 - India
 - Australia

Pulses Sector-Highlights

Domestic:

[\(Back to Content\)](#)

- According to IBIS (provisional data), import of pulses in October was around 4.88 Lakh tonnes at major ports in India, around 106% higher than September which was around 2.36 Lakh tonnes. Urad, Chana and Masoor were imported lower whereas Tur, Moong and Pea were imported higher in October as compared to September.
- In order to reduce the dependency on imports, Cabinet Committee on Economic Affairs (CCEA) has increased the MSP of Lentil (Masoor) and Chickpea (Chana) by Rs 250 each to Rs 3325 and Rs 3425 per quintal respectively. Apart from this, CCEA has also approved the bonus of Rs 75 per quintal for these two pulses over and above the support prices.
- Government has asked procurement agencies like Food Corporation of India (FCI), Small Farmers' Agribusiness Consortium (SFAC) and farmers' cooperative Nafed to procure one Lakh tonne of pulses mainly Urad, Arhar and Chana from the farmers from November 1 at MSP, but the prices of pulses in domestic market are hovering unexpectedly higher than MSP. Hence the target set by government is unlikely to be met under current market condition. Farmers may retain their stock in anticipation of higher prices in the months ahead. Only needy farmers would sell pulses and they would prefer to sell it at higher prices to private traders in smaller quantity.
- According to the Ministry of Agriculture, area under Rabi pulses throughout the country stood 20.65 lakh hectares as on 30th October this year, around 3% lower when compared to the area sown during corresponding period last year which was 21.31 lakh hectares. Despite higher domestic prices, the decrease in area is due to lower rainfall.
- Arrival starts from newly harvested Tur crop in limited quantity in Kanpur mandi. The price for the new crop was quoted at Rs 8300 to Rs 8400 per quintal. As new crop has higher moisture level, traders are offering lower quotes for the produce. It has moisture level of 15-16% and is coming from Meerut line with 100-125 bags per day.
- Farmers in Bihar are awaiting good showers of rain and if rains occur in the next 1 week it will boost up chana area by 15-20 % from last year. If rain doesn't occur in 7 to 10 days it may affect chana area by 20-30 % from last year. So occurrence of rain remains very crucial for chana area in Bihar.
- According to the local traders, Chana sowing started in GanjBasoda region of Madhya Pradesh but this year chana area may decrease as compared to last year due to less rainfall. Farmers in the region with water supply facility still tend to sow wheat as it is less prone to pest and frost attack as compared to chana.
- Maharashtra government has removed stock limit imposed on pulses importers this week. The decision will help to reduce the pulses prices as the stock which was lying on the ports is expected to enter into the market now.
- According to local media sources, Government of Tamil Nadu has imposed stock limit on pulses to curb the rising prices. Municipal corporation (big city) wholesalers can stock maximum 250 tonnes of pulses whereas retailers 6.25 tonnes, municipal council (small city) wholesalers 150 tonnes and retailers 5 tonnes respectively.
- Government of MP has imposed the stock limit on Pulses, seeing the drastically higher prices of the commodity. The stockist in the region having the population of three to ten lakh cannot hold the pulses more than four thousand quintal, whereas the limit for the region having the population of less than three lakhs is five hundred quintal.
- The Wholesale price index for Pulses for the month of September, 2015 rose to 333.8 from 326 in previous month. The Pulses annual rate of inflation based on monthly WPI, stood at 2.39% for September 2015 as compared to 2.58% in the previous month.

International:[\(Back to Content\)](#)

- According to the trade sources, Burmese Tur crop is in good condition and they are estimating around 4 Lakh MT productions this year. Harvesting of tur in Burma generally begins in December and export shipments start from January.
- In a view to keep the prices stable, Trading Corporation of Pakistan has issued two tenders to import 10,000 tonnes of Chickpeas. The tender for import of 5,000 each tons will be opened on 5th and 16th November respectively. Additional demand from Pakistan is expected to push up chickpeas prices in the international market.
- According to the Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP), French Pea exports in the month of August was 37285 MT which is around 9% higher than the month of July that was 34130 MT. The increase in exports is due to good demand of pea from India which imported 23,261 MT of peas in August month.
- According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent to 2.083 MMT. Canada had produced 1.987 MMT last year. Despite hope for higher production export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils in between \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.
- According to the statpub, Canada Lentil No. 1 variety harvest could increase from 5% (last year) to 12 % this year and No.2 variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Canadian lentil No. 2 variety is the FAQ (fair average quality) variety.
- According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 990 kilo tonnes which are around 78% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.

Monthly Outlook for November[\(Back to Content\)](#)

We expect pulses prices to show steady to slightly firm movement in coming month.

Chana (Chickpeas /Bengal Gram) Fundamental Analysis and Outlook

[\(Back to Content\)](#)

Market Recap:

Chana prices noticed firm movement in October.

Price Dynamics:

In October, average prices in key markets were up by around 7-8%. Prices witness firm tone due to:

- Lower imports.
- Lower crop arrivals in main mandis.
- Good Demand.

Seasonality Index hints that chana is likely to notice steady to slightly firm movement in the November.

Chana Future Market Analysis

Chana might remain steady to slightly firm at future market.

Production- According to the Agriwatch preliminary advance estimates, chana MY 2016-17 production is estimated at 84.0 Lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Chana in October was around 0.24 Lakh tonnes at major ports in India, around 12% lower than September which was around 0.28 Lakh tones.

Market Outlook for November

Chana prices are likely to witness steady to firm movement.

Field Pea (Matar/Dry Pea)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

Market Recap:

Imported and domestic yellow peas witnessed mostly steady to slightly weak movement during the month.

Price Dynamics:

In October, yellow pea average prices at Mumbai and Kanpur remained weak by 1-2%. Prices remained weak due to:-

- Lower demand from the retailer
- Higher arrivals in the mandis
- Higher imports from normal.

Spread With Chana

The spread between chana and pea at Kanpur reached to 2500. Meanwhile, spread is expected to widen to Rs.2400-2600 per quintal in the coming days on relative firm movement in chana prices.

Seasonality Index depicts that pea prices are likely to notice weak movement in the coming month.

Import Dynamics

According to IBIS (provisional data), import of Pea in September was around 2.78 Lakh tonnes at major ports in India, around 269% higher than September which was around 0.75 Lakh tones.

Market Outlook for November

Prices of Pea are likely to remain steady to firm in the coming month.

Masoor (Lentil/Masur)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

Market Recap:

Desi Masoor prices notice steady to slightly firm movement.

Price Dynamics:

In October, average prices in key markets up by 1-2%. Prices were up due to:

- Higher Demand
- Lower arrival in the mandis.
- Lower arrivals of imported masoor.

Seasonality Index depicts range bound movement in prices in the coming month.

Import Dynamics

According to IBIS (provisional data), import of Masoor in October was around 0.59 Lakh tonnes at major ports in India, around 2% lower than September which was around 0.60 Lakh tones.

Market Outlook for November

Prices are likely to notice steady to slightly firm movement.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Avare)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

Market Recap:

During October, Tur prices noticed firm movement.

Price Dynamics:

In October, average prices in key markets were up by around 28% on higher demand. But in the second quarter prices were weak due to stock limit imposed by government on importers.

Tur @ Gulbaraga

Seasonality Index depicts range bound movement as prices will take clue from new crop arrival.

Production- According to the Agriwatch preliminary estimates, Kharif Tur MY 2015-16 production is estimated at 28.2 Lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Tur in October was around 0.97 Lakh tonnes at major ports in India, around 133% higher than September which was around 0.41 Lakh tons.

Market Outlook for November:

Tur prices are likely to remain steady to slightly weak due expectation of new crop arrival in some areas.

Urad (Black Matpe/Black Gram)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

Market Recap:

During October, imported and desi Urad prices noticed steady to firm movement.

Price Dynamics:

In October, average prices in key markets were up by 38-42%. Prices were firm due to

- Higher Demand
- Lower Import
- Lower Arrival in Mundis

Seasonality Index depicts steady to firm movement in prices in near term.

Production

According to the Agriwatch preliminary estimates, Kharif Urad MY 2015-16 production is estimated at 10.7 lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Urad in October was around 0.11 Lakh tonnes at major ports in India, around 49% lower than September which was around 0.22 Lakh tones.

Market Outlook for November

Prices are likely to remain range bound.

Moong (Green gram/Mung)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

Market Recap:

Moong market witnessed steady to firm movement in October.

Price Dynamics:

In October, average prices in key markets were up by 11-12%. Following factors influenced Moong prices in October month:

- Lower mundi arrival.
- Higher demand.
- Higher prices of other pulses

Seasonality Index depicts steady to slightly firm movement in prices in near term.

Production-According to the Agriwatch preliminary estimates, Kharif Moong 2015-16 production is estimated at 10.2 Lakh tonne.

Import Dynamics

According to IBIS (provisional data), import of Moong in October was around 0.16 Lakh tonnes at major ports in India, around 86% higher than September which was around 0.08 Lakh tons.

Market Outlook for November:

Prices are likely to remain steady to firm.

Australian Pulses – Area, Production and Yield

[\(Back to Content\)](#)

Australia's Chana & Pea Production Up in 2015-16: ABARES- According to the ABARES (Agricultural commodities: September 2015 report), the Australian chana production in 2015-16 is expected to surge 990000 tonne from 555000 forecasted for 2014-15 on higher planted area. The field pea production is expected at 288000 tonnes, down from 290000 tonnes forecasted for 2014-15 on lower planted area. Following table illustrates further:

Australian supply and disposal of pulses

	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14
Crop	kt	kt	kt	kt	kt	kt
Pulses						
Production						
-lupins	708	823	808	982	459	626
-field peas	238	356	395	342	320	342
-chickpeas	443	487	513	673	813	629
Apparent domestic use ^a						
-lupins	404	470	621	416	290	310
-field peas	104	196	95	130	145	175
-chickpeas	1	1	39	93	1	0
Exports						
-lupins	304	353	186	565	169	316
-field peas	137	162	302	215	177	169
-chickpeas	508	503	474	581	853	629

^a-Calculated as a residual: production plus imports less exports less any observed or assumed change in stocks and, for wheat only, less seed use.

Note: Production, use, trade and stock data are on a marketing year basis: October–September for wheat; November–October for canola, peas and lupins. Production may not equal the sum of apparent domestic use and exports in any one year because of reductions or increases in stocks. The export data refer to marketing year export periods, so are not comparable with financial year export figures published elsewhere.
