

**Pulses Domestic Fundamentals:****Today's Update:**

- ***The central govt has green signaled to launch a procurement drive for Rabi 2021-22 crops in Andhra Pradesh. The state govt had requested to the central govt. to start procurement drive plan on MSP. Now it is accepted. Under this price support scheme, the state govt would procure 1,28,270 MT Chana, 91,475 MT Urad and 19,632 MT Moong. The state govt has to fix the date for procurement and it would continue for 90 days from the announced procurement date. This year good rabi crop is expected in the state despite the unseasonal rains.***
- ***Importers, who had paid adv. before 12 Feb-2022 for Moong import, can import Moong with some conditions involved in. If the payment by importers is partial, the import can be done in similar value of the paid amount. Bank would verify the documents like sale contract, invoice and payment details of import. Importers have to declare that Moong import deal is before 11th Feb-2022. Bill of lading date should be on or before 31, March-2022. Registration certificate for import should be till 7th March-2022. For more details the importers can visit the regional office of DGFT.***
- ***Situation is getting grave due to ongoing conflict between Russia and Ukraine and the indirect involvement of NATO group of countries in it. Vessels movements are disrupted now in conflict zone while the shortage of ready containers may delay shipments by two months. Freight cost would go up and so, the import cost too would increase. There is a fear that import of Tur, Urad, Rajma, Moong may be delayed and it may lead to price rise despite the Rabi arrivals in India.***

**Previous Update:**

- ***Slight recovery in Pulses market might be seen due to ongoing conflict between Russia and Ukraine despite the increasing arrivals in India from local Rabi crop. The conflict may continue for longer duration and supply chain might be disrupted as the NATO group of countries have started imposing sanction on Russia. All pulses market may move up by 100-200 this week. The involvement of other countries may fuel the fire on commodity prices world wide***
- ***Pulses market may trade firm as the supply chain from Russia and Ukraine have got disrupted and it may continue for a longer period. Uncertainty is prevailing in the market despite the fact that India's pulses import share from Russia and Ukraine is 5 to 7% only. India import Chickpeas and Masur in limited quantity. If other countries involve in this war, situation might be grave and it may push up prices of all commodities. India is not importing peas as it is in the restricted list.***
- ***Urad cash market traded down despite some improvement seen during last 4-5 days. As supply side would ease with higher import volume, Urad cash market is unlikely to move northward direction. Millers may restrict buying as they are aware of good availability in Myanmar this year. Rabi crop too is almost ready to be harvested and it may put further pressure on Cash market. Urad in Chennai market is being traded at INR 5900-6000. Myanmar is offering Urad at \$765 & \$845 per MT. Urad Burma at Indian port is available at INR 6200. The overall tone seems weak in coming weeks.***
- ***Summer Urad sowing has started gaining momentum in states like West Bengal, Tamil Nadu, Chhattisgarh and Karnataka. Farmers have covered 46.4 thousand ha as on 18th Feb-2022. It is down by 23.17 % from the last year same time. The normal area under summer Urad is 2.64 lakh ha. The major growing states are M.P.,***

Chhattisgarh, Assam and West Bengal. Farmers have covered 0.494 lakh ha under summer Moong so far, down from 0.656 lakh ha last year same time.

- **Prices of desi Tur and Tur Lemon are likely to trade under pressure during the week as arrival pressure is building up amid good import flow from Myanmar and other South African origin like Mozambique, Tanzania and Malawi.** Apart from it, the stock of old crop in private hands has put a cap on the upside movement. Price of Lemon Tur in Mumbai market traded down by 1.62% to 6050. It traded almost steady in Gulbarga market at INR 6600. Quality wise it traded in the range of INR 6200-6600. Pressure on Tur may continue and it may decrease by INR 100-150 in next 10 days. The main reason behind it is attributed mainly to good import flow and ample availability of old stock. Myanmar is offering Lemon Tur at \$820 per MT, basis Indian ports. The overall tone for the week is weak
- **A bumper crop seems on the cards under the prevailing weather conditions for all Rabi pulses. New arrivals from Rabi crops like Chana and Masur have already started.** Arrival from Rabi Urad and Moong is expected soon in South India.
- **Govt. of India has released its 2<sup>nd</sup> Adv. Estimates for pulses for 2021-22. Tur Production has been pegged at 40 LMT against the target of 43 LMT and 43.2 LMT produced last year.** Chana production has been pegged at record 131.2 LMT for 2021-22. It was 119.1 LMT last year. Urad kahrif and Rabi production has been pegged at 26.6LMT against 22.30 LMT last year. The production target for 2021-22 was set at 35.5 LMT. Moong combined production has been pegged at 30.6 LMT against 30.9 LMT last year. As per the Govt's estimates, availability would remain at comfortable level this year under the normal weather condition.
- **Production size is expected to be around 105-108 lakh MT this year, higher by 8-10 LMT from last year. Import is also coming from the LDC countries and the stockists/NAFED too are releasing stock to vacate the space for the new crop.** Demand is normal. However, supply in the coming weeks is bound to increase. So, under the normal condition, AgriWatch expects price to decrease by Rs 200-400, until the procurement starts for the Central Pool. The stake holders should wait at least for two-three weeks to get dry Chana. The impacts of higher production prospects, ample availability of old stock, cheaper import are already visible on Chana market. Rajasthan and M.P. Chana in Delhi market has decreased by 2% to INR 4950 this week while in South Indian markets it declined by INR100 to 5200. It declined in Jalgaon by INR 100 to INR 4700. The price may come down to 4600 to 4800, depending on quality by the beginning of March.
- **The pea cash market could not sustain its firm momentum and declined considerably just ahead of the new local crop. It declined by 6.15% to Rs 6100 in Kanpur market, 1.92% to INR 5100 in Dabra market and 3.70% to INR 7800 in Delhi market.** As import of pea remains restricted, global price would not affect price movement much. Availability in global market would increase as Canada has increased production forecast for 2022-23 to 3.80 MMT from 2.25 MMT for 2021-22. This year the local production has been pegged at 22.91 lakh MT against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY). The overall tone seems steady to slightly weak. Supply side would continue to ease.
- **NAFED may procure around 8 lakh MT Tur this year.** Out of total, 2.71 lakh MT would be procured in Maharashtra while 2.5 lakh MT in Karnataka. The rest would be procured in other states. Right now, prices of Tur in various markets are ruling below MSP.

### **International Market Update:**

- **Field Pea market in Canada trades rangebound and may trade firm as supply side seems weak against prospective demand. Demand from China feed market is almost nil due to the higher prevailing prices, demand might emerge for human consumption and fractionation industry. Apart from it, food processors and packers of US may start rebuilding stock for winter season. It may lend support to pea market despite availability in the global market is likely to increase from 2022-23 crop.**
- **Pulses exporter communities of Myanmar have urged the Indian Government to increase annual import quota for Tur and Urad by 100%. Notably, Government of India had signed a memorandum of understanding with Myanmar to import 2.5 lakh MT urad and 1 lakh MT Tur on annual basis for 5 years FY 2026 through private channel. Now they have requested the volume to be doubled. The request regarding the doubling the annual quota has been communicated to Nidhi Khare, Additional Secretary, Department of Consumer Affairs. The Myanmar exporter's association fears that if the quotas are not increased to 500,000 tonne for urad and 200,000 tonne for tur by the Government of India, farmers may switch to other crops, that may lead to rise in prices of both the commodities in the local market.**
- **Speaking on the Myanmar/India Urad status in the OATA Myanmar Panel Discussion, Mr. Hitesh Jain, Country Head, AGT Foods & Ingredients INC., hinted towards ample availability this year in Myanmar, based on higher production estimate there. According to Mr. Jain, production of Urad has been on the rise in Myanmar from 2019-20 and continued to increase till 2022. It increased to 6.3 lakh MT in 2020-21 from 5.5 lakh MT in 2019-20. This year it may increase to 6.8 lakh MT. Urad production in India is likely to decline 23.4 lakh MT in 2020-21 to 20.5 lakh MT in 2021-22. So, India would remain a major buyer for Urad from Myanmar. Taking advantage of G2G deal for 2.5 lakh MT import annually for the next 5 years, it may increase supply in India as the production prospect seems very good. Arrivals from the new crop is expected soon. As Production size in India is low this year, prices are unlikely to decline much from the current level. If Rabi crop in India suffers much due to weather aberration, prices of Urad may increase in the domestic market. Total global availability might be at 2019-20 level of 27.3 lakh MT in 2022.**
- **The OATA Myanmar Panel Discussion on Tur and Urad gave some useful information regarding production, demand and price outlook for both the commodities on 07th Jan-2022. As per Anant Chhajed, General Manager, Swiss Singapore overseas P(LTD), Myanmar, Tur opening stock continued to decline from 80,000 MT in 2020 to 70,000 MT in 2021. It declined further to 10,000 MT in 2022 in Myanmar. According to Anant Chhajed Production in Myanmar is expected to increase more than double to 2.5 lakh MT in 2022 from 1.1 lakh MT in 2021. Tur production in Myanmar in 2020 was registered at 1.75 lakh MT. At export front Myanmar had exported 1.85 lakh MT tur in 2020. It decreased to 1.70 lakh MT in 2021. However, this year export may increase to 2 lakh MT. At carryout stock front the season 2021 ended with 10,000 MT. It shows that supply side would remain tight in Myanmar this year too as India would remain a big buyer in 2022 too. Its impact on Indian Tur Price would be felt soon. Indian crop size too is below expectation if we see the latest new arrival pace in Karnataka & Maharashtra.**
- **As per the latest data released by Australian Bureau of Statistics, Australia has exported 43,902 MT Lentils in Nov-2021, down by 11.02% from Oct, when 49,341 MT was exported. Australia had exported 34,200 MT in Nov-2020. The major buyers were Bangladesh, Sri Lanka & India buying 15,720, 8,573 and 6,674 MT respectively. Notably, Australia has harvested a bumper crop this year.**

- **As per the latest release by the Canadian Grain Commission, lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.
- **Turkey Government extends zero import duty on Lentils through-out the year to control the spiraling prices of dal and food inflation.** It is an unexpected move for the global market. Notably, Turkey imposes import duty on grains/food items ranging 19.3 to 130%, depending on the supply demand side of a commodity. If there is no extension on 1st Jan-2023, it would be come to formal level.
- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in 2022 would be 50 % low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import(unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.
- **As per the latest update released by Agriculture & Agri Food Canada, Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44 %. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24 % due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04 %, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52 % to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints that prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
- **The production estimates for the Australian pulses have been published. As per the latest estimates, Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (ABARES estimate) while Pulses Australia sees it at 8.70 lakh MT.** The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.
