- The Election Commission of India has approved fixed urea price hike by Rs 350 per tonne . The move will now raise the government urea subsidy bill by Rs 900 crore. The Director General of Fertilizer Association of India says the price hike will provide some relief to the urea manufacturers. The fixed cost of urea has remained unchanged since 2002-03. For a urea plant, the fixed cost mainly comprises establishment cost, annual maintenance cost, working capital, salaries, and interest. The industry demanded a hike of Rs700 per tonne and looking forward for further reforms in sector. The decision came ahead of the upcoming kharif-sowing season.
- A United States Trade Representative recently revealed that Indian FSSR (Food Safety and Standards Act, Rules and Regulations) pose barriers to American trade and the US will keep pressing India to remove obstacles to smoothen business relation. He states that Indian policies on wholesale foods labeling act as trade barriers in food trade. The Indian Legal Metrology Rules create mandatory package sizes in metric units excluding many US food products from the market since they are packaged in traditional English units (fluid ounces,

pounds, and pints) which would effect the USA canned and bottled drinks, packaged biscuits and bottled vegetable oils. In Pea and Pulses trade, shipments of all pulses to India be fumigated at the point of origin, allowing MB fumigation on arrival, if necessary. The United States asked India to permit the exportation of US pea and pulse consignments to India without fumigation at the port of origin provided they are inspected and, if necessary, fumigated at the port of arrival.

According to the Agriculture and Agri-Food Canada (AAFC), chana production in Canada is forecast to fall by 29% to 130,000 tonne in 2014-15 against the 182000 tonne expected during 2013-14 , also lower from 161,000 tonne produced in 2012-13. The decline in production is mainly due to expected fall in seeded and harvested area along with lower average yield in 2014-15. On Export front, rise of 70% projected during 2014-15 against the export during 2013-14. The increase in export is mainly due the higher carry-forward crop of previous year. In 2014-15, total supply is likely to reach 268000 tonne against the 245000 tonne available during 2013-14. In 2013-14, Canadian export decline due to reduced demand from Middle East and increased export competition from India and Mexico for kabuli variety.

Mexico is under harvest time now, the harvesting season is typically from March to May and only around 10-15% is small size (9 mm) chickpea. The total production in estimated near 181000 tonne (114000 tonne in Sinaloa region ; 52000 tonne in Sonora region and 15000 tonne in Baja California region) with 50000 tonne of carry-over stocks of last year. Mexico's total seed and domestic use demand is expected at 20000 tonne.

In Turkey, very little rain in the lentil growing region reported and the area is in moisture stress. The red lentil prices continue to rally and supported the Australian and Canadian export prospects.

Red lentils witnessed sharp rally on firm rally in Turkish and Indian market. Moreover, lower supplies from Australia also favors the upside movement. Market participants are eagerly waiting for numbers of Turkey's production and acres planted in Canada. In Canada, red lentils are trading up at 21.5-22 cents as recent hailstorm in India delay the harvest support the firm tone. However, prices are likely to come down to 18-19 cents (FOB). Lentils witnessed thin trading activity in Canada as logistical and transportation problems continue to obstruct the ability of North American shippers to respond to emerging demand.

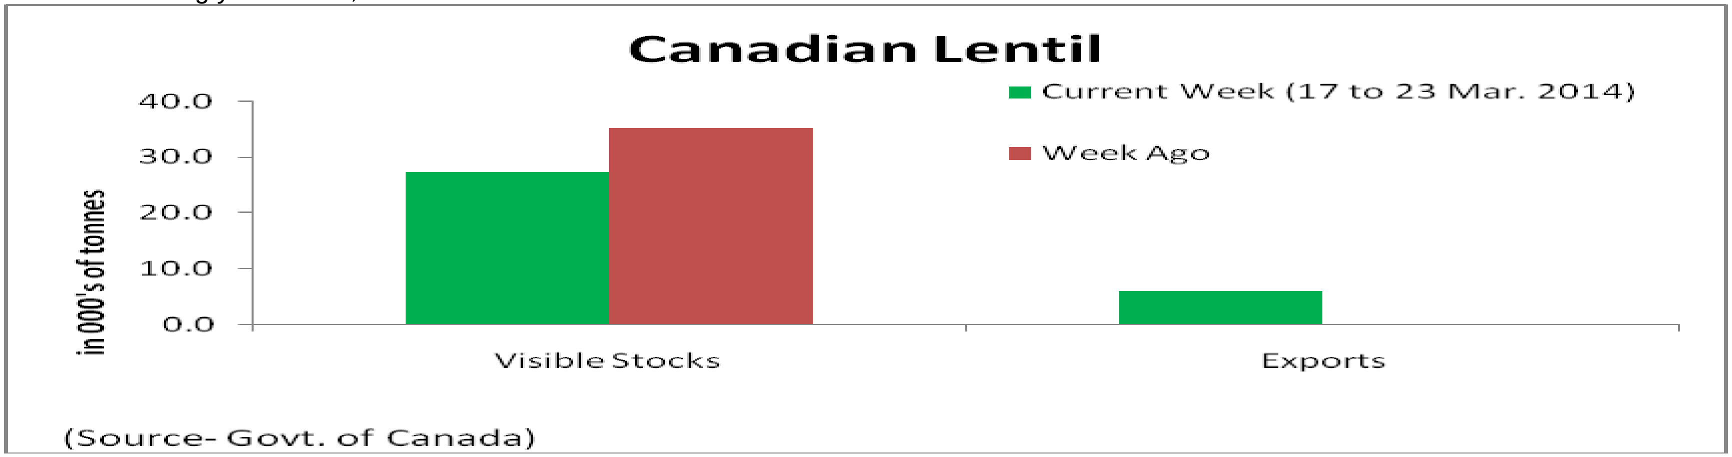
Lentils in international markets remain flat on thin trading activity as logistical and transportation problems continue to obstruct the ability of North American shippers to respond to emerging demand.

In Canada and Australia, last year carry forward stock is almost sold out and new crop is expected of high quality favoring bullishness for new season grain.

According to the Agriculture and Agri-Food Canada (AAFC), lentil production in Canada is forecast to fall by 8% to 1.7 million tonne(MMT) in 2014-15 against the 1.8 MMT expected during 2013-14 , but up from produced in 2012-13. Meanwhile, expected seeded and harvested area in 2014-15 is likely to rise, but lower average yield will results in to the downfall of production. On Export front, decline of 12% projected during 2014-15 against the expected record export during 2013-14. In 2013-14, record export expected at 1.7MMT on good demand from Turkey, India, and EU-27.

In Canada, red lentils are trading up at 21.5-22 cents as recent hailstorm in India delay the harvest support the firm tone. However, prices are likely to come down to 18-19 cents (FOB).

The Government of Canada reported the export of 5,900 metric tonne (MT) of lentils during the week ending March 23, lifting bulk exports for the current marketing year to 195,800 MT.



According to the Statistics Canada's December 31 stocks position report,
