Domestic:

- **Cash pulses market continued to reel under pressure due to higher supply, restricted buying from millers/stockiest and cheaper import from Burma, Canada and Australia.** Traders continued to avoid bulk buying in June due to GST issues. Sellers remain active throughout the month. Procurement agencies like FCI, Nafed continued to sell procured quantity through auction. All these developments restricted firmness in pulses market. Sentiments still remain weak for pulses market despite fear of lower kharif coverage area in 2017. Traders protest against GST continues and trade volume remains at lower ebb. Normal trade is expected to back on track in the second fortnight.
- **As prices are ruling at lower level, farmers intend to decrease pulses area in kharif season despite around 8 % increase in MSP and favorable weather conditions in growing regions.** Tur , the main kharif pulses ,area is bound to decline by 15 to 20 % this year. Moong and Urad area too may decline despite higher coverage in the beginning of the kharif sowing season. Farmers have preferred pulses over cotton. Moong and Urad area might decline by 5 to 10 % this year.
- **Progressive planting of Pulses is running smooth on the back of good monsoon rains in major producing States.** Indian farmers have covered 18.80 lakh ha under kharif pulses till 30th June-2017. Till date, it is higher by 44.13 % (last year 13.05 lakh ha) than area covered in the last year. Normal area under kharif pulses is 105.58 lakh ha. However, area under Tur has declined by 11.22 % to 5.69 lakh ha (last year 6.41 lakh ha) so far. Normal area under Tur is 39.24 lakh ha. Urad and Moong area is running ahead by 71.09 and 88.39 % to 2.92 lakh ha (last year 1.71 lakh ha) and 6.26 lakh ha (last year 3.32 lakh ha) respectively. Kulthi area is running behind by 33 % at 0.02 lakh ha so far. However, overall pulses area under kharif season would decline by 10 to 12 % at the end of the season in comparison to last year.
- **The Center govt. has hiked the MSP of pulses for 2017-18 kharif crop year and instructed states to procure it on MSP so that farmers would be able to receive minimum support price.** The maximum hike in the MSP is fixed for pulses. The MSP of tur (arhar) has been increased from Rs 5,050 per quintal (including bonus) in 2016-17 to Rs 5,450 per quintal (including Rs 200 bonus) in 2017-18 -- a hike of 400 per quintal. Similarly, the support price of Urad has been increased from Rs 5,000 (including bonus) per quintal in 2016-17 to Rs 5,400 (including bonus) per quintal in 2017-18. In case of Moong, it has been increased from Rs 5,225 (including bonus) per quintal in 2016-17 to Rs 5,575 (including bonus) in 2017-18.
- **Sudan pigeon pea was offered at \$555 per T at Nhava Shewa port. Australian Desi Chickpeas July and August delivery was offered at \$890 & 895 per T respectively.** The new crop Dec was offered at \$770 per T. Australian Kyabra Chick peas Nov/Dec was offered at \$790 per T. Australian Kasper Peas was traded at \$415 and Dun peas at \$390 per T. Australian Green Moong was offered at \$930 per T. Australian yellow split lentils was traded at \$845 July delivery. Canadian broken red lentil was offered at \$530 per tonne.
- **Urad FAQ was offered at \$718 and SQ was at 897 per T. Myanmar Lemon Tur was offered at 538 per T.** Australian red whole Lentils was offered at \$606 per T. Ukraine yellow peas at Nhava Sheva port was offered at \$315 CIF per T. It was offered at \$320 for Kolkatta port. Overall tone in pulses market remains weak.
- **As prices of all pulses are ruling at lower level with no scope for further dip as demand is expected ahead of festive season, Agriwatch expects prices to move up from current level.** All pulses like Chana ,Tur ,Urad Moong and Lentils would trade steady to firm in July. The main reason for likely upward trend is mainly attributed to lower acreage, higher MSP, slowed down import flow and likely fresh buying interest after GST impact adjustment.
- **Currently India charges Rs 3600 per 20" containers, the charges would now be Rs18000 per 20" containers.** India imports around 20,000 containers yearly from Canada. It would increase the cost of import. Besides, due to GST importers are hesitant to book new orders in forward months. So import flow would decrease and it would push up pulses prices in coming weeks.

International:

[\(Back to Content\)](#)

- **The latest pulses crop report from Canada hints towards normal condition for pulses plant growth.** Dry peas, dry beans and Lentil plant condition is good. Till the last week of June-2017 rating agencies rated 81.2 % dry peas condition was excellent. Around 91 % dry beans and 83.8 % Lentils crops were found to be in good to excellent condition. In Alberta 38 % field peas are in pre-flowering stage. However, long term average is 63 % at this point of time. Overall plant condition is considered to be normal so far.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Canada Is going to organize Special Crops Association's Pulses Convention from 10th to 13th, July 2017 in Vancouver.** Around 120 Indian delegates comprising pulse traders and millers would attend this convention. Indian delegates are visiting Canada for strengthening trade relationships, seeking new trading associates, exploring opportunities for investment and identifying new products and processing technologies, that can be used in India.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised lentils production estimate, down from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year to 1101 thousand ha for 2017-18 crop.** It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha in 2017-18.** However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area in Australia has been forecast down by 4.85 % to 219 thousand Ha for 2017-18 crop** due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export, at cheaper price and ample availability in India have affected global price of peas. So, bad weather and weak demand/price encouraged farmers to lower peas area.
- **Peas import from Ukraine to India is bound to increase by over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year. Area coverage has increased from 2.39 lakh ha to 2.9 lakh ha and with expected 3.16 tonne per ha, yield production may touch 9 lakh tonne this year. It has exported around 3 lakh tonne peas in first eight months of 2016-17. Higher acreage would compensate likely acreage loss in Canada.
- **Canada has revised its average price estimates for pulses for crop year 2016-17.** Canadian Govt agency has revised average price for Chickpeas, Peas and Lentils up to C\$ 910-930 per T, 290-310 & 610-615 per T. This shows that strong demand in Canadian market continues. In Jan, average prices estimate for the year were C\$900-930 for Chana, C\$280-310 for peas and C\$605 -635 for Lentils.
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tone in 2015-16. Imports too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.

Monthly Outlook: -Steady to slightly firm sentiment may prevail in pulses market in July.

Chana Future Market Analysis

Chana Future market is closed.

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 90.19 Lakh tonne. India had produced 67 lakh tonne Chana last year.

Import Dynamics:

According to IBIS (provisional data), import of Chana in Nov till 26th was around 1.16 Lakh tonnes at major ports in India, around 207.37 % higher than Oct., which was around 0.38 Lakh tonnes. Import update will be available as and when govt. releases data.
