

Pulses Domestic Fundamentals:**Today's Update:**

- *Tur prices may trade stable to slightly firm as demand from mills remain stable. Offtake of dal from retail end is not picking up while imported Tur coming at ports are almost stable at \$845. It may move further up by \$15 to 20 per MT as the fuel cost is going up. Marriage season is about to start and it may help market to go up. Apart from it, supply disruption in Myanmar may push up price in domestic markets. This week market may trade stable or slightly weak due to weak demand. Firm tone might be limited with the changed time frame of import, now free till March-2023. Regular supply from overseas countries like Myanmar, Mozambique, Malawi, Tanzania and Sudan has been ensured. It would facilitate regular supply and price stability in the local markets. If, the Monsoon rains remain normal, likely as of now, sowing of Tur may be similar as last year. However, in Maharashtra and Madhya Pradesh, farmers may switch to Soybean as it looks lucrative right now. The lower area coverage and resultant low crop size may be neutralized by the regular import till March-2023. Under the prevailing condition, price of Tur should stay stable or slightly weak this week.*
- *Water festival celebration in Myanmar during 13-14th April-2022 and the changes in rules of foreign exchange for the locals have disrupted the supply activities in Myanmar at least for 10 days. So, supply from Myanmar may be halted for couple of weeks. Indian traders/stockists and importers would take advantage of this temporary disruption and try to jack up market by Rs 200 in coming weeks. The medium-term outlook seems stable to slightly weak as the supply chain is expected to be restored again after 10-15 days. Prices in international and domestic market have already started moving up and may increase by Rs 300-400 per qtl in the medium term despite it being in OGL list till March-2023. Right now, it is trading above MSP (Rs 6300) by Rs 350 to Rs 6650 in Maharashtra. Under the given background and the disrupted supply from Myanmar, AgriWatch expects market to move up by Rs 200 in the near term. The overall outlook seems firm.*
- **Summer Urad sowing continued to gain momentum in all States except Madhya Pradesh.** Farmers have covered 2.60 lakh ha as on 01st April-2022. It is up by 72% from the last year same time. The normal area under summer Urad is 3.82 lakh ha. The major growing States are Tamil Nadu, M.P. and Uttar Pradesh. Farmers have covered 5.54 lakh ha under summer Moong so far, up by 34.79% from 4.113 lakh ha last year same time. M.P. is a major growing State, where it is down by 32% so far.
- **NAFED has halted Chana selling through auction in Rajasthan.** Apart from this the procurement drive begins from today on MSP of Rs 5230. With rising temperature, demand for sattu started improving in States of Bihar and UP. Mills too are active to build up stocks where Chana is ruling below MSP. All these developments may push up Chana price in coming weeks.
- **Despite similar area coverage under field peas last year (10.18 lakh ha in 2021-22 against 10.38 lakh ha in 2020-21),** production increased by 5 to 8% as weather remained very congenial throughout the season. Area coverage was higher in Madhya Pradesh, Jharkhand and Uttar Pradesh while it was lower in Assam, Odisha and Bihar. It was compensated with higher coverage in Madhya Pradesh and Uttar Pradesh this year. Pressure have started building up in Lalitpur-Jhansi line followed by Hamirpur and Banda line. In markets of MP too arrivals have increased and it is putting pressure on Peas price in the market. It is being traded at Rs 4450-4800, depending on quality in these markets. As the Chana prices are expected to improve, more downside move in peas market is unlikely. Once the arrival pressure ends by end April, prices would move up by Rs 200-300. Buying at the current level seems profitable.

- **As of 2nd April-2022, Chana procurement stands total at 3.49 LMT.** Procurement in major producer State Madhya Pradesh is expected to start from early April and as per estimates there are hefty stocks of around 12 Lakh MT with Gol. Chana is being procured at Minimum Support Price (MSP) of Rs 5230 per quintal by the State agencies.
- **Chana crop production for 2021-22 season is expected to be good at 103 Lakh MT** and new season has started with a carry in of 18.49 lakh MT, therefore, in the current season the supply will remain at comfortable level throughout the year.
- ***As expected one week earlier by AgriWatch, The DGFT, India has extended the timeline of Urad and Tur import till March-2023, by issuing Notification no. 63/2015-20 on 29th March-2022. Now, import of Tur and Urad stands free till March-2023. It would have a cooling impact on domestic prices of both the commodities. The market, players feel that the current step by the Govt. may ensure regular supply from Myanmar. If, there is normal monsoon this year and sowing increase from last year, it may build up pressure on Tur & Urad prices, right now.***

Previous Update:

- ***Madhya Pradesh govt has started procurement of Chana & Masur on MSP and the buying activities would continue to increase as arrivals of Chana and Masur have started increasing. The Central govt. has already given the buying target of 8,71,100 MT for Chana, 1,67,130 MT for Masur & 3,48,935 MT for Mustard in the states. The fund has already been allocated for this purpose. As the price of Masur is ruling up from MSP of 6300 per qtl., target is unlikely to meet this year. Private buyers are active and they are buying FAQ quality coming into market above MSP. In Madhya Pradesh markets Masur is being traded at INR 6600-6700 per qtl. Now, NAFED may start releasing Masur stock to cool down prices amid attempts to procure on MSP. Prices may move further up as parity for Canadian and Australian crop is going up. Masur price may move up to INR 7000 by April end, by then arrival pressure may decrease. Chana procurement drive seems to hit the procurement target in M.P.***
- ***The Central govt. has green signaled to launch a procurement drive for Rabi 2021-22 crops in Andhra Pradesh. The State govt. had requested to the Central govt. to start procurement drive at MSP. Now it is accepted. Under this price support scheme, the State govt. would procure 1,28,270 MT Chana, 91,475 MT Urad and 19,632 MT Moong. The State govt. has to fix the date for procurement and it would continue for 90 days from the announced procurement date. This year good rabi crop is expected in the State despite the unseasonal rains.***
- ***NAFED may procure around 8 lakh MT Tur this year. Out of total, 2.71 lakh MT would be procured in Maharashtra while 2.5 lakh MT in Karnataka. The rest would be procured in other states. Right now, prices of Tur in various markets are ruling below MSP.***

International Market Update:

- **U.S. Department of Agriculture (USDA) in its recent report, has estimated that growers are likely to sow around 788,000 acres area under the Lentils, as per the preliminary sowing intention, up by 11 percent from 708,000 acres last year and also well above from 523,000 acres from 2020. With 580,000 acres estimated sown area, Montana remaining the most important producing region where sowing was noticed in 530,000 acres**

last year followed by North Dakota where sowing intension would increase from 120,000 acres to 140,000 acres.

- **Recent data from General Customs Administration of China reveals that China's imports of peas remained almost same in December** in comparison to November. Total imports throughout the month remained 2,71,497 metric tonne (MT), similar to the previous month's import of 2,72,030 MT. So far, imports have totalled 2,140,739 MT, down from 2,337,252 during the previous calendar year. During the mentioned period, Canada remained top exporter by shipping 256,610 MT in the month followed by Australia and France which exported 12,346 MT and 1,522 MT respectively to China.
- **The Canadian Grain Commission (CGC) has reported that around 4,800 MT lentils were loaded for export** through licensed facilities in February. As per the Commission, 53,000 MT lentil was shipped the same month last year, while movement is down from the 7,200 MT shipped the previous month. With adding this quantity, the bulk loadings for the Marketing Year reached to 4,14,200 MT, compared to 6,06,100 MT last season.
- **According to the sources, over the past week, international field pea markets continued to improve on news of feed shortages** in some destinations like China, Bangladesh & EU that supported the market sentiments. Due to sanctions against Russia and the effective closure of many transportation links with the Ukraine have reportedly created an immediate shortage of product that have forced some compound feed manufacturers to increase the proportion of peas used in their blends. As both the Ukraine and Russia have been major suppliers of feed grains to the region, feed pea values in the European Union have reached record levels this month. At present, peas are trading in the range of Rs 5200 to 5300. As import is restricted, India is not importing field peas.
- **Lentil markets finished on a firm note during the week on anticipation of improved export demand outside North America** and Canada through the balance of the Marketing Year and possible into the post-harvest shipping period. As availability of stocks with farmers are limited, the green lentils are showing more strength than red. As per the sources, exporters expectation of improved demand over the short to medium term, kept the red lentils prices firm during the week. At present, the lentils FAQ rate is \$915 which is expected to increase to \$940 to \$950 in coming future.
- **As per the latest data released by Australia Bureau of Statistics Lentil export from Australia increased by 170% to 137,977 MT in Jan-2022 against 51090 MT in Dec-2021.** Bangladesh emerged as the biggest buyer, purchasing 84,696 MT, followed by UAE with buying 20,720 MT and India at 11,630 MT. The export sales are gaining momentum. Indian purchases are restricted as new crop in local markets are coming and the arrivals would continue to increase in March and April.
- **As per the latest information released by Canadian Grain Commission, Canada has exported 72,00 MT Lentil in Jan-2022 against 54,100 MT in Jan 2021.** Canada had exported 78,800 Mt in Dec-2021. The total shipment till Jan-2022 was recorded at 4.09 lakh Mt against 5.53 lakh MT same time last year.
- **As per the latest data released by Australian Bureau of Statistics, Australia has exported 43,902 MT Lentils in Nov-2021, down by 11.02% from Oct, when 49,341 MT was exported.** Australia had exported 34,200 MT in Nov-2020. The major buyers were Bangladesh, Sri Lanka & India buying 15,720, 8,573 and 6,674 MT respectively. Notably, Australia has harvested a bumper crop this year.
- **As per the latest release by the Canadian Grain Commission, lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price

and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.

- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in 2022 would be 50% low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import (unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.
- **As per the latest update released by Agriculture & Agri Food Canada, Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44%. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24% due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04%, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52% to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
