

Pulses Domestic Fundamentals:**Today's Update:**

- **Import of Tur has increased substantially due to free import regime this year from May to December.** Tur import rose to 4,79,268 MT during Apr-Nov 21 from 1,71,124 MT in the year ago period. As per trade sources, India has imported around 96,395 MT Tur in Nov 2021, the last month of ongoing MY, including G to G contracts and by private traders. Around 47,233 MT has been imported from Mozambique, 32,610 MT from Tanzania and 8,036 MT from Malawi.
- **Government of India has extended a period of relaxation for imported agricultural commodities requiring fumigation of Methyl bromide till 31st Mar-22.** The bill of lading should be on 31st March 2022 or beforeRegarding this notification has been isuued today.
- **As expected, area under Masur continued to recover smartly during the last week and it increased by 0.69 lakh ha to 14.89 lakh ha.** It is up by 4.86 % from last year same time. Agriwatch has estimated lentil's production of 11.91 lakh MT for 2022-23 MY, which is slightly higher by 0.18 lakh MT from previous year. Last year's production was 11.73 LMT. As weather conditions are good in UP and MP, yield is expected to be normal. Decreasing temperature at night is good for the growth of standing crop. Prices of Masur have decreased by 100 to 7500 in Kanpur. Price may stay steady to slightly down as quotes in Canada has decreased to \$1005 per MT from the previous \$1080.

Previous Updates

- **Uttar Pradesh Udhog Vyapaar Pratinidhi Mandal has decided to launch a protest against the re-installation of market fee on 15th of Dec** at the market directorate office, Lucknow. Actually, the state govt. has re-installed the market fee and now the market fee would be applicable for those traders/brokers too, who are working outside the APMC market as before. It may affect the normal trading activities,if the protest continues for a longer time.
- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 129.74 lakh ha as on 10th Dec-21 against 129.28 lakh ha same period last year. Overall sowing is up by 0.36 % till now.** Gram has been sown on 92.89 lakh ha against last year's 90.68 lakh ha, up by 2.21lakh ha. Lentil has been planted on 14.89 lakh ha against 14.20, up by 4.86 %, Moong on 0.88 lakh ha against 1.23 lakh ha, Urad on 3.70 lakh ha. against 4.15lakh ha. Peas area stands at 8.60 lakh ha against last year's acreage of 9.06 lakh ha. Area under Chana is bound to decline by 8 to 12 % in Madhya Pradesh, Rajasthan and Uttar Pradesh too some extent as coverage under Mustard has increased considerably this year. See sowing details on page no.4
- **Sensing the increasing Tur arrivals in coming weeks, Nafed has started preparation for smooth procurement** and may try to procure higher quantity at MSP. Prices in various market are ruling below MSP. The reason behind it is high moisture level in the crop, which is expected to decrease soon if weather remains dry, especially in Karnataka. Crop quality coming into market is normal to good. Apart from it, Karnataka govt. has decided to commence procurement drive from 15th of Dec-2021.Karnataka govt. has fixed procurement quantity at 2.5 lakh MT. each farmer would sell 15 Qtl. Tur at MSP. The procurement dive would continue till 15th of March-2022.
- **New arrivals of Tur in Karnataka and Maharashtra are expected to increase from the third week of Dec.** The moisture level in the crop is high at 18 to 20% against the normal of 12 to 13%. Demand is stable and mills and

stockists are waiting for Tur with lower moisture content. Continuous supply is there from African countries. Imported Tur in Mumbai is being traded at Rs 5,850- 5,950 per quintal. In Gulbarga market it is being traded at Rs. 6,000-6,100 per qtl.

- **Farmers have covered 3.22 lakh ha area under Urad this year so far, down by 8 % from last year till 3rd Dec 21.** Sowing of Rabi Urad in South India is yet to pick up. Normal Rabi Urad area is 9.07 lakh ha. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Import flow too has been low amid tight supplies and quality loss in the Kharif season. Also demand is weak. So, prices may trade steady this week too and may improve slightly in the coming weeks.
- **Area under Chana may decrease this year despite a good recovery during last two weeks.** As of now farmers have covered 81.43 lakh ha against 80.01 lakh ha last year as on 3rd Dec-2021. Among major producing states like Rajasthan, M.P., Karnataka & Maharashtra area is down in M.P. by 1.95% to 20.02 lakh ha till now. Area is down in other states like A.P by 7.48 % and Chhattisgarh by 40.54 %. The pace of sowing may go down due to bad weather conditions and shifting of Chana and wheat area to Mustard in Rajasthan and Madhya Pradesh. Area coverage may end up with 106 to 108 lakh ha against 116 lakh ha last year.
- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 113.98 lakh ha as on 03 Dec 21 against 113.48 lakh ha same period last year.** Overall sowing is up by 0.50 lakh ha till now. Gram has been sown on 81.43 lakh ha against last year's 80.01 lakh ha, up by 1.42 lakh ha. Lentil is planted on 13.03 lakh ha, Moong on 0.64 lakh ha, Urad on 3.22 lakh ha. Peas area stands at 7.92 lakh ha against last year's acreage of 8.05 lakh ha.
- **After the Centre revoked agricultural farm laws, traders doing business outside the Agricultural Market Produce Committee will be charged fee** and development fee as before in Uttar Pradesh. Those doing business outside the market of jaggery, pulses etc. will have to pay 1% mandi fee and 0.5% development fees on notified agricultural products. Notification regarding this has been issued.
- **The FSSAI has released an order regarding increasing in inspection fees for imported pulses.** In order F.No.12014/01/2020, they had increased the inspection fees for imported Pulses from Rs.7,900 per BL to Rs.15,570 per Sample. This increase in inspection fees will come into effect from 1st December 2021.
- **Overall Chana sowing is running smoothly and farmers may speed up sowing activities in all major states except south India** where continuous rains and the high moisture level in the field has hampered sowing activities. Sowing is expected to delay by 20 days, if rains continue, as predicted by the IMD. Farmers have covered over 70.01 lakh ha against 65.21 last year. Area is up in all major producing states including Madhya Pradesh, Maharashtra, Rajasthan and Karnataka. The next 15 days remain crucial from production point of view in South India.

International Market Update:

- **The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers.** As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. Indian buyers were reluctant to buy in volume from Canada in the beginning of Nov. as they were aware of the bumper Australian crop. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

- **As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT.** The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.
 - **The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares.** Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.
 - **Agriculture and Agri Food Canada (AAFC) has finalised the production of lentils in Canada at 18.02 lakh tonnes for 2021-22 as per recent November reports.** Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.
 - **Field peas import in Spain increased by 268 % to 58127 MT in Sep-2021, as per the latest update by Eurostat data.** Spain had imported 15778 MT in Aug. Total import from Jan to Sep reached at 116257 MT against 132195 MT last year same time. Russia supplied 49970 MT in Sep, followed by Ukraine at 7591 MT.
 - **As per the latest update by Statistics Canada, Green Peas export from Canada declined in Sep-2021 to 9890 MT against 17437 MT in Aug.** Canada has exported total 27327 MT during the marketing year. It is down by 29% from last year till Sep. The UAE was the biggest importer, buying 3,573 MT, followed by Colombia, taking 2,184 MT and Philippines at 865 MT.
 - **So far during this marketing year added to a weaker trend, with green pea export shipments from Canada were well down, plunging relative to the previous month in September, judging from available statistics from Statistics Canada.** Export sales during the month totaled 9,890 metric tons (MT), down from 17,437 MT the previous month. This boosted shipments so far during the marketing year to 27,327, down 29% last year. United Arab Emirates was the biggest consumer, buying 3,573 MT. Colombia was the second most important importer taking 2,184 MT, followed by Philippines at 865 MT.
 - **The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention.** This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.
- Daily Outlook:** - Pulses are likely to trade mixed.
