

## Pulses Domestic Fundamentals:

### Today's Update:

- **Rains and hailstorms in various parts of the country are causing damages to crops.** Madhya Pradesh has witnessed heavy rains and hails yesterday and some crops have been reported to damage in Harda, Sagar, Tikamgarh, Damoh, Narsinghpur, Shivpuri, etc. In Maharashtra also Tur crop has been reported to damage in almost all parts of the state including Nagpur, Amravati and Wardha. This unseasonal rains and cold weather is putting concern over production of Rabi crops.
- **Rabi Urad sowing is still down by 9.04% to 6.34 lakh ha as on 7<sup>th</sup> Jan-2022.** As sowing continues, improvement in area is expected. However, it may remain low from the last year. Normal rabi area is 9 lakh ha. As the demand has started increasing, prices may recover in coming weeks despite good flow of import and the bumper crop size expected in Myanmar this year. Myanmar may harvest over 6-7 lakh MT in 2022. So, availability for India seems good. Harvesting in Myanmar would start in February. Here in local market prices of Urad moved up by 100 to 6600 in Mumbai while it was traded at 6300 in Chennai. As availability would increase, unexpected spike is unlikely in the local market.
- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 156.23 lakh ha as on 08th Jan 22 against 157.75 lakh ha same period last year.** Overall sowing is down by 1.52 lakh ha till now. Gram has been sown on 109.44 lakh ha against last year's 107.17 lakh ha. Lentil is planted on 17.13 lakh ha, Moong on 2.67 lakh ha, Urad on 6.34 lakh ha. Peas area stands at 9.74 lakh ha against last year's acreage of 10.21 lakh ha.

### Previous Updates :

- **Speaking on the Myanmar/India Urad status in the OATA Myanmar Panel Discussion Mr. Hitesh Jain, country head, AGT Foods & INGREDIENTS INC.** hinted towards ample availability this year in Myanmar, based on higher production estimate there. According to Mr. Jain production of Urad has been on the rise in Myanmar from 2019-20 and continued to increase till 2022. It increased to 6.3 lakh MT in 2020-21 from 5.5 lakh MT in 2019-20. This year it may increase to 6.8 lakh MT. Urad production in India is likely to decline 23.4 lakh MT in 2020-21 to 20.5 lakh MT in 2021-22. So, India would remain a major buyer for Urad from Myanmar, taking advantage of G to G deal for 2.5 lakh MT import annually for the next 5 years. It may increase supply in India as the production prospect seems very good. Arrivals from the new crop is expected soon. As production size in India is low this year, prices are unlikely to decline much from the current level. If Rabi crop in India suffers much due to weather aberration, prices of Urad may increase in the domestic market. Total global availability might be at 2019-20 level of 27.3 lakh MT in 2022.
- **The OATA Myanmar Panel Discussion on Tur and Urad gave some useful information regarding production, demand and price outlook for both the commodities on 07th Jan-2022.** As per Anant Chhajed, general manager of Swiss Singapore Overseas P(LTD), Myanmar. Tur opening stock continued to decline from 80,000 MT in 2020 to 70,000 MT in 2021. It declined further to 10,000 MT in 2022 in Myanmar. According to Anant Chhajed production in Myanmar is expected to increase more than double to 2.5 lakh MT in 2022 from 1.1 lakh MT in 2021. Tur production in Myanmar in 2020 was registered at 1.75 lakh MT. At export front Myanmar had exported 1.85 lakh MT tur in 2020. It decreased to 1.70 lakh MT in 2021. However this year export may increase to 2 lakh MT. At carryout stock front the season 2021 ended with 10,000 MT. It shows that supply side would remain tight in Myanmar this year too as India would remain a big buyer in 2022.

too. Its impact on Indian Tur Price would be felt soon. Indian crop size too is below expectation if we see the latest new arrival pace in Karnataka & Maharashtra.

- **Nafed may procure around 8 lakh MT Tur this year.** Out of total 2.71 lakh MT would be procured in Maharashtra while 2.5 lakh MT in Karnataka. The rest would be procured in other states. Preparation for the procurement drive is on and it would start in Jan-2022, when arrivals start increasing. Right now prices of Tur in various markets are ruling below MSP.
- **Chana at Bikaner traded at same level as previous day at Rs 4800 per quintal on Tuesday.** Rajasthan Chana at Delhi decreased by Rs. 25 as compared to previous day and traded at Rs. 5100/qlt. Urad FAQ Burma at Mumbai traded steady at Rs. 6500/qlt. while in Chennai prices have come down by Rs 25 and traded at Rs. 6800/qlt. Tur at Gulbarga market increased by Rs 400 and traded at Rs. 6450/qlt. In Jaipur market Moong is trading in range of Rs 6000-6800/ qtl as per quality. Masoor at Kanpur (mill quality) traded steady at Rs. 7400/qlt.
- **According to Ministry of Agriculture data, all India Rabi pulses area was down by 0.93 % to 152.62 lakh ha as on 31st Dec-2021 despite a** good recovery was seen during last four weeks for Masur, Chana & Urad. Farmers have covered 107.69 lakh ha under Chana so far, higher by 1.90 % to last year till date. Lentil area continues to recover and moved up by 1.64 % to 16.76 against 16.49 lakh ha. Despite a slow recovery, Urad area was down by 11.98 % to 5.66 lakh ha. Moong area too was down by 32.45 % to 2.29 lakh ha. Field pea area was down by 5.04 % to 9.61 lakh ha. The concern over Urad, Moong and field peas remains as it was before, as sowing may continue hardly 10 days from now except Moong. Rabi Moong area is likely to recover as the sowing duration is long and may continue till Jan-2022. By the end of Feb, summer sowing for Moong starts and the area in the Summer season is likely to increase and would cover the loss in Rabi season. See sowing details on page no.4.
- **Winter rains and hailstorm in some parts of Maharashtra, Madhya Pradesh and Rajasthan have affected standing Chana and Tur crops to some extent.** With recent rains in Akola, Yawatmal Parbhani & Hingonghat may delay Tur harvesting by 8 to 10 days. The loss is being assessed. However, rains may be beneficial for late sown Chana crop and make up the loss to a great extent. Tur crop may suffer more as the quality of the harvested crop may deteriorate further. If the weather opens up, most likely, it would not impact the size of the crop much. As per the market sources, cotton crop has suffered much in comparison to Tur and Chana in some particular pockets of the above mentioned districts.

#### **International Market Update:**

- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in 2022 would be 50 % low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import (unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper. New crop in India would hit markets by Feb-end March. As Chana is trading weak, sentiment for the pea market too is weak.

- **As per the latest update released by Agriculture & Agri Food Canada Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44 %. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24 % due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04 %, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52 % to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints that prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022. The landed price may move up again to \$1180 from \$1040-45 per MT right now. Its impact on domestic markets in India might be seen in Jan-Feb-2022
- **The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers.** As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. Indian buyers were reluctant to buy in volume from Canada in the beginning of Nov. as they were aware of the bumper Australian crop. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.
- **As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT.** The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.
- **The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares.** Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.
- **Agriculture and Agri Food Canada (AAFC) has finalised the production of lentils in Canada at 18.02 lakh tonnes for 2021-22 as per recent November reports.** Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.
- **Field peas import in Spain increased by 268 % to 58127 MT in Sep-2021, as per the latest update by Eurostat data.** Spain had imported 15778 MT in Aug. Total import from Jan to Sep reached at 116257 MT against 132195 MT last year same time. Russia supplied 49970 MT in Sep, followed by Ukraine at 7591 MT.

**Daily Outlook:** - Pulses are likely to trade mixed.
