Pulses Sector-Highlights

Domestic:

[\(Back to Content\)](#)

- According to IBIS (provisional data), import of pulses in May was around 2.29 Lakh tonnes at major ports in India, around 35% lower than April which was around 3.51 Lakh tonnes. Urad and Moong were imported higher this month whereas Tur, Yellow Pea, Masoor and Chana were imported lower compared to last month.
- According to the Third advance estimate, All India Chana production has been lowered down to 7.48 MMT which is around 7.5% lower than previous estimate. Second production estimate of chana was of 8.09 MMT. Agriwatch expects prices of chana to show steady to firm movement in coming days due to good demand from millers/stockiest and lower arrival. However, prices may take some downward movement due to profit booking and demand could lower at higher price.
- According to the third advance estimate, India Urad production has increased to 1.88 MMT which is around 8% higher than the second advance estimate. Second advance estimate was 1.74 MMT. Government also increased MSP of Kharif urad by 9% to Rs 5,000 per quintal from Rs 4,625 in 2015-16 in order increase the area. Agriwatch expects prices of Urad to show steady to weak movement due to arrival of late rabi crop and expectation of higher sowing area in Kharif. Imports from Myanmar may also increase as they may also try to clear their stock at present prevailing market prices.
- According to the third advance estimate, India Moong production has increased to 1.59 MMT which is around 3% higher than the second advance estimate. Second advance estimate was 1.55 MMT. Government also increased MSP of Kharif moong by 8% to Rs 5,225 per quintal from Rs 4,850 in 2015-16 in order increase the area. Moong cash market is likely to trade steady to weak due to higher availability and lower demand. Arrival of late rabi crop may not let the market to move northward.
- In order to curb the rising prices of tur, central government is providing tur at Rs 66/kg to states who can sell these in retail market at maximum price of Rs 120/kg. At present, Tur prices are moving slightly weak due to lower demand and lower imports quotes from Burma. Agriwatch expects prices to show steady to slightly weak movement in coming month due to higher availability and expectation of higher area coverage in this year due to favorable weather condition and government decision to increase the MSP of Tur by 9% to Rs 5,050 per quintal for 2016-17 from Rs 4,625 per quintal last year.
- Overall demand for masoor remains weak due to Ramadan started this month and it will continue to affect normal demand in the market throughout June. Stockiest have stored out masoor on high price and whenever prices move up they will release it and cash market would decrease taking clue from market fundamental. So Agriwatch expects masoor market to trade range bound to slightly weak this month.
- FSSAI has issued a regulation draft on imported pulses to ensure quality. They have fixed the foreign matter limit at a maximum 3 per cent by weight. Out of 3 percent allowed maximum of 0.5 percent by weight may be inorganic matter and impurities of animal origin.
- In anticipation to fulfill the shortage of pulses in future, Indian government is in discussion with Myanmar for G- to- G imports for pulses. If materialized, it will help India have sufficient buffer stock of pulses and in case of unexpected uptrend; government would be able to curb it on time. It will also give signal to market participants not to drag market up.
- The WPI has risen from 346.6 in March 2016 to 360.4 in April 2016 for pulses. There has been a considerable rise in WPI of Gram (282.4 for March 2016 and 301.8 for April 2016), Tur (274.1 for March 2016 and 383.8 for April 2016), Urad (495.6 for March 2016 and 505.5 for April 2016) and Moong (390.5 for March 2016 and 398.4 for April 2016).

International:[\(Back to Content\)](#)

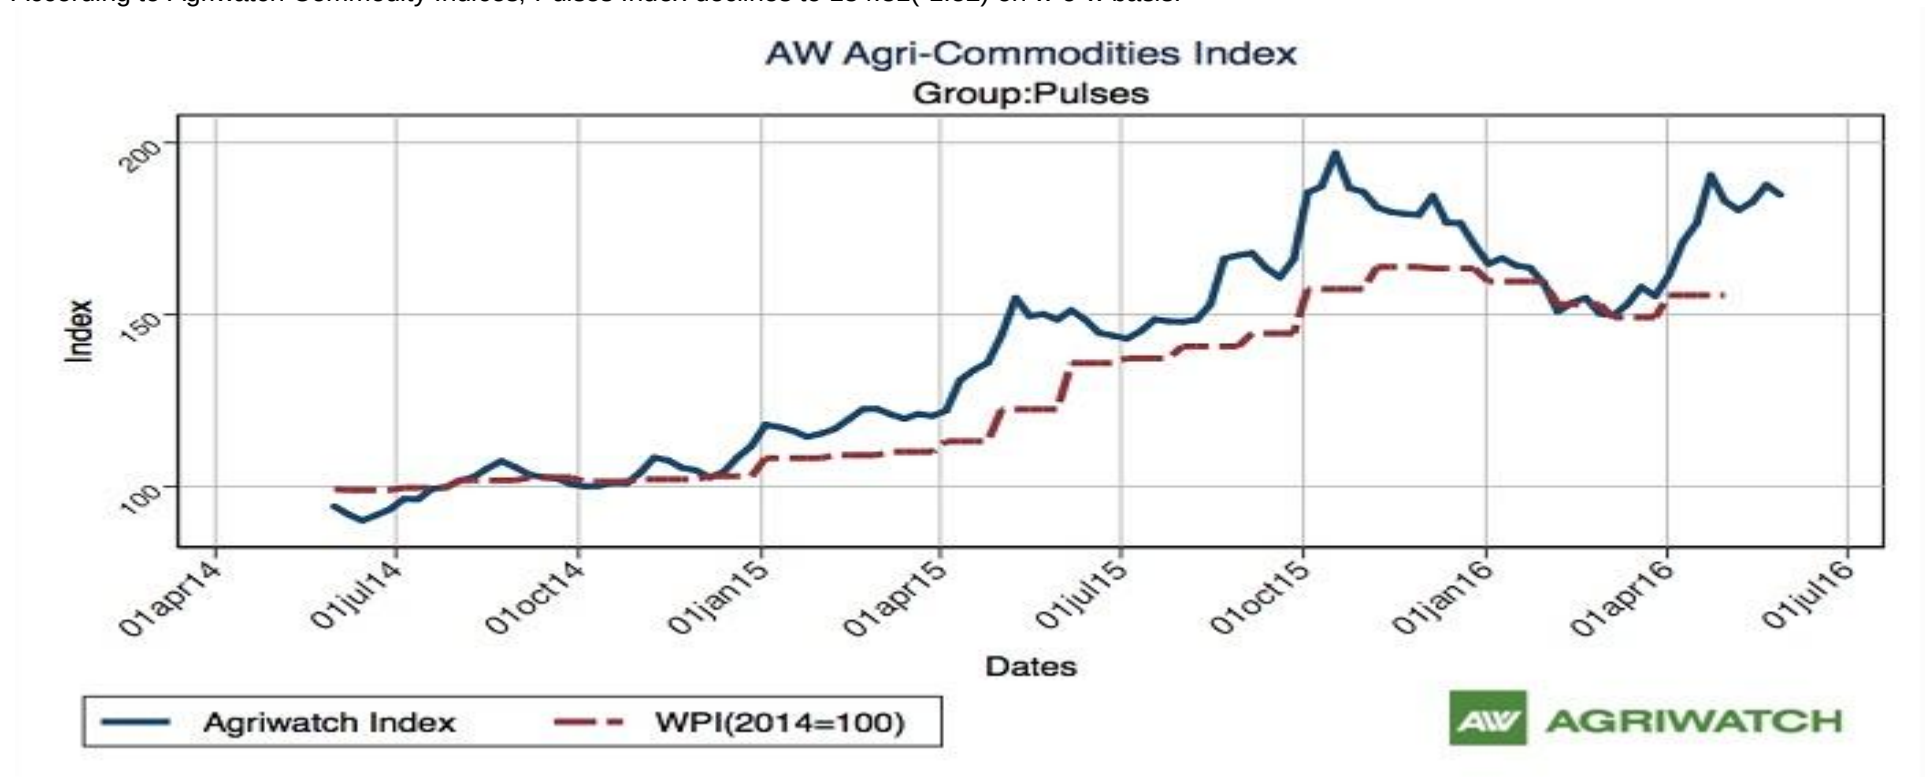

- According to the latest report, Canadian Lentil production for 2015-16 increases by around 19% to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers' bids are likely to increase from \$515 to \$685-715 per tonne.
- According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmers' bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 1013 kilo tonnes around 82% greater than 2014-15 estimates of 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start reaching India market from October onwards.
