Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic:

- **Pulses markets continued to reel under pressure as demand remains affected due to cash crunch.** After bumper kharif season India is heading towards bumper Rabi pulses too. Stock is ample in domestic market and with govt. Besides, import flow continues. Opening up export is meaningless as there is no parity for exporters right now. In current scenario any strong recovery in market is unlikely. Agriwatch expects market to return to normal trade not before 2nd half of the new year.
- **Rabi pulses area is running ahead by 47 percent to 42.01 lakh ha so far.** Chana, Masur, Matar, Kulthi Urad & Lathyrus area coverage is higher by 47.39, 131.19, 21.87, 15.71 & 6.79 % higher so far. Just opposite to it area under Moong is Moong & Lathyrus lagging behind by 19.66 and 40.15 % so far. Overall sowing progress seems normal to good.
- **Area coverage under Chana is lower in states like Rajasthan, Telangana, AP & Odisha** by 44.8, 18.2, 13.5 & 45.3 % so far. However, higher coverage in MP, Maharashtra, Karnataka and Uttar Pradesh by 301, 134.9, 13.1 & 23.2 % respectively has negated the impact of lower coverage area in some particular states. Overall area coverage is bound to increase by 10 to 15 % this year. After slight recovery Chana is bound to decrease once again.
- **The Government has decided to develop a formula to increase/decrease import duty** on Agriculture commodities. A benchmark price would be fixed under this formula. According to market sources, if prices go down below MSP by 20 %, import will be restricted, export would continue. Similarly, if prices go above MSP by 20 %, export will be restricted, and import would continue.
- **New Tur arrives in Sholapur and around 50 bags were traded at Rs 4500/4600 per qtl.** Reports are circulating in mandis that no of grains are 3 to 4 instead of 5 to 6 this year in Sholapur region. Increasing fear of fungus infestation in other region may support Tur this week to a certain extent. Tur market is likely to move up further by Rs 100 to Rs 150 in the near term before new arrivals increase.
- **A vessel having 24535.50 tonne yellow peas and 33964.49 tonne lentil** reached Mumbai on 6th Nov-2017. Total quantity in question is around 58500 metric tonnes. Despite bearish trend and lower price in domestic market import flow continues. It will put further pressure on already distorted market in coming weeks.
- **Mozambique pigeon pea (red) and white were offered at \$190 and \$210 per tonne basis CnF Nhava Sheva.** Australia quoted chickpeas Jimbour type at \$730 FoB for Nov and Dec delivery. Myanmar Lemon Tur is being offered at \$305 per tone basis Kolkatta. Faq & SQ Urad from same origin is being offered at \$410 & \$555 per tone basis Kolkatta.
- **Australia Desi Chickpeas Jimbour type is being offered at \$730 for Nov delivery.** December and January delivery is being offered at \$725 & \$735 per tonne. Australian Red whole Lentil is being offered at \$480 for Nov/dec delivery, for nipper type it is being offered at \$475 per tone. Australian Kaspas peas is being offered at \$350 per tone for December delivery.
- **Some export deals (around 10,000 tone) have been held for Moong and if export demand continues, moong** would continue to trade at current level. Arrivals have decreased as farmers have started retaining stock due to lower price realization. Burma offers Mung at \$770 per tonne while it is being traded at Rs 4500 to Rs 4700 in Indian market.

International:

- **Global chickpeas market traded almost unchanged during the week under review despite** a tight supply demand side in spot markets. At current market assessment scenario longer term supply side seems good. India and Turkey are trying to increase its pulses production. So demand from India is bound to decline. Carryout stock in India is at comfortable position. The biggest change will be in desi chickpea output. Australia is now harvesting its crop. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas. Now it is assumed that crop size would be lower than 1 MMT.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for Chickpeas** for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81,000 tonne against 82,000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 tonne against 16,000 tonne last year.
- **Dry bean production in US has been estimated sharply up by 23 % to 1.6 million tonne.** Yield has been estimated at 1737 pound per acre. US farmers have planted 2.11 million acres in 2017. It was up by 27 % from 2016. In Michigan, harvest began in the third week of September as favorable weather aided in drying down the crop. As October got underway, 57% of the beans were harvested.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Outlook: Pulses market is likely to trade steady to range bound to slightly weak in November.

Pulses Supply & Deemand:

Combined Balance Sheet Of Pulses for Crop Year 2016-17 & 2017-18										
(*All quantities in Lakh tonnes)	Urad(Kha-Rabi)		Moong(Kha-Rabi)		Tur		Chana		Masur	
Marketing Year	2016-17	2017-18*	2016-17	2017-18*	2016-17	2017-18*	2016-17	2017-18*	2016-17	2017-18*
Opening Stocks	3.3	8.77	5.33	8.9	0.9	9.53	1.9	12.89	5.27	3.95
Production /Fresh arrival	23.97	24.97	20.13	19.25	38.59	28.76	90.19	92.12	10.4	11.68

Total Use(Export + Consumption)	23.5	25.5	18.8	20.5	37	35	89	92	18.72	20
Ending Stocks (Total Supply - Total Use)	8.77	9.74	8.9	9.15	9.53	5.29	12.89	15.01	3.95	3.63

Urad Kharif –Rabi combined production is bound to increase slightly from 23.9 to 24.97 lakh ton in crop year 2017-18. Production increase is due to higher area coverage. Import would remain restricted at 1.5 lakh tone, applicable till March-2018. Over 1.1 lakh ton Urad import has already been reported. Govt may review quantity restriction in March-2017. Consumption is likely to increase by 2 lakh ton due to cheaper availability in domestic market. Carryout would increase due to higher total supply and higher production. It will increase from 8.77 lakh ton to 9.74 lakh ton. Supply side will remain at comfortable level.

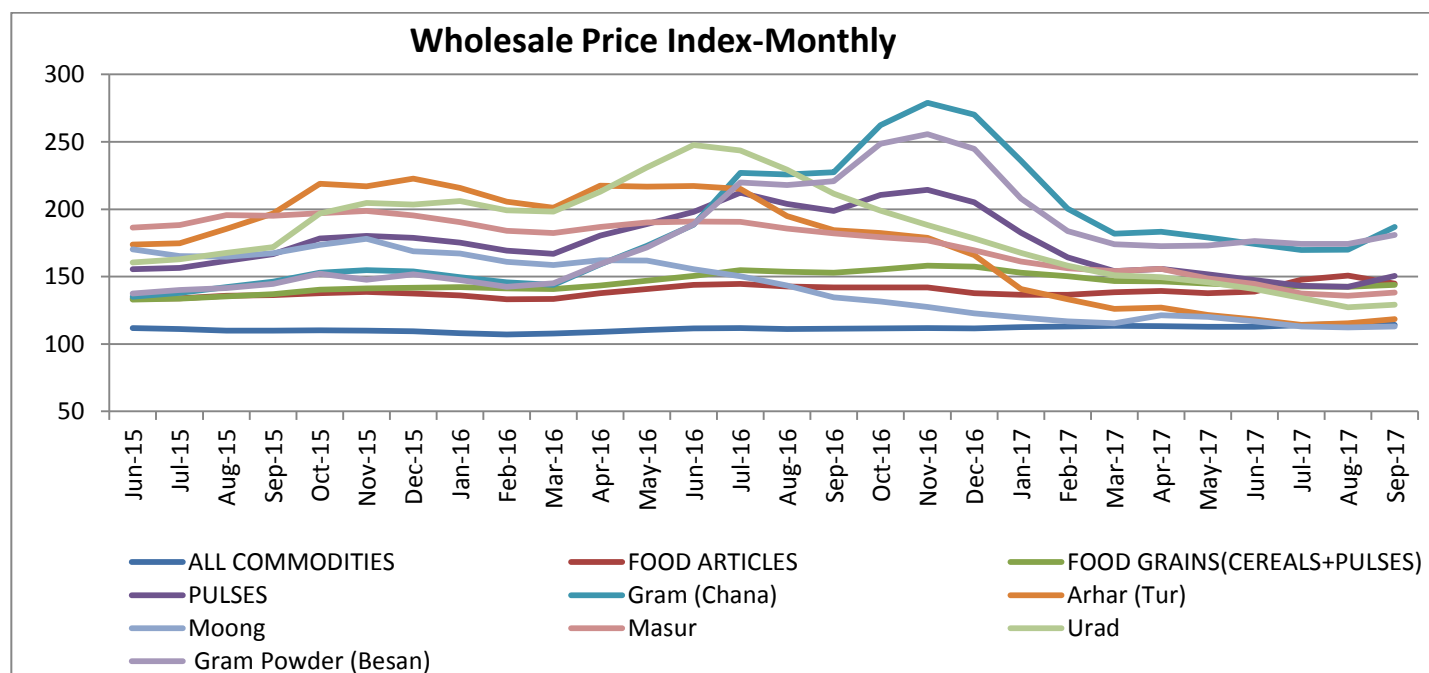

Moong Kharif-Rabi production is expected to decrease from 20.3 lakh ton to 19.25 lakh ton in 2017-18. Import would remain at 1.5 lakh ton as fixed by govt. Total supply would increase to 29.65 lakh ton due to higher carryout stock. Govt may review import quantity restriction March-2018 onward. Over 1.25 lakh ton Moong has been imported so far. Consumption would increase slightly from 18.8 to 20.5 lakh ton. The season 2017-18 would end with higher carryout stock (9.15 lakh ton). Supply side will remain at comfortable level.

Tur production is expected to decline to 28.7 lakh ton in 2017-18 from record production of 38.59 lakh ton last year. Decrease in production is due to over 22/24 % decline in area planted this year. Total supply is expected to decline to 40.29 lakh ton due to lower crop size. Consumption is expected to decline from 37 to 35 lakh ton due higher availability of other pulses at competitive price. Ending stock would decline from 9.53 to 5.29 lakh ton. Supply sided at is comfortable. Import restriction continues and fixed at 1.5 lakh ton.

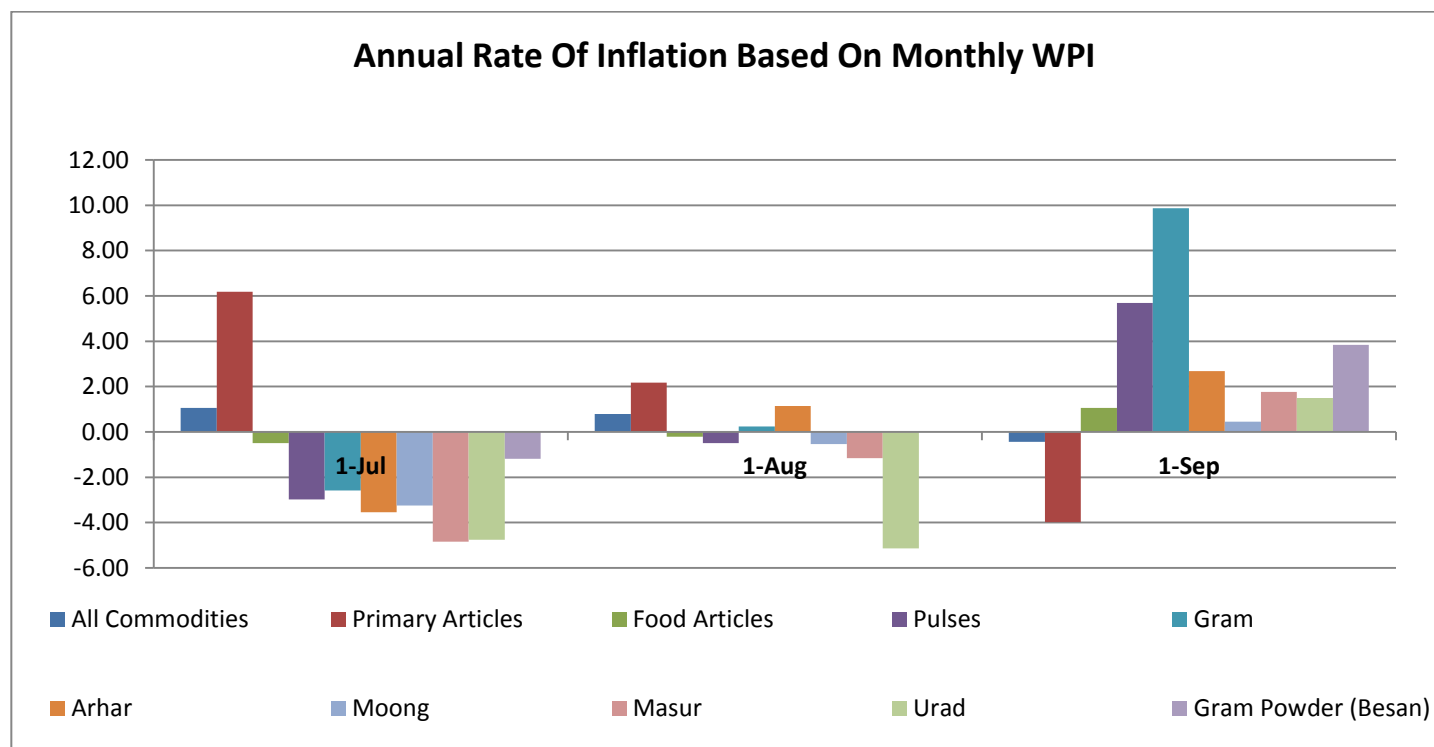

Chana production is likely to increase from 90.19 to 92.12 lakh ton in 2017-18 as per Agriwatch preliminary estimate. As season would start with hefty carryout of 22.89 lakh ton Chana ,total supply would increase from 101.89 to 107.01 lakh ton. As supply side is higher ,import might decrease from hefty 9.8 lakh ton to 2 lakh ton. Consumption is likely to increase from 89 to 92 lakh ton. The season would end with 15.01 lakh ton carry out. So pressure on Chana market may continue without govt.'s interference.

Lentil production is expected to increase from 10.40 to 11.68 lakh ton this year due to higher area coverage. Higher carry out and higher production would increase total supply to 23.63 lakh ton. Import is expected to remain steady at 7/8 lakh ton. Availability is higher. The season may end with 3.63 lakh ton carry out. Supply side would remain at comfortable level.

Agri Commodity Indices –September, 2017

Pulses Index increases to 150.5(8.1) M-o-M basis in September-2017

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

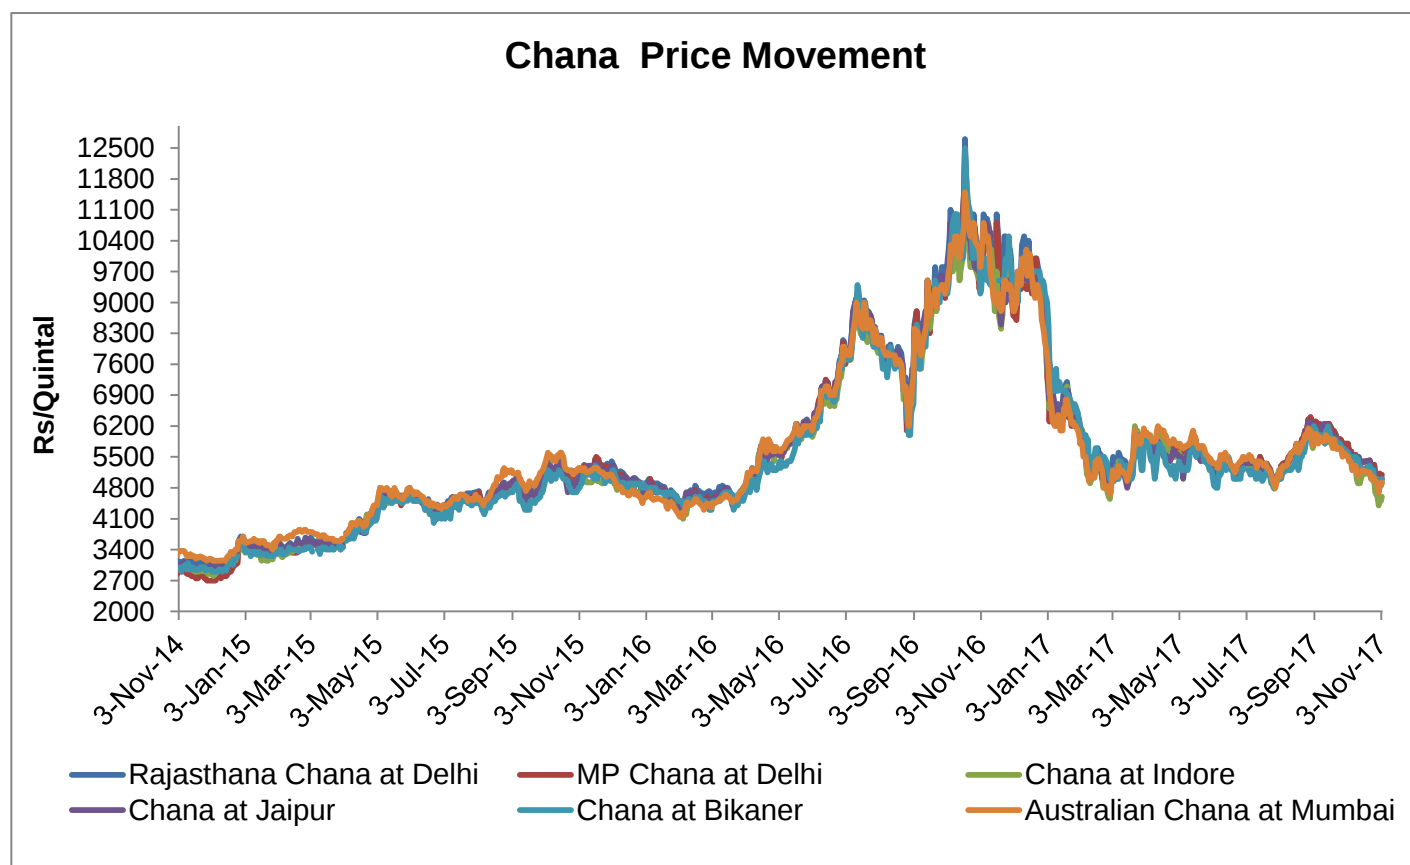

Chana market could not sustain its upward momentum in the month of October due to weak demand, higher area coverage and lower quotes in Australia. Australia is offering Chana at \$ 730 for Nov, \$720 for Dec & \$735 for Jan delivery at Nhava Sheva port. Feb delivery is being offered at \$735 per tone. Actually there is no impact of lower crop size in Australia. Chana market may move up by Rs 100 to Rs 150 more from current level in the near term. Agriwatch advises to sell Chana on recovery.

Price Dynamics:

In Oct-2017, all India average price was down by 10 % to Rs 5267 per qtl.. Average price in Sept was 5953 per qtl.

Prices are likely to move down side due to:

- Higher area coverage
- Stockists selling
- Lower Australian quotes at \$730 and
- Weak demand

Seasonality Index hints that Chana is likely to notice weak movement in the Spot market.

Chana Future Market Analysis:

Technical Commentary:

Decreasing price, OI, Volume show market to enter into consolidation phase.

RSI is moving down in neutral region, hints caution to bulls.

Prices closed below 9 and 18 days EMAs

Strategy: Sell on rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Nov.	4700	4600	5000	5350	5500
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Nov.	Sell below	5250	4800	4700	5350

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 90.19Lakh tonne. Downward revision is likely due to crop loss in Bikaner region and lower grain size in some particular region in Rajasthan and Maharashtra. Agriwatch sticks to its previous estimate. India had produced 67 lakh tonne Chana last year.

Market Outlook for Nov-2017

Chana prices are likely to witness weak movement.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

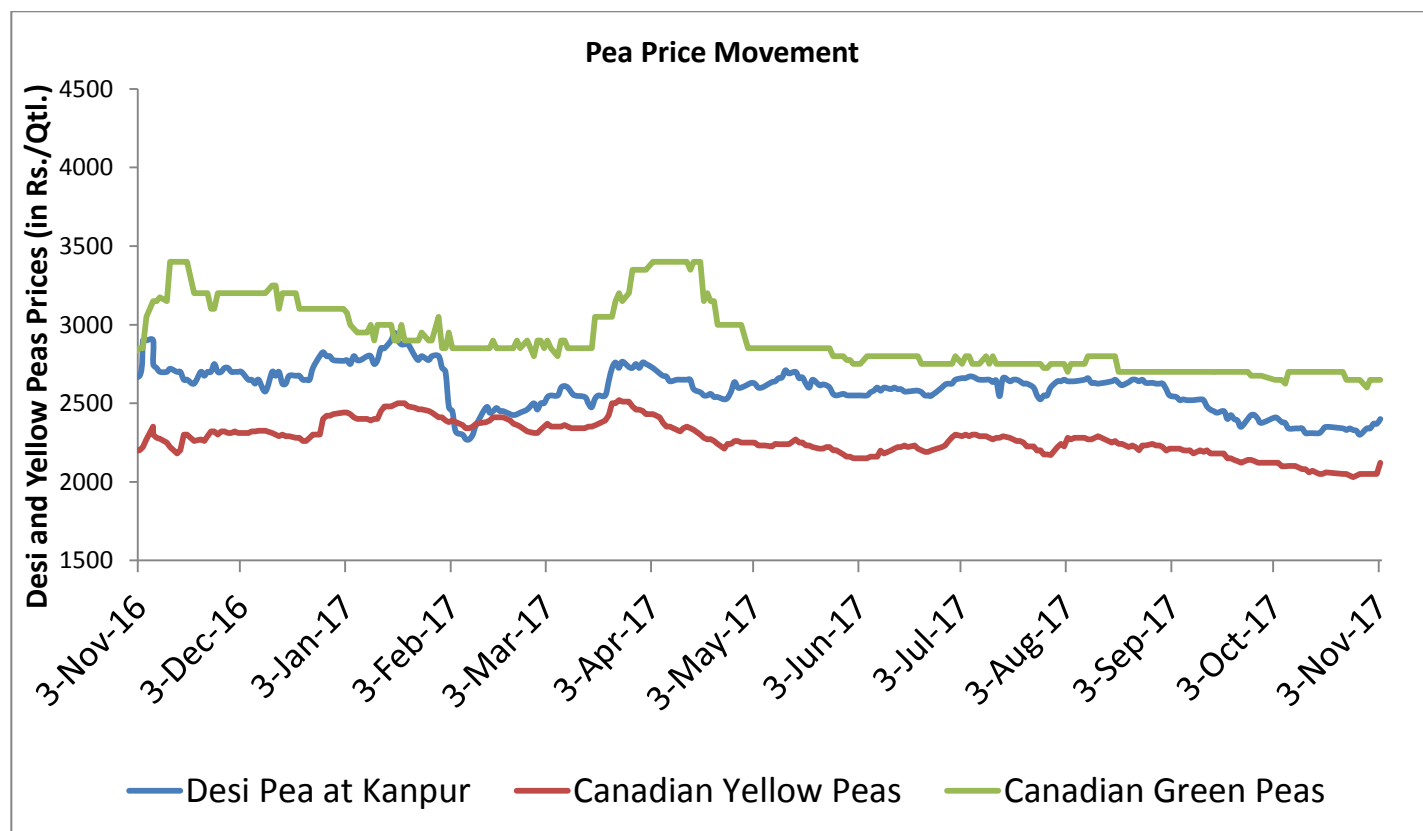

Market Recap:

Imported and domestic yellow peas, by and large witnessed steady to weak momentum during the month under review. Pressure on peas market may continue as import flow at cheaper price is hampering market fundamentals. Besides, weak Chana would work as a cap for peas market in November. Import continues unabated and it would pressurize peas market once again in November. Selling at recovery seems good in current market condition.

Price Dynamics:

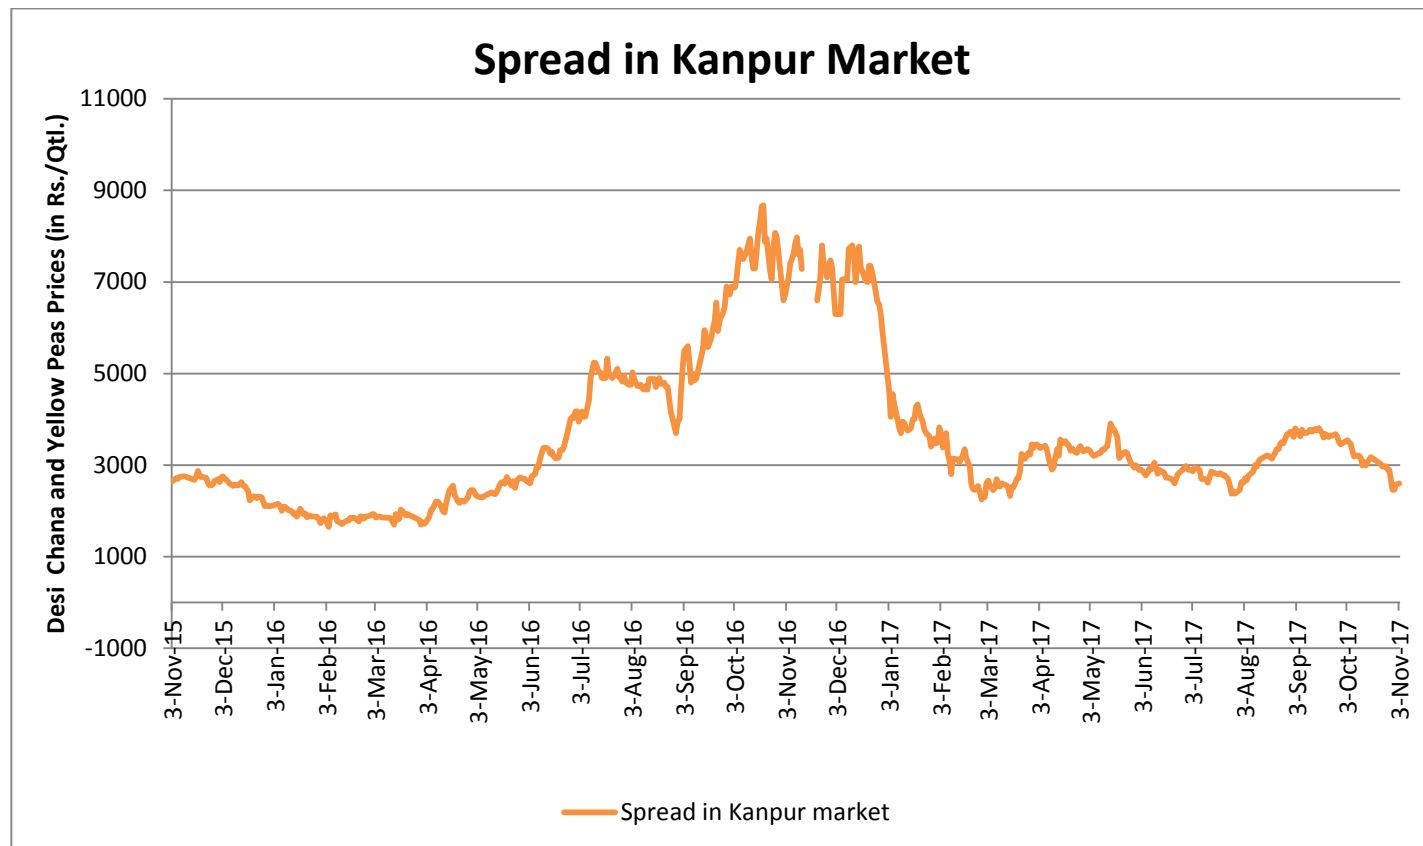

In Oct-2017., yellow pea all India average prices traded down by 3.20 % from Rs 2439 to Rs 2360 per qtl. Steady to weak movement is expected in Nov due to:-

- Decreased forward quotes.
- Higher imported stock
- Decreasing Chana price &
- Weak demand in domestic market

Spread With Chana:

[\(Back to Content\)](#)

The spread between Chana and Pea at Kanpur market decreased considerably mainly because of decreased Chana price. As pressure would continue, spread is expected to remain between Rs 2300 to Rs 2600 per quintal in Nov on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound to weak movement in Nov-2017.

Market Outlook for Nov: Prices of Pea are likely to trade steady to slightly weak due to subdued demand at current level and continued import flow. Stock is ample.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

Market Recap:

Masur market continues to reel under pressure due to ample stock and weak demand. Import flow continues. Buyers are covering only their immediate demand. Besides, money crunch too is restricting market to recover once again. Whenever prices move up stockists start selling and market decreases. Weak tone is likely to prevail in the market in November too. Monthly average price decreased by 9% from Rs 3762 to Rs 3425 per qtl. Currently in Mumbai it is being quoted at Rs 3400/3450 per qtl. Recovery in market is unlikely despite fear of lower acreage in UP. Stock is ample and demand is weak. Unlikely in November too.

Price Dynamics:

In Oct-2017, average price in key market Kanpur was down by 7.78 % to Rs 3450 per qtl MoM basis. Prices are unlikely to recover in November. Prices are weak due to:

- Lower forward quotes(\$480/85) Australia.
- Weak demand at lower level and bearish trend in other pulses.
- Import flow and lower CnF quote in Canada(\$450)
- Ample stock available in the market

Seasonality Index depicts range bound to slightly weak movement in Nov-2017.

Market Outlook for Nov:

Prices are likely to notice range bound to weak movement. Market may see slight recovery. But overall tone remains weak.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

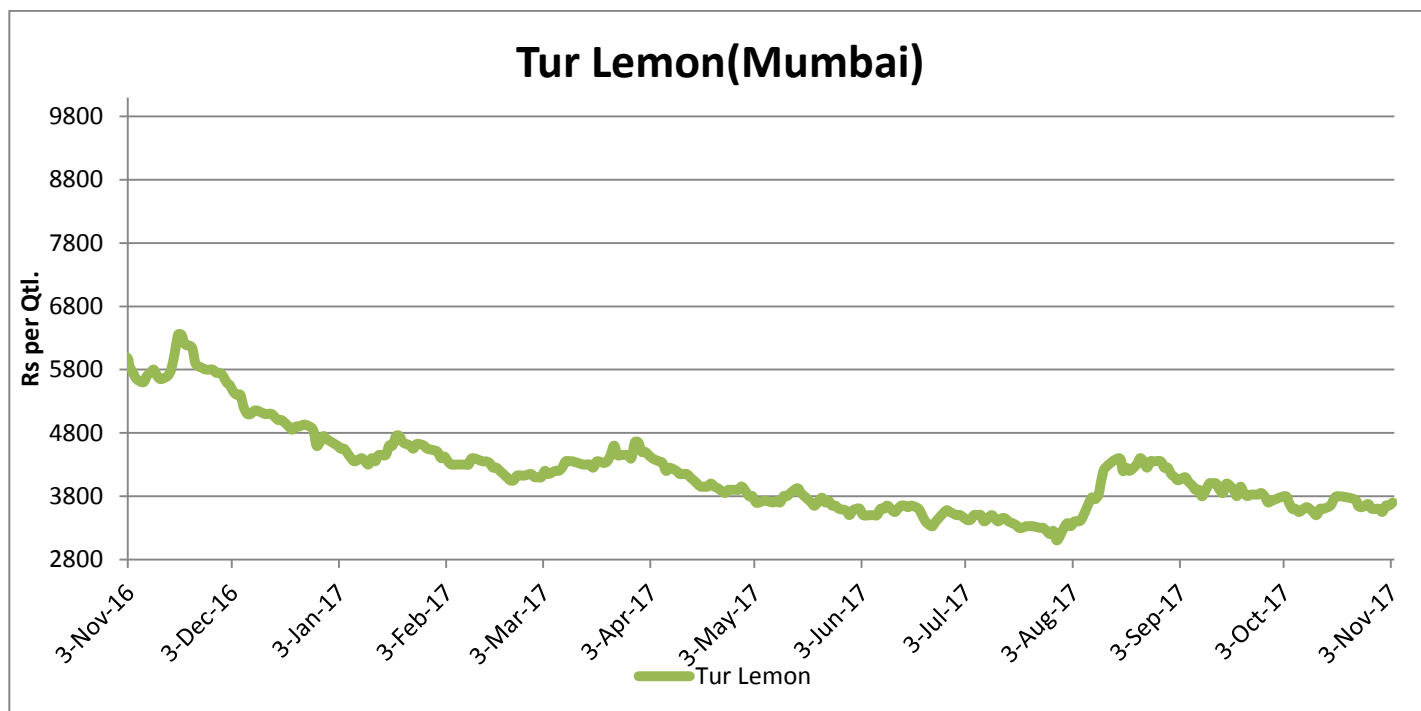

Market Recap:

During review month, Desi and imported Tur traded smartly down by 6.01% to Rs 3637 per qtl due to weak demand, higher stock with govt.weak buying interest due to money crunch and cheaper availability of other pulses. Market is likely to trade range bound in November as area is lower and yield of the new crop is expected to decline by 15 % this year . Gulberga market is likely to trade in the range of Rs 3750 to 3950 in November. Buying near 3700 in Gulberga seems good under prevailing scenario..

Price Dynamics:

In Oct-2017, average price in key markets were down by around 8.14 % to Rs 3814per qtl. from Rs 4152 in Sept due to

- Higher availability
- Lower forward quotes
- Weak demand
- & selling pressure from central pool stock.

Seasonality Index- depicts steady to slightly weak movement in this month. Average price decreased by 8 % MoM basis. Farmers have restricted selling at current level. Steady to weak movement might be seen in Nov.

Production- According to the Agriwatch estimate, Kharif Tur MY 2017-18 production is estimated at 28.74 Lakh tonne against 38.58 lakh tonne in 2015-16. Sowing is almost over now . Tur area ended with 42 lakh ha as per Agriwatch estimate.

Market Outlook for November:

Tur prices are likely to trade steady weak in Nov-2017. New crop has started hitting the market in Maharashtra region.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

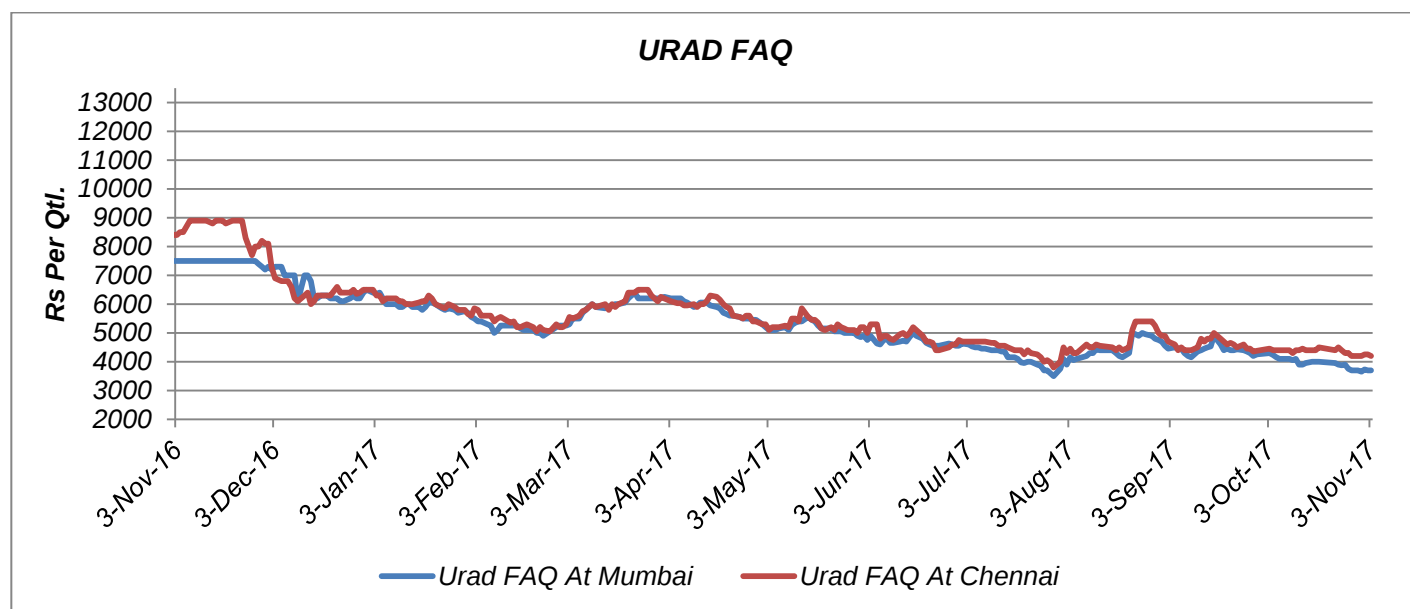

During Oct-2017, imported and desi Urad prices noticed weak movement due to higher stock, lower demand from mills and stockists selling in bearish outlook. Market may trade steady to slightly weak in November due to new arrival flow and restricted procurement activities on MSP. Higher area coverage too may be restrictive for Urad market. Overall tone remains steady to weak for Urad in Nov. Average price decreased by 7.45 % from Rs 4506 to Rs 4170 per qtl.

Price Dynamics:

In Oct, average prices in key markets including Mumbai/Chennai were down by 7.40 % percent to Rs 4175 per qtl.

Prices may stay steady to weak due to

- Weak demand
- Higher crop size
- Ample stock
- Lower forward quotes and restricted buying in domestic market.

Seasonality Index depicts steady to weak movement in the near term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2017-18 production is estimated at 24.97 lakh tonne against 23.97 lakh tonne 2015-16. See balance sheet at page no 76. It includes kharif and Rabi Urad.

Market Outlook for Nov:

Prices are likely to trade steady to weak.

Fundamental Analysis and Outlook For Moong:

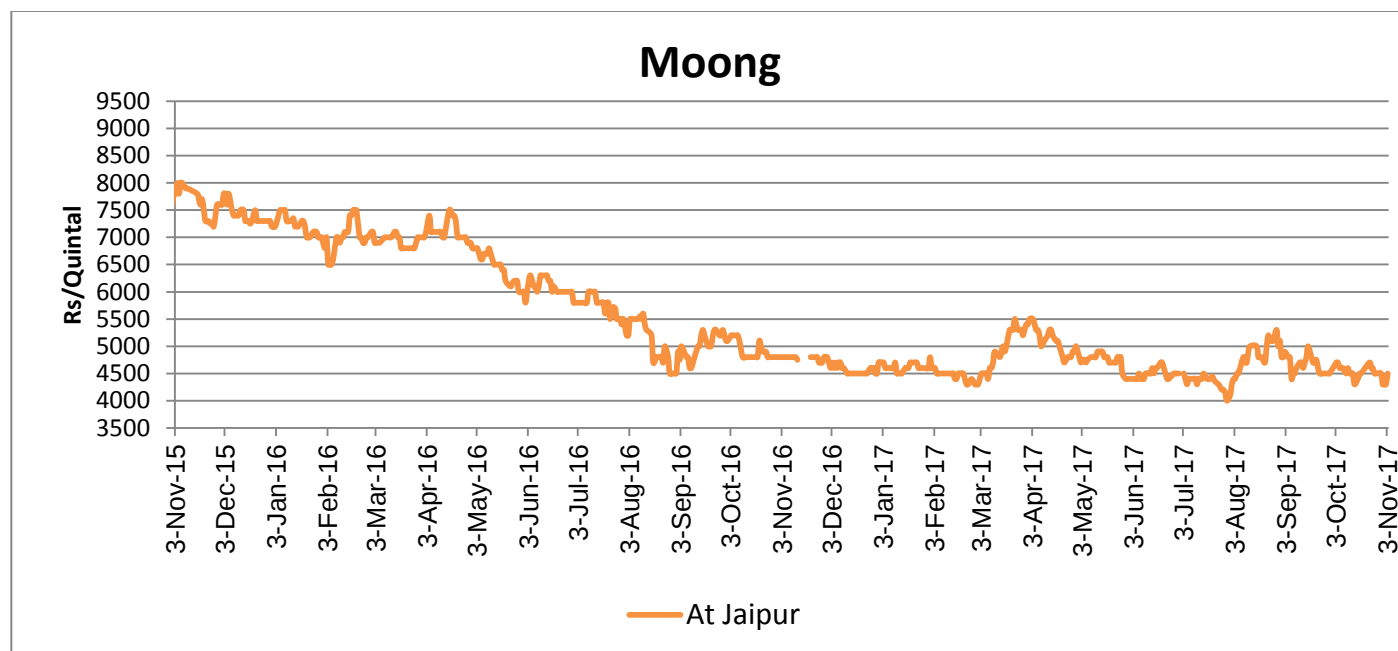

Market Recap:

Moong market witnessed weak movement in Oct-2017. It may trade stable to slightly weak in Nov too due to new arrival and weak demand. Buyers remain inactive at current level due to money crunch and uncertain govt. policy. No major movement in Moong market is expected in Nov. Some export orders has been clinched, but not enough to support market in the near term.

Price Dynamics:

Market is expected to trade range bound due to subdued demand. Selling from central pool would continue to cap any attempt of recovery. Demand remains weak. Average prices in key markets were down by 2.3 % to Rs 4500 per qtl..Following factors would influence Moong prices in Nov.

- Govt.'s restricted procurement on MSP (Rs 5225per 100kg)
- Stockiest inactiveness in descending market
- Decreased demand at lower level
- New crop arrival in MP and Maharashtra.

Seasonality Index depicts steady to slightly weak movement in Nov.

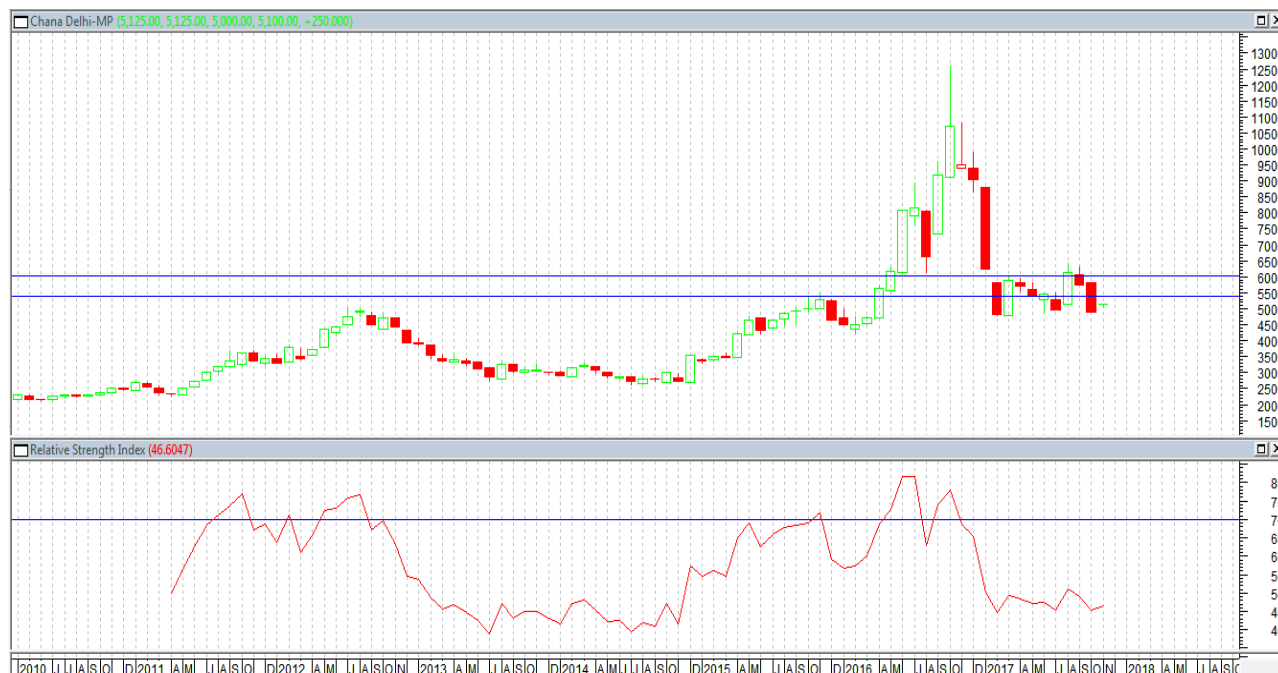

Production- According to the Agriwatch preliminary estimates, Kharif and rabi Moong 2017-18 production is estimated at 19.25Lakh tonne. It was 20.13 in 2016-17.

Market Outlook for Nov:

Prices may trade range bound.

Pulses Wise Technical Outlook for Nov-2017 :-

Chana:

Outlook –We expect prices to notice weak movement in the near term. Improvement in demand is unlikely. Higher area coverage would put further pressure on Chana price.

- ❖ Chart depicts weak movement in prices.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4800 to 5250 levels in this month.

Strategy: Sell on Rise.

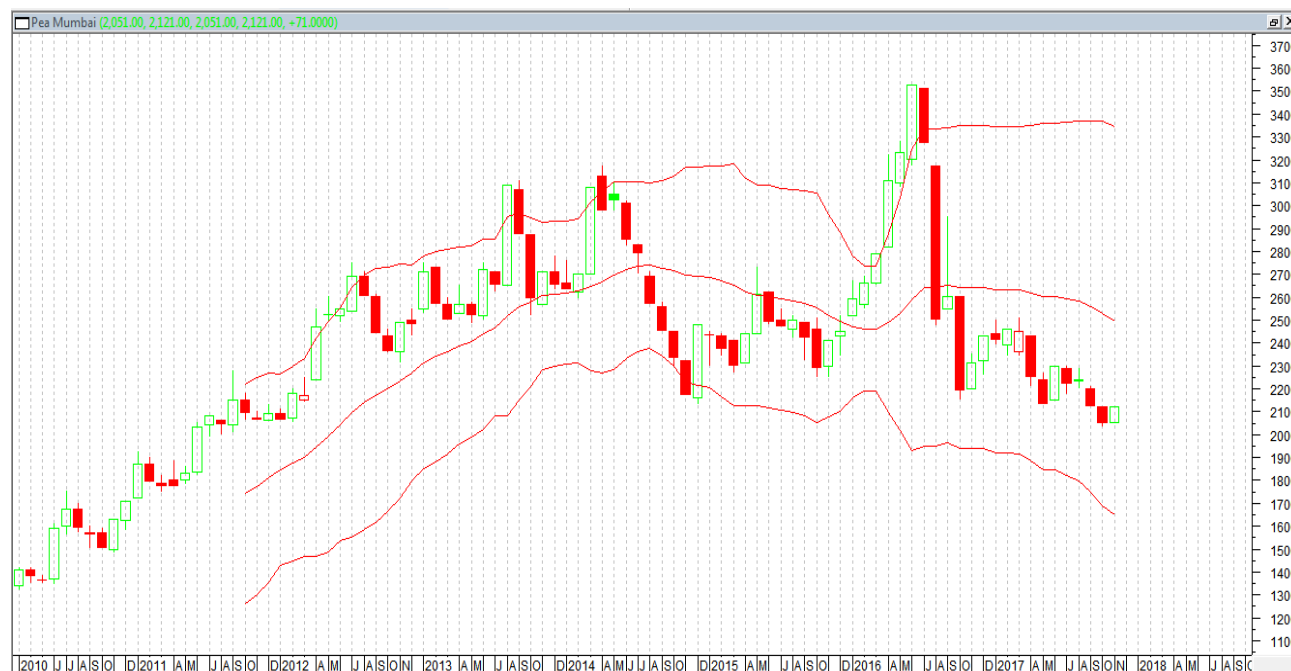

Trade Recommendations:

- **Spot Market outlook:** Chana is likely to stay steady to slightly weak

Trade Recommendations: Go short around 5250 with the first target of 5000 and second target 4800 with stop loss at 5350 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4550	4700	5100	5350	5500

Pea:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slight weak movement in this month taking clue from higher import flow and weak forward quotes.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 2050-2150 in this month.

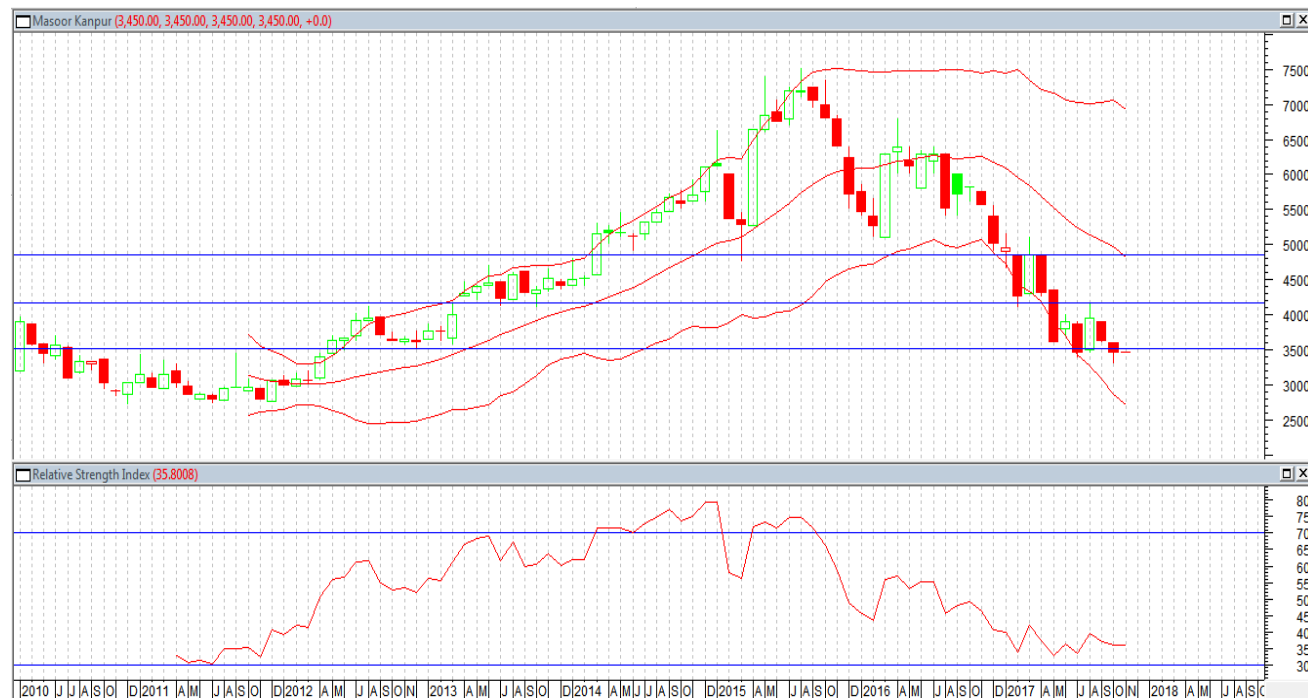

Strategy: Sell on rise

Trade Recommendations: Go short around 2150 with the first target of 2080 and second target 2050 with stop loss at 2175 level.

Support & Resistance				
S2	S1	PCP	R1	R2
2050	2100	2130	2250	2400

Masoor:

Desi Masoor (at Kanpur) Spot Market Monthly Chart:

Outlook –Range bound to slightly weak movement is likely to be noticed in this month.

- Chart depicts weak movement in the market.
- RSI oscillator is moving down in the neutral region.
- Expected price band is 3400 to 3700

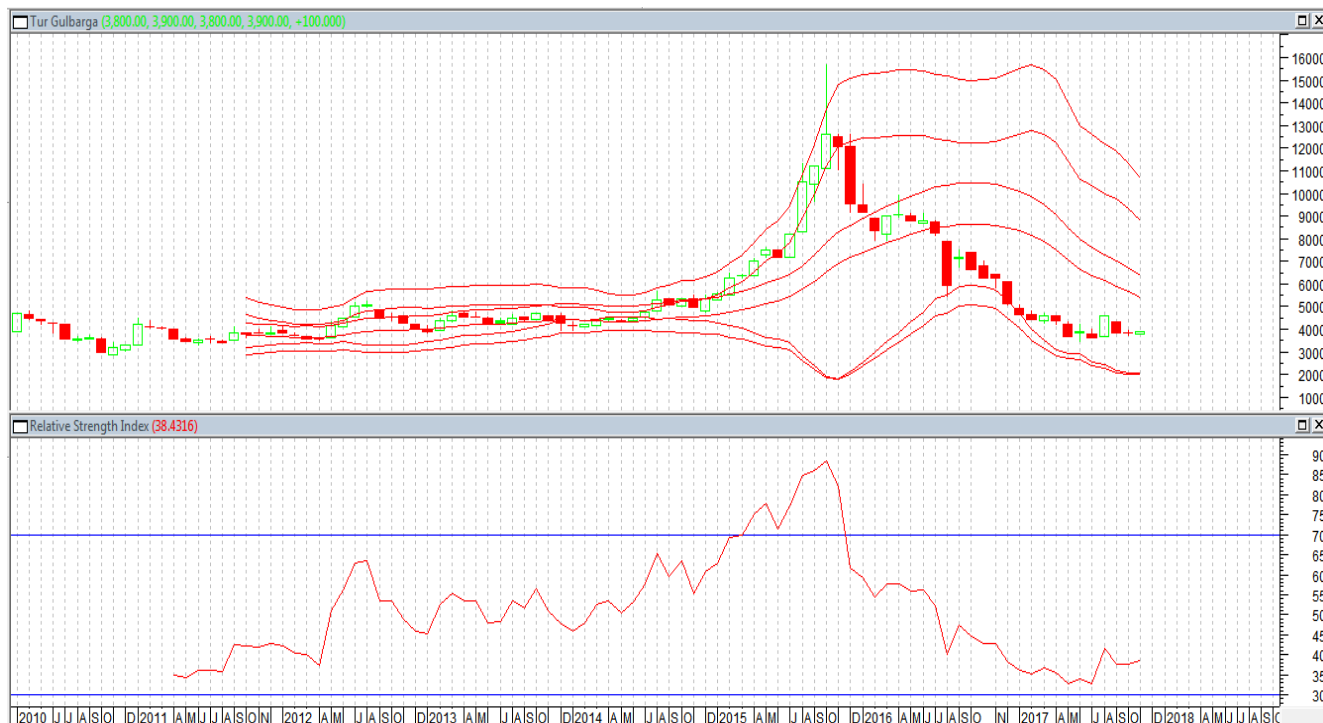

Strategy: Sell on rise

Trade Recommendations: Sell around 3650 with the first target of 3550 and second target 3400 with stop loss at 3700 level.

Support & Resistance				
S2	S1	PCP	R1	R2
