Domestic:

- **Pulses including Chana could not sustain its uptrend despite fundamentals remain firm.** Profit-booking at higher level and importer's unsteady quote have pressurized market. Overall tone in Chana remains firm. At higher level, profit booking starts and it pushes Chana market down. In Sept Chana market may trade in the range of Rs 5900 to 6300. Australian Desi Chickpeas Oct delivery quotes are steady at \$860 per tonne. While Nov shipment is being quoted at \$840 per tonne. Agriwatch expects selling to start over 6500 level despite some big players have sold around 6350. Chana would trade up once again as Sept futures got settled.
- **Lentils markets traded lower as importers started selling on discount while demand and supply side remained balanced.** Retailers are buying only to cover their immediate demand. Lentils market may dip Rs 100 more from current level. Buying after downward correction is advised as market is expected to move up once again as Govt may allow export. Australia is offering Red Whole Lentils at \$585 per T Oct delivery nipper type. It is being offered at \$590 per T Oct delivery, nugget type.
- **Tur market too reeled under pressure due to selling pressure from central pool stock.** Govt has enough stock and has to release it before new crop hits the market in Nov. There is no import as import quota of 2 lakh tonne for the year is complete now. More downward move is unlikely. Market is expected to recover once again from current level. Increasing hope for opening up of export may support market. Burma is offering Tur at \$ 395/400 per T.
- **Urad market too traded downward despite restricted import quantity. Demand is weak and supply side is comfortable.** Urad market is expected to move up from 20th Sept once again as buyers would return to market to fulfill their immediate needs. Burma is offering FAQ at \$495 and FAQ at 645 per T. New crop pressure is expected to end by the month and then market may move up.
- **Pressure on Moong market continues due to arrivals from new crop and weak demand.** Market is expected to improve from current level. Moong pedishwa from Burma is being offered at &1150 and Pakaku at \$810 per T on CnF basis.
- **Total Kharif pulses area, till 1st Sept, declined by 3.82 percent from last year to 137.61** against 143.08 lakh ha. Except Urad all kharif pulses area declined this year. Tur area declined by 18.24 % from 51.74 to 42.31 lakh ha so far. Moong area declined by 7.66 % from 33.84 to 31.25 lakh ha. Major set-back has been seen in Kulthi area. It declined by 38.01 percent to 0.33 lakh ha. Other pulses area declined by 2.94 percent to 21.93 lakh ha. The good performer is Urad this year. Its area increased by 21.63% from 34.36 to 41.80 lakh ha.
- **Agriwatch has published its 1st preliminary pulses production estimates for 2017-18 kharif season.** Urad production is likely to increase slightly from 23.97 to 24.97 lakh tonne despite higher area coverage in kharif season. Carryout is likely to increase from 8.77 to 9.74 lakh tonne. As supply side is expected to be higher, market may take downward correction further. Agriwatch expects Rs 200 dip from current level. It is advisable to buy on dip.
- **Agriwatch published its 1st preliminary production estimate for Tur for 2017-18.** Tur production is likely to decline drastically from 38.59 to 28.76 lakh tonne this year due to lower area coverage and hot & dry weather condition in south India. Carryout would decline from 9.53 to 5.29 lakh tonne this year. Supply side is good. Tur market may move up once again after downward correction. Buying near 3800/3900 would be good.
- **Agriwatch releases 1st production estimate of Moong for 2017-18 at 19.25 lakh tonne, lower** from 20.13 lakh tonne produced last year. Lower area coverage and crop loss would reduce the crop size. Despite lower production carryout would increase slightly by 25 thousand tonne due to slower pace of consumption and ample availability of other pulses. Carryout would increase to 9.15 lakh T. See balance sheet at page on 76.

International:
[\(Back to Content\)](#)

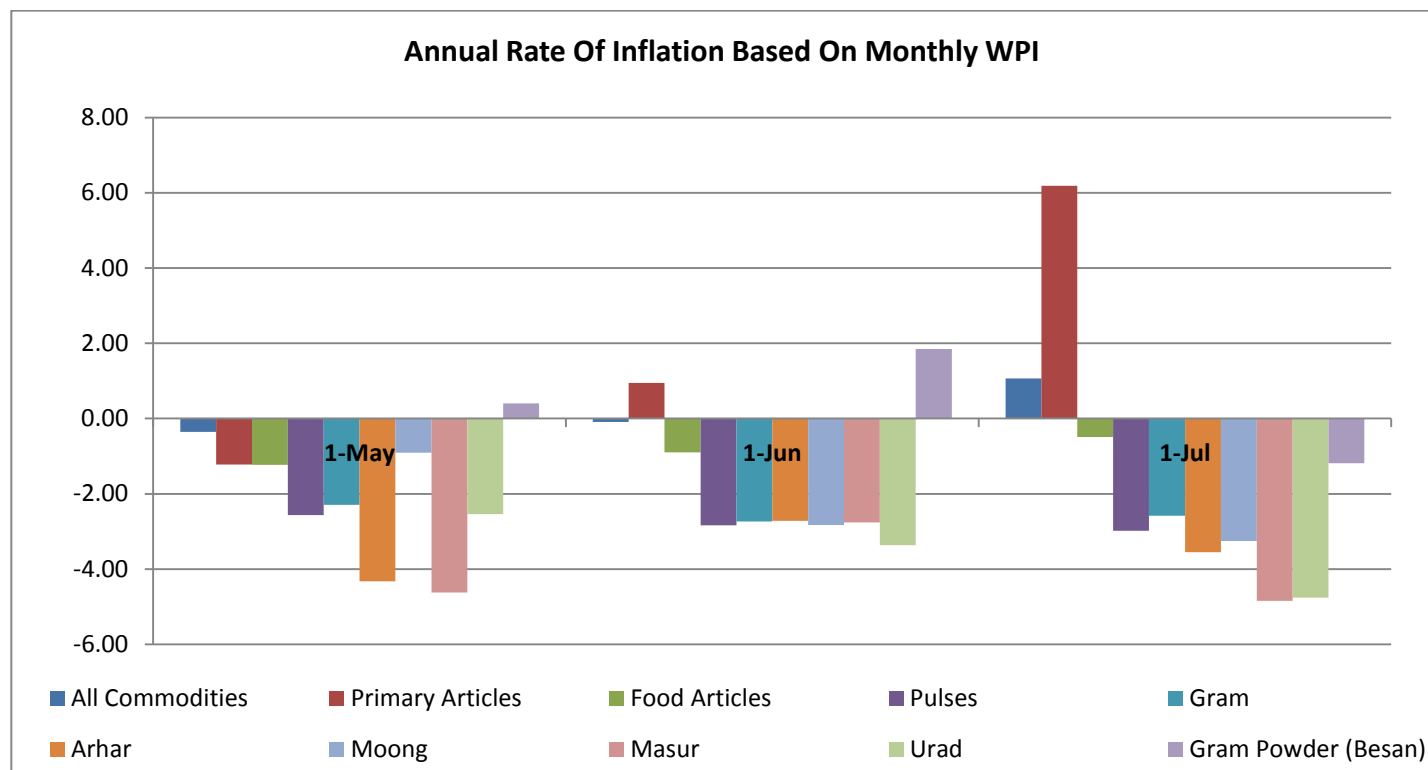

- **According to Statistics Canada Peas production in Canada is expected to be at 37.9 lakh tonne against 48.4 lakh tonne last year.** Out of this 85 % would be yellow peas and 14 % green peas . The rest one percent is marrow fat and maple.
- **Early crop harvesting including cereals and pulses in Ukraine is almost complete now.**Peas harvest is over now. Farmers in Ukraine had covered 4.10 lakh ha area under pea and harvested around 10.95 lakh tonne peas. It was 2.37 lakh ha last year and it had produced 7.63 lakh ha. which means Ukraine has ample crop to supply pea this year. As weather condition remained unfavourable, yield has decreased from 3.22 to 2.67 per ha. However higher area coverage has increased the final crop size of early peas crop.
- **Australia is facing hot and dry condition when crop is under developmental stages.** Prior to planting there was dry weather too. It has increased the fear of further yield loss of pulses. However, chances of diseases infestation have reduced considerably this year. Outbreaks of ascochyta, sclerotinia and phytophthora like diseases are unlikely at mass scale, generally seen in Pulses crop in Australia. Lentils-laired -2 price decreased by 2 cents to 37 cents per pound. It ranges to 43 cents according to quality. Even Kabuli chickpeas declined 5 cents to 59/63 cent per pound. Yellow peas are traded in the range of C\$7.20 to C\$ 8.25 per bushel.
- **Market sources say that production of Peas, Lentils and Chickpeas in Canada, are likely to decline** from normal expectation this year. Latest report of Agriculture and Agri-foods Canada' hits peas production would decline by 17.3 percent to 40 lakh tonne in 2017-18 (Aug- to July) due to lower coverage area and below normal yield. Lower production size would drag down supply side to 42 lakh tonne which is almost 18 % lower than last year. As carryout is expected to decline average price for peas has been revised up to \$208 to \$310 for the year. It is up by \$5 per T from July projected price.
- **Global Peas market moved up despite negative cash market fundamental.** Demand from India has slowed down in recent weeks. France has shipped 43500 tonne peas to India this week. China's buying is likely to continue. Lower demand from India and higher demand from China would offset the overall impact on demand. Buying recovery from India is expected next year. Lower yield too would nullify the impact of decreased demand. Harvesting in US begins now.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year** to 1101 thousand ha for 2017-18 crop. It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha** in 2017-18. However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect yield of lentils in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area in Australia has been forecast down by 4.85 % to 219 thousand Ha** for 2017-18 crop due to lower price realisation and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export, at cheaper price and ample availability in India have affected global price of peas. So, bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before commencement of the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, export figure in current MY is expected to touch 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.

Outlook: Pulses market is likely to trade steady to slightly firm in the month of September.

Chana (Chickpeas /Bengal Gram)

[\(Back to Content\)](#)

Fundamental Analysis and Outlook

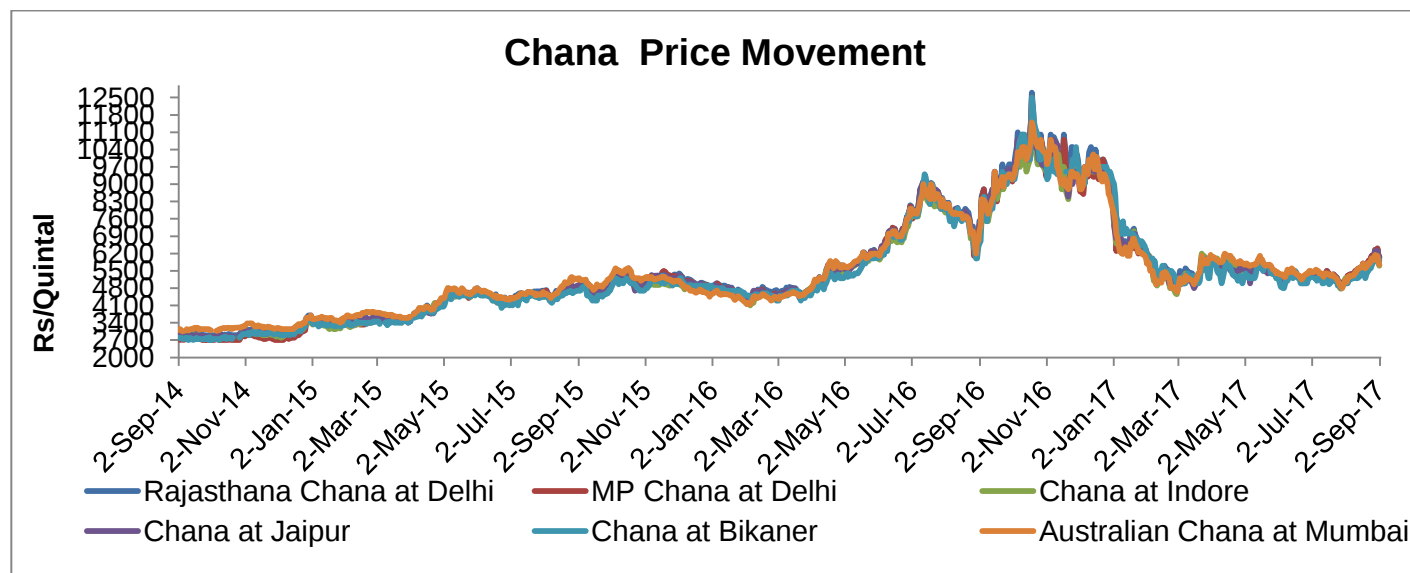

Market Recap:

Chana cash markets traded firm in the beginning of August due to higher quotes in Australia and good demand from retail sectors. However, uptrend could not sustain as profit booking started at higher level. Overall trend in Chana remains firm. Cash market is bound to trade at 6500 level once again. Selling at current level (6200) would be unwise despite Australian offer at \$860 for Nov delivery. Despite ample stock in local markets, stockiest are unwilling to release chana at current level. It will support market

Price Dynamics:

In August-2017, all India average price was up by 9.97 % to Rs 5625 per qtl. Average price in July was 5114 per qtl. Prices are likely to stay steady to slightly firm due to:

- Retention and likely improvement in demand
- Bad weather condition in Australia
- Weak Import flow &
- Fear of lower acreage for next crop in India due to lower prevailing price.

Seasonality Index hints that Chana is likely to notice steady to firm movement in Sept.

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 90.19Lakh tonne. Downward revision is likely due to crop loss in Bikaner region and lower grain size in some particular region in Rajasthan and Maharashtra. Agriwatch sticks to its previous estimate. India had produced 67 lakh tonne Chana last year.

Market Outlook for Sept-2017

Chana prices are likely to witness steady to firm movement.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

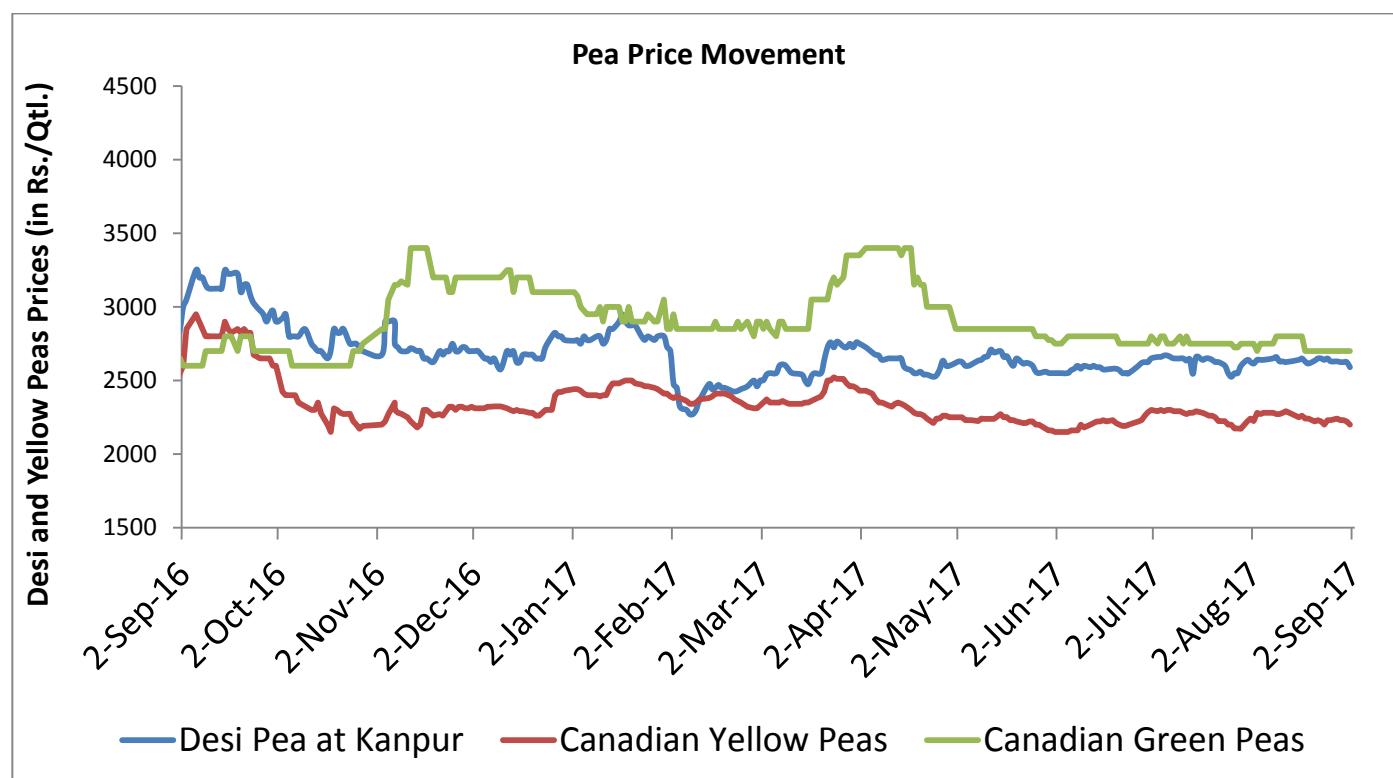

Market Recap:

Imported and domestic yellow peas, by and large witnessed steady to weak momentum during the month under review. Pressure on peas market may continue as import flow at cheaper price is hampering market fundamentals. However, recovery in peas market depends on Chana price to a great extent in this month. Forward quotes in recent week have decreased. Ukraine is offering peas at \$288 per T. Inner tone remains weak.

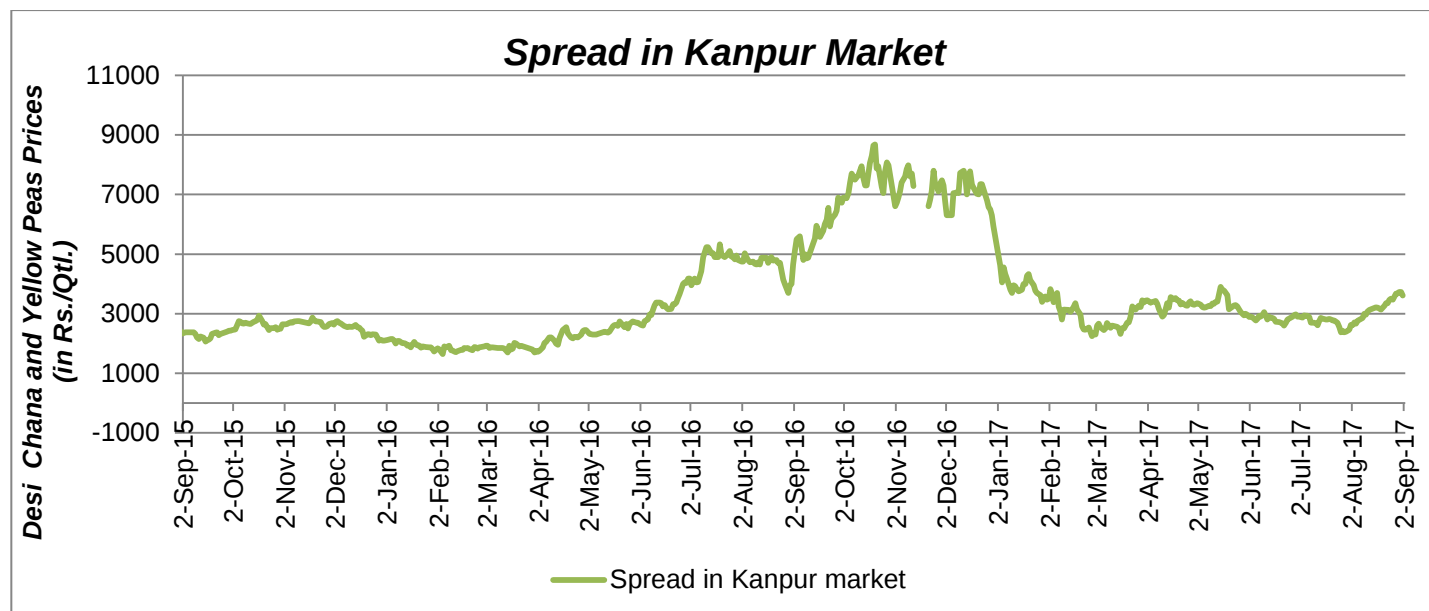

Price Dynamics:

In August-2017., yellow pea average prices at Kanpur traded down by 0.06% from Rs 2633 to Rs 2625 per qtl. Steady to weak movement is expected in Sept due to:-

- Decreased forward quotes.
- Higher Import volume and weak festive demand.
- Ample stock in global market.

Spread With Chana:

[\(Back to Content\)](#)

The spread between Chana and Pea at Kanpur market increased from Rs 2714 to Rs 3178 mainly because of increased Chana price. Meanwhile, spread is expected to remain between Rs 2700 to 3200 per quintal in Sept on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound to weak movement in Sept-2017.

[\(Back to Content\)](#)

Market Recap:

During review month, Desi and imported Tur traded smartly up by 14% to Rs4324 per qtl due to restriction on import, renewed demand and crop loss news. Govt.'s selling from central pool stock and it has put more pressure on market. Buying near 3900.4000 seems good in Mumbai market. Diwali and dashara demand is due to come out. It may push price up.
