Pulses Sector-Highlights

[\(Back to Content\)](#)

Domestic:

- Pulses Prices noticed steady to firm movement in the month of September.
- According to IBIS (provisional data), import of pulses in September was around 2.36 Lakh tonnes at major ports in India, around 5% lower than August which was around 2.48 Lakh tonnes. Urad, Chickpea and Moong were imported lower whereas Tur, Lentil and Pea were imported higher in September as compared to August.
- With the rise of festive demand and decreased pace of arrival from local market and import, the prices of Urad continued to lend support in the cash market and resultantly prices firmed up. According to the preliminary advance estimate released by Agriwatch, Urad Kharif production is likely to be around 10.7 Lakh tonnes which is around 22 percent lower than the 1st advance estimate release by Government of India of 13.7 Lakh tonnes.
- With a view of boosting production of pulses at domestic front the CACP has recommended hike in MSP of Chickpeas to Rs 3425 per quintal from 3175 and lentil to Rs 3,325 from Rs 3,075 per quintal.
- Central Government extends the stock limit on pulses by one year to September 2016 and States will be allowed to take necessary steps to curb rising prices. Warehouse registered with WDRA would be subjected to the same stock limits imposed by State Governments except exporters; who store raw material for food processing and suppliers to retailers have been exempted.
- According to the first advance estimate 2015-16 by Ministry of Agriculture, pulses Kharif production is estimated to be 5.56 MMT which is around 1% lower than the fourth estimate of 2014-15 that was 5.63 MMT. Tur production is estimated to decline to 2.61 MMT as compared to 2.71 MMT (4th estimate 2014-15) but Urad production is estimated to increase to 1.37 MMT from 1.27 MMT.
- According to Ministry of Agriculture area under Kharif pulses throughout the country stood at 114.58 Lakh hectares as on 01 October this year, around 12% higher when compared to the area sown during corresponding period last year which was 102.56 lakh hectares.
- According to the final estimate released by Ministry of Agriculture, All India Tur, Urad and Moong sowing area are 37.78, 28.22 and 25.73 Lakh Hectare which is around 4%, 10% and 20% higher than last year which was 36.27, 25.57 and 21.41 respectively.
- According to the Gujarat Agriculture Department First Advance Estimate 2015-16, total pulses production has been set at 3.74 Lakh tonnes with area of 4.43 Lakh Hectares and yield of 843 kg/Ha. The estimated area has marginally increased from normal area which is 4.41 Lakh Hectares. However, pulses in Gujarat stood at 4.14 Lakh Hectares as on 31 August this year, around 10% higher than 3.78 hectares of area sown during corresponding period last year.
- The Wholesale price index for Pulses for the month of August, 2015 rose to 326 from 317.8 in previous month. The Pulses annual rate of inflation based on monthly WPI, stood at 36.46% for August 2015 as compared to 35.75% in the previous month.

International:[\(Back to Content\)](#)

- According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent to 2.083 MMT. Canada had produced 1.987 MMT last year. Despite hope for higher production, export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils between \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.
- According to the stat pub, harvest of the No.1 variety of Canada could increase from 5% (last year) to 12 % this year and No.2 variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Canadian lentil No. 2 variety is the FAQ (fair average quality) variety.
- According to the Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP), French Pea exports in the month of July were 34130 MT which is around 1% higher than the month of June that was 33720 MT. The increase in exports is due to good demand of pea from Indian subcontinent.
- According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 990 kilo tonnes which are around 78% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts mid September and crops start hitting India market from October onwards.

Monthly Outlook for October[\(Back to Content\)](#)

We expect pulses prices to show steady to slightly firm movement in coming month due to good festive demand.

Chana (Chickpeas /Bengal Gram) Fundamental Analysis and Outlook

[\(Back to Content\)](#)

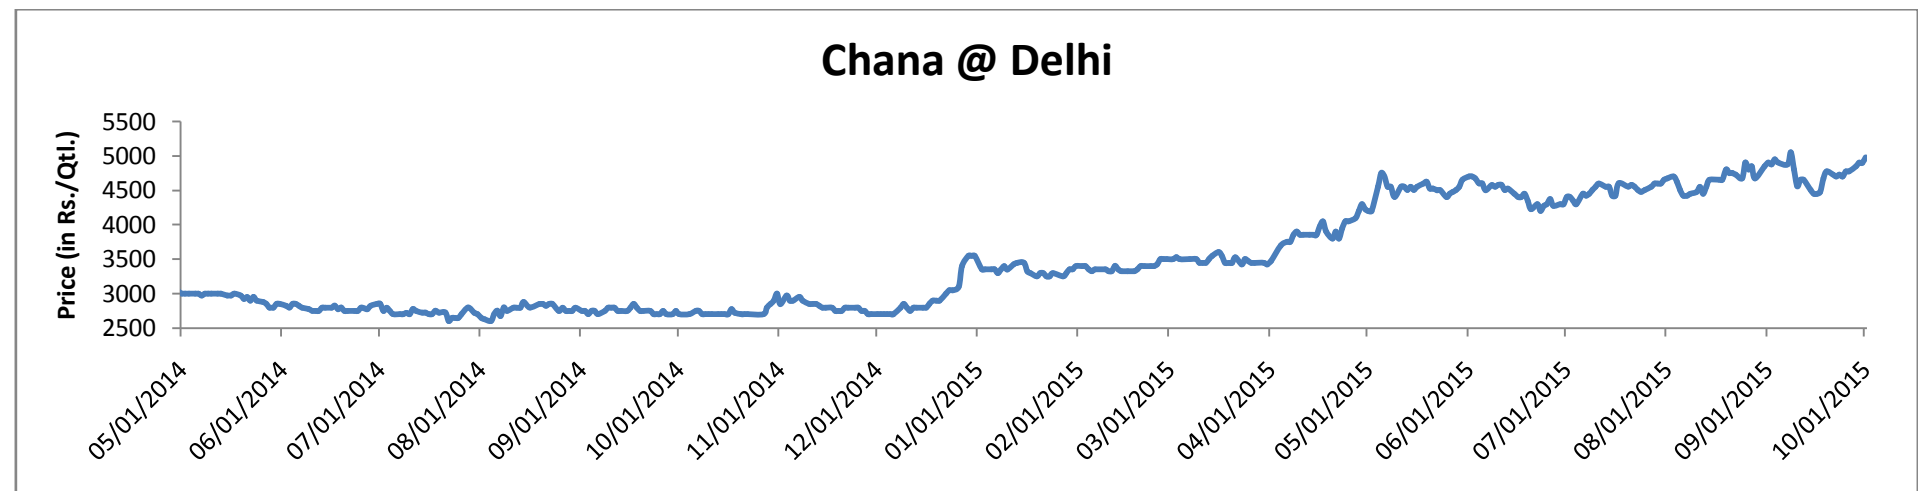

Market Recap:

Chana prices noticed range bound movement in September.

Price Dynamics:

In September, average prices in key markets were up by around 2-3%. Prices witness firm tone due to:

- Lower imports.
- Lowercrop arrivals in main mandis.
- Good Demand.

Seasonality Index hints that chana is likely to notice steady to slightly weak movement in the October.

Chana Future Market Analysis

Chana might remain steady to slightly firm at future market.

Production- According to the 4th advance estimates, chana 2014-15 production is estimated at 71.7 lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Chana in September was around 0.28 Lakh tonnes at major ports in India, around 34% lower than August which was around 0.41 Lakh tones.

Market Outlook for October

Chana prices are likely to witness range bound movement.

Field Pea (Matar/Dry Pea)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

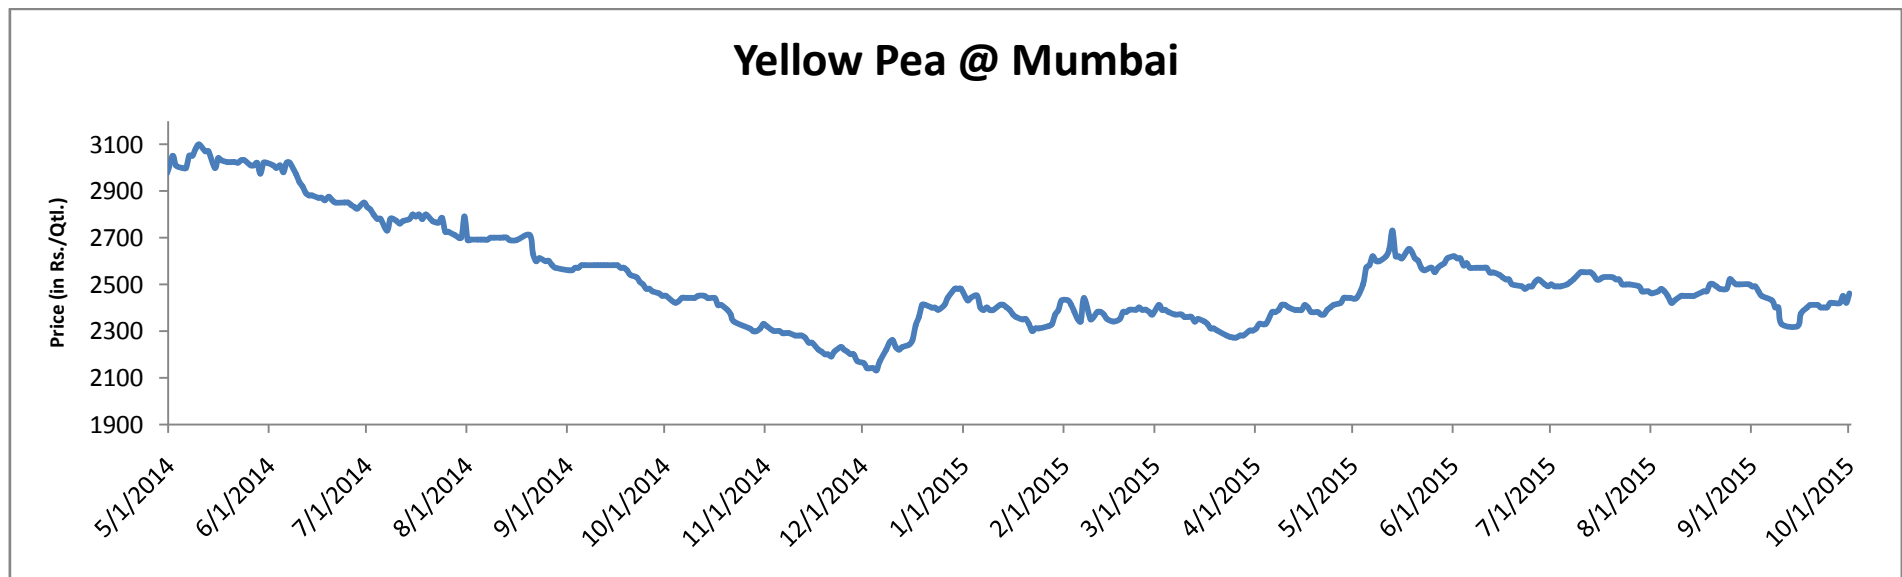

Market Recap:

Imported and domestic yellow peas witnessed mostly steady to slightly weak movement during the month.

Price Dynamics:

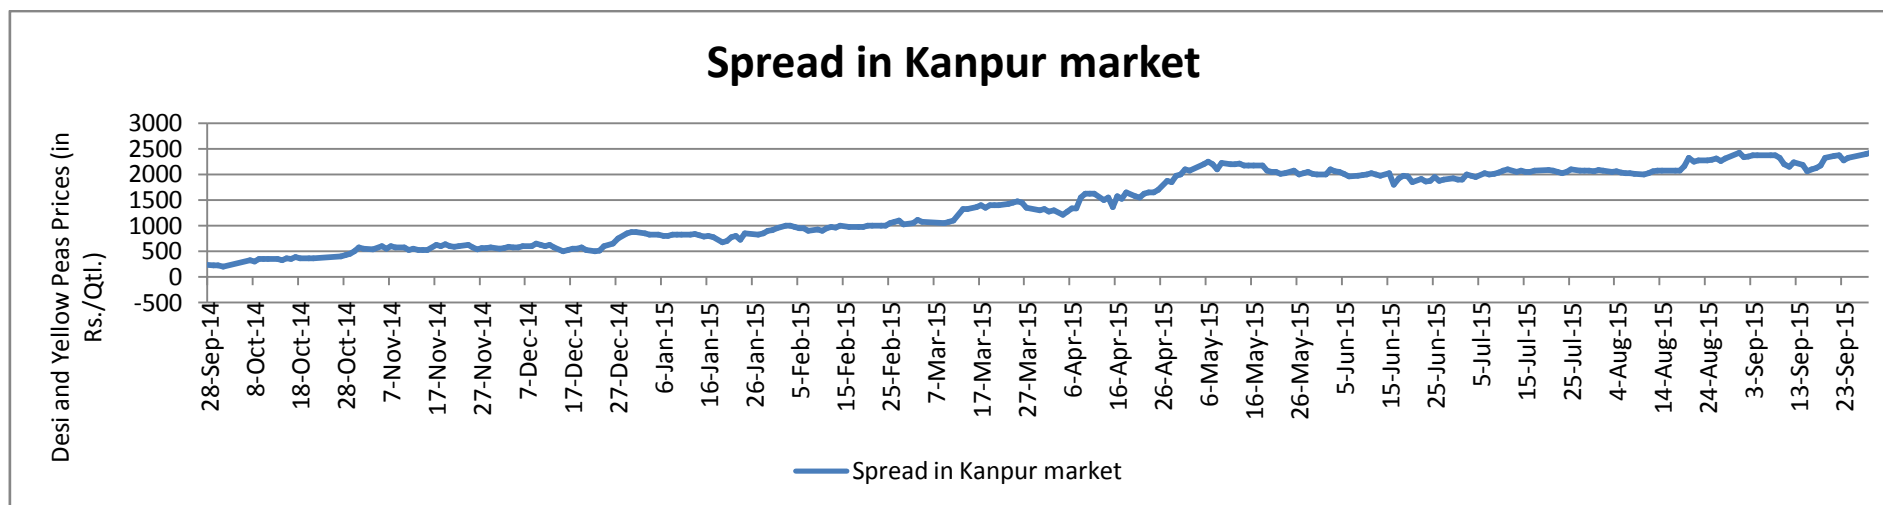

In September, yellow pea average prices at Mumbai and Kanpur remained weak by 2-3%. Prices remained weak due to:-

- Lower demand from the retailer
- Higher arrivals in the mandis
- Higher imports from normal.

Spread With Chana

The spread between chana and pea at Kanpur reached to 2450. Meanwhile, spread is expected to widen to Rs.2350-2550 per quintal in the coming days on relative firm movement in chana prices.

Seasonality Index depicts that pea prices are likely to notice weak movement in the coming month.

Import Dynamics

According to IBIS (provisional data), import of Pea in September was around 0.75 Lakh tonnes at major ports in India, around 2% higher than August which was around 0.74 Lakh tones.

Market Outlook for October

Prices of Pea are likely to remain range bound.

Masoor (Lentil/Masur)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

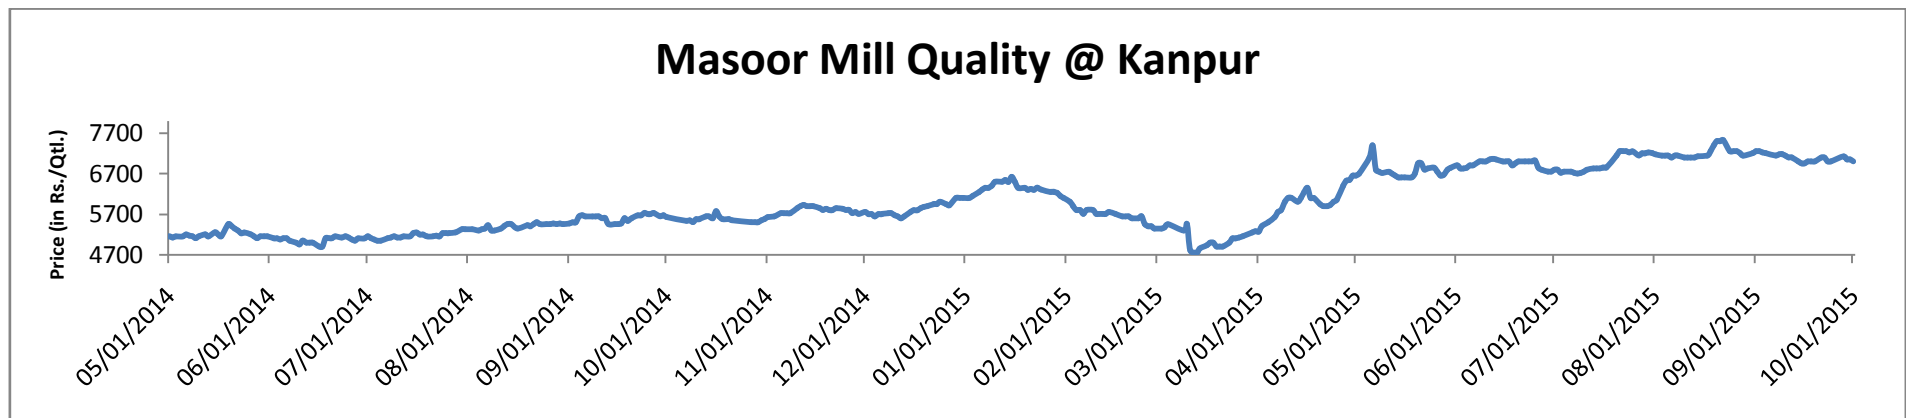

Market Recap:

Desi Masoor notice steady to weak movement.

Price Dynamics:

In September, average prices in key markets down by 2-3%. Prices up due to:

- Lower Demand
- Higher arrival in the mandis.
- Higher arrivals of imported masoor.

Seasonality Index depicts range bound movement in prices in the coming month.

Import Dynamics

According to IBIS (provisional data), import of Masoor in September was around 0.60 Lakh tonnes at major ports in India, around 9% higher than August which was around 0.55 Lakh tones.

Market Outlook for September

Prices are likely to notice steady to slightly weak movement.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Avare)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

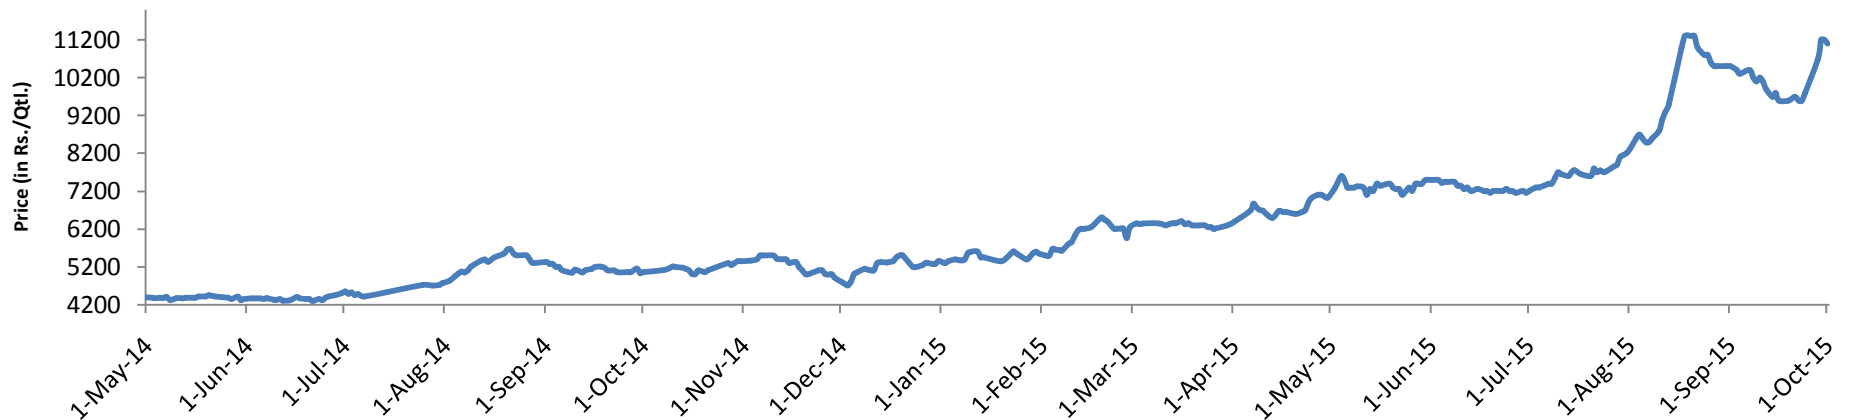

Market Recap:

During September, Tur noticed range bound movement.

Price Dynamics:

In September, average prices in key markets were up by 2-3% on higher demand. Prices take strong cues from arrivals reported in domestic markets and monsoon.

Tur @ Gulbaraga

Seasonality Index depicts range bound movement.

Production- According to the Agriwatch preliminary estimates, Kharif Tur 2015-16 production is estimated at 30.6 Lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Tur in August was around 0.41 Lakh tonnes at major ports in India, around 22% higher than August which was around 0.34 Lakh tons.

Market Outlook for October:

Tur prices are likely to remain steady to slightly firm due to higher demand.

Urad (Black Matpe/Black Gram)

[\(Back to Content\)](#)

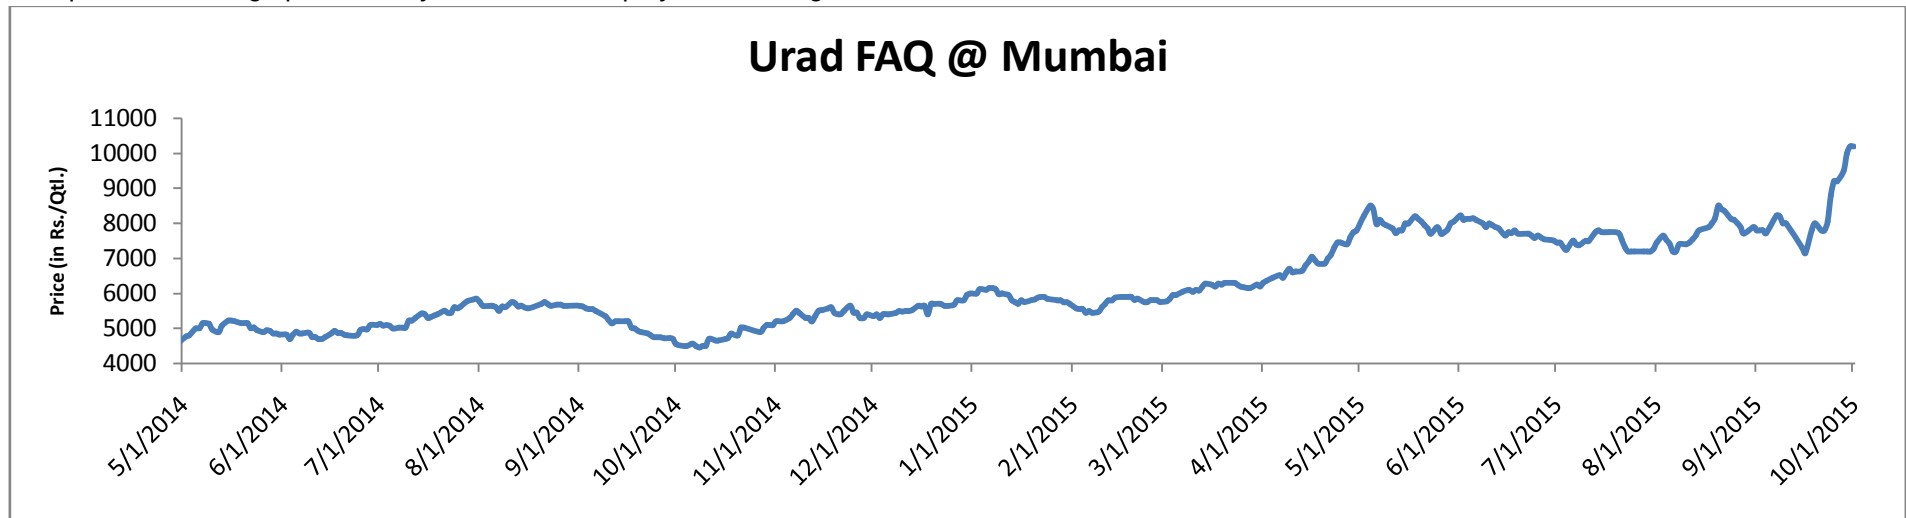

Fundamental Analysis and Outlook

Market Recap:

During September, imported and desi Urad prices noticed steady to firm movement.

Price Dynamics:

In September, average prices in key markets were up by 6-7% on higher demand.

Seasonality Index depicts steady to weak movement in prices in near term.

Production

According to the Agriwatch preliminary estimates, Kharif Urad 2015-16 production is estimated at 10.7 lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Urad in September was around 0.22 Lakh tonnes at major ports in India, around 30% lower than August which was around 0.32 Lakh tones.

Market Outlook for October

Prices are likely to remain range bound.

Moong (Green gram/Mung)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

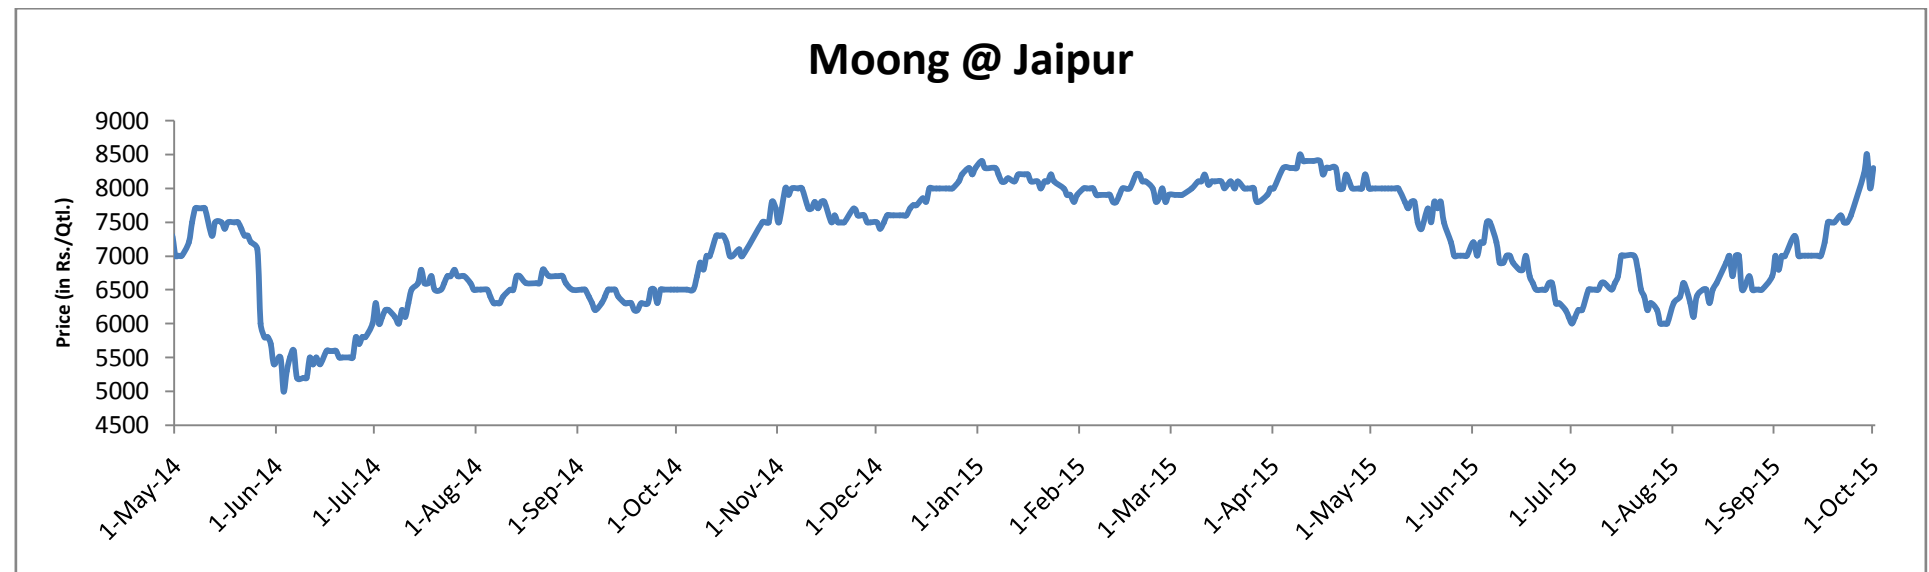

Market Recap:

Moong market witnessed steady to firm movement in September.

Price Dynamics:

In September, average prices in key markets were up by 11-12%. Following factors influenced Moong prices in September month:

- Lower imports.
- Higher demand.
- Higher prices of other pulses

Seasonality Index depicts steady to slightly weak movement in prices in near term.

Production-According to the Agriwatch preliminary estimates, Kharif Moong 2015-16 production is estimated at 10.2 Lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Moong in September was around 0.08 Lakh tonnes at major ports in India, around 17% higher than August which was around 0.10 Lakh tons.

Market Outlook for August:

Prices are likely to remain steady to firm.

Australian Pulses – Area, Production and Yield
[\(Back to Content\)](#)

Australia's Chana & Pea Production Up in 2015-16: ABARES- According to the ABARES (Agricultural commodities: September 2015 report), the Australian chana production in 2015-16 is expected to surge 990000 tonne from 555000 forecasted for 2014-15 on higher planted area. The field pea production is expected at 288000 tonnes, down from 290000 tonnes forecasted for 2014-15 on lower planted area. Following table illustrates further:

Australian supply and disposal of pulses

	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14
Crop	kt	kt	kt	kt	kt	kt
Pulses						
Production						
-lupins	708	823	808	982	459	626
-field peas	238	356	395	342	320	342
-chickpeas	443	487	513	673	813	629
Apparent domestic use ^a						
-lupins	404	470	621	416	290	310
-field peas	104	196	95	130	145	175
-chickpeas	1	1	39	93	1	0
Exports						
-lupins	304	353	186	565	169	316
-field peas	137	162	302	215	177	169
-chickpeas	508	503	474	581	853	629

^a-Calculated as a residual: production plus imports less exports less any observed or assumed change in stocks and, for wheat only, less seed use.

Note: Production, use, trade and stock data are on a marketing year basis: October–September for wheat; November–October for canola, peas and lupins. Production may not equal the sum of apparent domestic use and exports in any one year because of reductions or increases in stocks. The export data refer to marketing year export periods, so are not comparable with financial year export figures published elsewhere.
