Domestic:

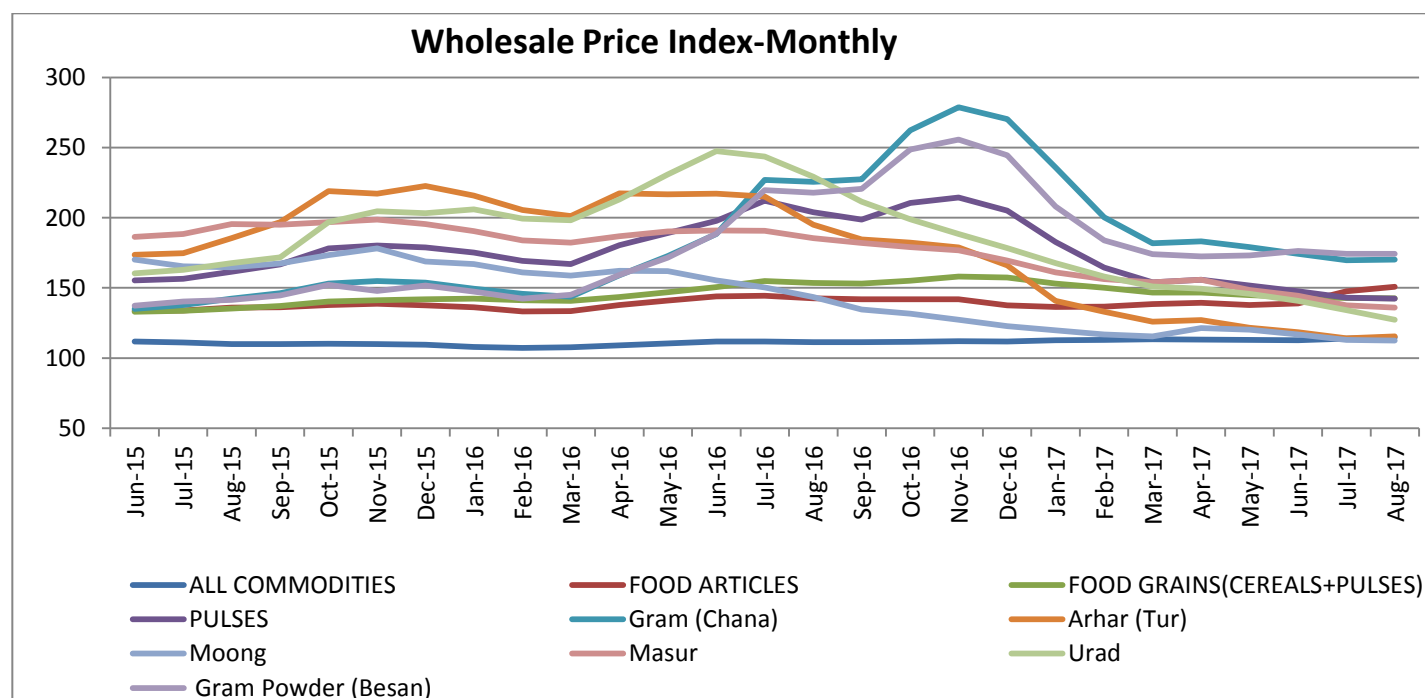

- Kharif pulses sowings are almost over now. Indian farmers have covered 142.70 lakh ha as on 06.10.2017** against 147.95 lakh ha last year and year's normal of 105.58 lakh ha. Area coverage is 3.55 % lower than last year. Almost all pulses area, except Urad and Kulthi has declined this year in kharif season. Tur area declined by 18.38 % to 43.59 lakh ha(53.40 last year) against normal of 39.24 lakh ha. Moong area declined by 8.01 % to 31.82 lakh ha(34.59 last year) against normal of 23.41 lakh ha. Kulthi area increased by 74.86 % to 1.26 lakh ha against normal of 2.40 lakh ha. However, Urad performed well against all expectation. Its area increased by 19.69 % to 43.08 lakh ha(35.99 lakh ha) against normal of 24.79 lakh ha. If we see overall decline, it is minor decline as total area is higher by 35.16% from normal area.
- Pressure on Chana market continues against all expectation and more dip is expected in the first half of October.** In second half seed demand is likely to support market and it may trade in the range of Rs 5300 to Rs 5700 per qtl. in Delhi market. As import flow from October to December is likely to continue around one lakh tonne per month from Australia. It would fulfill the short supply expected in the lean season. Stock in domestic market is expected to be 25 to 30 lakh tonne and it is sufficient to meet the four months demand. New crop would hit Indian market from February. So any unexpected firmness is unlikely.
- As supply side of Moong is about to increase from kharif crop and demand is not up to the mark, firmness is unlikely in October.** Moong is being traded at Rs 4600 per qtl. in Jaipur market and there is a possibility that some improvement might be seen in Moong price with the commencement of procurement on MSP by govt.'s agencies. Private participants would avoid bulk buying as there is a fear in the market that after the end of procurement prices would decrease again as availability is higher. State agencies procurement quantity may go up as farmers would offer maximum Moong to Govt. for getting MSP. Moong Price is ruling Rs 1000 below MSP.
- Lentils cash market is likely to recover to some extent as seed demand is expected to emerge by October end.** Demand for Masur dal and Masur is weak right now while domestic and imported stock is said to be higher than normal expectation. Imported Masur in Mumbai is being traded at Rs 3550/3600 per qtl. There is a fear in the market that farmers may reduce Masur area this year due to lower price. Canada & Australia are offering broken red Lentils at \$500 per tonne and \$540 nipper type on CnF basis at Nhava Sheva respectively. Buying at current level is better to make average and get some better price by the end of this month.
- Tur market is likely to trade under pressure due to excess domestic and imported old stock in the market.** Market is likely to trade in the range of Rs 3800 to Rs 4200 per qtl. until procurement by govt.'s agencies start for new crop. As area is lower by 18 percent, crop size would be lower by 10 lakh tonne. However, this shortfall would be nullified by excess stock available with govt. & private hands. As import limit is fixed at 1.5 lakh tonne, no import is expected now till March 2018. Decision on export early may help market to recover to some extent. However, if allowed, exporters would not be able to export as Burma is offering Tur at Rs 24000 to 25000 per tonne. Burma is offering Tur at \$ 380/85 per T on CnF basis.
- Urad market has recovered due to commencement of procurement. Crop quality is good and supply side is expected to increase in coming weeks.** Old stock is available in plenty against normal demand. Stockists have retained old stock and they might release stock with improving price. It would restrict market and pressure would continue. Urad might trade in the range of Rs 4400 to Rs 4800 per qtl. Burma is offering FAQ at Rs 3050 to Rs 3100 per qtl. on CnF basis. Retaining stock is unwise. Stake holders should start selling with improvement in market.
- As Chana is under pressure, there is no scope for peas to get firmer in October.** Old stock is ample and import flow continues from Canada and Ukraine. Ukraine is offering peas at Rs 1810/1820 per qtl. at Nhava Sheva port.

International:
[\(Back to Content\)](#)

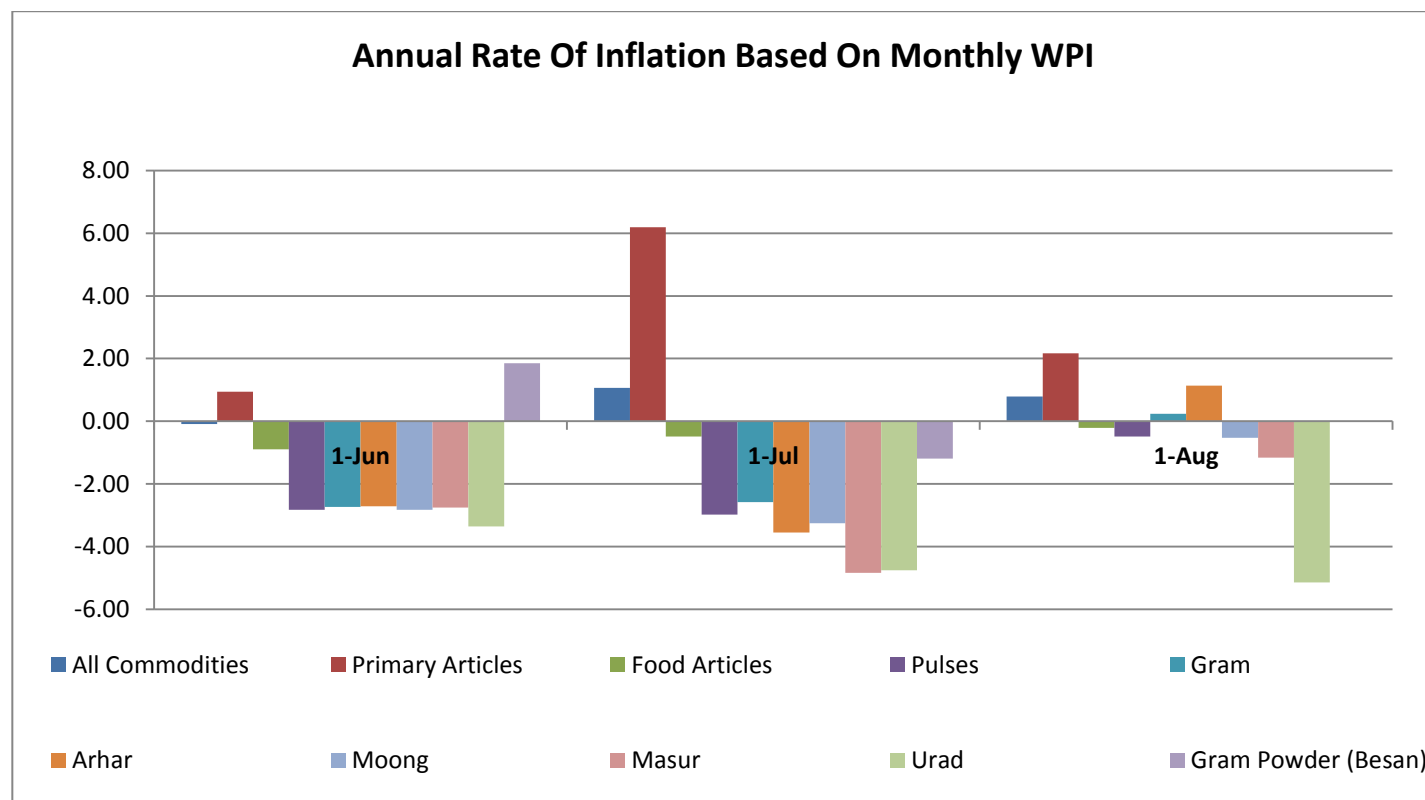

- **Harvesting of Lentils in Canada is almost over now. Experts say that yield is better than expected for 2017.** Pulses grower's association sees Lentils production at 24 lakh tonne and total supply is expected to be around 27.5 lakh tonne in 2017. It would be lower by 20 % from last year. Out of total production the share of red lentils would be around 15 lakh tonne & green lentils at around 8.75 lakh tonne. US may supply 5.5 lakh tonne green lentils to Canada. So availability of Lentils for export would be ample throughout the year. Quality of Canadian Lentils is good.
- **Major buyers like India is in no hurry to get maximum supply from Canada from new crop due to higher availability in domestic market.** So price in Canadian Lentils would depend on Australian quotes. Green Lentils demand would continue as quality is better and Canada has an order for supply. Once the order requirement is filled, green lentils price too might be under pressure. Russian is offering green Lentils at \$35 per hundredweight for no. 2 quality.
- **India had purchased around 9.1 lakh tonne lentils including green lentils from Canada.** It was 37 % of total Canadian Lentils demand. Right now 1.76 lakh tonne lentils are available on Indian ports. India consumes 1.5 lakh tonne Lentils per month. If we include domestic stock in it total availability comes to 3 to 4 lakh tonne. So from December requirement would increase and import volume might increase in new year. India may import 5 to 6 lakh tonne lentils in 2018.
- **Chickpeas production in Canada has been estimated in the range of 60000 to over one lakh tonne** as showed by various estimates in 2017. Crop size in US is expected to be higher than last year. It may be around 2 lakh tonne. Desi Chick peas crop in Australia would be around 1MMT, quite lower from last year. But demand from India would decrease as sowing of Chana and its area is bound to increase by 5 % this year, starting from 20th October-2017.
- **As per latest update by USDA Peas production in USA would decrease by 45%** to 697,043 tonne. Rough weather condition has impacted yield of all pulses. Besides, hot and dry weather lower area coverage (17%) to 1.15 million acres contributed to lower overall crop size. Average yield has decreased by 703 pounds per acre to 1383 pounds per acre. It would be the lowest yield after 1996. Harvesting is almost over now in Montana and North Dakota. Crop faced extreme moisture stress from growth/flowering stage to harvesting stages.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canada dry pea area is expected to decline by 3.44 % to 16.56 lakh ha** in 2017-18. Yield is expected to decrease by 14.63 % to 2.45 T per ha. Thus total production is expected to decline from 48 lakh tonne to 40 lakh tonne in 2017-18. As production is bound to decline, export volume too is expected to decrease from 38 to 32 lakh tonne in 2017-18. Total supply in Canada is likely to decrease from 50 lakh t to 41.50 lakh Tonne. Price of pea may rule in the range of \$280 to \$310 per T in 2017-18.

Outlook: Pulses market is likely to trade steady to range bound in the month of October.

Agri Commodity Indices –August, 2017

Pulses Index decreases to 142.4(-0.7) M-o-M basis in August-2017

Chana (Chickpeas /Bengal Gram):

[\(Back to Content\)](#)

Fundamental Analysis and Outlook:

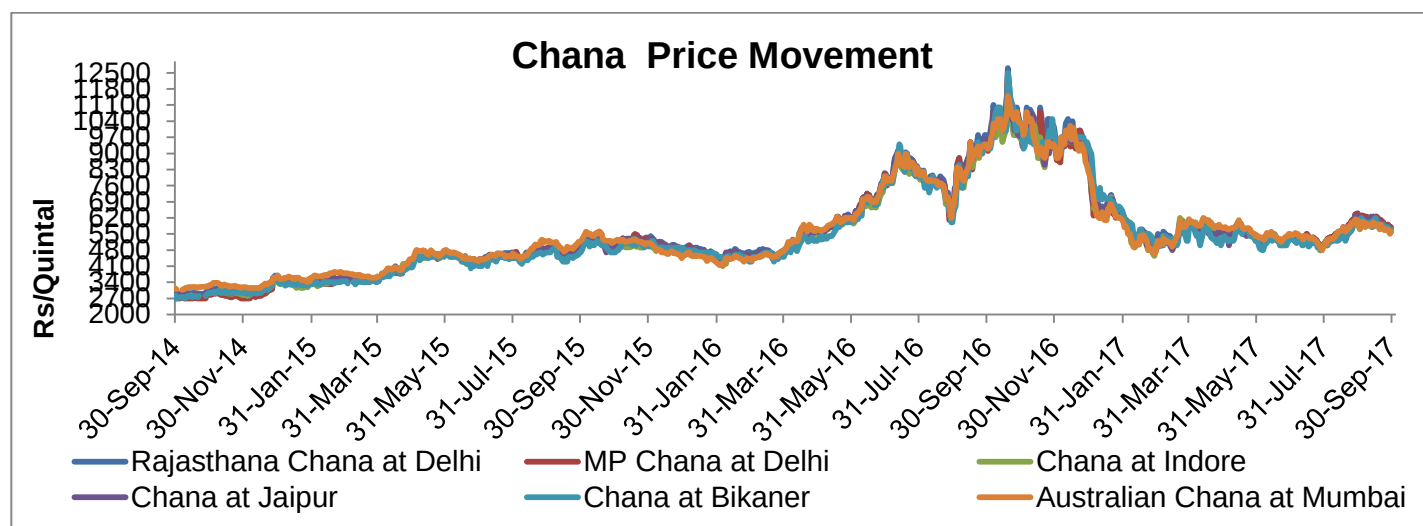

Market Recap:

Chana cash market traded up during first half of Sept and upward momentum could not sustain in the second half of the review month. Weak demand at higher level, retained stock and incoming vessels in Oct., Nov & Dec (around 3 lakh tonne) pressurized Chana cash market. Area is expected to increase this year by 5 percent from last year have weakened inner tonne in the market. In Mumbai Australian Chana is being offered at Rs5300/5350 per qtl. Cash market is expected to improve to some extent as seed demand would support market. However it would be a recovery, not uptrend. Selling at higher level would be good in October.

Price Dynamics:

In Sept-2017, all India average price was down by 1.76 % to Rs 5550 per qtl. Average price in August was 5660 per qtl. Prices are likely to stay steady to slightly firm due to:

- Retention and likely seed demand
- Millers might return to market at lower level
- Steady Australian quotes at \$840
- Uncertain weather.

Seasonality Index hints that Chana is likely to notice steady to weak movement in Spot.

Chana Future Market Analysis:

Technical Commentary:

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 90.19Lakh tonne. Downward revision is likely due to crop loss in Bikaner region and lower grain size in some particular region in Rajasthan and Maharashtra. Agriwatch sticks to its previous estimate. India had produced 67 lakh tonne Chana last year.

Market Outlook for Oct-2017

Chana prices are likely to witness range bound movement.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

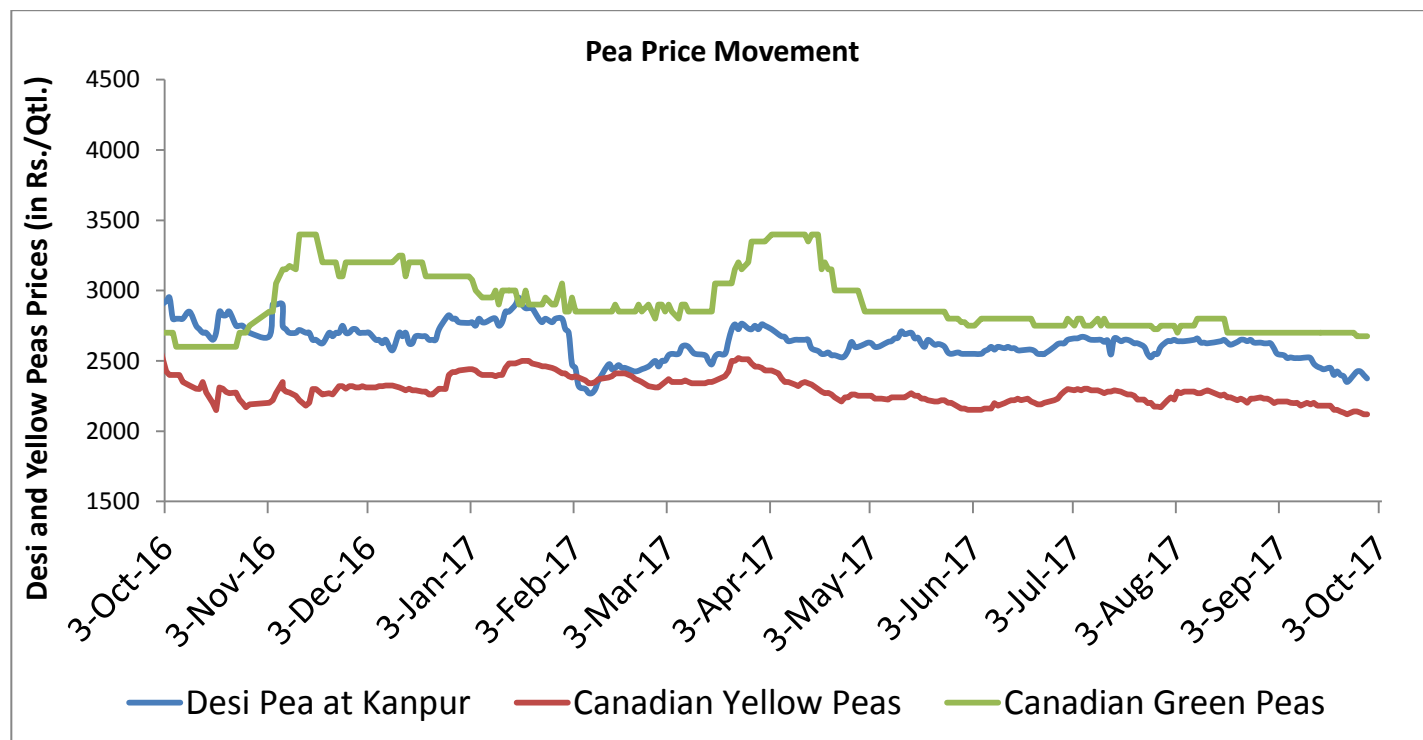

Market Recap:

Imported and domestic yellow peas, by and large witnessed steady to weak momentum during the month under review. Pressure on peas market may continue as import flow at cheaper price is hampering market fundamentals. However, recovery in peas market depends on Chana price to a great extent in this month. Forward quotes in recent week have decreased. Ukraine is offering peas at \$280 per T. Inner tone remains weak.

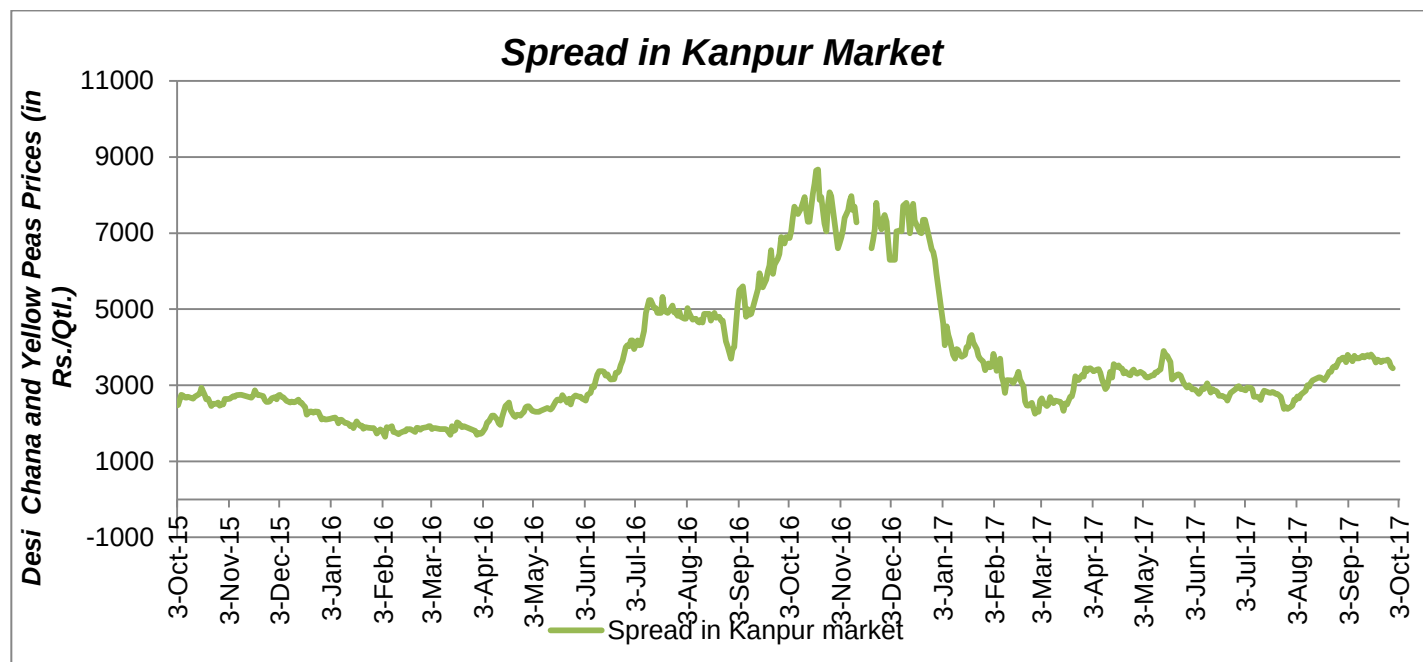

Price Dynamics:

In Sept-2017., yellow pea average prices at Kanpur traded down by 6.56 % from Rs 2434 to Rs 2634 per qtl. Steady to weak movement is expected in Oct due to:-

- Decreased forward quotes.
- Higher imported stock
- Decreasing Chana price &
- Weak demand in domestic market

Spread With Chana:

[\(Back to Content\)](#)

The spread between Chana and Pea at Kanpur market increased from Rs 2788 to Rs 3683 mainly because of increased Chana price. Meanwhile, spread is expected to remain between Rs 3400-3600 per quintal in Oct on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound to weak movement in Oct-2017.

Market Outlook for Sept: Prices of Pea are likely to trade steady to slightly weak due to subdued demand at current level and continued import flow.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

[\(Back to Content\)](#)

Fundamental Analysis and Outlook:

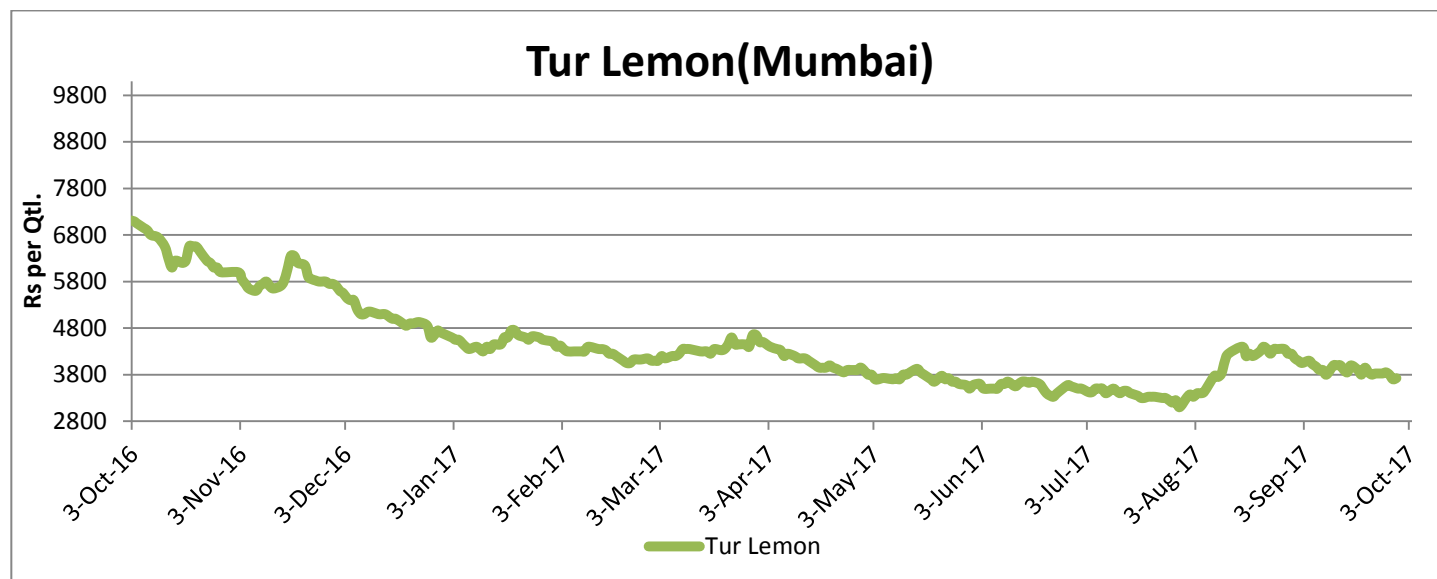

Market Recap:

During review month, Desi and imported Tur traded smartly up by 14% to Rs4324 per qtl due to restriction on import, renewed demand and crop loss news. However, release from central pool stock and profit booking dragged down price once again. Gulberga market is likely to touch 4100/4200 level. It may trade in Mumbai at 4000. Govt.'s selling from central pool stock and it has put more pressure on market. Buying near 3900.4000 seems good in Mumbai market. Diwali and dashara demand is due to come out. It may push price up.

Price Dynamics:

In August-2017, average price in key markets were up by around 14.00 % to Rs 4324 per qtl. from Rs 3340 in July due to

- Import restriction
- Festive demand
- Stockiest unwillingness to sell at current level
- Govt's policy to ensure good price to farmers

Seasonality Index- depicts steady to slightly weak movement in this month. Average price increased by 14 % MoM basis. Farmers have restricted selling at current level. Steady to weak movement might be seen in Sept.

Market Outlook for Sept:

Prices are likely to trade steady to weak.

Fundamental Analysis and Outlook:

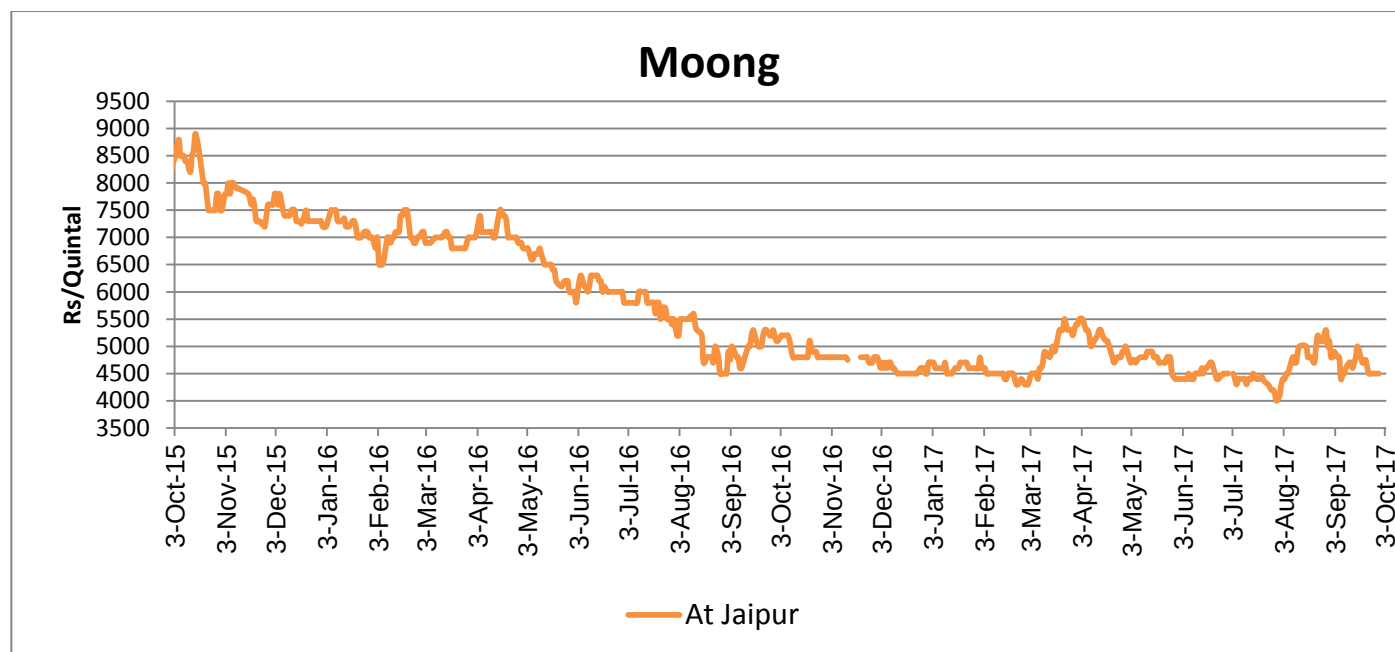

Market Recap:

Moong market witnessed firm movement in August-2017. It may trade stable to slightly weak in Sept too due to new arrival and weak demand. Buyers remain inactive at current level. Lower quotes in global market remain unsupportive for Moong cash market. Market expects demand from 20th Sept and it may support cash market.

Price Dynamics:
