Domestic:

- Pulses market noticed range-bound to firm movement.
- This year pulses prices are ruling higher and farmers intend to grow more pulses this year. In normal weather condition acreage is likely to increase by 20 percent. However, as farmers opine that lower rainfall can change farmer's intention and they may go for another lucrative cash crop. If growing areas receives normal rainfall, production and productivity are bound to increase. Under lower rainfall condition, increase in acreage could be restricted. However, in any condition pulses area in kharif would be higher in comparison to last year.
- Central Government has asked all state governments to submit details of their demand for pulses and details of this year crop and availability of pulses from last year's stock. The information will help central government to analyze the situation and decide the action plan to control the increasing prices of pulses. They can meet the demand by getting additional supply from surplus states or can import from other countries. A meeting regarding pulses supply-demand situation and likely price trend is scheduled next week to take the stock of the situation.
- As per latest update from market participants some forward deals of Chana from Australia have been struck at Rs4550 this week to be shipped during October-November. Masoor and Yellow peas deals too have been struck from Canada at Rs 5950-6000 and Rs 2550-2575 respectively for October-November shipment.
- In a latest measure to keep pulses market under control government has directed traders to update their stock of imported pulses every fortnight. The immediate effect of this order worked as a cap on firming up pulses market at this point of time. Traders and importers have started releasing imported pulses stock at regular intervals and it has made supply side easy in domestic market. Importers are not retaining stock in large quantity as they would have to give stock position twice in a month. Besides, Government has started thinking on import option through MMTC. Government may allow MMTC to import higher quantity of pulses and release it whenever prices in domestic market start firming up. These developments have restricted pulses market fundamentals. In brief, market is unlikely to show any spike in the short term.
- As per latest update from market participants some forward deals of Chana from Australia has been struck at \$785-90 last week to be shipped during July-August and \$775-80 for October-November shipment this year. At present Australia Chana is being imported at \$790. Forward deals at slightly lower price hints range bound movement in physical market. Australian Chickpea is currently being planted and should be finished by the end of June. Weather condition is favorable and yield may increase this year as compare to last year. Harvest is set to begin after September.
- Department of agriculture has revised down pulses production estimate by 5.6 percent in the 3rd Adv Est. released on 13th May,2015. Inclement weather and un seasonal rainfall affected the pulses crop adversely. It has been revised down from 18.43 MMT (2nd Adv. Est) to 17.38 MMT.
- Odisha government had set the production target of 0.587 MT of pulses in Kharif season. It includes 0.19 MT of Arhar, 0.15 MT of Mung and 0.176 MT of Biri. According to them pulses will be cultivated on about 0.965 million hectares with yield of 609 kg /Ha.

International:

- Chana to be buoyant in 2015:According to the GrainCorp Middle East, Europe and Africa regional manager Nick Poutney, the chickpea values to rise this season as India would fall short of producing enough to meet its demand and international supply remains low. He said India had planted 20% less than last year, meaning production was likely to be down by 2.1 million tonnes. He further states that “Demand will outstrip supply, so expect chickpea values to be quite buoyant.” (Source- The Land, Australia, Article by Gregor Heard of Fairfax Agricultural Media)
- Lentil witnessed firm tone in International markets on good export demand.
- **French Pea Jan. Export Up 3% M-O-M;Down 14% Y-O-Y-** French Pea export in Jan.2015 totalled at 13,700 metric tonne, up 3% from the 13,265 MT shipped the previous month, but down 14% from the 15,940 MT shipped the same month in last year. The Shipments so far in this season are down 39% at 72,485 MT.
- Myanmar has launched the world's first 23x7 multi-commodity exchange for the benefit of entire value-chain participants, including traders, importers, arbitrageurs and investors. Myanmar International Commodity Exchange Ltd (MICEx), a Pearl Group initiative, offers trading in varied commodity contracts across segments, with initial focus on pulses and gold. (Source-Business Standard)
- According to the Pakistan Bureau of Statistics (PBS),The country's pulses import mounted by 37% to 254.557 million dollars in July-February 2014-15.In term of volume, pulses import went up by 131, 293 metric tons (44 percent) to 429,977 metric tons in July-February 2014-15 from 298,684 metric tons in July-February 2013-14.
- Australia's Chana & Pea Production Up in 2015-16:ABARES- According to the ABARES (Agricultural commodities: March quarter 2015 report) , the Australian chana production in 2015-16 is expected to surge 636000 tonne from 517000 forecasted for 2014-15 on higher planted area. The field pea production is also expected at 327000 tonnes, up from 302000 tonnes forecasted for 2014-15 on higher planted area. Following table illustrates further:

Monthly Outlook for June: -

[\(Back to Content\)](#)

We expect mostly range bound movement .The prices are likely to take cue from imported pulses (INR movement) and sowing intention.

Chana(Chickpeas /Bengal Gram)

Fundamental Analysis and Outlook

Market Recap:

Chana prices noticed mostly firm movement in May on lower arrival and good demand in the market.

Price Dynamics:

In May, average prices in key markets were up by around 35-40%. Prices witness firm tone due to:

- Lower production on lower rabi sowing area.
- Lower crop arrivals in main growing belts.
- Good demand in the market.
- Disparity in chana import.

Seasonality Index hints toward chana is likely to notice steady movement in the June.(Appendix No. 12)

Chana Future Market Analysis(Appendix No. 3)

Chana remain steady to slightly firm at future market; monthly average price surge to Rs.4515 per quintal. And Future market seasonality hints towards range-bound to firm movement in coming months.

Production- According to the AgriWatch estimates, chana 2014-15 production is estimated at 78.9 lakh tonne.
