Pulses Sector-Highlights

Domestic:

[\(Back to Content\)](#)

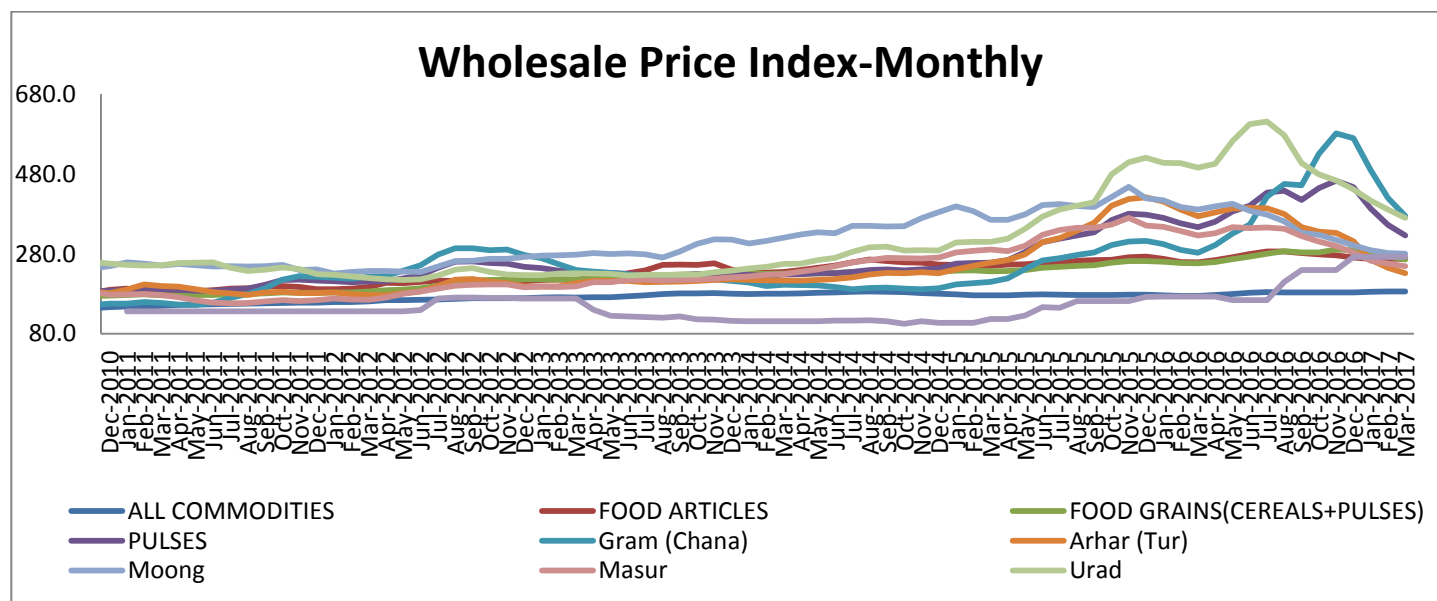

- **Pulses cash markets traded further down against normal market expectation during** the month of April and pressure still continues barring Urad and Chana. Tur has touched its low of two years. Availability remains higher with record production over 22 MMT (Govt. estimate) and record import of 5.67 MMT against normal demand of 24 MMT per year. Higher availability of 39 to 40 lakh tonne, stock limit by various states, limited procurement in particular region and lower demand from retailers due to mango season continued to pressurized market. Overall tone in pulses market except Chana and Urad remains weak.
- **Govt.'s procurement agency Nafed has stopped procurement of pulses from** kharif season. However, purchase continues from Rabi pulses. There is a report that Nafed is procuring Chana and Masur from UP, MP and Rajasthan on market price. Total 18708 tonne Chana and Masur have been procured till 25th April-2017. Total 16728 tonne Chana has been purchased. Out of total, 15331 tonne has been procured from Rajasthan. MP figure is lower and is limited to 1253 tonne. UP contribution is only 143 tonne.
- **In case of Masur total 1980 tonne has been procured till 25th April-2017.** Out of this 1501 tonne has been procured from Uttar Pradesh and 480 tonne from M.P. As both pulses are ruling higher than MSP, govt. is procuring these pulses at prevailing market price.
- **Overall Chana All India average price increased by 5 % to Rs 5646 in April** against Rs 5377 in March-2017. Despite current pressure Chana is unlikely to trade lower from current level. Agriwatch expects firmness from June in Chana Market. In May, range bound movement is expected due to weak retail demand.
- **All India average price for Urad decreased by 1.44 % to Rs 5865 in April** against Rs 5951 in March-2017. More dip is unlikely and it would move up from current level as pipeline is totally vacant, sellers are unwilling to sell amid continued demand from processing industry. Agriwatch expects firmness in Urad from Mid-May.
- **In case of Lentils all India average price decreased 2.48 percent to Rs 4554 in April** against Rs 4670 in March-2017. Overall all tone in Lentils market remains steady to firm. However, it may continue to trade range bound in May due to local demand factors and import flow from Canada and Australia at competitive price.
- **Despite imposition of 10 % duty on selected countries on Tur, average prices** decreased by 2.87 percent to Rs 4396 in April. It was ruling at Rs 4526 per qtl. in March-2017. Pressure still continues due to import flow from Myanmar, Tanzania amid higher availability in domestic market and selling from central pool stock. In May, Tur prices may trade steady to slightly weak. Recovery in market is expected June onwards when sowing starts. There is a common view in market that Tur area would decline by 25 to 30% this year.
- **Ukraine offers yellow peas at \$335 per T CiF Nhava Sheva and \$340 at Kolkata** for May delivery. Turkey offers split red Lentils at \$525 CnF at Nhava Sheva for immediate delivery. Canada offers broken red Lentils at \$550 per TCnF Nhava Sheva for May delivery. Australia is offering Kabuli Chickpeas at \$955 per t for June /July delivery. Australian desi chana is being offered at \$980 for June, \$995 for July and \$795 for Oct. Nov delivery. Australian Moong is being offered at \$935 for May delivery. Tanzania Moong offered at \$690 per tonne, and Mozambique at 640 per tonne.
- **Burma decreased CnF quotes by \$45 to \$560 per tonne in past one week.** Its CnF quote was \$605 per tonne in the third week of April. Tanzania quotes too decreased by \$50 to \$555 per tonne for delivery in May/June at Nhava Sheva port.
- **AW preliminary production estimate for Chana for 2017-18 has been pegged at over 90 Lakh Tonne** this year based on normal weather condition, around 13 % higher area coverage from last year and normal to good crop condition so far.
- **Kharif Tur production 2016-17 (crop is coming into markets) has been pegged at 38.59 lakh tonne** against 24.9 lakh tonne in 2015-16. Around 14 lakh tonne higher production has pressurized market.
- **Overall sentiment in pulses market remains under pressure barring some selective pulses.** As prices are at bottom, more dip is unlikely in May. Monsoon rains too would be price directing factor.

International:
[\(Back to Content\)](#)

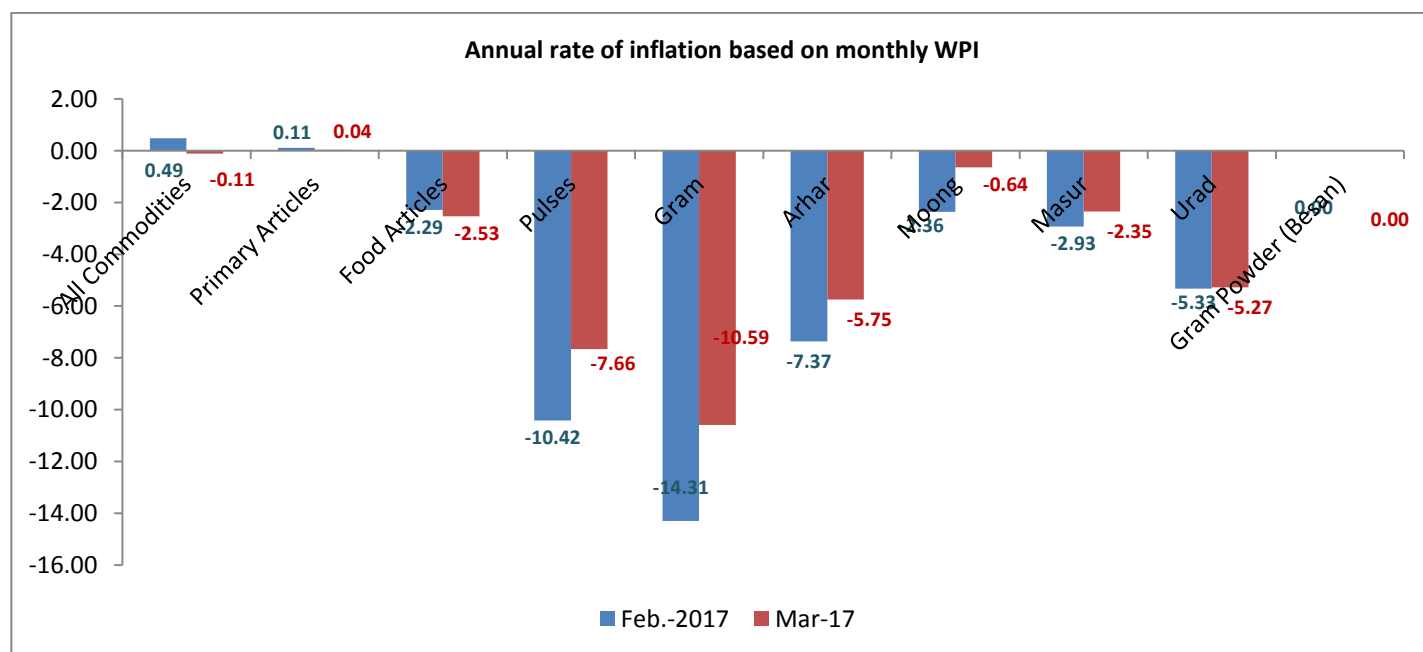

- Ukraine has exported around 3.33 lakh tonne peas so far in 2016-17 marketing year** started from July 2016. It had exported 1.82 lakh tonne during the corresponding period last year. As export demand from Asia continues, CnF quotes remain steady to slightly firm. **Red Lentils** in Western Canada hovers around 47 to 48 cent per pound. However, new crop bids hinge in range of 31 to 39 cents per pound. **Red Lentils** are being offered at 22 to 26 cents per pound. Canada offers **Kabuli Chickpeas** at 67 to 68 cent per pound. Against it **Burmese CnF** eased slightly in this week.
- Experts differ on Canadian pulses acreage for the crop year 2017-18. Notably, Canada** had produced record Peas and Lentils last year owing to record area coverage. Survey based estimates of statistics Canada, see Lentils area may vary from 3.9 to 6.1 million acres against 5.9 million acres covered last year. In case of Peas area, estimate varies from 3.6 to 4.8 million acres against last year coverage of 4.2 Million acres. The main reason behind a wide gap in acreage estimate is mainly attributed to uncertainty over Indian demand and quality issues seen in Canadian crop last year. These factors go in favour of lower acreage. However, good return per acre and low inputs cost, go in favour of higher area coverage. Govt.'s estimate is yet to come. Lower price factor too may impact final size of the acreage.
- Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year. Area coverage has increased from 2.39 lakh ha to 2.9 lakh ha and with expected 3.16 tonne per ha, yield production may touch 9 lakh tonne this year. It has exported around 3 lakh tonne peas in first eight months of 2016-17. Higher acreage would compensate likely acreage loss in Canada.
- Driven by strong demand production, pulses in Black Sea region is bound to increase.** Around 18 to 20 % area increase against 2015 coverage in Russian and Ukraine is expected this year. Domestic demand of peas in both countries has been almost constant. However, demand from India, Pakistan and other Asian countries, Europe is continuously increasing. This has promoted farmers of Russia and Ukraine to plant more area under peas in 2017-18. Increasing demand of peas world over and higher planting intensity would enable Black Sea Region as top suppliers of peas next season, replacing Canada at second position. Russian and Ukraine origin peas are comparatively cheaper from Canada.
- Canada has revised its average price estimates for pulses for crop year 2016-17.** Canadian Govt agency has revised average price for Chickpeas, Peas and Lentils up to C\$ 910-930 per T, 290-310 & 610-615 per T. This shows strong demand in Canadian market continues. In Jan average prices estimate for the year were C\$900-930 for Chana, C\$280-310 for peas and C\$605 -635 for Lentils.
- During 2016-17 crop year, Canada is expected to produce 48.36 lakh tone peas, 32.48 lakh T Lentils and 82,000 T Chana.** Against this in 2017-18 production of chickpeas, peas and Lentils is likely to increase to 1.45, 42.50 and 35 lakh tonne. Peas production would decrease due to lower prevailing price and weakened demand from India. If demand continues average price estimate may be revised further up.
- Australian Chickpeas farmers are expected to cover higher area under this crop in 2017** due to conducive weather and strong demand from India. Chickpeas prices in Australia jumped around \$125 to \$135 per tonne to \$915 in last one month. Demand for Chickpeas continues from India, Pakistan and B, desh. Exporters are trying to meet Indian growing demand. India has bought around 1MMT Chickpeas from last year crop. As per ABS export data India imported 9.5 lakh tonne Chana from October to February-2017. Pakistan and B, desh have bought 325000 and 60,000 tonne Chickpeas in same period. Ample rainfalls in March-2017 have provided the ideal start for another huge planting of chickpeas. Farmers in Queensland had planted 4.74 lakh ha last year. Higher price would encourage farmers to increase 20 to 25 % area under Chickpeas.
- Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. The season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tone in 2015-16. Imports too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.

Monthly Outlook: -Steady to slightly weak sentiment may prevail in pulses market in May

AGRIWATCH Agri Commodity Indices – 25th March, 2017

According to Agriwatch Commodity Indices, Pulses Index increases to 137.35 (+3.20) on w-o-w basis.

Chana (Chickpeas /Bengal Gram)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

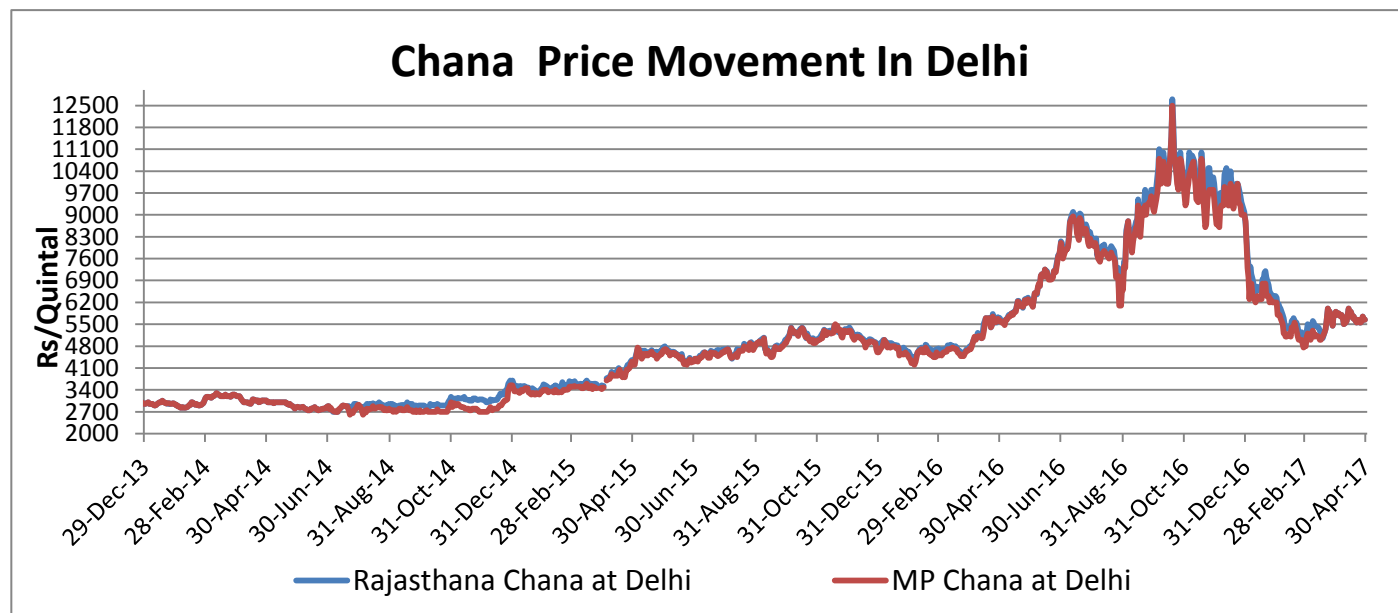

Market Recap:

After weak momentum in March due to new arrivals Chana cash markets traded firm in April. It increased from Rs 5377 to Rs 5646 per qtl. Chana market may rule steady to firm as fresh demand from retailers is expected by May end. Besides, CnF quotes for Chana remains at higher level. So decrease in Chana market seems a remote possibility. Agriwatch suggests buying on current level and slight dip.

Price Dynamics:

In April-2017, average price in Delhi (MP line Chana) were up to Rs 5698 in April from Rs 5320 per qtl. in March Prices are likely to increase further due to:

- Lower arrival and farmers unwillingness to sell at lower level
- Fresh demand likely from consumer's end
- Higher quotes for forward months
- Lower volume of import

Seasonality Index hints that Chana is likely to notice steady to firm movement in May too.

Chana Future Market Analysis

Chana Future market is closed.

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 90.19Lakh tonne. Down wise revision is likely due to crop loss in Bikaner region and lower grain size in some particular region in Rajasthan and Maharashtra. Agriwatch sticks to its previous estimate. India had produced 67 lakh tonne Chana last year.

Import Dynamics:

According to IBIS (provisional data), import of Chana in Nov till 26th was around 1.16 Lakh tonnes at major ports in India, around 207.37 % higher than Oct., which was around 0.38 Lakh tonnes. Import update will be available as and when govt. releases data.

Market Outlook for May-2017

Chana prices are likely to witness steady to firm movement in May.

Field Pea (Matar /Dry Pea):

[\(Back to Content\)](#)

Fundamental Analysis and Outlook:

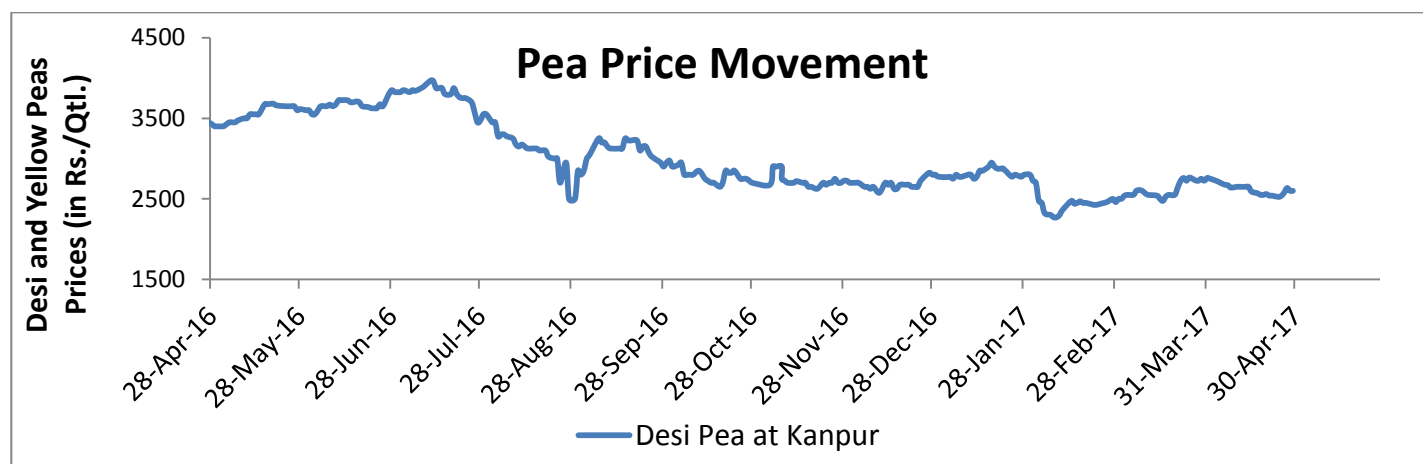

Market Recap:

Imported and domestic yellow peas, by and large witness weak momentum during the month under review. Firmness in domestic market in May is unlikely to continue taking clue from steady Chana market and weakness in other pulses. Higher than expected arrivals and decreased quotes for forward months remains unsupportive to the peas market. Inner tone remains steady to slightly weak. Range bound movement expected in May.

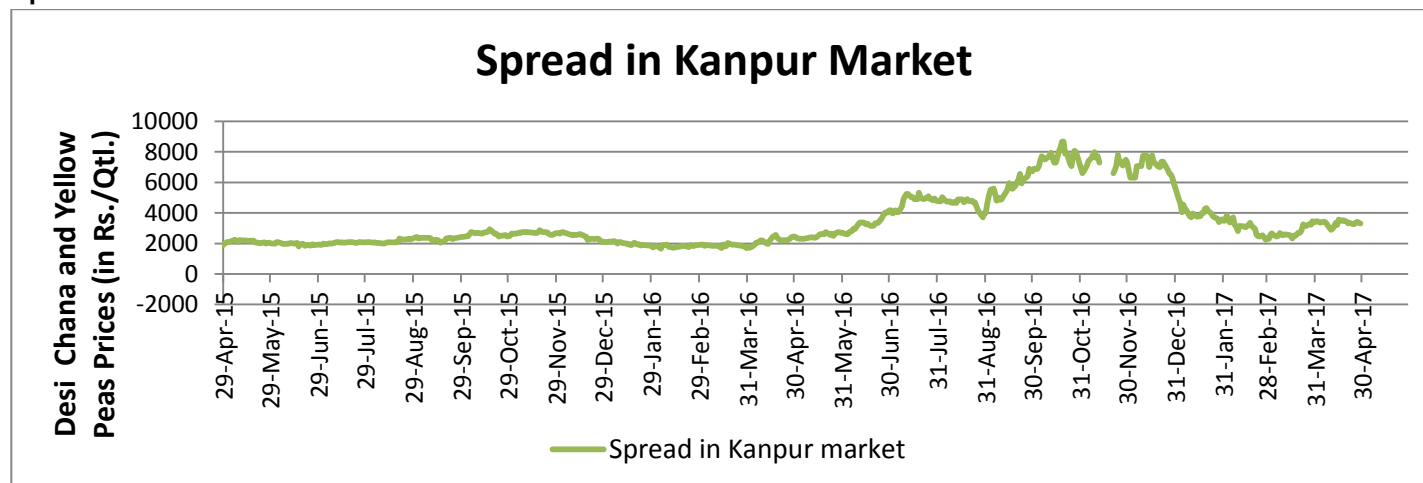

Price Dynamics

In April-2017, yellow pea average prices at Kanpur traded down by 0.17 % from Rs 2616 to Rs 2601 per qtl. Range bound movement is expected in May due to:-

- Lower forward quotes and steady movement in Chana market.
- Higher Import volume, lower prices for pulses and decreasing demand.
- Weak buying interest at current level.

Spread With Chana:

The spread between Chana and Pea at Kanpur decreased from Rs 3315 to Rs 3301 mainly because of weakness in Chana price. Meanwhile, spread is expected to remain between Rs 3300 to 3400 per quintal in May on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound movement in May-2017.

Import Dynamics:

According to IBIS (provisional data), import of Pea in Nov till 26th was around 6.49 Lakh tonnes at major ports in India, around 55 % higher than Oct-2016, which was around 4.16 Lakh tonnes. Import flow may dip despite attractive prices in global market. Import data update is subject to govt. releases.

Market Outlook for April: Prices of Pea are likely to trade steady to slightly weak with decreasing demand at current level.

Masoor (Lentils/ Masoor):

[\(Back to Content\)](#)

Fundamental Analysis and Outlook:

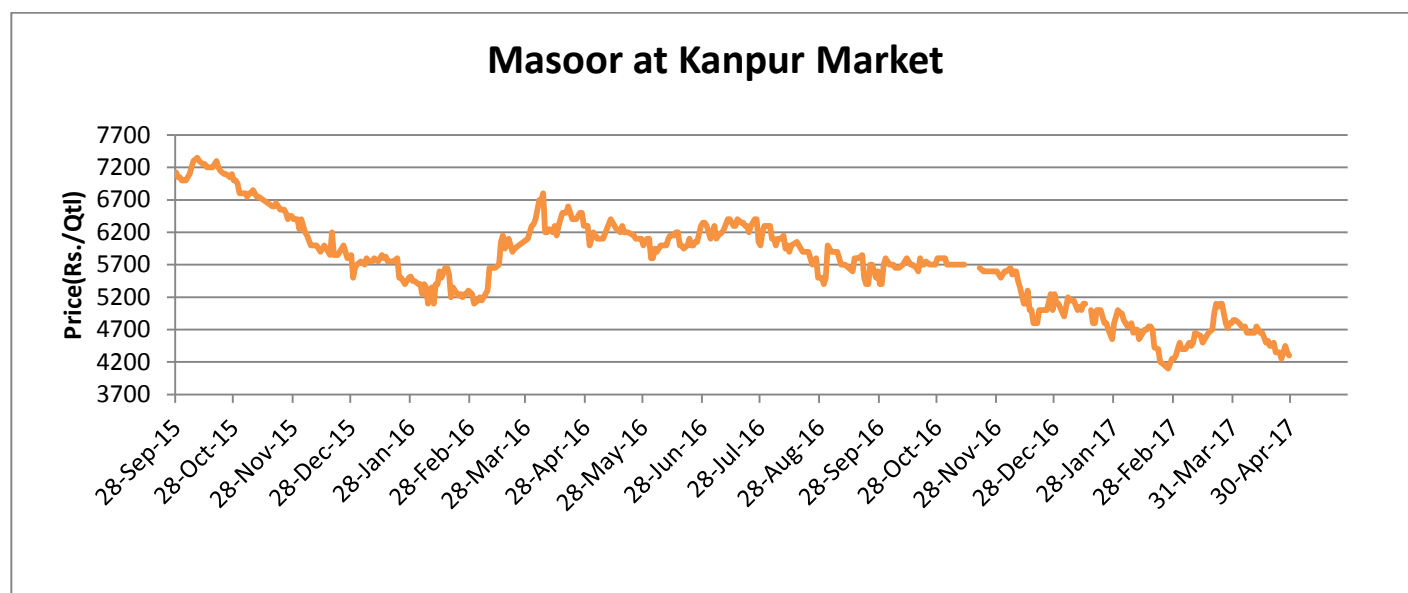

Market Recap:

Supply side is expected to weaken with weakened price in the weeks ahead. Weekly average price decreased by 1.62% from Rs 4542 to Rs 4350 per qtl. Currently in Mumbai it is being quoted at Rs 3850/3900 per qtl. Lower quotes for imported Lentils would restrict one way uptrend. Canadian Massor is showing steady to slightly weak movement and was traded in the range of Rs.3850/3900per quintal. Market may trade steady to weak as pressure on market may build up in the near term.

Price Dynamics:

In April-2017, average price in key market Kanpur was down by 4 % from Rs. 4670 to Rs 4400 per qtl MoM basis. Prices were weak due to:

- Lower forward quotes and arrival from new crop.
- Weak demand at lower level and bearish trend in other pulses.
- Import flow and lower CnF quote
- Stockiest weak buying interest

Seasonality Index depicts range bound movement in prices in May-2017.

Import Dynamics:

According to IBIS (provisional data), import of Masoor in Nov. was around 1.10 Lakh tonnes at major ports in India, around 110% higher than Oct which was around 0.27 Lakh tonnes. Fresh import data is awaited.

Market Outlook for April:

Prices are likely to notice range bound movement due to weak demand.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

[\(Back to Content\)](#)

Fundamental Analysis and Outlook:

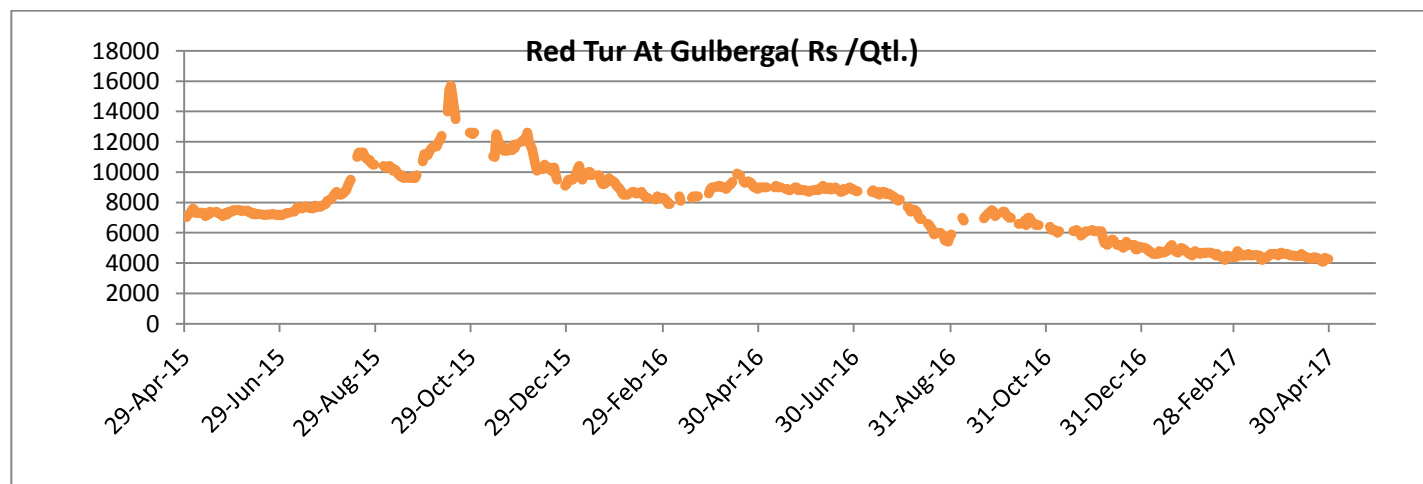

Market Recap:

During review week, Desi and imported Tur traded weak despite imposition of import duty. Govt.'s selling from central pool stock has put more pressure on market. However, downtrend is unlikely to continue as buyers are expected to return to market at lower level.. Buying at current level would be good in the medium term. Steady tone may prevail in May. Tur is ruling at bottom level now.

Price Dynamics:

In April-2017, average prices in key markets were down by around 3.07 % to Rs 4388 per qtl. from Rs 4527 in March due to

- Higher availability
- Lower quotes in Burma and import flow
- Selling from central pool stock
- Stockiest weak buying.
- Suspension of procurement on MSP for Tur

Seasonality Index- depicts steady movement in the this month too. . Average price increased by 3.0 % MoM basis. Farmers have restricted selling at current level. Besides, imposition of May support Tur Market in a limited way.

Production- According to the Agriwatch estimate, Kharif Tur MY 2016-17 production is estimated at 38.59 Lakh tonne against 24.9 lakh tonne in 2015-16.

Import Dynamics:

According to IBIS (provisional data), import of Tur was around 1.34 Lakh tonnes at major ports in India, around 31.56 % higher than OCT which was around 1.02 Lakh tons.

Market Outlook for March:

Tur prices are likely to trade steady in May-2017.

Urad (Black Matpe/Black Gram)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook:

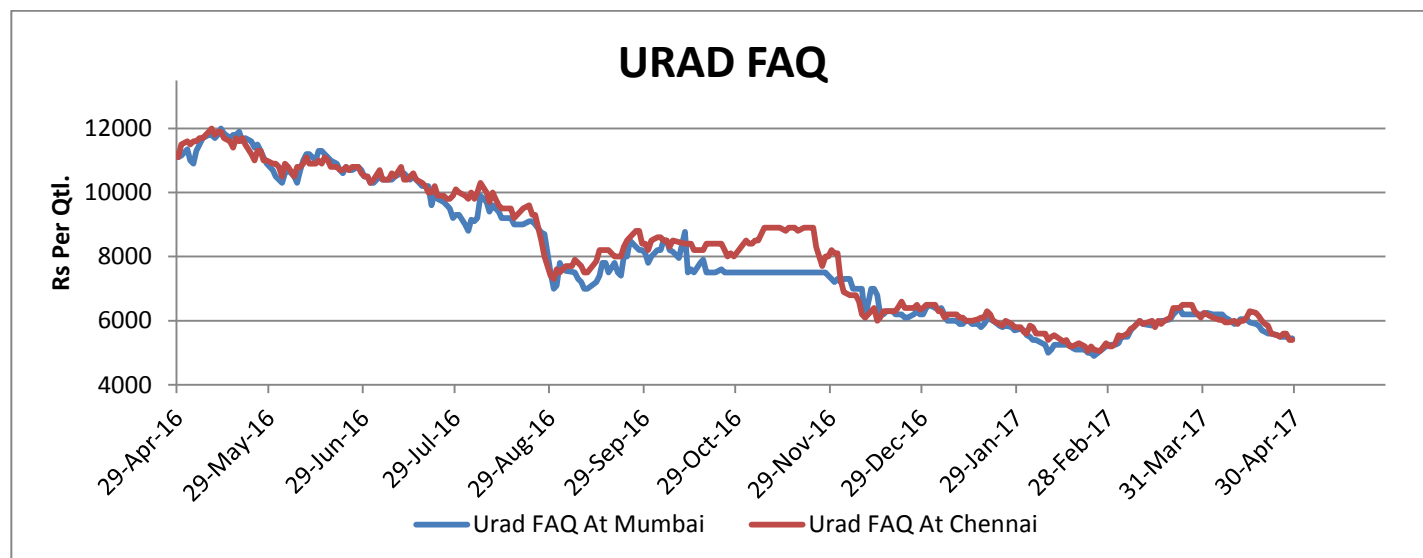

Market Recap:

During April-2017, imported and desi Urad prices noticed weak movement owing to lower forward quotes and weak demand. Market may trade up from current level in May. Pipeline is almost vacant. Farmers have preferred to retain stock and it may affect arrival flow. Any downward correction is expected at current level. Overall tone remains firm for Urad in May.

Price Dynamics:

In April, average prices in key markets including Mumbai/chennai were down by 1.44% percent from Rs 5951 to Rs 5865 per qtl. Prices may rule firm due to

- Unchanged quotes in forward months
- Lower arrival
- And good demand against disrupted supply side.

Seasonality Index depicts steady to firm movement in the near to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2016-17 production is estimated at 17.43 lakh tonne against 10.7 lakh tonne 2015-16. Rabi estimate is 5.35 lakh tonne. This means total production (rabi + Kharif) would cross 22.79 lakh tonne against total of 15.8 lakh tonne last year.

Import Dynamics

According to IBIS (provisional data), import of Urad in Nov was around 0.25 Lakh tonnes at major ports in India, which is 3.63% lower than that of Oct which was around 0.26 Lakh tonnes. Fresh data is awaited.

Market Outlook for May:

Prices are likely to trade steady to firm after slight downward correction.

Moong (Green gram/Mung)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook:

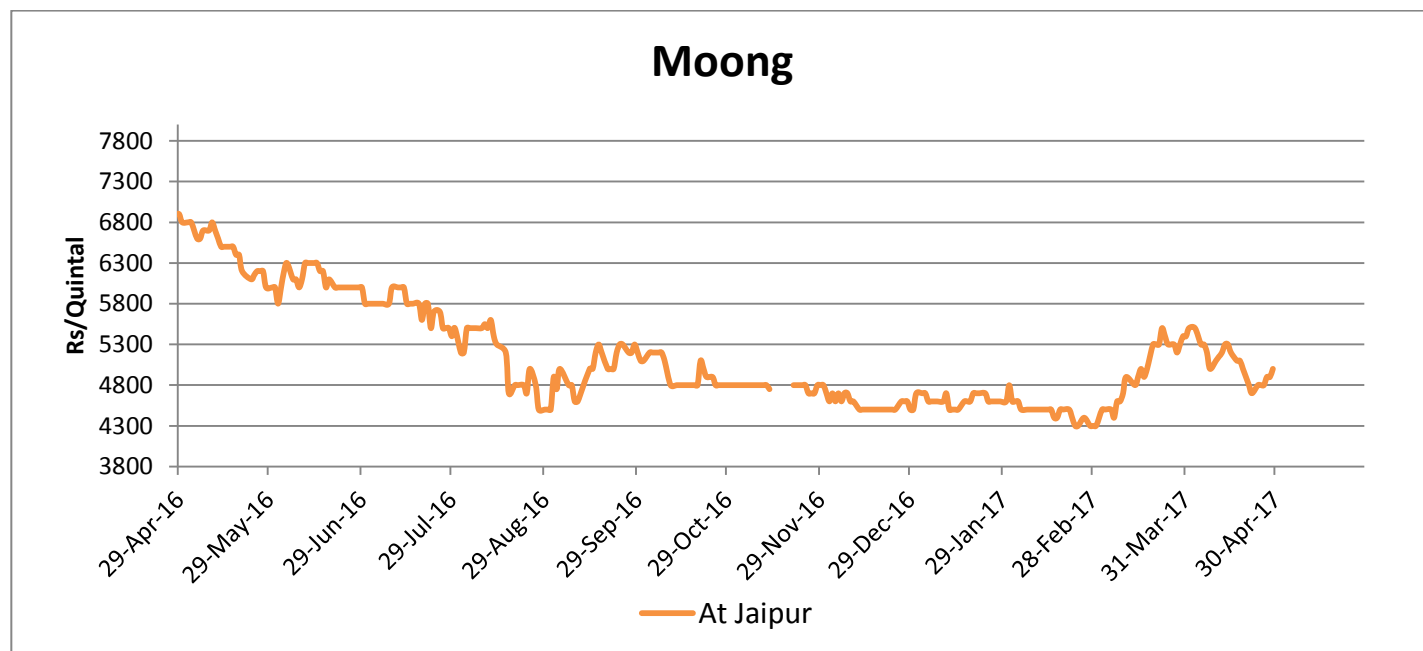

Market Recap:

Moong market witnessed firm movement in April-2017. It may trade stable to slightly weak in May. Buyers remain active at current level. Lower quotes in global market remains unsupportive for Moong cash market.

Price Dynamics:

Market is expected to trade steady to slightly weak as other pulses prices moved down in April. Selling from central pool would continue to pressurize Moong market and new local crop is hardly one month away. Average prices in key markets were up by 1 % to Rs 5077 per qtl..Following factors influenced Moong prices in April.

- Govt.'s procurement on MSP (Rs 5225per 100kg)
- Stockiest's active buying
- Increased demand at lower level
- Cheaper availability of other pulses

Seasonality Index depicts steady to slightly weak movement in the near term.

Production-According to the Agriwatch preliminary estimates, Kharif Moong 2016-17 production is estimated at 13.88 Lakh tonne. Total kharif Rabi production may touch 20 lakh tonne against 15.1 lakh tonne last year(2015-16)

Import Dynamics

According to IBIS (provisional data), import of Moong in Nov was around 0.09 Lakh tonnes at major ports in India, same as Oct. which was around 0.09 Lakh tonnes.

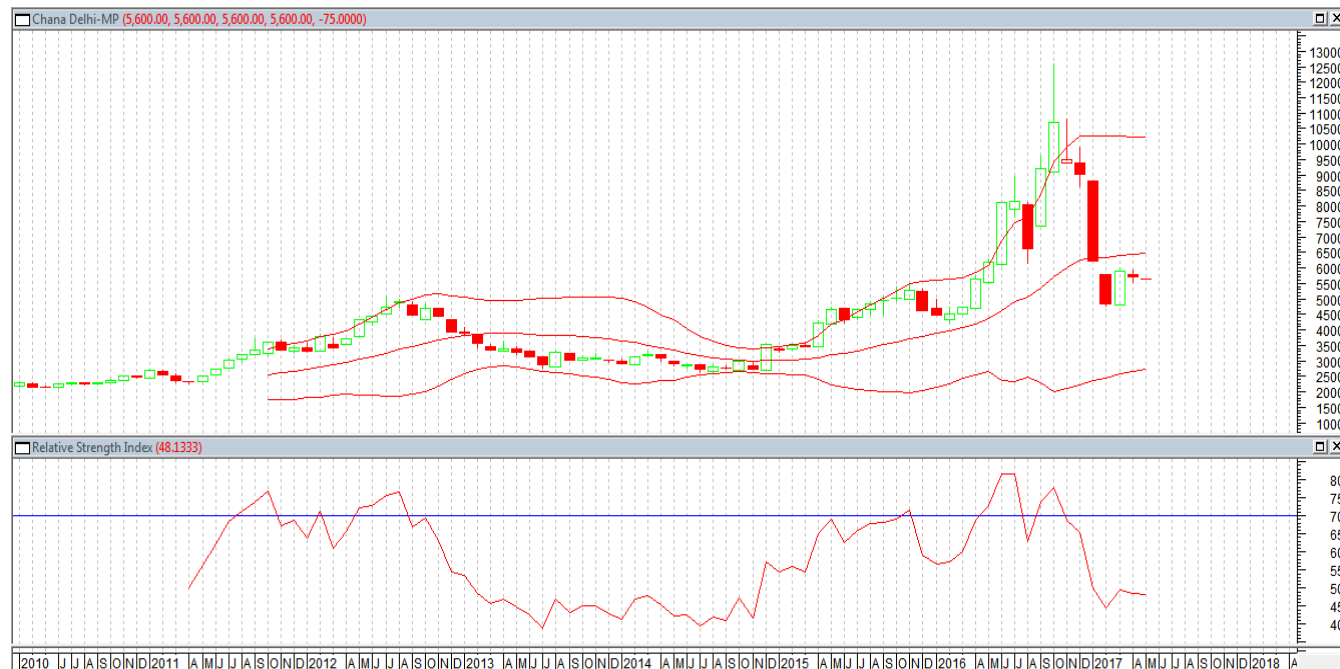

Market Outlook for May:

Prices may trade steady to slightly weak.

Pulses Wise Technical Outlook for May-2017 :-

[\(Back to Content\)](#)

Chana:

Outlook –We expect prices to notice steady to firm movement in the near term after slight downward correction.

- ❖ Chart depicts weak movement in prices.
- ❖ RSI is steady in neutral region.
- ❖ Expected price band for Chana is 5500 to 5800 levels in this month.

Strategy: Buy on Dip.

Trade Recommendations:

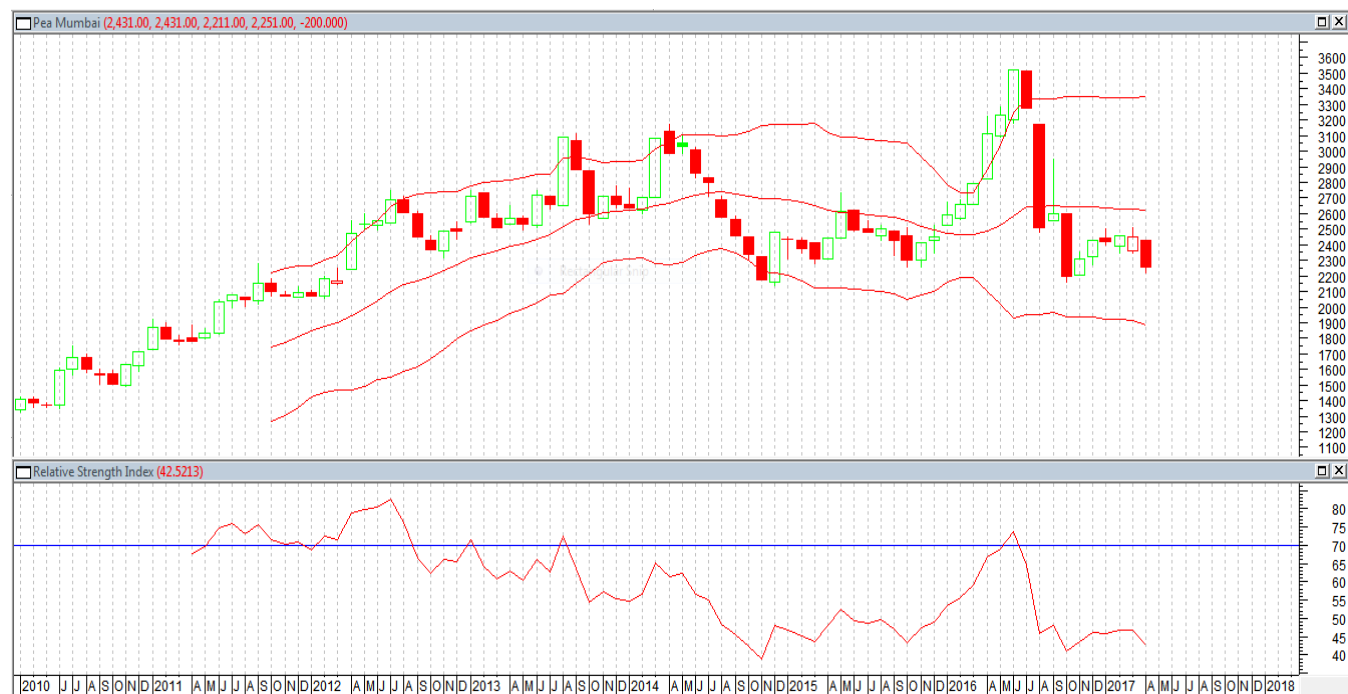

- **At NCDEX: Chana Future Market is closed.**
- **Spot Market outlook:** Chana is likely to stay steady to slightly firm between 5400-5800 per quintal.

Trade Recommendations: Buy around 5500 with the first target of 5700 and second target 5850 with stop loss at 5400 level.

Support & Resistance				
S2	S1	PCP	R1	R2
5250	5400	5600	5800	6000

Pea:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

[\(Back to Content\)](#)

Outlook - We expect prices to notice steady to slight weak movement in this month taking clue from weak Chana.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 2175-2350 in this month.

Strategy: Buy on Dip

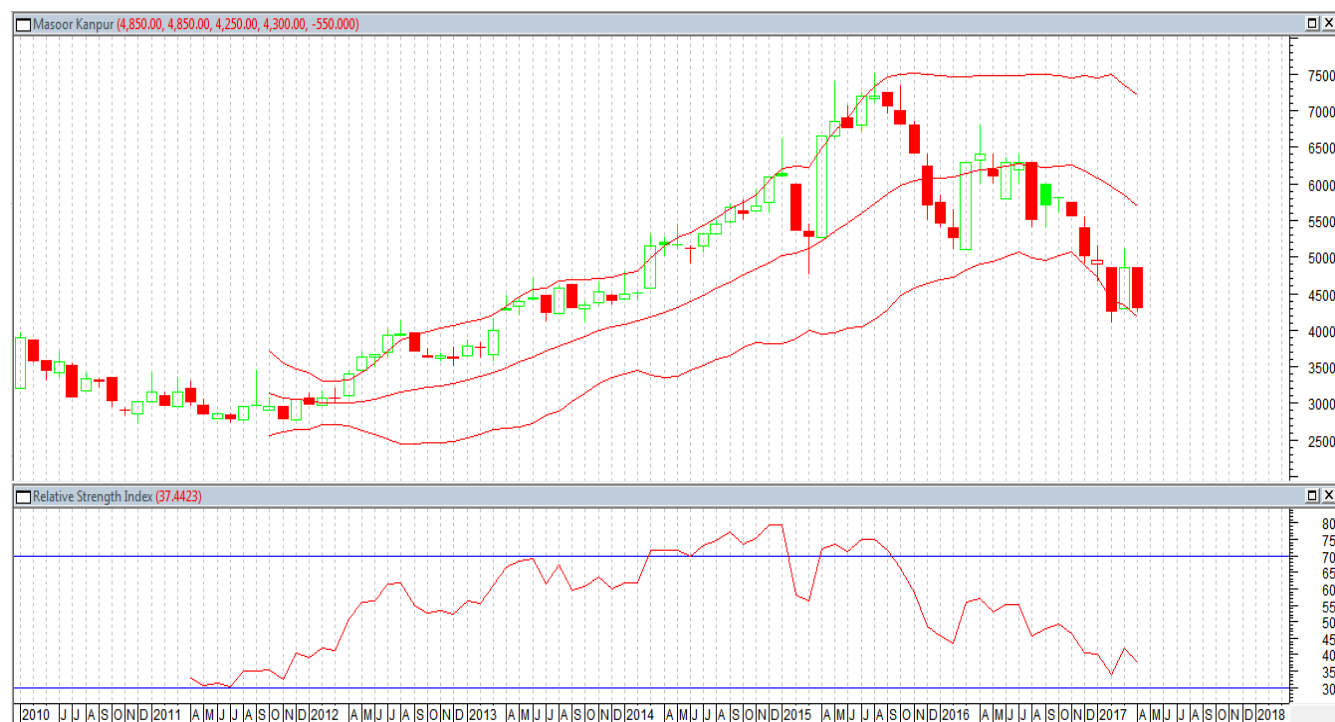

Trade Recommendations: Buy around 2200 with the first target of 2300 and second target 2350 with stop loss at 2150 level.
