

Pulses Domestic Fundamentals:**Today's Update:**

- **Summer Urad sowing continued to gain momentum in all states including Madhya Pradesh. Farmers have covered 3.31 lakh ha as on 22th April-2022.** It is up by 63.75 % from the last year same time. The normal area under summer Urad is 3.86 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.
- **Farmers have covered 10.47 lakh ha under summer Moong so far, up by 51.14 % from 6.93 lakh ha last year same time. M.P. is a major growing state,** where it has improved smartly by 118%. Recovery in area may minimize the impact of the rising temperature and the fear of small grain size.
- As on 21.04.2022, at Yadgir APMC market yard, Bengal gram arrivals continued steady amidst normal demand. Average prices of Bengal gram with steady mode quoted at INR 4568 per quintal while Minimum and Maximum prices quoted at INR 4551 per quintal & INR 4611 per quintal respectively. Prices are likely to remain range bound in the short term. Similarly, the average quotation for the Green gram noted at INR 6563 per quintal with Minimum rate of INR 6211 per quintal and Maximum rate of INR 6841 per quintal. Here, Tur Red traded at INR 5569 per quintal while Minimum and Maximum prices were noted at INR 4111 per quintal and INR 6333 per quintal respectively. Sentiments for Green gram and Tur Red may remain steady in short term.

Previous Update:

- **Higher import of Tur (8.40 lakh tonne in 2021-22, vs 4.42 lakh tonne of last year), sluggish buying interest of stockiest and millers continue to pressurized the Tur cash market.** Tur Red FAQ prices were ruling at INR 6200 per quintal down by INR 240 per quintal from INR 6440 per quintal seen at previous day. MP Tur in Kanpur mandi traded at INR 6050 per quintal at previous level. Myanmar Tur lemon quoted at \$860 per MT similar as previous day level. At present, spike is unlikely in prices amidst ease of supply side and lower buying interest.
- According to the sources, National Agricultural Cooperative Marketing Federation of India Ltd. (NAFED) will start procurement of around 43,000 MT pulses. The agency will buy around 30,000 MT of masoor dal and 13,000 MT of gram. The buying would be made at the Minimum Support Price (MSP) through primary agricultural cooperative societies (PACS) and Vyapar Mandal in pulse-growing districts. For the purpose, NAFED has signed an agreement with the Bihar State Food and Civil Supplies Corporation (BSFCSC) last month to use the procurement channels for paddy and wheat. Before it, the procurement process had been suspended for almost a decade owing to a financial dispute with the state government. Farmers in remote areas are likely to get benefit from this procurement drive.
- **With intention of surging supply side in the domestic market and curbing rising prices of pulses, MARKFED continues to release its stocks of Urad on 20th April 2022.** MARKFED has put 6130 MT of Urad for auction. Maximum stocks available for auction in warehouses are, namely Balaji WH Shivpuri (2470 MT), Shri Ji WH & Grader (1130 MT) and Guru Kripa WH Kolaras (1000 MT). Also, some small quantities are available for auction in MAA Ramgarh Wh-2Q Bhandar (340 MT), Soni WH-2 S Bhandar (560 MT), Kishan WH-8 (360 MT) and PHW-3 Badarwas (270 MT). The series of auction is intended to bring down the already higher prices.
- **MARKFED continues to release its stocks of Moong on 20th April 2022. It has put stock of 7690 MT of Moong** for auction at various centres namely, Shubh Warehousing-73 (2890 MT), Ram WH 109 (2110) and

Amritprabha WH 110 (1760 MT). Objective of this auction is to control rising prices in local markets. Arrival of Moong is expected from May onwards, may put pressure on prices as well as sentiments.

- **State agencies have procured 687384 MT Chana as on 18th April-2022. The highest contributors** are Gujarat and Maharashtra, buying over 44 and 43% respectively so far. The procurement volume recorded at 3.05 LMT in Gujarat while 2.95 LMT in Maharashtra. Karnataka and Andhra Pradesh contributed around 58000 MT and AP around 28,000 MT. The procurement volume is likely to increase as the markets back on track after the continuous Holidays last week. The higher procurement volume may lend some support to cash markets in the coming weeks.
- **According to the Ministry of Agriculture and Farmers' Welfare's recent statement, Indian summer pulses sowing figure has reached at 12.21 lakh hectare**, as on 18 April, 2022, up by 37.19% from 8.90 lakh hectare same time last year. The area has been reported mainly from the states of Odisha, Madhya Pradesh, Tamil Nadu, Uttar Pradesh, Gujarat, West Bengal, Bihar, Andhra Pradesh, Chhattisgarh, Maharashtra, Assam, Karnataka, Rajasthan, Jharkhand, Punjab, Uttarakhand and Jammu & Kashmir.
- **As per latest update by IMD for monsoon rainfall for 2022 Southwest is to be likely** to be normal. It may remain 99% with a model error of $\pm 5\%$.
- **It would be interesting to see the selling strategy of NAFED to control the prices. If prices continue** to move up on the increasing fear of low summer yield, NAFED may start early auction as it has over 3 lakh MT Moong stocks. This week prices may decrease by Rs 150-200, as demand is weak from millers' end.
- **Nanded of Maharashtra sowing area, monsoon rains and the likely shifting of Moong area to Soybean** in the Kharif season. In Jaipur market, Moong was being traded at Rs 6500-7100, might decrease to Rs 6300-6900.
- **Mixed tone was featured in the tur cash markets despite disrupted supply from Myanmar** and low availability in African countries, as season is coming to an end there. Ample availability of old stock (3.5 to 4 lakh MT) in Karnataka & Maharashtra, arrivals from 2021-22 crop and weak demand from miller's end have capped uptrend in the Tur cash market. It may trade at the current level of Rs 6350 to 6550 until demand for marriage season starts, expected from the end April. C&F quotes in Myanmar increased by \$20 to \$890 last week, ending 9th April-2022. No trade has been reported at this level from last three days. So, the short-term outlook seems weak and the market may continue to trade at the current level. Import has already gone up by 89% during last financial year, ending at March-2022 to 8.40 lakh MT over the previous financial year, when only 4.42 LMT had been imported. So, availability is good at this point of time. The medium-term outlook would depend on the kharif sowing area and the monsoon rains. Tur import during the first week of April was reported at 12035 MT. AgriWatch expects rangebound movement this week.
- **Summer Urad sowing continued to gain momentum in all states except Madhya Pradesh.** Farmers have covered 2.84 lakh ha as on 08th April-2022. It is up by 55.81% from the last year same time. The normal area under summer Urad is 3.82 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh. Farmers have covered 6.12 lakh ha under summer Moong so far, down by 4.12 % from 6.38 lakh ha last year same time. M.P. is a major growing state, where it is down by 83% so far.
- **Chana cash market continued to inch up by around 1% during the week under review.** The main reason behind it was mainly attributed to the ongoing procurement drive and the buying by private trades. NAFED has procured over 4.65 lakh MT Chana till the first week of April-2022. Under the prevailing market fundamentals, prices of Chana may continue to inch up towards MSP. Maximum Chana stocks coming into markets is either going to the private go-downs or Central Pool. As arrival is comparatively lower, firm tone may prevail in the market. Right now, prices are ruling in the range of INR 4900 to 5150 and it may move up by INR 150 in couple of weeks.

- **Active buying by private trades, declining stocks at ports (over 1 lakh LMT), increasing cost of import** due to rising fuel cost and the higher quotes in Canada and Australia have lent support to cash Lentil markets. Stockists and importers have restricted sale, sensing uptrend to continue. All these developments have pushed up cash Lentil markets and the firm trend may continue. Availability in the global market have declined and the ready stocks at ports in Canada and Australia have also decreased considerably during last three-four weeks. New crops in Australia and Canada would be available only in Nov. so, the stockists and importers would continue to take advantage of the emerging market fundamentals. The cash market may move up by Rs 200-400 in the medium term. Prices in various markets are ruling in the range of Rs 6800- 7300.
- **As expected one week earlier by AgriWatch, The DGFT, India has extended the timeline of Urad and Tur import till March-2023**, by issuing Notification no. 63/2015-20 on 29th March-2022. Now, import of Tur and Urad stands free till March-2023. It would have a cooling impact on domestic prices of both the commodities. The market, players feel that the current step by the Govt. may ensure regular supply from Myanmar. If, there is normal monsoon this year and sowing increase from last year, it may build up pressure on Tur & Urad prices, right now.

International Market Update:

- **Myanmar's Central bank as on dated 20th April, 2022 has exempted the some foreign entities from its** controversial new exchange rules making mandatory the foreign exchange to be converted into local currency Kyat. Company approved for foreign investment, firms located in Special Economic Zones, International NGOs, diplomats, UN agencies and airlines have been given exemption from this policy. This rule had triggered a panic among corporate.
- **Eurostat recent report reveals that field Pea import in Spain has increased in February compared to January.** In February, Spain imported 6,245 MT Pea while combined import volume in January and February reached at 6,810 MT, down from same period last year when it had imported 28,467 MT Pea. During the mentioned period, Russia emerged as leading exporter (5,833 MT) followed by France (235 MT) and Canada (169 MT).
- **Data received from Eurostat indicates, in the period of January-February, Italy imports of pea** have increased by 111.19% to total 29,749 MT up from 14,86 MT during same period last year. In February, it imported 17,075 MT Pea up by 35% from January's import of 12,674 MT. Russia remained major exporter (14,241 MT) of Pea followed by Canada (409 MT).
- **Data received from Australia Bureau of Statistics indicates that Chickpea export from Australia at this point** in the current Marketing Year has increased rapidly during the February. During the mentioned period, Chickpea export surged by 63.7 percent to totaled at 116,796 metric tonne from 71,334 metric tonne January. To add this, total export increased to 303,607 metric tonne during the Marketing Year. However, this volume is still lower by 30% from same time last year. Bangladesh remained the top importer with buying 81,389 metric tonne followed by Pakistan and Nepal, purchasing 23,180 metric tonne and 4,496 metric tonne respectively.
- **U.S. Department of Agriculture (USDA) in its recent report, has estimated that growers are likely to sow** around 788,000 acres area under the Lentils, as per the preliminary sowing intention, up by 11 percent from 708,000 acres last year and also well above from 523,000 acres from 2020. With 580,000 acres estimated sown area, Montana remaining the most important producing region where sowing was noticed in 530,000 acres last year followed by North Dakota where sowing intensification would increase from 120,000 acres to 140,000 acres.

- **Recent data from General Customs Administration of China reveals that China's imports of peas remained almost same in December** in comparison to November. Total imports throughout the month remained 2,71,497 metric tonne (MT), similar to the previous month's import of 2,72,030 MT. So far, imports have totalled 2,140,739 MT, down from 2,337,252 during the previous calendar year. During the mentioned period, Canada remained top exporter by shipping 256,610 MT in the month followed by Australia and France which exported 12,346 MT and 1,522 MT respectively to China.
- **The Canadian Grain Commission (CGC) has reported that around 4,800 MT lentils were loaded for export** through licensed facilities in February. As per the Commission, 53,000 MT lentil was shipped the same month last year, while movement is down from the 7,200 MT shipped the previous month. With adding this quantity, the bulk loadings for the Marketing Year reached to 4,14,200 MT, compared to 6,06,100 MT last season.
- **According to the sources, over the past week, international field pea markets continued to improve on news of feed shortages** in some destinations like China, Bangladesh & EU that supported the market sentiments. Due to sanctions against Russia and the effective closure of many transportation links with the Ukraine have reportedly created an immediate shortage of product that have forced some compound feed manufacturers to increase the proportion of peas used in their blends. As both the Ukraine and Russia have been major suppliers of feed grains to the region, feed pea values in the European Union have reached record levels this month.
- **As per the latest data released by Australia Bureau of Statistics Lentil export from Australia increased by 170% to 137,977 MT in Jan-2022 against 51090 MT in Dec-2021.** Bangladesh emerged as the biggest buyer, purchasing 84,696 MT, followed by UAE with buying 20,720 MT and India at 11,630 MT. The export sales are gaining momentum. Indian purchases are restricted as new crop in local markets are coming and the arrivals would continue to increase in March and April.
- **As per the latest information released by Canadian Grain Commission, Canada has exported 72,00 MT Lentil in Jan-2022 against 54,100 MT in Jan 2021.** Canada had exported 78,800 Mt in Dec-2021. The total shipment till Jan-2022 was recorded at 4.09 lakh Mt against 5.53 lakh MT same time last year.
- **As per the latest release by the Canadian Grain Commission, lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.
- **Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in 2022 would be 50% low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import (unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.
- **As per the latest update released by Agriculture & Agri Food Canada, Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from

2020-21 production, it is down by 44%. Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24% due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021. If we compare it from last year total supply has decreased by 35.04%, when total supply was 31.90 lakh MT. At export front too availability has decreased by 10.52% to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21. It hints prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
