

Pulses Domestic Fundamentals:**Today's Update:**

- ***Demand for Tur from millers is likely to improve soon and it may lend support to Tur and Tur dal. Stockists too are active amid the low pace of import may push up price further.*** Mill from Maharashtra, Gujarat, M.P. and U.P. have started buying to build up stock required at least for 20-25 days. Apart from it stockist's holding, farmers retention would remain supportive to the cash market. Tur traded up by Rs 100 in markets of Maharashtra. Imported Tur in Mumbai too has gone up to Rs 6450, up by Rs 50. It may go up to Rs 6600-6700 while desi Tur may move up to Rs 7000-7200 by end April- May. However, if govt extends the bill of lading date from 31st March to 30th June-2022, price rise pace may be slower.
- ***Decreasing trend in Masur market capped during last two-three days and it may move further up by Rs 100-200 before Holi despite new arrivals coming into markets of M.P., U.P. and Bihar.*** Moisture level in the new crop has decreased and the percentage of dust in Masur crop too has decreased. Apart from it, the import cost has gone up due to rising fuel cost. Deals are being finalized in Canada and Australia as the other sources like Black Sea Region remains disturbed due to Russian and Ukraine conflict. Even Egypt has extended export ban for another 3 months to June -2022. Farmers in domestic market too have restricted sale as prices have started increasing. So, the decline in prices seem difficult at this point of time and it may continue to trade in the range of Rs 6400-6800 per qtl.
- ***Govt. is considering a comprehensive long-term policy that can minimize the pos- harvest production and processing loss and ensure stability in the market.*** Even the import policy of pulses too is being reviewed, so that imported pulses prices could be at par with the prevailing MSP. Purchase on MSP at the door step of farmers may be maximize.

Previous Update:

- ***Chana cash market stayed steady to slightly weak and is likely to trade range bound this week. It traded around 2% up in Indore due to the low flow of arrivals and improved demand for besan ahead of Holi.*** However, downward correction was seen in markets like Bikaner and Delhi. Tanzania Chana in Mumbai too traded low at Rs 4500, down by 2.17 % from last week. As the procurement drive is on, Chana price may continue to move towards MSP in the coming weeks. After Holi some correction of Rs 100-150 is expected in Chana markets.
- ***Govt may extend the date of Urad and Tur import from Myanmar if prices continue to move up. The fear of price rise has started surfacing its head again*** due to the ongoing conflicts between Russia and Ukraine, increasing fuel cost and issues with logistics. The BL date (right now is 31st March-2022), might be extended for three months. Dal prices in physical market have increased by 6 to 8 % during 10 days. If the BL date is extended, it may have a cooling impact on Urad and Tur prices in domestic markets. A MoU with Myanmar had been signed on the 4th week of June-2021 for importing 2.5 lakh MT of Urad and one lakh MT of Tur every year for five years, starting from 2021-22 to 2025-2026 (April-March).
- ***Kabuli Chana may continue to trade firm as arrival from the new crop has started declining while the old stock is declining fast. Disrupted shipment from Russia and Ukraine, increasing fuel cost and buyers interest at current price are likely to push price by Rs200 to 300 in coming weeks. Demand for Holi continues and it***

would remain supportive to market fundamental. Importers are trying to source it from other available sources and the import cost would go up with rising fuel cost and other logistic issues.

- **The Central govt. has green signaled to launch a procurement drive for Rabi 2021-22 crops in Andhra Pradesh. The State govt. had requested to the Central govt. to start procurement drive at MSP.** Now it is accepted. Under this price support scheme, the State govt. would procure 1,28,270 MT Chana, 91,475 MT Urad and 19,632 MT Moong. The State govt. has to fix the date for procurement and it would continue for 90 days from the announced procurement date. This year good rabi crop is expected in the State despite the unseasonal rains.
- **Situation is getting grave due to ongoing conflict between Russia and Ukraine and the indirect involvement of NATO group of countries in it.** Vessels movements are disrupted now in conflict zone while the shortage of ready containers may delay shipments by two months. Freight cost would go up and so, the import cost too would increase. There is a fear that import of Tur, Urad, Rajma, Moong may be delayed and it may lead to price rise despite the Rabi arrivals in India.
- **Govt. of India has released its 2nd Adv. Estimates for pulses for 2021-22. Tur Production has been pegged at 40 LMT against the target of 43 LMT** and 43.2 LMT produced last year. Chana production has been pegged at record 131.2 LMT for 2021-22. It was 119.1 LMT last year. Urad kahrif and Rabi production has been pegged at 26.6LMT against 22.30 LMT last year. The production target for 2021-22 was set at 35.5 LMT. Moong combined production has been pegged at 30.6 LMT against 30.9 LMT last year. As per the Govt's estimates, availability would remain at comfortable level this year under the normal weather condition.
- **The pea cash market could not sustain its firm momentum and declined considerably just ahead of the new local crop. It declined by 6.15% to Rs 6100 in Kanpur market, 1.92% to INR 5100 in Dabra market and 3.70% to INR 7800 in Delhi market.** As import of pea remains restricted, global price would not affect price movement much. Availability in global market would increase as Canada has increased production forecast for 2022-23 to 3.80 MMT from 2.25 MMT for 2021-22. This year the local production has been pegged at 22.91 lakh MT against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY). The overall tone seems steady to slightly weak. Supply side would continue to ease.
- **NAFED may procure around 8 lakh MT Tur this year.** Out of total, 2.71 lakh MT would be procured in Maharashtra while 2.5 lakh MT in Karnataka. The rest would be procured in other states. Right now, prices of Tur in various markets are ruling below MSP.

International Market Update:

- **As per the latest data released by Australia Bureau of Statistics Lentil export from Australia increased by 170% to 137,977 MT in Jan-2022 against 51090 MT in Dec-2021.** B, desh emerged as the biggest buyer, purchasing 84,696 MT, followed by UAE, buying 20720 MT and India at 11630 MT. The export sales are gaining momentum. Indian purchases are restricted as new crop in local markets are coming and the arrivals would continue to increase in March and April.
- **As per the latest information released by Canadian grain Commission Canada has exported 72,00 MT Lentil in Jan-2022 against 54,100 MT in Jan 2021.** Canada had exported 78800 Mt in Dec-2021. total shipment till Jan-2022 was recorded at 4.09 lakh Mt against 5.53 lakh MT same time last year.
- **Pulses exporter communities of Myanmar have urged the Indian Government to increase annual import quota for Tur and Urad by 100%.** Notably, Government of India had signed a memorandum of understanding

with Myanmar to import 2.5 lakh MT urad and 1 lakh MT Tur on annual basis for 5 years FY 2026 through private channel. Now they have requested the volume to be doubled. The request regarding the doubling the annual quota has been communicated to Nidhi Khare, Additional Secretary, Department of Consumer Affairs. The Myanmar exporter's association fears that if the quotas are not increased to 500,000 tonne for urad and 200,000 tonne for tur by the Government of India, farmers may switch to other crops, that may lead to rise in prices of both the commodities in the local market.

- **Speaking on the Myanmar/India Urad status in the OATA Myanmar Panel Discussion, Mr. Hitesh Jain, Country Head, AGT Foods & Ingredients INC.,** hinted towards ample availability this year in Myanmar, based on higher production estimate there. According to Mr. Jain, production of Urad has been on the rise in Myanmar from 2019-20 and continued to increase till 2022. It increased to 6.3 lakh MT in 2020-21 from 5.5 lakh MT in 2019-20. This year it may increase to 6.8 lakh MT. Urad production in India is likely to decline 23.4 lakh MT in 2020-21 to 20.5 lakh MT in 2021-22. So, India would remain a major buyer for Urad from Myanmar. Taking advantage of G2G deal for 2.5 lakh MT import annually for the next 5 years, it may increase supply in India as the production prospect seems very good. Arrivals from the new crop is expected soon. As Production size in India is low this year, prices are unlikely to decline much from the current level. If Rabi crop in India suffers much due to weather aberration, prices of Urad may increase in the domestic market. Total global availability might be at 2019-20 level of 27.3 lakh MT in 2022.
- **The OATA Myanmar Panel Discussion on Tur and Urad gave some useful information regarding production, demand and price outlook for both the commodities on 07th Jan-2022.** As per Anant Chhajed, General Manager, Swiss Singapore overseas P(LTD), Myanmar, Tur opening stock continued to decline from 80,000 MT in 2020 to 70,000 MT in 2021. It declined further to 10,000 MT in 2022 in Myanmar. According to Anant Chhajed Production in Myanmar is expected to increase more than double to 2.5 lakh MT in 2022 from 1.1 lakh MT in 2021. Tur production in Myanmar in 2020 was registered at 1.75 lakh MT. At export front Myanmar had exported 1.85 lakh MT tur in 2020. It decreased to 1.70 lakh MT in 2021. However, this year export may increase to 2 lakh MT. At carryout stock front the season 2021 ended with 10,000 MT. It shows that supply side would remain tight in Myanmar this year too as India would remain a big buyer in 2022 too. Its impact on Indian Tur Price would be felt soon. Indian crop size too is below expectation if we see the latest new arrival pace in Karnataka & Maharashtra.
- **As per the latest data released by Australian Bureau of Statistics, Australia has exported 43,902 MT Lentils in Nov-2021, down by 11.02% from Oct, when 49,341 MT was exported.** Australia had exported 34,200 MT in Nov-2020. The major buyers were Bangladesh, Sri Lanka & India buying 15,720, 8,573 and 6,674 MT respectively. Notably, Australia has harvested a bumper crop this year.
- **As per the latest release by the Canadian Grain Commission, lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.
- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in

2022 would be 50 % low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import(unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.

- **As per the latest update released by Agriculture & Agri Food Canada, Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44%. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24% due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04%, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52% to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints tha prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
- **The production estimates for the Australian pulses have been published. As per the latest estimates, Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (ABARES estimate) while Pulses Australia sees it at 8.70 lakh MT.** The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.
