Domestic:
[\(Back to Content\)](#)

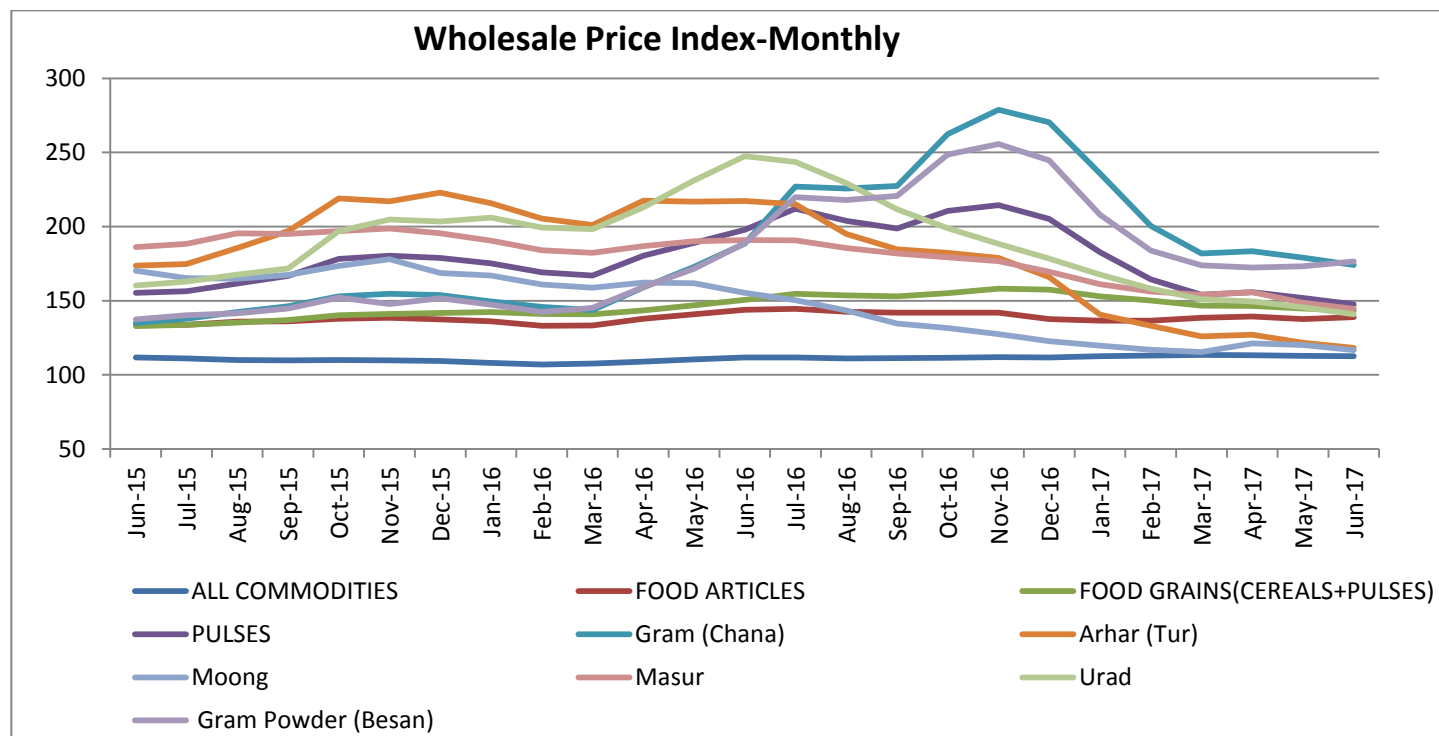

- **Pulses cash markets continued to reel under pressure in the month of July. However,** demand from retail sector is expected and it may support market in August. Supply is higher than current demand and stockiest/importers would continue to release stock at every jump of Rs200/300. Exporting countries like Myanmar, Canada, Australia and Africa seems in a hurry to offload their marketable surplus at discount as they are aware of the facts that stock is higher in domestic market and import demand from India is bound to decrease this year due to bumper domestic production. So any bull run is unlikely in August. Agriwatch expects upward correction only in the short term.
- **Chana futures re-commenced on 14th July-2017 and opened at 5399 in Sept. contract.** However, it could not sustain at higher level and decreased to 4772 in two weeks. Slight recovery is expected this month and it may trade in the range of 5050 to 5350. Futures contracts in Tur may be launch as it is under consideration. In a latest development, govt. may consider to allow Lentils/dal export from India. Pulses associations have been demanding to allow export of pulses as prices are ruling much below the normal expectation/MSP.
- **Besides, lack of demand in local market would continue to cap any unexpected firm momentum** in domestic market. Chana and Urad are likely to trade range bound to slightly firm in August. Masur, Moong and Tur may stay steady to slightly firm despite govt.'s intension to sell 50 % of its stock from central pool before new kharif pulses hit the market. Matar Vessels having 43400 T & 30,000 T from France have just hit the Indian ports. So uptrend in peas seems a remote possibility until Chana gets firmer.
- **The pace of kharif pulses planting increased in comparison to previous week from 3.35 % to 6.92 %** despite excessive rains in major producing regions. Indian farmers have covered 114.88 lakh ha under kharif pulses till 28th July-2017. Till date, it is higher by 6.92 % (107.44 lakh ha last year) than area covered in corresponding period last year. Normal area under kharif pulses is 105.58 lakh ha. However, area under Tur has declined by 15.50 % to 34.88 lakh ha (last year 41.28 lakh ha) so far. Normal area under Tur is 39.24 lakh ha. Urad area is running ahead by 35.19 % to 34.38 lakh ha (last year 25.43 lakh ha). Moong area coverage has increased by 1.88 % to 27.58 lakh ha. against 27.07 lakh ha. last year till date. Kulthi area is lagging behind by 55.56 % to 0.20 lakh ha so far.
- **The Center govt. has hiked the MSP of pulses for 2017-18 kharif crop year.** The maximum hike in the MSP is fixed for pulses. The MSP of tur (arhar) has been increased from Rs 5,050 per quintal (including bonus) in 2016-17 to Rs 5,450 per quintal (including Rs 200 bonus) in 2017-18. Similarly, MSP of Urad, has been increased from Rs 5,000 (including bonus) per quintal in 2016-17 to Rs 5,400 (including bonus) per quintal in 2017-18. In case of Moong, it has been increased from Rs 5,225 (including bonus) per quintal in 2016-17 to Rs 5,575 (including bonus) in 2017-18.
- **Australian Desi Chick Peas CnF quote decreased from \$800 to \$ 765 per T** for delivery in Aug-Sept-2017 at Nhava Shewa and Chennai ports. Australia is offering new crop at \$715 per Tonne for Oct-Nov delivery. The gap has narrowed now from \$75 to \$50 now. Australian Red Whole Lentils (nugget) Are being offered at \$590 per T at Nhava Shewa, Nipper at \$575 per t and flash Aug at 4590 per tonne. burma offers lemon tur at \$485 per tonne. It offered Urad FAQ at \$590, SQ at \$700 per tonne. Moong Pedisheva is being offered at \$1150 per tonne at India ports.
- **Urad FAQ was offered at \$597 and SQ was at 687 per T from Myanmar** at Nhava Sheva port for August shipment. Myanmar Lemon Tur was offered at 485 per T for same destination. Australian red whole Lentils was offered at \$590 per T. Ukraine yellow peas at Nhava Sheva port was offered at \$285 CIF per T. It was offered at \$290 for Kolkatta port. Overall tone in pulses market remains weak.

International:
[\(Back to Content\)](#)

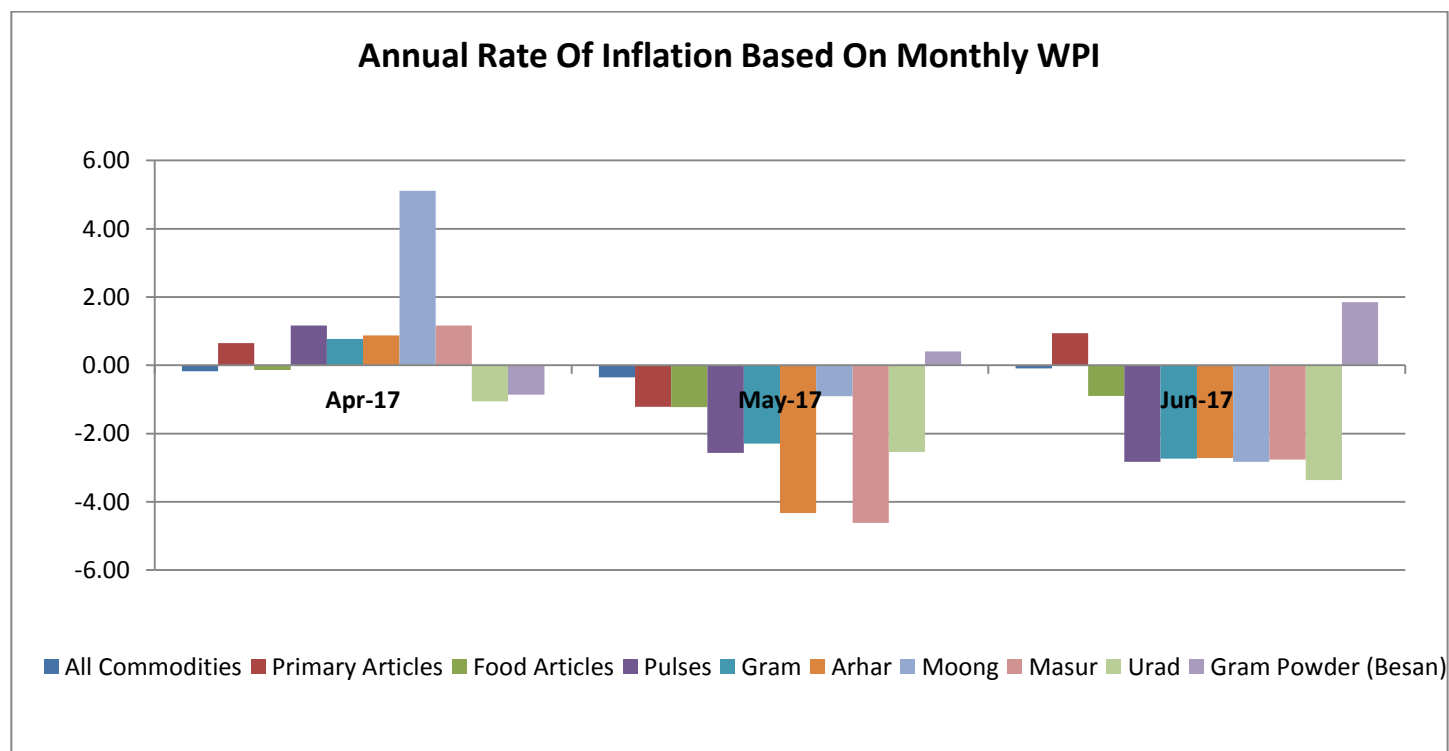

- **Global Peas market moved up despite negative cash market fundamental.** Demand from India has slowed down in recent weeks. France has shipped 43500 tonne peas to India at end July and a vessel of 30,000 T is expected by mid-August. China's buying is likely to continue. Lower demand from India and higher demand from China would offset the overall impact on demand. Buying recovery from India is expected next year. Lower yield too would nullify the impact of decreased demand. Harvesting in US begins now.
- **Marketing season In Canada is coming to an end now and pace of shipment is decreasing**, as expected. Field Peas stock is still ample. According to Canadian Grain Commission around 500 MT field peas has been exported from the country during 3rd to 9th July 2017. Total peas export stands at 33,29,600 tonne so far against 2,355,100 MT during corresponding time last year. Farmers in Canada has supplied 3,875,100 MT so far. It was 2,355,100 MT last year.
- **Lentils growing area in Canada is facing hot and dry condition and there is a growing fear that crop yield may suffer** if the prevailing weather condition persists. The impact of grower's bids remain unchanged as of now. But new crop indicative price has started showing improvement so that new crop price starts matching with spot price. Exporters are not willing to sell new crop's Lentils. It may support Lentils price in global market.
- **Agriculture Food Canada, has projected 24 lakh tonne Lentils export in crop year 2016-17.** It is up by 1 lakh tonne from previous estimate. Premium large green lentil bids have decreased slightly, about 42 cents per pound. New crop bids range from about 31 to 40 cents per pound. Red lentil bids range from about 23 to 26.5 cents per pound. Over all sentiment remains weak due to weakening of demand.
- **Despite lower price for lentils in global market and fear of area decline in Canada**, the main producer and exporter, area coverage under lentils is bound to increase. The latest USDA update hints 1,055,000 acres could be planted in 2017 against 933,000 acres last year. It might be higher by 13.05 percent. In Canada Laird -3 lentils price has decreased to 24 to 30 cents per pound due to higher stock and decreasing demand from India.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year** to 1101 thousand ha for 2017-18 crop. It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha** in 2017-18. However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect yield of lentils in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area in Australia has been forecast down by 4.85 % to 219 thousand Ha** for 2017-18 crop due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export, at cheaper price and ample availability in India have affected global price of peas. So, bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, export figure in current MY is expected to touch 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimate from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month, production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.

Monthly Outlook: -Steady to slightly firm sentiment may prevail in pulses market in August.

Fundamental Analysis and Outlook

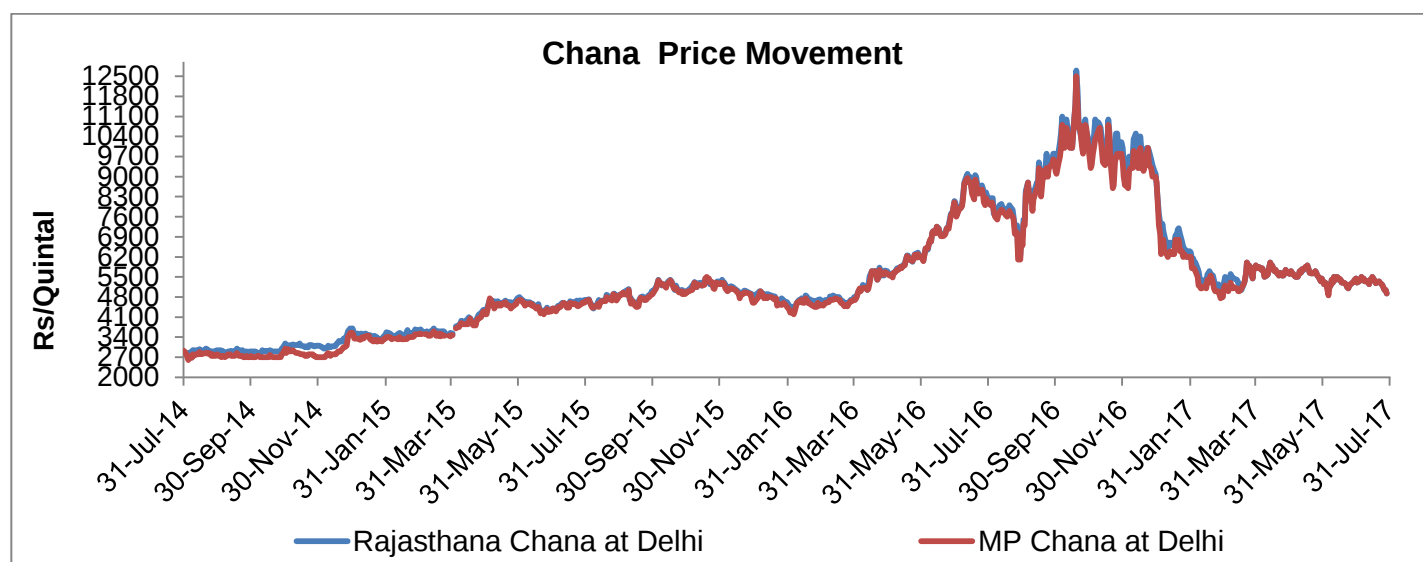

Market Recap:

Pressure on Chana market continued in July too in spite of re-launching of futures in Sept, Oct & Nov contracts. The all India average price decreased by 0.56 % from Rs 5266 to Rs 5236 per qtl in July. Sellers remained active due to lower forward quotes and bearish trend in other pulses. Australia continued to offer Chana at discounted price from new and old crops. Currently, it is offering Chana at \$765 per tonne for August delivery, down by \$100 per tonne from June offer. Dec delivery from new crop is being offered at \$715 per tonne. As Chana prices are ruling at lower level, recovery is expected in August.

Price Dynamics:

In July-2017, all India average price was down by 0.56 % to Rs5236 per qtl. Prices are likely to stay steady to slightly firm due to:

- Retention and likely improvement in demand

- Fear of lower acreage for next crop in India due to lower prevailing price.

Seasonality Index hints that Chana is likely to notice steady to firm movement in August.

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 90.19Lakh tonne. Downward revision is likely due to crop loss in Bikaner region and lower grain size in some particular region in Rajasthan and Maharashtra. Agriwatch sticks to its previous estimate. India had produced 67 lakh tonne Chana last year.

Market Outlook for August-2017

Chana prices are likely to witness steady to firm movement.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

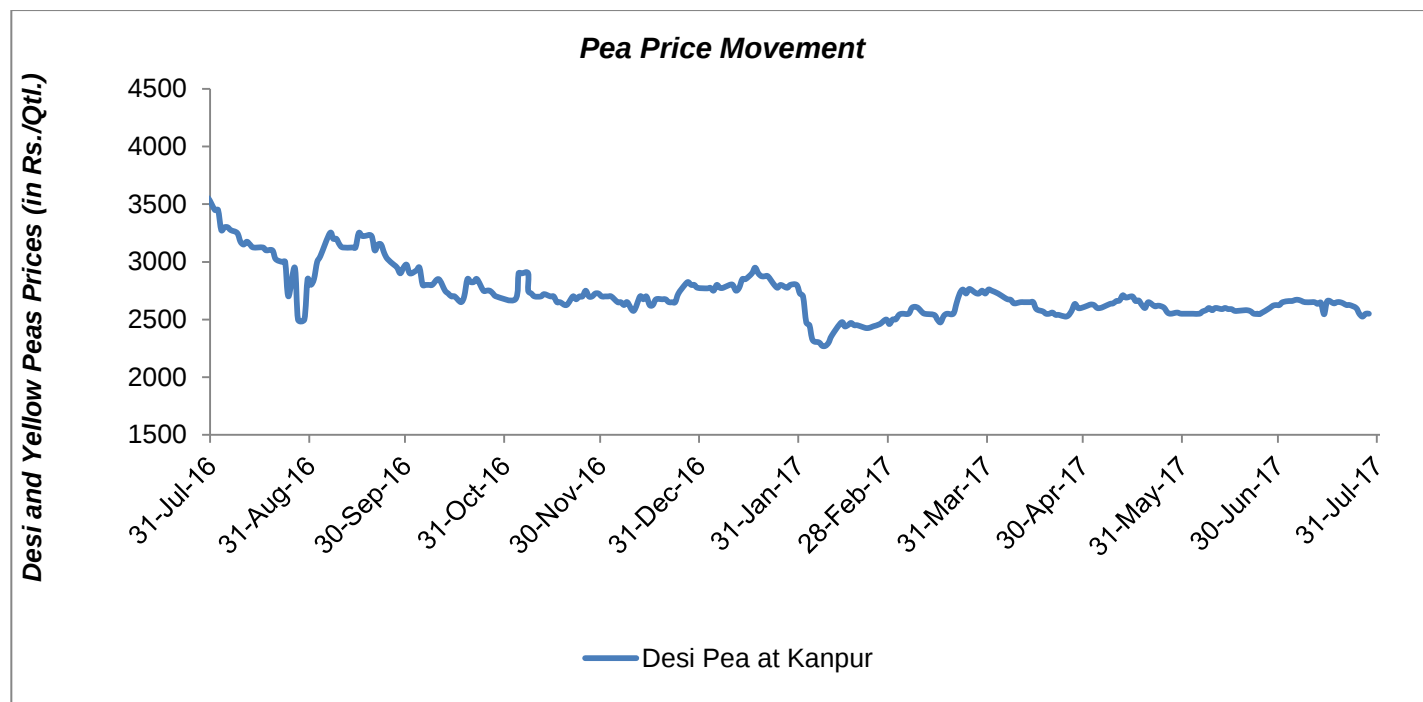

Market Recap:

Imported and domestic yellow peas, by and large witnessed steady to weak momentum during the month under review. Pressure on peas market may continue as import flow at cheaper price is hampering market fundamentals. However, recovery in peas market depends on Chana price to a great extent in this month. Forward quotes in recent week have decreased. Ukraine is offering peas at \$285 per T. Inner tone remains weak.

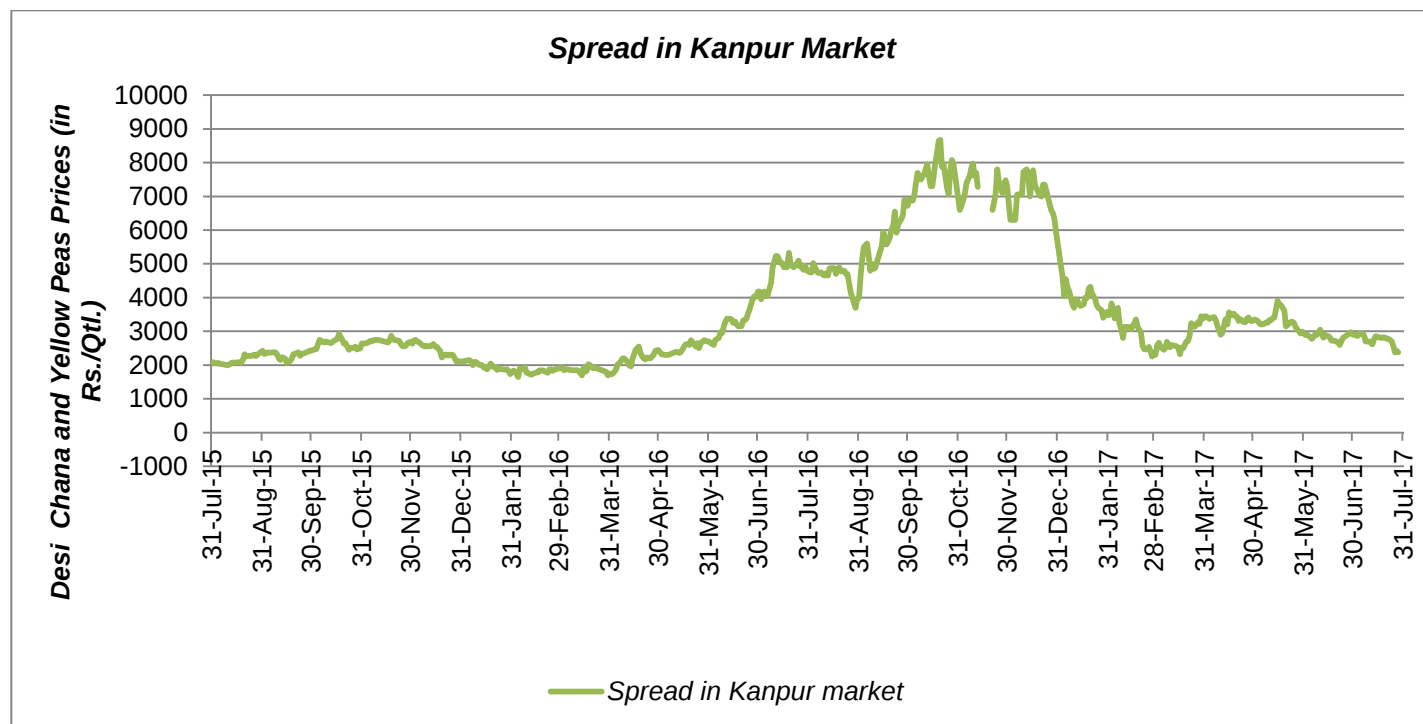

Price Dynamics:

In July-2017., yellow pea average prices at Kanpur traded up by 0.65 % from Rs 2589 to Rs 2625 per qtl. Steady to weak movement is expected in August due to:-

- Decreased forward quotes.
- Higher Import volume and weak festive demand.
- Ample stock in global market.

Spread With Chana:

[\(Back to Content\)](#)

The spread between Chana and Pea at Kanpur market decreased from Rs 2866 to Rs 2748 mainly because of weakness in Chana price. Meanwhile, spread is expected to remain between Rs 2300 to 2400 per quintal in August on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound to weak movement in August-2017.

Market Outlook for August: Prices of Pea are likely to trade steady to slightly weak due to subdued demand at current level and import flow from France.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

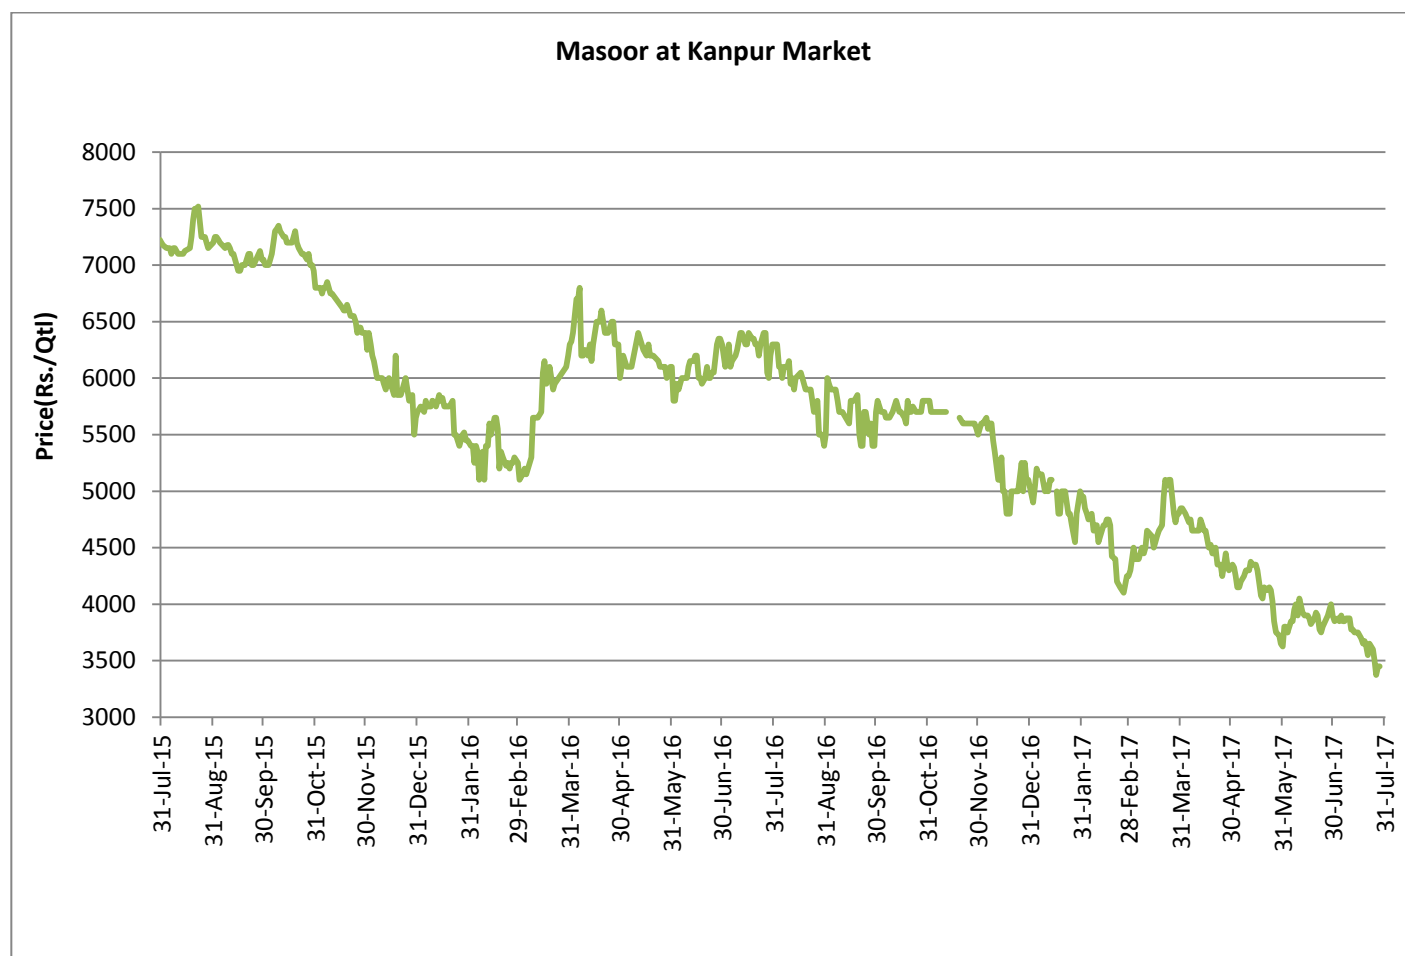

Market Recap:

With continuous import flow and lower demand, Masur price continued to trade under pressure. There is ample stock in global and domestic market. There is remote scope of one way firmness. [\(Back to Content\)](#)

[\(Back to Content\)](#)
