

Pulses Domestic Fundamentals:**Today's Update:**

- Masur cash market traded slightly weak on lower offtake by stockists and millers. In Kanpur market, mill quality Masur traded at INR 6900 per quintal, down by INR 50 per quintal from INR 6950 per quintal while in Neemuch, Desi Masur traded at INR 6250 per quintal, down by INR 270 per quintal from INR 6520 per quintal. Arrival pace is slow at present as farmers are not releasing their stocks in bulk on the hope of good remunerative ahead. Apart from it, ready stock at Canadian ports has come down close to 1 LMT. The overall tone seems strong for near term on the aforementioned reasons.

Previous Update:

- **Moong cash market traded down amidst increasing new crop arrivals and plenty of stocks. In Jaipur market,** Moong Chamki traded at INR 6500 per quintal, down INR 300 per quintal from INR 6800 per quintal. New crop arrivals, sufficient stocks in Central Pool and Free distribution in MP may keep the sentiments weak. Market prices may fall by INR 200 to 300 per quintal more from present level. New crop arrivals will increase in coming days. Farmers have covered 19.15 lakh ha under summer Moong so far, up by 15.6 % from 16.57 lakh ha last year same time. MP is a major growing state, where it has improved by 78.2 % to 8.50 lakh ha this year.
- **Tur cash market traded range bound in the range of INR 50-100 per quintal up and down. In Barshi mandi of Maharashtra,** Tur Red quality traded at INR 4700, up by INR 100 per quintal from INR 4600 per quintal while in Kanpur market, it traded at INR 6050 per quintal, down by INR 50 per quintal from 6100 per quintal. At present, demand for dal is weak due to higher processing cost and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. Prices may recover by Rs 200-250 by 1st week of June, by then Monsoon rains in the growing region should start and define the future.
- **As per official sources, National Agricultural Cooperative Marketing Federation of India Ltd. (NAFED) has** procured 2,175,475 MT Chana as of 28th May, 2022. The States where procurement has been done are: Gujarat (556,397 MT), Maharashtra (NAFED-600,655 MT & FCI- 65,921 MT), Madhya Pradesh (692,255 MT, tentative), Rajasthan (108,556 MT, tentative), Karnataka (73,874 MT, procurement closed), Andhra Pradesh (67,857 MT) and UP (9,960 MT). Chana procurement is being done at the MSP of INR 5,230 per quintal. Total procurement target is 29 lakh MT. According to the Maharashtra State Govt. official notification, it has extended the purchase date of Chana till 18th June, 2022.
- **According to the Maharashtra State Govt. official notification, it has extended the purchase date of Chana till 18th June, 2022.** As per the sources, till date, around 22 LMT Chana procurement has been done in which Maharashtra's share is around of 6,66, 576 MT (NAFED-600,655 MT & FCI- 65,921 MT). Chana procurement is being done at the MSP of INR 5,230 per quintal. Total procurement target is 29 lakh MT.
- **Mostly pulses cash markets traded steady to range bound except Urad which decreased by INR 400 per** quintal to INR 6800 per quintal from INR 7200 per quintal in Delhi. However, new crop arrivals are being noticed in Karnataka and Andhra Pradesh but it would locally consume without having any impact on prices. Rapidly reducing stocks are likely to support the sentiment in near future for Urad.

- **Summer Urad sowing continued to gain momentum in all states including Madhya Pradesh. Farmers have covered 3.866 lakh ha as on 27th May-2022.** It is up by 36% from the same time last year. The normal area under summer Urad is 3.86 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.
- **Farmers have covered 19.158 lakh ha under summer Moong as on 27th May-2022, up by 15.6% from 16.578 lakh ha last year same time.** MP is a major growing state, where sowing area was reported at 8.501 lakh ha. Recovery in area may minimize the impact of the rising temperature, pest attack and the fear of small grain size.
- **Chana cash market traded slightly negative due to lower demand and weak offtake by stockists and millers.** Rajasthan origin Chana at Delhi traded at INR 4850 per quintal, down by INR 50 per quintal from INR 4900 per quintal and in Akola, it traded down by INR 100 per quintal at INR 4400 per quintal.
- **Chana cash market may continue to trade range bound as the supply side is normal against the current demand despite** the ongoing procurement drive at MSP. NAFED and other procurement agencies have already procured 20 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 200-250, the target is likely to be achieved as the procurement date in M.P. has been extended till June. Availability of old stocks, arrivals and weak demand for dal are keeping Chana markets under pressure. If the demand improves, likely in June, prices may recover by Rs 100-200 and may touch MSP. Right now, range bound movement is expected.
- **Cash pulses markets continued to wait for demand from the bulk buyers amid the increasing arrivals of Moong from summer crop, Lentil and Chana from Rabi crops.** The decreased fuel cost, weak demand from the retail and wholesale end, an expectation of timely arrival of monsoon and the restricted buying by mills have broken the inner tone in the pulses markets. Ample stock of Chana and Moong in Central Pool, old stock holdings by trade are weighing on the market fundamentals. It would not allow the cash market to move up in the near term to medium term until or unless monsoon goes totally against the market expectation.
- **According to the third advance estimates of production of major agricultural crops for the year 2021-22** released by the Agriculture Ministry recently, Pulses production of the current crop year is predicted to increase nearly by 9% to a record 27.75 million tonne. Main pulses crop Chana output in current crop year has reportedly inched up by 17% to 13.98 million tonne from 11.91 million tonne last crop year. However, tur production is estimated at 4.35 million tonne and gram output is predicted at 13.98 million tonne which will be a record.
- **According to the latest report by Agriculture Ministry, total summer sowing area under pulses has jumped** to 21.41 lakh hectare, up by 22.9 percent from 17.42 lakh hectare as of May 13, 2022. Among the pulses complex, Moong area has increased significantly by 21.2 percent to 17.48 lakh hectare from 14.43 lakh hectare a year ago. Similarly, a Urad sowing has also inched up by 39.9 percent or 3.69 lakh hectare from 2.64 lakh hectare. The major pulses States are Madhya Pradesh (8.85 lakh hectare), Bihar (2.07 lakh hectare), Odisha (2.61 lakh hectare), Tamil Nadu (1.95 lakh hectare), Uttar Pradesh (1.53 lakh hectare), Gujarat (0.96 lakh hectare), West Bengal (0.84 lakh hectare), Punjab (0.39 lakh hectare), Andhra Pradesh (0.35 lakh hectare), Chhattisgarh (0.35 lakh hectare), and Maharashtra (0.26 lakh hectare).
- **Chana procurement date has been extended in Rajasthan till 29th June, 2022.** Extended timeline for procurements will help govt. to build up stocks over 2 million tonne. Higher stocks in Central Pool would enable govt. to control the sentiments of cash market as has seen last year.

International Market Update:

- **According to the sources, Pea sowing in Canada recorded in the range of 62 to 68% down from 90-93%** similar time previous year as weather is reportedly cool and wet halting the normal practice for sowing. At present, Alberta's farmers are showing a good progress this year where around 83 to 85% area has been sown till now. However, last year figure was between 96-98%. Simultaneously, sowing in Saskatchewan recorded between 65 to 67% this year lower from 93 to 95% same time last year. In Manitoba, sowing is lagging and only 5 to 7% area has been reportedly covered so far. On the other hand, in US, Pea sowing recorded between the range of 82-84% in comparison of 83 to 85% same time last year while the past five-year average is around 77-78%.
- **As per the sources, Lentil sowing in Canada recorded in the range of 65 to 68% down from 91-95%** similar time previous year as weather is reportedly cool and wet halting the normal practice for sowing while sowing period is running short. Sowing in Saskatchewan recorded between 65 to 67% this year lower from 93 to 95% same time last year. Last five year's average is 93 to 95%.
- **According to the sources, recent rains in major growing areas of North American have eased the worries** regarding yields as it helped to enhance the much-needed moisture level for sowing. However, slow pace of sowing has emerged as a caused of concern. As per the recent data, around 63% sowing has been observed till the week end 27th May, 2022 compared to 72% same period last year. This level is also lower from last five year average of 68%.
- **Statistics Canada's recent report reveals that Lentil stocks in all positions have also decreased by 34% to 949,000 tonne** as of March 2022, from 1.43 million tonne last year. New figure is also below from past five-year average of 1.51 million tonne of all classes of lentils. However, there is no change in commercial inventories but stocks at farms gate have reduced to mere 770,000 tonne, down by 39% from 1.26 million tonne last year. Commercial inventories have been seen at 179,000 tonne.
- **As per Statistics Canada recent report, Pea inventories in Canada in all positions has decreased by 35% to 1.22 million tonne**, as of March 31 2022, from 1.87 million tonne last year. New inventory level is also below the last five-year average of 1.924 million tonne. Commercial inventories have also reduced to 322,000 tonne, down by 21% from 405,000 tonne. Besides, all classes pea stocks at farms have reportedly reduced by 36% to mere 902,000 tonne from 1.47 million tonne.
