 MT, up by 93% exported in July-2021.** Australia had exported 61892 MT in July-2021. So far Australia has exported total 796,239 MT in the ongoing season against 604,690 MT last year till August-2020. India emerged as a top buyer in Aug, buying 61,415 MT, followed by Bangladesh at 24,271 MT and UAE at 22,758 MT. India may remain major buyers in Sep and Oct too.
- **Field Pea export from Canada increased in August-2021 to 114,798 MT, higher by 38% from July when 83,201 MT was exported.** Canada had exported 127,488 MT in Aug-2021. China, US and Venezuela were major buyers in Aug-2021, importing 52,904, 27,468 & 7,411 MT respectively. Demand from China continues and US too would continue to import for feed industries.
- **The Agriculture Ministry Of Pakistan has estimated kharif Moong production 2021-22 at 2.53 lakh MT against the annual domestic demand of 1.75 to 1.80 lakh MT.** Production forecast for Chickpeas and Lentils has been increased slightly
- **Global Lentils market traded weak as exporters have now shifted their attention to sell and find markets for the newly harvested crop.** According to Statistics Canada production has been pegged at 18.02 lakh MT against 28.68 lakh MT last year. Market sees this production not a little bit optimistic and may be revised down further by 1 lakh MT. Final survey report is yet to come. The federal yield estimate for Saskatchewan was 948 pounds per seeded acre, while the provincial agriculture department thinks they will be closer 817 pounds. If exporters start selling actively, prices may decline further. In the Indian market Lentils prices have decreased to 7300-7400 from 7500-7600.
- **Australia Chickpea production is estimated to be 8,44,000 tonnes in 2021-22 according to September update.** Last year's production was 7,33,000 tonnes while June 2021-22 estimate was 7,33,000 tonnes. Lentil production in Australia is projected to be 6,39,000 tonnes against last year's production of 6,34,000 tonnes while June 2021-22 estimate was 5,89,000 tonnes.

Daily Outlook: -Pulses are likely to trade mixed.
