

Pulses Domestic Fundamentals :

Today's Update :

- According to the recent release by Department of Agriculture & Farmers Welfare, farmers have covered 0.384 lakh ha area under Chana up by manifold from 0.014 lakh ha last year as on 7th October, 2022. With the help of excess rainfall and late withdrawal of Southwest monsoon this year, farmers have started Rabi sowing with a good start as moisture content is reportedly sufficient for the Rabi crops. However, as per market sources, Chana sowing is likely to decrease this year compared to last year owing to poor realization in Chana than other crops and farmers may shift towards more lucrative crops like Mustard seed, Wheat etc.

Previous Update :

- In line with IMD predictions, rains observed in some parts of Madhya Pradesh and Karnataka on 4th and 5th October and there is prediction for more rains during coming days. Likely rains may affect the new crop arrivals and also affect the quality of the produce (moisture content will increase) which may have a bearing on the quality of the produce.
- Moreover, the likely rains would delay the Rabi crop sowing / planting due to presence of excess moisture in field. Tur crop has reportedly turned yellow in some areas of Karnataka due to excess rains and farmers have been advised to make proper drainage system to drain out the excess water. However, weather is reportedly conducive in other places of the state.

International Market Update:

- According to the sources, Kabuli Chickpea export from Australia remained at around 4,44,000 tonne during first nine months (November to July) of Marketing Year, down by around 37% from 7,09,000 tonne same period last year. Projected cumulative export figure is expected to remain around 6,30,000 tonne for 2021-22 which is down from 8,79,000 tonne during last season.
