Pulses Sector-Highlights

Domestic:

[\(Back to Content\)](#)

- According to IBIS (provisional data), import of pulses in January was around 5.71 Lakh tonnes at major ports in India, around 41% lower than December which was around 9.72 Lakh tonnes. All pulses except Chana were imported lower in January compared to December.
- According to the Ministry of Agriculture, area under Rabi pulses throughout the country stood 139.08 lakh hectares as on 28th January this year, around 3% lower compared to the area sown during corresponding period last year which was 143.01 Lakh hectares.
- Chana has started arriving in some mandis of Maharashtra in small quantity. Arrivals will gain momentum after mid February in these mandis. In other states arrival is due in March. Chana crop is expected in good condition due to recent favorable condition. According to latest report released by Ministry of Agriculture, Chana area till date (as on 28.01.2016) was registered at 85.48 Lakh Ha which is around -0.3% lower than the corresponding period of last year. Last year it was 85.74 Lakh ha.
- Rabi Urad sowing area till 28th January was registered at 8.16 Lakh Ha which is around 1% higher than the corresponding period last year. It was 8.08 Lakh ha. Last year. The higher area coverage is attributed mainly to area shifting from moong to urad. Crop condition in Andhra Pradesh and Tamil Nadu is average to good so far. As per traders view yield of incoming crop may be around 3-4 quintal/acre. Arrival may continue to 2-3 months this year major crop of Andhra Pradesh is expected earlier than normal schedule.
- Lentil sowing area till 28th January was registered at 13.45 Lakh Ha which was around 10% lower than the last year in the corresponding period. Last year it was 15.01 Lakh ha. Crop condition is average to good as recent weather condition was beneficial to crop. Farmers are expecting good crop this year. Arrival in small quantity started hitting some places of Madhya Pradesh region and good arrival is expected after mid February in these region. Arrival is expected from March in other States.
- As per feedback received recently from farmers and traders Tur crop condition seems normal. There is no major issue on quality front in Gulbarga and Latur, especially in Vidarbha region. In these mandis arrival will continue till the end of this month as Tur crop was harvested late in this region and pressure on cash market may sustain as demand as if now, is lower than normal expectation. However, size of grain is smaller than last year. On increasing expectation for higher prices once again like last year farmers have retained stocks to get maximum benefit and their retention has affected the normal pace of the arrival in the season.
- In order to create buffer stock of pulses, FCI NAFED and SFAC progressively procured around 4.7 Thousand tonnes of Urad and around 24.6 tonnes of Tur from different states. Government has also released import tender for buffer stock.
- The Wholesale price index for Pulses for the month of November, 2015 rose to 380.4 from 364.4 in previous month. The Pulses annual rate of inflation based on monthly WPI, stood at 4.39% for November 2015 as compared to 9.16% in the previous month.

^a - Calculated as a residual: production plus imports less exports less any observed or assumed change in stocks and, for wheat only, less seed use.

Note: Production, use, trade and stock data are on a marketing year basis: October–September for wheat; November–October for canola, peas and lupins. Production may not equal the sum of apparent domestic use and exports in any one year because of reductions or increases in stocks. The export data refer to marketing year export periods, so are not comparable with financial year export figures published elsewhere.
