Pulses Sector-Highlights

Domestic:

[\(Back to Content\)](#)

- According to IBIS (provisional data), import of pulses in April was around 3.51 Lakh tonnes at major ports in India, around 37% higher than March which was around 2.25 Lakh tonnes. Urad, Moong, Tur and Yellow Pea were imported higher this month whereas Masoor and Chana were imported lower compared to last month.
- In order to curb the rising prices of pulses, government has informed the States to put stock limit on all varieties of pulses. Further government has also asked the States to place their requirements for making allotment of tur and urad dals for retail distribution through their channels.
- Maharashtra government has issued a bill to fix the maximum selling price of pulses, though the bill is yet to be signed. The price of pulses which will be fixed will vary in metro cities, towns and villages. This move is likely to pressurize cash market in the short term.
- According to the trade source, Rajasthan mill association has decided to provide pulses at lower rate than ongoing market rate. Retail shops will be open, in which pulses will be provided at lower rate. Tur and Urad will be at Rs 120/kg while Moong Chilka at Rs 82, Chana at Rs 70/kg and Pea at Rs 40/kg.
- Chana prices are moving range bound due to uncertainty in the market. Central government has asked State governments to place stock limit on Chana which might drag prices downward. However, Chana demand is good and cash market prices may get support due to lower production estimate. Agriwatch expects Chana prices to show steady to firm movement due lower arrivals in the mandi and good demand from millers and stockiest.
- Urad prices currently showing some downward correction due to higher imports from Burma and normal demand from millers. Agriwatch expects prices to show steady to firm movement in coming days as demand will increase at lower rates and stockiest will also restrict their release. Higher quotes in global market and slower release by local farmers too would continue to support urad cash market.
- Moong cash market is likely to trade steady to weak due to higher availability and lower demand. Stockiest have released some of their stock at higher prices but major portion is still in their hand as prices have not moved northward as per their expectation.
- Tur prices are moving down due to lower demand and uncertainty in the market regarding government action against higher prices of Tur. Agriwatch expects prices to show some firmness due to higher quotes from Burma amid farmer's/stockiest unwillingness to sell at lower rates.
- Pea prices are likely to show steady to firm movement due to good demand. Traders and stockiest are buying at the current price for stock, in expectation of higher prices in medium to long term.
- The Wholesale price index for Pulses for the month of March, 2016 falls to 346.6 from 356.4 in previous month. The Pulses annual rate of inflation based on monthly WPI, stood at -2.7% for March 2016 compared to -4.93% in the previous month.

International:[\(Back to Content\)](#)

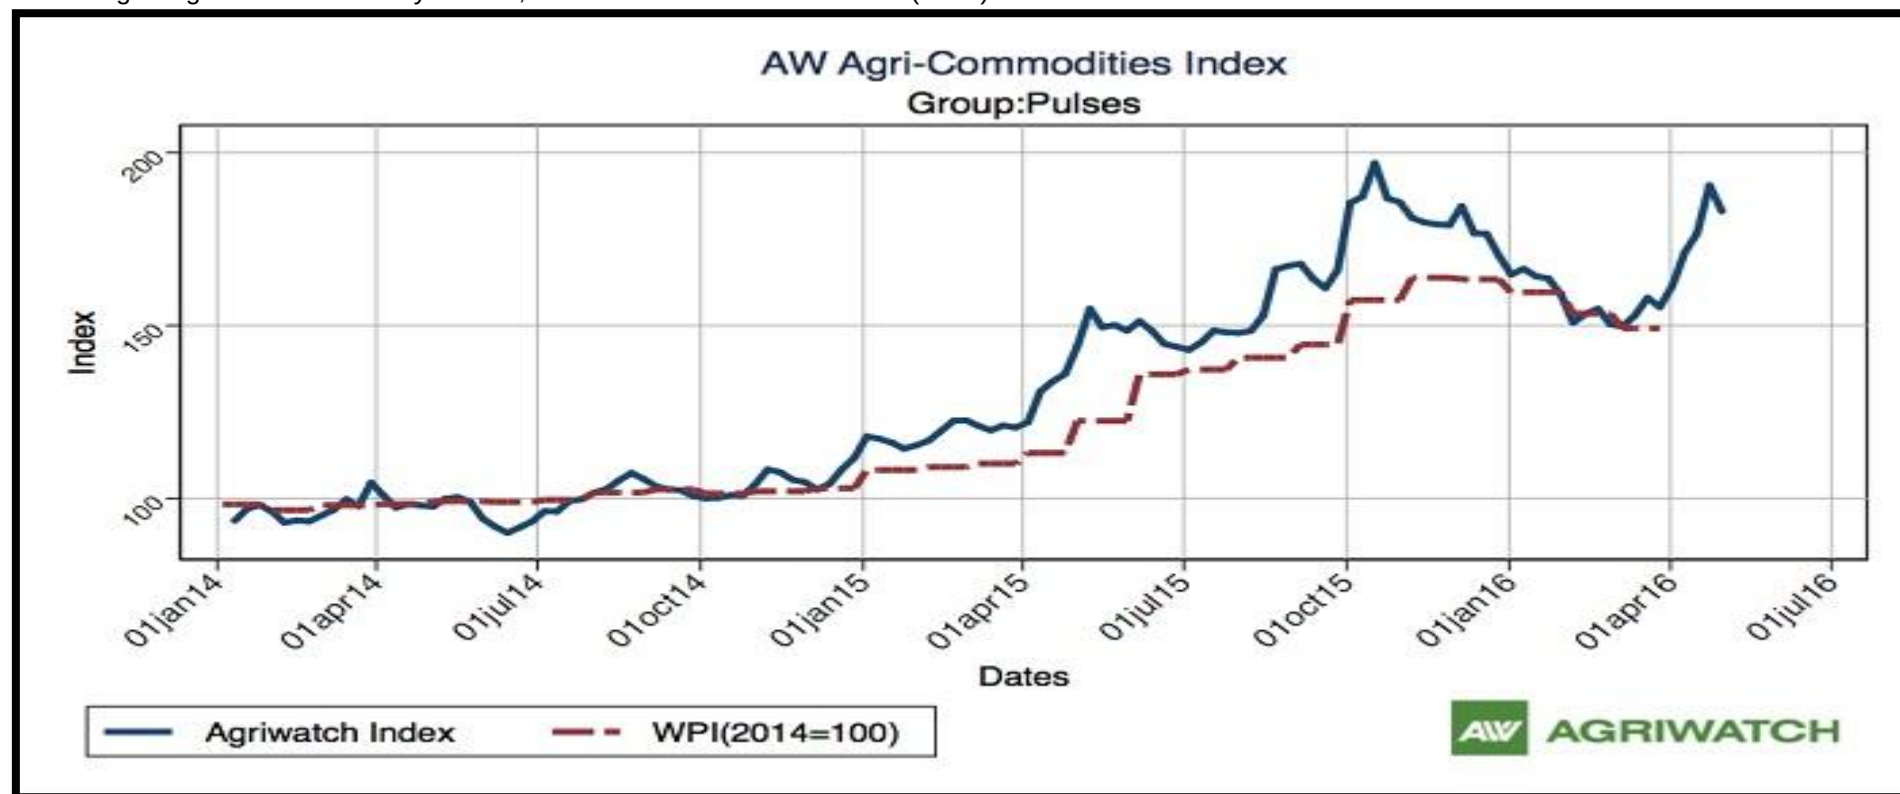

- USDA's Commodity Credit Corporation released purchase tender for 540 metric tonne (MT) of pulses for April-May shipment as food aid. Pulses have to be packed in 50 kg bags.
- According to the latest report, Canadian Lentil production for 2015-16 increases by around 19% to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers' bids are likely to increase from \$515 to \$685-715 per tonne.
- According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmers' bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 1013 kilo tonnes around 82% greater than 2014-15 estimates of 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start reaching India market from October onwards.
