Pulses Sector-Highlights

Domestic:

[\(Back to Content\)](#)

- According to IBIS (provisional data), import of pulses in June was around 3.45 Lakh tonnes at major ports in India, around 51% lower than May which was around 2.29 Lakh tonnes. All pulses except Tur was imported higher in the month of June as compare to May.
- Despite SEBI closing Chana contract in future market and Government decision to import 5000 tonnes of Chana to sell Chana Dall at Rs 60/Kg through NCCF (National Consumer Cooperative Federation) outlets in Delhi, Chana prices has shown firm movement. Main reasons for increase in prices are good demand and lower production estimate. Agriwatch expects prices of chana to show steady to firm movement in coming month due to good demand from millers, lower arrivals in the mandis and lower imports.
- According to the latest Kharif sowing data released by Ministry of Agriculture, Tur sown area as on 1st July, 2016 was recorded at 9.29 Lakh hectares which is around 1% lower than at the corresponding time period last year. Last year it was 9.37 Lakh hectares. Agriwatch expects Tur prices to show range bound to slightly weak movement in coming month due to lower demand, higher availability and expectation of higher area coverage in this year due to favorable weather condition. Moreover, central government decision to provide tur at Rs 66/kg to States who can sell these in retail market at maximum price of Rs 120/kg will restrict tur prices to move northward.
- According to the latest Kharif sowing data released by Ministry of Agriculture, Urad sown area as on 1st July, 2016 was recorded at 4.22 Lakh hectares which is around 2% higher than last year at the same time period. Last year it was 4.13 Lakh hectares. Agriwatch expects Urad prices to show range bound to slightly weak movement as market participants will only do need based buying as they expect higher production this year and demand could fall at higher price. However, urad prices may not show steep fall due to empty pipeline.
- According to the latest Kharif sowing data released by Ministry of Agriculture, Moong sown area as on 1st July, 2016 was recorded at 4.46 Lakh hectares which is around 29% lower than last year at the same time period. Last year it was 6.31 Lakh hectares. Moong cash market is likely to trade steady to weak due to higher availability and lower demand. Regular import arrivals and higher production estimate of coming crop may prevent the market from moving northward.
- In order to ensure continuous flow and to curb down rising prices of pulses, Government decides to increase the buffer stock of pulses from 1.5 Lakh tonnes to 8 Lakh tonnes. It also approves to import 3 Lakh tonnes of green lentil, 2 Lakh tonnes of yellow peas, 1Lakh tonnes of red lentil and 20 thousand tonnes each of Urad and Pigeon peas.
- In order to restrict any upward movement of pulses, Odisha government has reduced the currently applicable 5% Vat on pulses to 1% for three months. In recent past, prices of pulses remained boiling due to lower production estimate; reduction in VAT by 4% would help to cool down upward momentum.
- In order to curb prices and to maintain regular supply of pulses, Haryana government lowers stock limit of pulses for traders, dealers and millers. Stock limit for wholesalers, distributing agents and selling agents has been reduced to 150 quintals from 250 and for retailers it has been reduced to 15 quintals from 25 quintals. Millers would be able to keep only 1/24th of total annual milling done for raw material and 1/48th of total annual milling done for finished goods.
- The WPI for Pulses has risen from 360.4 in April 2016 to 385.8 in May 2016. There has been a considerable rise in WPI of Gram (301.8 for April 2016 and 330.6 for May 2016), Tur (383.8 for April 2016 and 393.4 for May 2016), Urad (505.5 for April 2016 and 562.2 for May 2016), Masur (331.2 for April 2016 and 346.5 for May 2016) and Moong (398.4 for April 2016 and 405.2 for May 2016).

Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- According to the latest ABARES report, Australian Chickpea production forecast 2016-17 is 1090 kilo tonnes which are around 8% greater than 2015-16 production estimate of 1013 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- According to the latest Saskatchewan Agriculture's weekly Crop Report, pulses crop are developing faster than normal this year, with 20% of the crop ahead of normal and 76% at a normal State of development for the third week of June. The majority of the crops are in good-to-excellent condition though excess moisture is causing concerns in some areas. Harvesting of pulses generally begins in August and if the weather continues to be favorable hope for higher production of pulses increases this year.
- According to the apk-inform, Russia pea export during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India's imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.
- According to the latest Statpub report, France pea export increased by 210% to 42.16 Thousand MT in month of April from previous month of 13.60 Thousand MT and it is around 106% higher than 20.51 Thousand MT shipped during the same month last year. Total shipments clearance for ten months this year (July to April) is around 27.74 Lakh MT which is 105% higher than 12.06 Lakh MT shipped during the same month last year. Good demand from India and lower stock in domestic market due to lower production this year would continue to lend support to cash market in France and quotes are expected to remain stable to firm in the near term.
