

Pulses Domestic Fundamentals:**Today's Update:**

- ***All India Rabi pulses area was up marginally by 0.06 % to 160.22 lakh ha as on 14th Jan-2022 as good recovery was seen during the last few weeks for Masur & Chana.*** Farmers have covered 111.61 lakh ha under Chana so far, up by 3.55% from same time last year. Lentil area continues to recover and currently stands 3.59% higher than same time previous year at 17.32 against 16.72 lakh ha. Urad acreage has also recovered during the week and stood at 6.9 lakh ha, which is still lower by 7.38% compared to 6.90 lakh ha same time previous year. Until 7th Jan, the rabi Urad acreage was lagging that of previous year by 9.04%. Moong acreage continues to lag the previous year's tally by 38.59% to 3.23 lakh ha. Field pea acreage was down by 3.50% from previous year, at 9.92 lakh ha. This is also an improvement from previous week's lag of 4.60%. Overall acreages for Urad and Field Pea are likely to remain lower than previous year as sowing for may continue only for 10-15 more days from now. Rabi Moong acreage is likely to recover to some extent as the sowing duration is longer and may continue till end of Jan-2022. By the end of Feb, summer sowing for Moong will start. Despite this, overall acreage of Moong may also remain lower than the previous year as the current lag is too large.

Previous Updates :

- ***Tur cash market traded unstable and it might continue for a week due to weak demand for dal and uncertainty over yield for late shown crop. Apart from this bad weather condition and high moisture level in Tur coming into markets have encouraged un-stability into the cash market.*** Around 60,000 MT Tur landed at Indian ports of Mozambique origin and importers were seen active to release this stock soon as pressure is building up from the new crop in local markets. Millers are not active for bulk buying as the moisture level in local crop is high due to recent rains. Recent rains in the major growing region of Maharashtra like Amravati, Latur, Akola and Washim may delay the harvesting activities and pressure in these region might be felt from the next week, if weather normalizes. Millers are fulfilling its immediate need through old and imported Tur as the new one contains high moisture level. Despite unstable market prices are unlikely to fall much So the stake holders should buy when the market decreases by around 200-250 from the current level. The medium and the long term outlook seems strong. Myanmar crop is expected from the beginning of Feb. It may cap uptrend in the market. Weather condition in Feb-Mar still remains crucial.
- ***Rabi Urad sowing is still down by 7.38 % to 6.90 lakh ha as on 14th Jan-2022.*** As sowing continues, improvement in area is expected. However, it may remain low from the last year. Normal rabi area is 9 lakh ha. As the demand has started increasing, prices may recover in coming weeks despite good flow of import and the bumper crop size expected in Myanmar this year. Myanmar may harvest over 6-7 lakh MT in 2022. So, availability for India seems good. Harvesting in Myanmar would start in February. Here in local market prices of Urad moved up by 100 to 6600 in Mumbai while it was traded at 6300 in Chennai. As availability would increase, unexpected spike is unlikely in the local market.
- ***Area under Masur has increased by 3.59% to 17.32lakh ha this year and production seems crossing 12 lakh MT this year if weather remains favorable. Agriwatch sees the low yield from late shown crop as the temperature would start increasing from mid-February. Grain size may be smaller than our normal expectation. So the increase in area would not boost up yield much. Weather and temperature would remain crucial for the final size of the crop. Prices of Masur in the local market may decrease by 100 more this week as demand is***

weak while area is up. Stockists in the local market have started releasing stock as the new crop would start hitting the market by mid –Feb-2022.

- **Nafed may procure around 8 lakh MT Tur this year.** Out of total 2.71 lakh MT would be procured in Maharashtra while 2.5 lakh MT in Karnataka. The rest would be procured in other states. Preparation for the procurement drive is on and it would start in Jan-2022, when arrivals start increasing. Right now prices of Tur in various markets are ruling below MSP.
- **Chana at Bikaner traded at same level as previous day at Rs 4800 per quintal on Tuesday.** Rajasthan Chana at Delhi decreased by Rs. 25 as compared to previous day and traded at Rs. 5100/qrtl. Urad FAQ Burma at Mumbai traded steady at Rs. 6500/qrtl. while in Chennai prices have come down by Rs 25 and traded at Rs. 6800/qrtl. Tur at Gulbarga market increased by Rs 400 and traded at Rs. 6450/qrtl. In Jaipur market Moong is trading in range of Rs 6000-6800/ qtl as per quality. Masoor at Kanpur (mill quality) traded steady at Rs. 7400/qrtl.

International Market Update:

- **Pulses exporter communities of Myanmar have urged the Indian Government to increase annual import quota for Tur and Urad by 100%.** Notably, Government of India had signed a memorandum of understanding with Myanmar to import 2.5 lakh MT urad and 1 lakh MT Tur on annual basis for 5 years FY 2026 through private channel. Now they have requested the volume to be doubled. The request regarding the doubling the annual quota has been communicated to Nidhi Khare, Additional Secretary, Department of Consumer Affairs. The Myanmar exporter's association fears that if the quotas are not increased to 500,000 tonnes for urad and 200,000 tonnes for tur by the Government of India, farmers may switched to other crops, that may lead to rise in prices of both the commodities in the local market.
- **Speaking on the Myanmar/India Urad status in the OATA Myanmar Panel Discussion Mr. Hitesh Jain, country head, AGT Foods & INGREDIENTS INC.** hinted towards ample availability this year in Myanmar, based on higher production estimate there. According to mr. Jain production of Urad has been on the rise in Myanmar from 2019-20 and continued to increase till 2022. It increased to 6.3 lakh MT in 2020-21 from 5.5 lakh MT in 2019-20. This year it may increase to 6.8 lakh MT. Urad production in India is likely to decline 23.4 lakh MT in 2020-21 to 20.5 lakh MT in 2021-22. So, India would remain a major buyer for Urad from Myanmar, taking advantage of G to G deal for 2.5 lakh MT import annually for the next 5 years. It may increase supply in India as the production prospect seems very good. Arrivals from the new crop is expected soon. As Production size in India is low this year, prices are unlikely to decline much from the current level. If Rabi crop in India suffers much due to weather aberration, prices of Urad may increase in the domestic market. Total global availability might be at 2019-20 level of 27.3 lakh MT in 2022.
- **The OATA Myanmar Panel Discussion on Tur and Urad gave some useful information regarding production, demand and price outlook for both the commodities on 07th Jan-2022.** As per Anant Chhajed, general manager of Swiss Singapore overseas P(LTD), Myanmar. Tur opening stock continued to decline from 80,000 MT in 2020 to 70,000 MT in 2021. It declined further to 10,000 MT in 2022 in Myanmar. According to Anant Chhajed Production in Myanmar is expected to increase more than double to 2.5 lakh MT in 2022 from 1.1 lakh MT in 2021. Tur production in Myanmar in 2020 was registered at 1.75 lakh MT. at export front Myanmar had exported 1.85 lakh MT tur in 2020. It decreased to 1.70 lakh MT in 2021. However this year export may increase to 2 lakh MT. At carryout stock front the season 2021 ended with 10,000 MT. It shows that supply side would remain tight in Myanmar this year too as India would remain a big buyer in 2022 too. Its impact on Indian

Tur Price would be felt soon. Indian crop size too is below expectation if we see the latest new arrival pace in Karnataka & Maharashtra.

- **As per the latest data released by Australian Bureau of Statistics, Australia has exported 43,902 MT Lentils in Nov-2021, down by 11.02% from Oct, when 49,341 MT was exported.** Australia had exported 34,200 MT in Nov-2020. The major buyers were Bangladesh, Srilanka & India buying 15,720, 8,573 and 6,674 MT respectively. Notably, Australia has harvested a bumper crop this year.
- **As per the latest release by the Canadian Grain Commission lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.
- **Turkey Government extends zero import duty on Lentils through out the year to control the spiraling prices of dal and food inflation.** It is an unexpected move for the global market. Notably, Turkey imposes import duty on grains/food items ranging 19.3 to 130%, depending on the supply demand side of a commodity. If there is no extension on 1st Jan-2023, it would be come to formal level.
- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in 2022 would be 50 % low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import (unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.
- **As per the latest update released by Agriculture & Agri Food Canada Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44 %. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24 % due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04 %, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52 % to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints that prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
- **The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers.** As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.
