

Today's Update:

- According to IMD, weather is likely to be clear and dry across all major Pulses grown areas in India and an alarm raised for rising temperature for NW India (Rajasthan, Gujarat). Currently Chana crop is in maturity to harvesting stage and prevailing higher temperature especially over Rajasthan has negative bearing on crop. In Rajasthan, the crop is in pod filling to maturity stage and rising temp. is posing threat to the crop. However, there has been no threat to the lentil and peas crop which is mainly in central India and temp. as of now is conducive for the crops.
- The rising temperature, is also posing a threat to summer crops mainly Moong and partly urad as the residual soil moisture will deplete fast which would lead to lower sown area where irrigation is unavailable.
- Meanwhile, new Chana and Masur crop arrivals have started in some places of MP and UP but in small quantity and is expected to increase post Holi festival in these two states.

Previous Update:

- Chana physical prices traded up by INR 50 per quintal at INR 4950 per quintal in Raipur while it remained unchanged at INR 5150 per quintal in Kanpur amidst steady demand. Chana prices may remain supportive in coming days due to increasing demand for Dal and Besan for upcoming festival (Holi) and expected procurement drive from next month in various States including Telangana, AP, Gujarat and Karnataka. However, any sudden spike in prices not likely as of now considering hefty stock with NAFED (around 20 LMT) and around 10% jump in sowing area in Maharashtra along with gradually increase in new crop arrivals in North India.

International Market Update:

- According to the Agriculture and Agri-Food Canada's (AAFC) February Outlook for the 2022-2023 crop year, Dry Peas production in the country is expected to decrease by 5% to 3.3 million tonnes during 2023-24 due to predicted decrease in seeding area as farmers are expected to attract towards other crop on better return. However, export volume during 2022-23 is likely to increase to 2.5 million tonnes on increased exports to Bangladesh.
- According to the Agriculture and Agri-Food Canada's (AAFC) February Outlook for the 2022-2023 crop year, Lentil production in Canada during 2023-24 is estimated to increase by 15% to 2.65 million tonnes from 2.3 million tonnes despite the expected fall in seeded area to mere 1.73 million ha. due to lower return compared to other crop. However, export is expected to increase to 2.3 million tonnes in 2022-23 due to strong demand from India and Turkey.
