Pulses Sector-Highlights

Domestic:

[\(Back to Content\)](#)

- According to IBIS (provisional data), import of pulses in March was around 2.25 Lakh tonnes at major ports in India, around 24% lower than February which was around 3.35 Lakh tonnes. Urad, Moong and Tur were imported higher this month whereas Masoor, Chana and Yellow Pea were imported lower compared to last month.
- Chana price has shown firmness in the starting of the month due to lower production estimate in Rajasthan. Import prices also got support from the news of damage of chana crop in Pakistan which increased the demand of Australian chana. However, arrivals have started in the main mandis which might put downward pressure on the prices. Stockiest are scared to store chana at higher level as they expect prices to come down by the end of April. Prices may rule stable to slightly weak as demand weakens at current price.
- Urad prices are likely to trade firm on the back higher international quotes, restricted release by stockiest in expectation of higher price. Higher in global market, slower release by local farmers too would continue to support urad market, demand is normal amid vacant pipeline. Traders and stockiest could not stock urad in peak arrival season due to higher price and they continue to wait for downward correction in the market. Unfortunately it didn't happen so far. However, slight downward correction might be seen in May as higher price may affect normal demand.
- As expected, arrival has increased in first week of April but it would get normal in coming weeks. Farmers of producing region still have 10-15% marketable surplus in their hands in expectation of higher prices in future and we expect them to release their stock when prices get firmer in coming month. Arrival is likely to continue with normal pace in coming weeks. With expectation of higher quotes for imports Agiwatch expects prices to rule firm.
- Moong cash market is likely to trade firm and it will encourage stockiest to release stock at improved price level. Demand for moong is good at present and millers' fresh buying interest would continue to support moong price at current level.
- Fear of lower production in India than various pegged out estimates and higher quotes in global market continue to lend support to lentil cash market fundamentals. Demand is good and stockiest are unwilling to release their stock at this point of time. However, expected arrival pressure in Bihar and Uttar Pradesh may pressurize lentil market in short to medium term.
- Expectation of lower crop size for yellow peas and higher prevailing prices of other pulses and costly import restrict yellow peas prices from dropping. AW expects prices market to rule firm.
- The Wholesale price index for Pulses for the month of January, 2016 falls to 370.1 from 378.2 in previous month. The Pulses annual rate of inflation based on monthly WPI, stood at -2.1% for January 2016 as compared to -0.58% in the previous month.

International:[\(Back to Content\)](#)

- USDA's Commodity Credit Corporation released purchase tender for 540 metric tonne (MT) of pulses for April-May shipment as food aid. Pulses have to be packed in 50 kg bags.
- According to the latest report, Canadian Lentil production for 2015-16 increases by around 19% to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers' bids are likely to increase from \$515 to \$685-715 per tonne.
- According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmers' bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 1013 kilo tonnes around 82% greater than 2014-15 estimates of 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
