

**Pulses Domestic Fundamentals:****Today's Update:**

- ***As per market sources, gossip is circulating in the market that Central Government may extend the Bill of Lading (BL) date to 30<sup>th</sup> June, 2022 which currently is 31<sup>st</sup> March, 2022. If, the Centre extended the BL date to June-2022, Urad and Tur prices may decrease by INR 200-300. If, the Government does not change the BL date, market prices may remain firm. The price direction would depend on the decision on BL date. Pulses market is likely to remain steady till 31<sup>st</sup> March, 2022.***
- ***Madhya Pradesh govt has started procurement of Chana & Masur on MSP and the buying activities would continue to increase as arrivals of Chana and Masur have started increasing. The Central govt. has already given the buying target of 8,71,100 MT for Chana, 1,67,130 MT for Masur & 3,48,935 MT for Mustard in the states. The fund has already been allocated for this purpose. As the price of Masur is ruling up from MSP of 6300 per qtl., target is unlikely to meet this year. Private buyers are active and they are buying FAQ quality coming into market above MSP. In Madhya Pradesh markets Masur is being traded at INR 6600-6700 per qtl. Now, NAFED may start releasing Masur stock to cool down prices amid attempts to procure on MSP. Prices may move further up as parity for Canadian and Australian crop is going up. Masur price may move up to INR 7000 by April end, by then arrival pressure may decrease. Chana procurement drive seems to hit the procurement target in M.P.***
- ***Chana cash market is unlikely to trade down despite the increasing arrivals in markets of Rajasthan, Madhya Pradesh, Gujarat, Uttar Pradesh and Bihar. Chana Rajasthan is being traded at Rs 5000-5050 in Delhi. There is no parity from other producing states right now. Yield realization has not been up to the mark so far in Madhya Pradesh and Maharashtra. Market expects around 10 million metric tonne (MMT) production this year against 13 MMT projected by the govt. There is no parity for Australian Chana. Apart from it, demand for sattu and dal is increasing with rising temperature and the inflated fuel cost continue to lend support to Chana markets in coming weeks. Procurement drive too would push up price of Chana in April and May. June onward the direction of Chana market would depend on NAFED release through auction. The overall sentiment remains firm for Chana. The prices of fair average quality would continue to move towards MSP of Rs 5230 per 100 kg. Beyond this price, NAFED may start releasing. It has around 7.5 LMT old stock right now.***
- ***In Moong, steady to firm sentiments are witnessing at present due to robust millers & stockists demand amidst slightly delayed arrivals and shortage of quality crop. Prices may remain firm in coming week too if current situation remains the same. Strong fundamentals and present supportive factors like arising fuel cost and low pace of arrival from upcountry markets etc. may keep the market prices firm. Apart from it, the shortage of quality crop in major consuming markets may continue to lend support at current level. Moong prices are hovering at Rs 6,500 to Rs 7,100 per quintal at present.***
- ***Sentiment in Tur cash market remains firm as supply side is getting tight due to decreasing arrivals in all major mandis. Demand for Dal is expected to increase as marriage season will start from April onward. Right now, traders, exporters, importers & stockists are waiting for extension in DL date due, on 31<sup>st</sup> March, 2022. If, Govt. extends DL date to 30<sup>th</sup> June, 2022, bullish sentiments may be capped to some extent. If, Govt. goes with current policy for import, AgriWatch expects Rs 300 to Rs 500 spike in Tur cash market.***

- **Summer Urad sowing continued to gain momentum in all states including Chhattisgarh. Farmers have covered 1.374 lakh ha as on 18<sup>th</sup> March-2022.** It is up by 50% from the last year same time. The normal area under summer Urad is 1.57 lakh ha. The major growing states are M.P., Assam and Uttar Pradesh.
- **Farmers have covered 1.86 lakh ha under summer Moong so far, up by 9.85 % from 1.70 lakh ha last year same time. MP is a major growing state, but the sowing data is not in the public domain so far.**
- **The sowing of summer Moong is running late by 20 to 25 days and resultantly arrival too would be late by the same margin. It is all due to late maturity of rabi crops and the high moisture level in the field.** Farmers are preferring to sow maize crop where potato/Chana/Masur is being harvested. Late shown Chana too may take time to get maturity. As availability of Moong in domestic market is at comfortable level, it may continue to rule range bound. Moong cash market would continue to rule in the range of Rs 6000-7000 in March. It would be good to have a running business rather than to hold it. NAFED has ample stock and whenever sale starts, it will depress prices.

#### **Previous Update:**

- **Urad cash market could not sustain its firm momentum in domestic market despite the higher quotes in Myanmar. It moved up by 6.45 % to \$ 825 per MT, basis Mumbai.** The increase in SQ quality was even sharper and it increased by 8.28% to \$915 per MT. Lemon Tur increased by 1.86 % to \$820 per MT. Moong quotes were stable during the first fortnight of March. The reason behind the past week uptrend in Urad market was said to be the lower crop size in Myanmar. Now gossip is circulating in the market that Myanmar crop is not more than 6 lakh MT against the trade estimates of 6.5 to 7.0 lakh MT. Demand for Holi is almost over now and AgriWatch expects downward correction of Rs 200-300 in Urad cash market. If the govt increases the bill of lading (BL) date to Jun-2022. Prices may decrease below MSP in South India. In Chennai market, Urad FAQ was traded at Rs 6200-6250 per qtl. The price direction would depend on the decision on BL date. It may be extended, as AgriWatch expects. Sentiment remains weak.
- **Decreasing trend in Masur market capped during last two-three days and it may move further up by Rs 100-200 before Holi despite new arrivals coming into markets of M.P., U.P. and Bihar.** Moisture level in the new crop has decreased and the percentage of dust in Masur crop too has decreased. Apart from it, the import cost has gone up due to rising fuel cost. Deals are being finalized in Canada and Australia as the other sources like Black Sea Region remains disturbed due to Russian and Ukraine conflict. Even Egypt has extended export ban for another 3 months to June -2022. Farmers in domestic market too have restricted sale as prices have started increasing. So, the decline in prices seem difficult at this point of time and it may continue to trade in the range of Rs 6400-6800 per qtl.
- **Govt may extend the date of Urad and Tur import from Myanmar if prices continue to move up. The fear of price rise has started surfacing its head again** due to the ongoing conflicts between Russia and Ukraine, increasing fuel cost and issues with logistics. The BL date (right now is 31<sup>st</sup> March-2022), might be extended for three months. Dal prices in physical market have increased by 6 to 8 % during 10 days. If the BL date is extended, it may have a cooling impact on Urad and Tur prices in domestic markets. A MoU with Myanmar had been signed on the 4th week of June-2021 for importing 2.5 lakh MT of Urad and one lakh MT of Tur every year for five years, starting from 2021-22 to 2025-2026 (April-March).
- **The Central govt. has green signaled to launch a procurement drive for Rabi 2021-22 crops in Andhra Pradesh. The State govt. had requested to the Central govt. to start procurement drive at MSP.** Now it is

accepted. Under this price support scheme, the State govt. would procure 1,28,270 MT Chana, 91,475 MT Urad and 19,632 MT Moong. The State govt. has to fix the date for procurement and it would continue for 90 days from the announced procurement date. This year good rabi crop is expected in the State despite the unseasonal rains.

- **NAFED may procure around 8 lakh MT Tur this year.** Out of total, 2.71 lakh MT would be procured in Maharashtra while 2.5 lakh MT in Karnataka. The rest would be procured in other states. Right now, prices of Tur in various markets are ruling below MSP.

#### **International Market Update:**

- **The Canadian Grain Commission (CGC) has reported that around 4,800 MT lentils were loaded for export** through licensed facilities in February. As per the Commission, 53,000 MT lentil was shipped the same month last year, while movement is down from the 7,200 MT shipped the previous month. With adding this quantity, the bulk loadings for the Marketing Year reached to 4,14,200 MT, compared to 6,06,100 MT last season.
- **According to the sources, over the past week, international field pea markets continued to improve on news of feed shortages** in some destinations like China, Bangladesh & EU that supported the market sentiments. Due to sanctions against Russia and the effective closure of many transportation links with the Ukraine have reportedly created an immediate shortage of product that have forced some compound feed manufacturers to increase the proportion of peas used in their blends. As both the Ukraine and Russia have been major suppliers of feed grains to the region, feed pea values in the European Union have reached record levels this month. At present, peas are trading in the range of Rs 5200 to 5300. As import is restricted, India is not importing field peas.
- **Lentil markets finished on a firm note during the week on anticipation of improved export demand outside North America** and Canada through the balance of the Marketing Year and possible into the post-harvest shipping period. As availability of stocks with farmers are limited, the green lentils are showing more strength than red. As per the sources, exporters expectation of improved demand over the short to medium term, kept the red lentils prices firm during the week. At present, the lentils FAQ rate is \$915 which is expected to increase to \$940 to \$950 in coming future.
- **As per the latest data released by Australia Bureau of Statistics Lentil export from Australia increased by 170% to 137,977 MT in Jan-2022 against 51090 MT in Dec-2021.** Bangladesh emerged as the biggest buyer, purchasing 84,696 MT, followed by UAE with buying 20,720 MT and India at 11,630 MT. The export sales are gaining momentum. Indian purchases are restricted as new crop in local markets are coming and the arrivals would continue to increase in March and April.
- **As per the latest information released by Canadian Grain Commission, Canada has exported 72,00 MT Lentil in Jan-2022 against 54,100 MT in Jan 2021.** Canada had exported 78,800 Mt in Dec-2021. The total shipment till Jan-2022 was recorded at 4.09 lakh Mt against 5.53 lakh MT same time last year.
- **As per the latest data released by Australian Bureau of Statistics, Australia has exported 43,902 MT Lentils in Nov-2021, down by 11.02% from Oct, when 49,341 MT was exported.** Australia had exported 34,200 MT in Nov-2020. The major buyers were Bangladesh, Sri Lanka & India buying 15,720, 8,573 and 6,674 MT respectively. Notably, Australia has harvested a bumper crop this year.
- **As per the latest release by the Canadian Grain Commission, lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT

in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.

- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in 2022 would be 50 % low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import (unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.
- **As per the latest update released by Agriculture & Agri Food Canada, Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44%. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24% due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04%, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52% to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints that prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
- **The production estimates for the Australian pulses have been published. As per the latest estimates, Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (ABARES estimate) while Pulses Australia sees it at 8.70 lakh MT.** The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.
