

**Pulses Domestic Fundamentals:****Today's Update:**

- *The extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas is expected now as per requirement throughout the year. The slight increase seen last week was due to disrupted supply from Myanmar. With this changed import policy, stockists of Tur may hold their Tur stocks for a longer time and release based on the prices. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 200- 250 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing area and Monsoon rains. If farmers shift some area to Soybean, price rise may be higher. Mostly cash markets traded up by 1 to 2% last week to Rs 6300 to 6600 per Qtl. Myanmar quotes are up at \$880-890 per Tonne, basis Indian ports.*
- *Summer Urad sowing continued to gain momentum in all states except Madhya Pradesh. Farmers have covered 2.84 lakh ha as on 08th April-2022. It is up by 55.81% from the last year same time. The normal area under summer Urad is 3.82 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh. Farmers have covered 6.12 lakh ha under summer Moong so far, down by 4.12 % from 6.38 lakh ha last year same time. M.P. is a major growing state, where it is down by 83% so far.*
- *Chana cash market continued to inch up by around 1% during the week under review. The main reason behind it is mainly attributed to the ongoing procurement drive and the buying by private trades. Apart from it, demand for dal has started improving. NAFED has procured over 4.65 lakh MT Chana till the first week of April-2022. Under the prevailing market fundamentals, prices of Chana may continue to inch up towards MSP. Maximum Chana stocks coming into markets is either going to the private go-downs or Central Pool. As arrival is comparatively lower, firm tone may prevail in the market. Right now, prices are ruling in the range of INR 4900 to 5150 and it may move up by INR 150 in couple of weeks.*
- *New arrivals in markets of Madhya Pradesh and Uttar Pradesh have started declining as farmers have sensed bullish sentiments in coming weeks and are selling the quantity based on their immediate needs. Apart from it, Chana prices have started moving up and it may cap the decreasing trend in cash Peas markets in coming weeks. AgriWatch expects peas market to recover from this level in the next couple of weeks. Stockists are active and they are buying 80% of arrivals coming into markets right now.*
- *Sentiments remains firm for peas markets in the near to medium term. Prices of peas traded down last week by 1 to 1.5 % and ruled in the range of Rs 5000 to 5100 in Kanpur Market. As Chana prices is almost trading in range and once it starts moving up, peas too may follow the suit. The import remains in the restricted list.*
- *Active buying by private trades, declining stocks at ports (over 1 lakh LMT), increasing cost of import due to rising fuel cost and the higher quotes in Canada and Australia have lent support to cash Lentil markets. Stockists and importers have restricted sale, sensing uptrend to continue. All these developments have pushed up cash Lentil markets and the firm trend may continue. Availability in the global market have declined and the ready stocks at ports in Canada and Australia have also decreased considerably during last three-four weeks. New crops in Australia and Canada would be available only in Nov. so, the stockists and importers would continue to take advantage of the emerging market fundamentals. The cash market may move up by Rs 200-400 in the medium term. Prices in various markets are ruling in the range of Rs 6800- 7300.*

**Previous Update:**

- *Northwardly moving import cost, limited supply from the overseas market, importers' restricted sale at ports and slowdown in farmers' intention for releasing their stocks have accumulatively pushed Masur prices up by 3% last week. In Mumbai, imported quality was being traded at Rs 7300 and Rs 7200 in Kanpur. Prices expected*

to inch up further by Rs 200 until quotes in Canada and Australia comes down again. Right now, C&F quotes for Canadian Lentil is \$970-975 per MT. The overall tone seems firm. Farmers intension for sowing is reportedly high for Lentils in Canada and the new crop would start to come in market in Aug-Sep. Under the normal condition, output may touch the level of 25 lakh MT. But its impact in India would not be felt before Nov. Import option from other sources other than Canada and Australia remain limited. At present, stockists demand is seen and maximum stocks coming into markets are being diverted to go-downs.

- **Despite similar area coverage under field peas last year (10.18 lakh ha in 2021-22 against 10.38 lakh ha in 2020-21),** production increased by 5 to 8% as weather remained very congenial throughout the season. Area coverage was higher in Madhya Pradesh, Jharkhand and Uttar Pradesh while it was lower in Assam, Odisha and Bihar. It was compensated with higher coverage in Madhya Pradesh and Uttar Pradesh this year. Pressure have started building up in Lalitpur-Jhansi line followed by Hamirpur and Banda line. In markets of MP too arrivals have increased and it is putting pressure on Peas price in the market. It is being traded at Rs 4450-4800, depending on quality in these markets. As the Chana prices are expected to improve, more downside move in peas market is unlikely. Once the arrival pressure ends by end April, prices would move up by Rs 200-300. Buying at the current level seems profitable.
- ***As expected one week earlier by AgriWatch, The DGFT, India has extended the timeline of Urad and Tur import till March-2023, by issuing Notification no. 63/2015-20 on 29th March-2022. Now, import of Tur and Urad stands free till March-2023. It would have a cooling impact on domestic prices of both the commodities. The market, players feel that the current step by the Govt. may ensure regular supply from Myanmar. If, there is normal monsoon this year and sowing increase from last year, it may build up pressure on Tur & Urad prices, right now.***

#### **International Market Update:**

- **Data received from Australia Bureau of Statistics indicates that Chickpea export from Australia at this point in the current Marketing Year has increased rapidly during the February.** During the mentioned period, Chickpea export surged by 63.7 percent to totaled at 116,796 metric tonne from 71,334 metric tonne January. To add this, total export increased to 303,607 metric tonne during the Marketing Year. However, this volume is still lower by 30% from same time last year. Bangladesh remined the top importer with buying 81,389 metric tonne followed by Pakistan and Nepal, purchasing 23,180 metric tonne and 4,496 metric tonne respectively.
- **U.S. Department of Agriculture (USDA) in its recent report, has estimated that growers are likely to sow around 788,000 acres area under the Lentils, as per the preliminary sowing intention, up by 11 percent from 708,000 acres last year and also well above from 523,000 acres from 2020.** With 580,000 acres estimated sown area, Montana remaining the most important producing region where sowing was noticed in 530,000 acres last year followed by North Dakota where sowing intension would increase from 120,000 acres to 140,000 acres.
- ***Recent data from General Customs Administration of China reveals that China's imports of peas remained almost same in December in comparison to November. Total imports throughout the month remained 2,71,497 metric tonne (MT), similar to the previous month's import of 2,72,030 MT. So far, imports have totalled 2,140,739 MT, down from 2,337,252 during the previous calendar year. During the mentioned period, Canada remained top exporter by shipping 256,610 MT in the month followed by Australia and France which exported 12,346 MT and 1,522 MT respectively to China.***

- **The Canadian Grain Commission (CGC) has reported that around 4,800 MT lentils were loaded for export** through licensed facilities in February. As per the Commission, 53,000 MT lentil was shipped the same month last year, while movement is down from the 7,200 MT shipped the previous month. With adding this quantity, the bulk loadings for the Marketing Year reached to 4,14,200 MT, compared to 6,06,100 MT last season.
- **According to the sources, over the past week, international field pea markets continued to improve on news of feed shortages** in some destinations like China, Bangladesh & EU that supported the market sentiments. Due to sanctions against Russia and the effective closure of many transportation links with the Ukraine have reportedly created an immediate shortage of product that have forced some compound feed manufacturers to increase the proportion of peas used in their blends. As both the Ukraine and Russia have been major suppliers of feed grains to the region, feed pea values in the European Union have reached record levels this month.
- **As per the latest data released by Australia Bureau of Statistics Lentil export from Australia increased by 170% to 137,977 MT in Jan-2022 against 51090 MT in Dec-2021.** Bangladesh emerged as the biggest buyer, purchasing 84,696 MT, followed by UAE with buying 20,720 MT and India at 11,630 MT. The export sales are gaining momentum. Indian purchases are restricted as new crop in local markets are coming and the arrivals would continue to increase in March and April.
- **As per the latest information released by Canadian Grain Commission, Canada has exported 72,00 MT Lentil in Jan-2022 against 54,100 MT in Jan 2021.** Canada had exported 78,800 Mt in Dec-2021. The total shipment till Jan-2022 was recorded at 4.09 lakh Mt against 5.53 lakh MT same time last year.
- **As per the latest release by the Canadian Grain Commission, lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.
- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in 2022 would be 50% low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import (unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.
- **As per the latest update released by Agriculture & Agri Food Canada, Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44%. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24% due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04%, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52% to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints prices of Canadian Masur may move up again, if Australian suppliers restrict their sale

at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
