4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic:

- **Pulses markets continued to reel under pressure in the month of November despite govt's attempt to arrest declining prices** through import restriction, duty imposition and procurement drive to ensure MSP for farmers. However, higher stock in central pool stock, import flow and bumper crop from two consecutive years have impacted pulses price negatively in domestic market. Actually, supply side is higher than demand and bulk buyers have restricted buying for stock purpose due to huge loss incurred in last six months. Agriwatch expects huge Rabi crop once again and pressure would continue in pulses market.
- **There is a possibility that govt. may restrict import volume of Chana and lentils too** by imposing import duty on it like peas. Govt may impose 25 to 30 % duty on both pulses. Besides, govt. may provide incentives to dal exporters in range of 4 to 5%, so that burden of excess stock with govt and in private hands would decrease. The concerned ministry are attempting to make supply-demand side balanced. Lower price realization is discouraging factor for farmers and it may impact govt.'s strategy to increase pulses production in coming years. Agriwatch expects normal trade in pulses market from 2nd half of 2018, by then excess stock is expected to decrease to normal level with restricted import quantity.
- **Rabi pulses sowing area is running ahead by 6.46 % to 117.83 lakh ha as on 1st Dec-2017.** Chana area was registered at 84.37 against 78.26 lakh ha. Masur area was registered at 13.55 against 12.62 lakh ha, peas area was recorded at 7.19 against 7.63 lakh ha. Even Urad and Moong area was recorded at 2.54 against 2.45 & 0.89 against 1.02 lakh ha. Other pulses area was recorded at 3.31 against 2.43 lakh ha. Overall sowing progress is running good. Bumper area coverage is on the card once again.
- **New Tur strats in Latur and quality is said to be fair to good. Around 200 bags per day new Tur arriving in Latur region on an average** and was trade at Rs 3950 to 4150 per qtl. In Ahmednagar around 1500 bags new Urad was reported and it traded in the range of Rs 3000 to Rs 4200 per qtl. depending on quality of crop. As new crop has started and pressure is likely to build up in next 20 days, prices of both commodities might be seen under pressure in coming weeks despite procurement move on MSP.
- **Higher carryout for Urad (8.77 lakh tone) and good crop size expected to be around 24.97 lakh tone** would not allow market to retain its current higher level. Total availability is around 35 lakh tonne against AW projected consumption fig. of 25.5 lakh tone for MY 2017-18.
- **There is no respite for Chana as production size is expected to cross 10 MMT** against 9.1 MMT last year. Old stock is ample and new arrival is due in Karnataka from mid Jan-2018. Chana southward journey would continue and it may trade below Rs 4000 in March & April. Delhi chana is trading at Rs 4700 per qtl. In Dec Chana price may trade in the range of Rs 4400 to Rs 4800 per qtl. In March –April-2018 it is bound to trade below Rs 4000 as crop is expected to be around 10.5 to 11 MMT, higher than 20 lakh tone from last year.
- **Uptrend in Moong market continues due to fresh demand from mills, decreasing arrivals and beginning of procurement activities on MSP in Rajasthan.** Moong traded at Rs. 4750-4850 in Jaipur market. It may cross Rs 5000 level soon. New Arrival is expected from April now. So it may touch MSP level in coming months. As carryout stock is higher, it should trade in the range of Rs 5000 to 5400 per qtl.
- **Rajasthan would procure 2.74 lakh tone Moong in the state and for this Rs 1527 crore** has been allocated for procurement. It would support Moong price from current level. Arrival pressure is declining in major markets. Improvement may continue. It would procure 60,000 metric tone Urad in the state. For procurement Rs 324 crore has been allocated to state agencies engaged in procurement. It may support market to a certain extent.
- **Tur including some other pulses import from Mozambique is now on restricted list.** Now its restricted quantity will be 1.25 lakh ton for 2017-18. A MoU between both countries has been signed last week (18 Nov-2017). Out of total 1.25 lakh ton around 40,000 has already been imported. The rest 85,000 would be imported further with conditions like requirement of NOC from Mozambique authority and offloading at 5 selected ports like Mumbai Tuticorin, Chennai, Kolkata & Hazira.
- **NAFED procured around 1.25 lakh tone Moong in four states like Rajasthan, Telangana, Karnataka and Maharashtra till 30 Nov 2017.** It has been procured from kharif season crop at MSP under price support scheme
- **Lentils may trade firm till new crop hits the market. Peas market may trade steady** as stock is higher despite imposition of 50% duty on all peas. However its demand would decrease as Chana crop may touch record level and it may reduce peas demand by 20 to 25 % this year. Lower price of Chana would continue to hit peas price this year.

International:

Statistic Canada would release pulses production estimate this week. It had predicted earlier 3.7 to 4.2 million tonne peas production for 2017-18. Market is awaited new estimates. As demand from India has decreased considerably, farmers and trade community is concerned about price and smooth marketing in new year.

Likely storm and 250mm rainfall forecast in parts of eastern Victoria may disturb harvesting activities in Australia. Chickpeas and lentil harvesting are expected to get affected from this storm and heavy rainfall. In US pulses area is increasing rapidly. Over 80 per cent of pulses grown in the United States come from either North Dakota or Montana.

After import restriction of pulses from Myanmar by India exporters from Myanmar have focused their eyes on other countries like Bangladesh, Sri Lanka, Pakistan and Nepal in recent months. Notably, Indian had restricted import volume quota of black matpe, mung beans and pigeon peas from Myanmar in the 2017-18 fiscal year in August-2018.

Demand from neighboring countries is increasing now and import volume from these countries has doubled so far. Current demand from other markets helped Myanmar pulses market to stand once again. Media report says that Myanmar is exporting around 30,000 pulses per month in four countries now. Pigeon pea price declined from Rs 28000 to Rs 18800 per tone in three months in Myanmar. Moong bean price has declined from Rs 29610 to Rs 16200 per tonne.

Recent rains in Australia have nullified impact of frost on Chickpeas. Notably Australian Chickpeas belt was facing frost like condition in early Nov. Recent 80 millimeters rains have given chance of re-flowering of Chickpeas. Some improvement in yield is expected now. So Australian Chickpeas production may be revised slightly up.

Imposition of import duty on all peas by 50 % has started impacting export volume from Canada According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT(2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas price are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.

As per the latest update by Board of Public Association "Community of Pulse Producers and Customers of Ukraine" (SPPBU), Ukraine is likely to increase pulses area by 30% in 2018. It was 5.02 lakh ha in 2017. Out of this peas area was 4.01 lakh ha. Ukraine has witnessed 2.5 times area increase under pulses in recent three years. Ukraine had produces 8 lakh tonne in 2016 and 13 lakh tonne in 2017. If area increases by 30 % in 2018, production would touch to 15 /16 lakh tonne under normal condition.

Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18. It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.

Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18. It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.

Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.

Outlook: Pulses market is likely to trade steady to slightly firm except Chana, Tur & Urad in December.

Pulses Supply & Demand:

Urad Kharif –Rabi combined production is bound to increase slightly from 23.9 to 24.97 lakh ton in crop year 2017-18. Production increase is due to higher area coverage. Import would remain restricted at 1.5 lakh tone, applicable till March-2018. Over 1.1 lakh ton Urad import has already been reported. Govt may review quantity restriction in March-2017. Consumption is likely to increase by 2 lakh ton due to cheaper availability in domestic market. Carryout would increase due to higher total supply and higher production. It will increase from 8.77 lakh ton to 9.74 lakh ton. Supply side will remain at comfortable level.

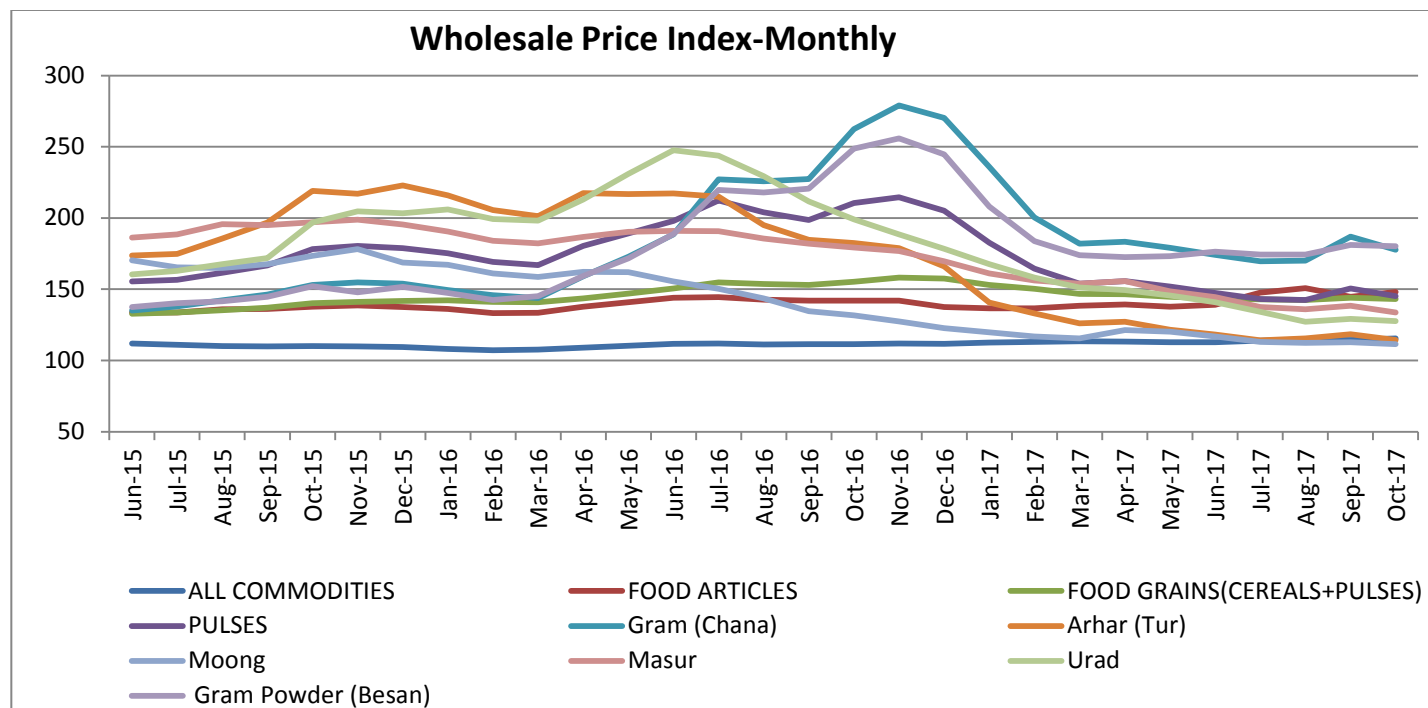

Moong Kharif-Rabi production is expected to decrease from 20.3 lakh ton to 19.25 lakh ton in 2017-18. Import would remain at 1.5 lakh ton as fixed by govt. Total supply would increase to 29.65 lakh ton due to higher carryout stock. Govt may review import quantity restriction March-2018 onward. Over 1.25 lakh ton Moong has been imported so far. Consumption would increase slightly from 18.8 to 20.5 lakh ton. The season 2017-18 would end with higher carryout stock (9.15 lakh ton). Supply side will remain at comfortable level.

Tur production is expected to decline to 31.19 lakh ton in 2017-18 from record production of 38.59 lakh ton last year. Decrease in production is due to over 22/24 % decline in area planted this year. Total supply is expected to decline to 42.72 lakh ton due to lower crop size. Consumption is expected to decline from 37 to 35 lakh ton due higher availability of other pulses at competitive price. Ending stock would decline from 9.53 to 7.72 lakh ton. Supply sided at is comfortable. Import restriction continues and fixed at 2 lakh ton.

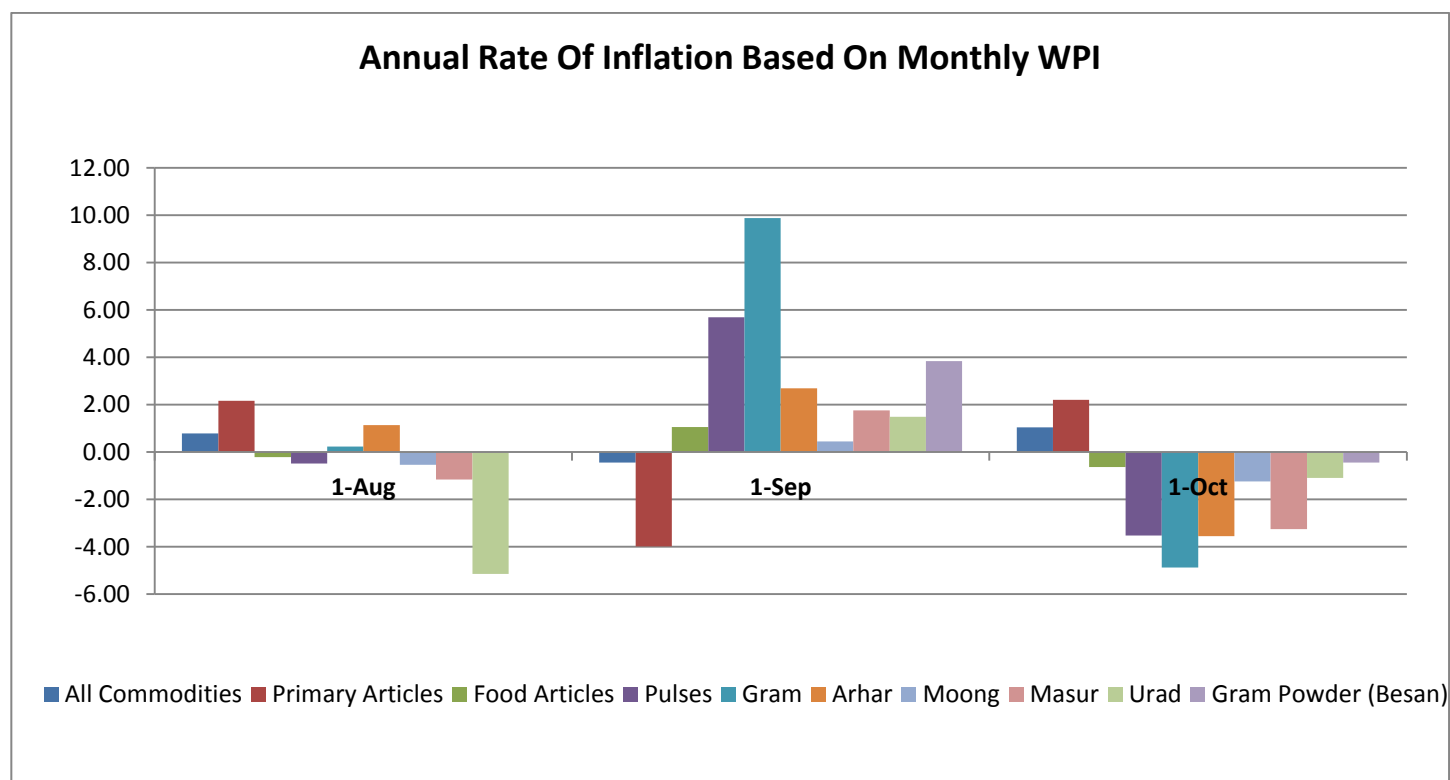

Chana production is likely to increase from 90.19 to 92.12 lakh ton in 2017-18 as per Agriwatch preliminary estimate. It may cross 10 MMT as area has increased. Agriwatch would revise its preliminary estimate by end December. As season would start with hefty carryout of 12.89 lakh ton Chana, total supply would increase from 101.89 to 107.01 lakh ton. As supply side is higher, import might decrease from hefty 9.8 lakh ton to 2 lakh ton. Consumption is likely to increase from 89 to 92 lakh ton. The season would end with 15.01 lakh ton carry out. So pressure on Chana market may continue without govt.'s interference. Higher crop size (likely to be over 10 MMT) would increase carryout further.

Lentil production is expected to increase from 10.40 to 11.68 lakh ton this year due to higher area coverage. Higher carry out and higher production would increase total supply to 23.63 lakh ton. Import is expected to remain steady at 7/8 lakh ton. Availability is higher. The season may end with 3.63 lakh ton carry out. Supply side would remain at comfortable level.

Agri Commodity Indices –September, 2017

Pulses Index decreases to 145.2(5.3) M-o-M basis in Oct-2017

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

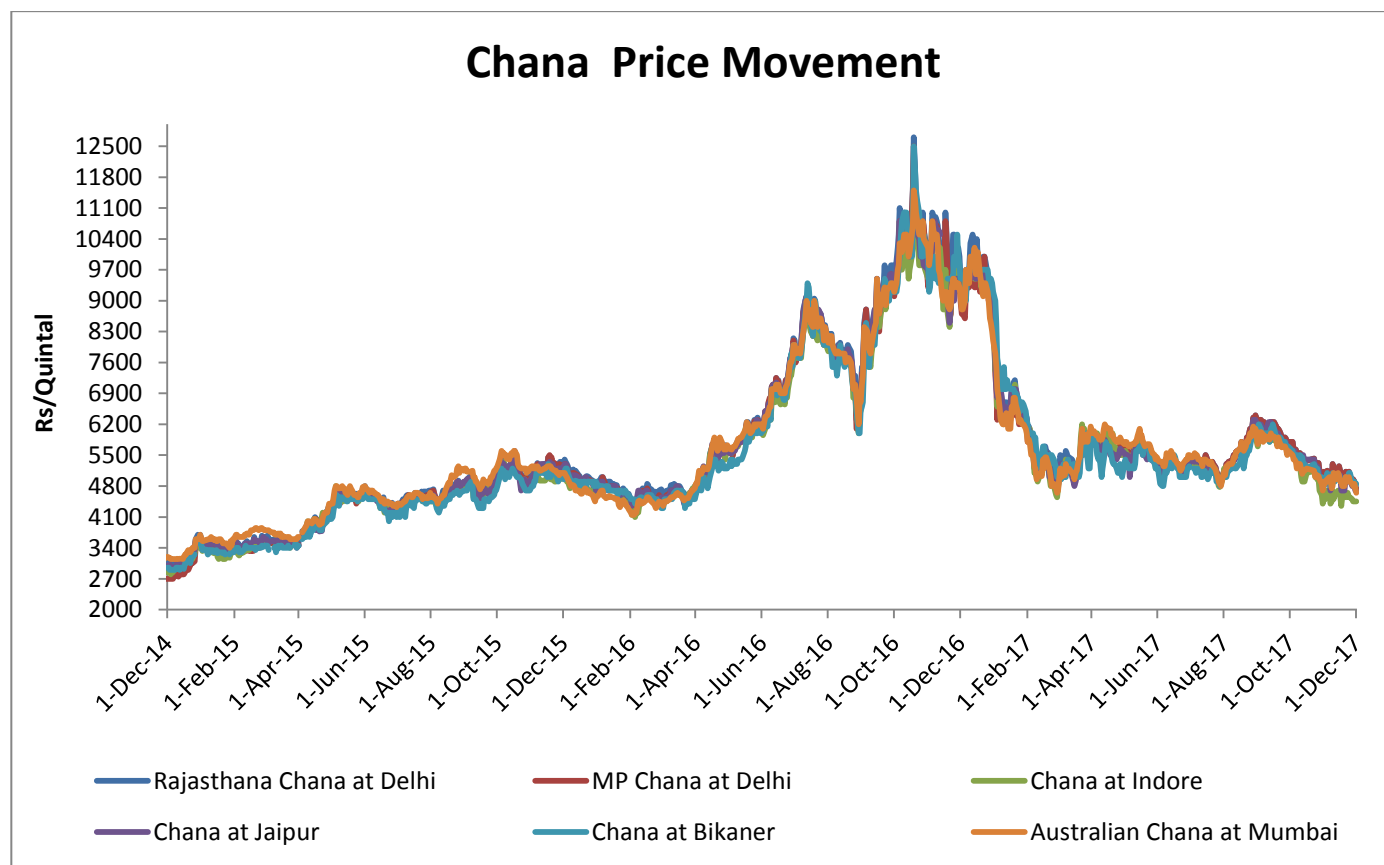

Market Recap:

Chana market continues to reel under pressure due to higher production size expected to be around 10.5 to 11.5 MMT in 2018. It would be higher than 20 lakh tone from last year. Agriwatch would revise its preliminary estimate next month. Besides, there is plenty of old stock available. So firmness is unlikely. Fundamental suggests that Chana is bound to trade below MSP in March –April. As crop size is higher, govt would not be able to procure higher quantity. Private trade too would avoid buying under prevailing weak inner tone. So selling is better than to hold stock in current condition. Import continues and govt. has delayed proposal for imposition of duty, that was last hope for some support in the cash market.

Price Dynamics:

In Nov-2017, all India average price was down by 713 % to Rs 4794 per qtl..Average price in Oct was 5267 per qtl. Prices are likely to move down side due to:

- Higher area coverage (up by 7.81 % to 84.37 lakh ha so far against normal of 86.80 lakh ha.)
- Stockists selling/ cheaper import
- Lower Australian quotes at \$710/15 and
- Available old stock around 16/17 lakh tone, sufficient to cater demand for two months.

Seasonality Index hints that Chana (gram) is likely to notice weak movement in the Spot market in December-2017

Chana Future Market Analysis:

Technical Commentary:

Decreasing price, OI, Volume show market to enter into consolidation phase.

RSI is moving down in neutral region, hints caution to bulls.

Prices closed below 9 and 18 days EMAs

Strategy: Sell on rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Dec	4400	4300	4560	4800	5000
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Dec.	Sell below	4650	4450	4400	4750

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 92.12 Lakh tonne. Upward revision is likely due to higher area coverage. Revised estimate will be published in Jan-2018 monthly report.

Market Outlook for Dec-2017

Chana prices are likely to witness weak movement, if proposed import duty is notified it may support market to a certain extent. Overall sentiments remain weak in the medium to long term.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

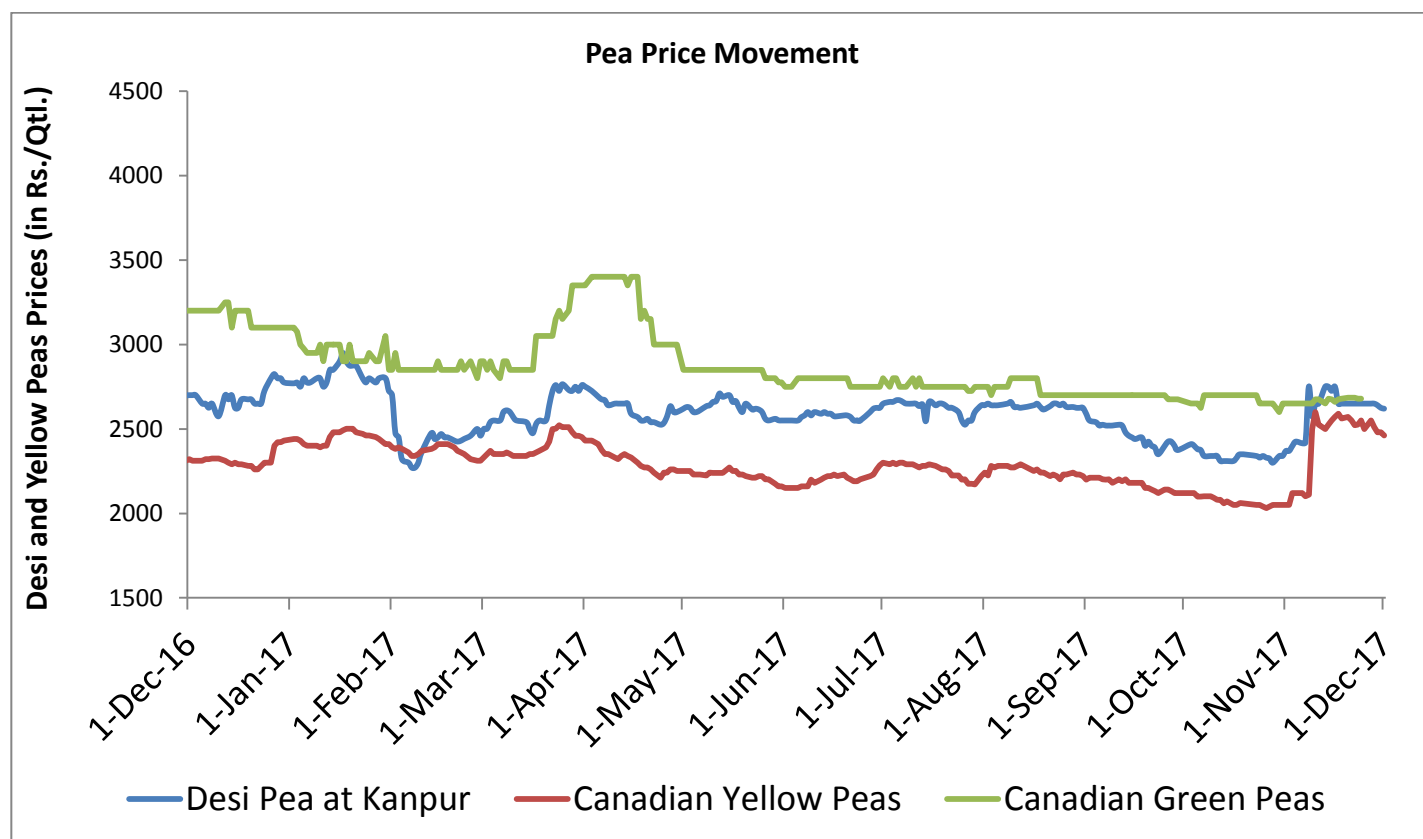

Market Recap:

There is a fear in the cash market that govt. would revized duty down to 30% in coming months. However, it is unlikely in the near term. Pressure from Canada continues to review it. The average price decrease by 0.12 % to Rs 2637 per qtl. It may continue to trade steady in the near to medium term. Import flow is expected to come to a halt. Coverage area is likely to increase due to price factor. However, It is running behind by 5.73 % to 7.19 lakh ha so far. Overall outlook remains weak due to weak Chana price. New crop is due in Feb-2018. So, there is no concern at supply side. Old stock is ample to cater to the demand of next two months.

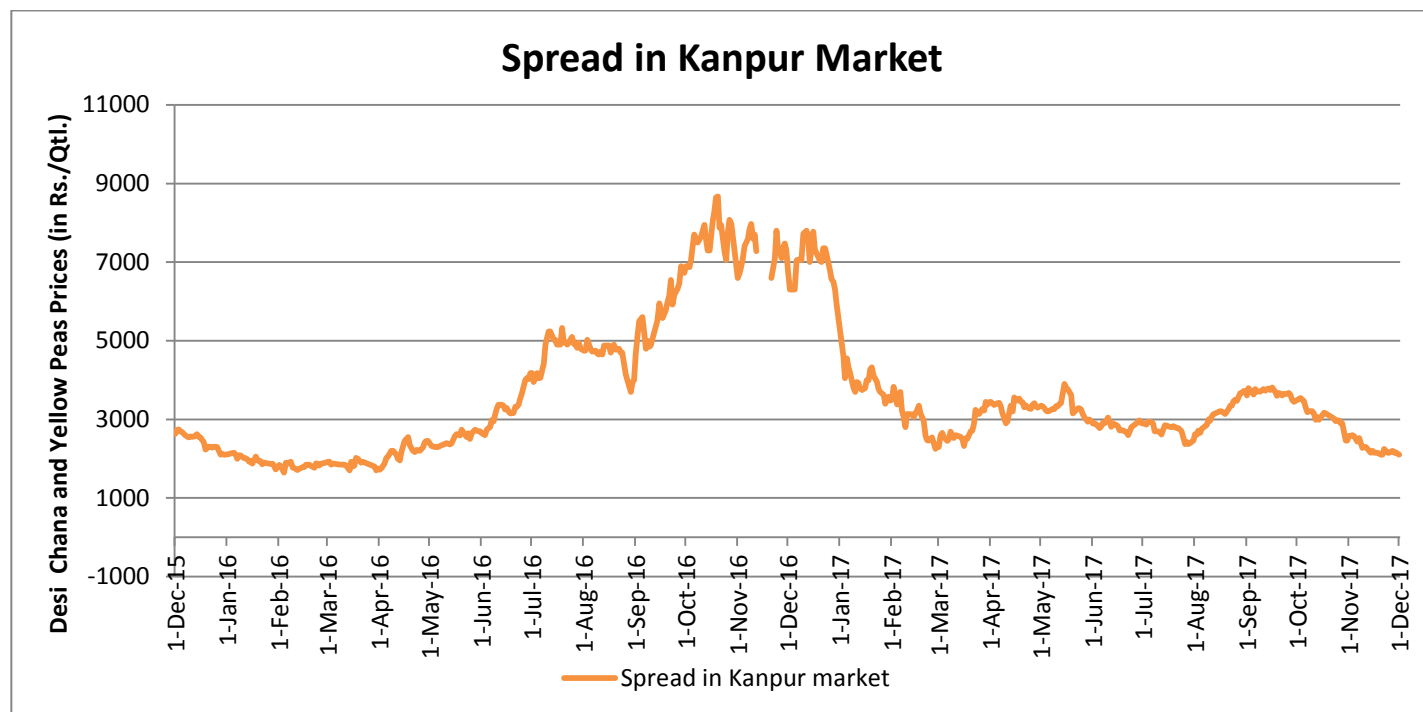

Price Dynamics:

In Nov-2017., yellow pea all India average prices traded down by 8.03 % from Rs 2365 to Rs 2455 per qtl. Steady to weak movement is expected in Dec due to:-

- Higher stock.
- Prospects of higher area coverage
- Decreasing Chana price &
- Weak demand in domestic market.

Spread With Chana:

[\(Back to Content\)](#)

The spread between Chana and Pea at Kanpur market decreased considerably (Rs 818) mainly because of decreased Chana price. As pressure would continue, spread is expected to remain between Rs 2000 to Rs 2200 per quintal in Dec on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound to weak movement in Dec-2017.

Market Outlook for Nov: Prices of Pea are likely to trade steady to slightly weak due to subdued demand at current level and weak chana price. Stock is ample, New crop is due in February. Ample old stock and expected good crop size would not allow market to move unexpectedly up in the near term. Gov. may consider revision in duty (currently 50 %) after new crop. It might be in next financial year, starting from April-2018.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

Market Recap:

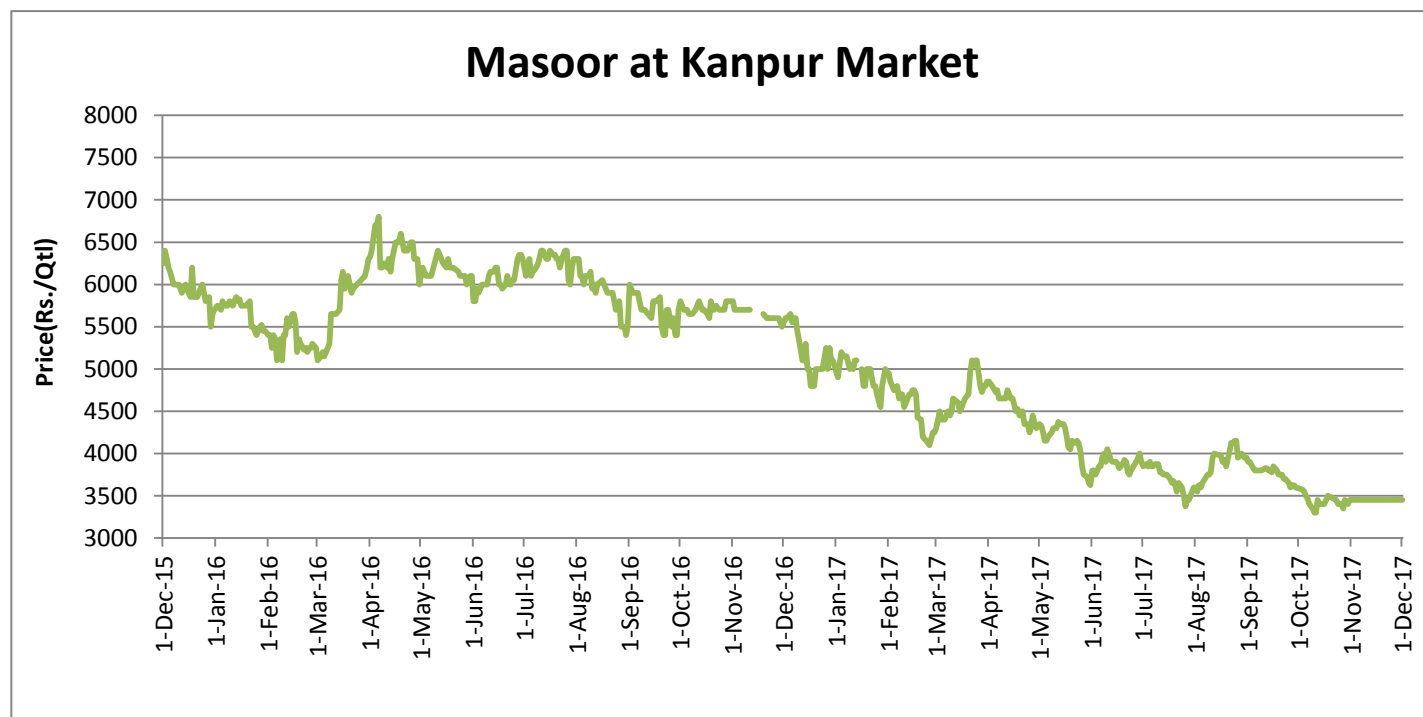

Kanpur market opened with a firm note in the beginning of the week and could not sustain at higher level despite restricted import flow and opening up of dal export.. Area under Lentils is bound to increase this year as overall sowing trend is higher by 7.39 % to 13.55 lakh ha so far. Overall sentiments remain steady to slightly firm in the short to medium term. Australian Red whole Lentils (nipper Type) is being offered at \$505 for tone for Dec delivery. Nugget type is being offered at \$495 per tone for Dec delivery. Stakeholders should buy on dip..

Price Dynamics:

In Nov-2017, average price in key market Kanpur was down by 8.29 % to Rs 3450 per qtl MoM basis. Prices are likely to recover in December too. Prices are firm due to:

- Improved forward quotes (\$490/500) Australia.
- Fresh demand at current level and fear of imposition of import duty in coming weeks.

- Restricted Import flow and improved CnF quote in Canada(\$460)
- Fumigation issue remains intact affecting bulk import.

Seasonality Index depicts range bound to slightly firm movement in Dec-2017.

Market Outlook for Dec:

Prices are likely to notice range bound to firm movement. Market may see slight recovery at current level.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

During review month, Desi and imported Tur traded slightly firm on improved demand from stockiest and retail sector. Opening up dal export and restricted import quantity from Mozambique may support Tur market at current level despite arrivals from new crop. Govt.'s buying too may support market. Agriwatch expects export from next year after March/April to a certain extent. However, one way uptrend is unlikely as govt has around 0.8 MMT stock. Market is expected to stabilize at current level. Buying on dip is good.

Market Recap:

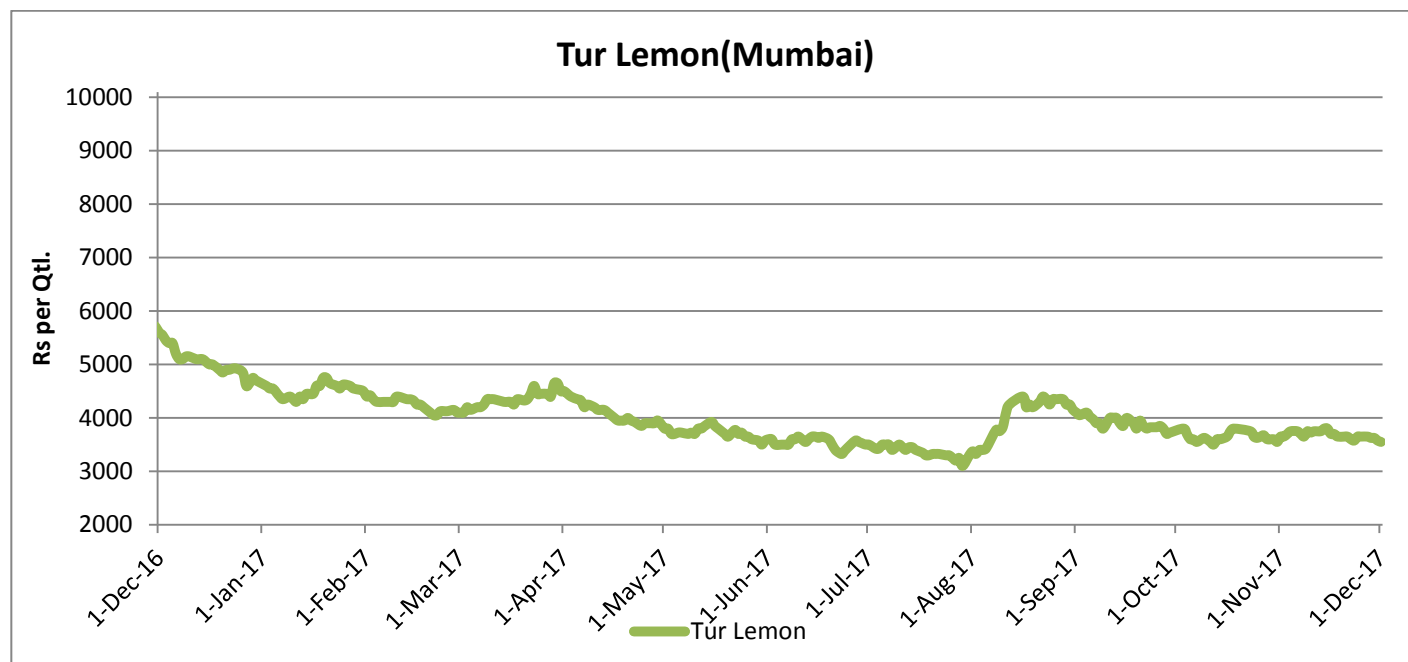

Imported Tur prices noticed steady to firm movement during the month under review. Stockists continued to retain stock despite new arrivals. Yield is considered to be lower by 10 to 15 % this year. It may boost price by Rs 100/150 more from current level. However medium term outlook remains weak. Tur lemon (imported) average price for the week, increased by 0.85 % to Rs 3950 per qtl in Gulberga. While lemon tur is being quoted at Rs 3600/3650 in Mumbai market. Steady to slightly weak tone may prevail in the market. Overall tone remains weak, new crop starts.

Price Dynamics:

In Nov-2017, average price in key markets was up by around 1.63 % to Rs 3900 per qtl. from Rs 3814 in Nov due to

- Restricted selling from central pool stock
- Expected lower crop size

- Improved demand from current level
- & likely procurement from 20th Dec-2017.

Seasonality Index- depicts steady to slightly weak movement in this month. Average price increased by 1.63 % MoM basis to Rs 3600 . Farmers have restricted selling at current level. Steady to weak movement might be seen in Dec.

Production- According to the Agriwatch estimate, Kharif Tur MY 2017-18 production is estimated at around 31 Lakh tonne against 38.58 lakh tonne in 2016-17. New crop starts now . Tur area ended with 42 lakh ha as per Agriwatch estimate.

Market Outlook for December:

Tur prices are likely to trade steady weak in Dec-2017. New crop has started hitting the market in Maharashtra region.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

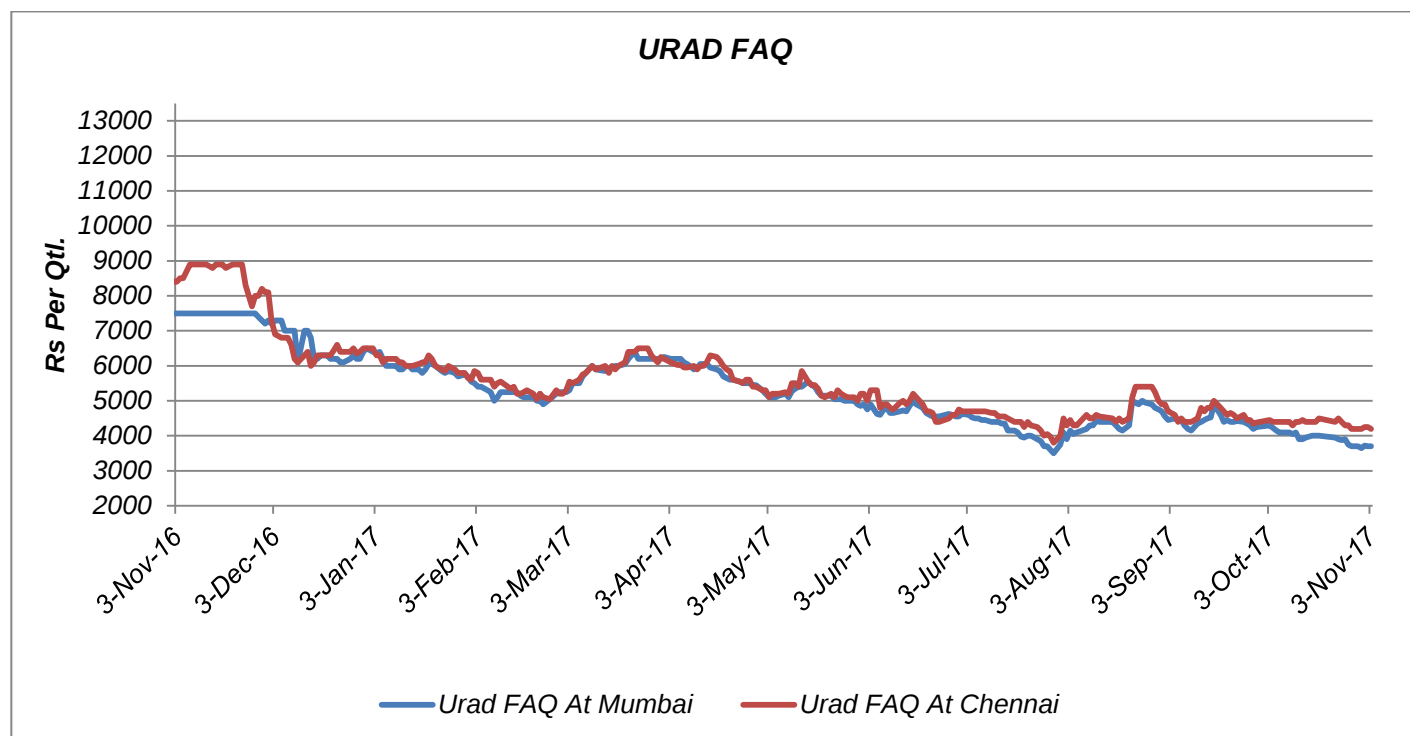

Market Recap:

During the review period, imported and desi Urad prices noticed firm momentum due to improved demand at current level and fresh buying activities. Commencement of procurement may support Urad market in coming weeks. Rajasthan govt is going to buy 60,000 tone on MSP. Urad FAQ Mumbai is being quoted at Rs 4100 and in Chennai at Rs 4500/4550 per qtl. Down ward Correction in Urad price is likely as market expects arrivals to increase in coming weeks..

Price Dynamics:

In Nov, average prices in key markets including Mumbai/Chennai were up by 0.85 % percent to Rs 4100 per qtl. Prices may stay steady to weak due to

- New arrival
- Higher crop size
- Ample stock
- Lower forward quotes and restricted buying in domestic market.

Seasonality Index depicts steady to weak movement in the near term to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2017-18 production is estimated at 24.97 lakh tonne against 23.97 lakh tonne 2015-16. See supply and demand side.

Market Outlook for Dec:

Prices are likely to trade steady to weak.

Fundamental Analysis and Outlook For Moong:

Market Recap:

Rajasthan govt would buy Moong worth Rs 1524 crore to support price. Besides, arrival is declining. Cash market may move up. Desi moong prices noticed firm movement during the week under review. Overall tonne remains firm due to declining arrivals. Steady forward quotes and commencement of procurement remain supportive for Moong market. Sellers have restricted selling. Moong moved up at Rs 4900 during the week under review. Steady to firm tone may prevail. It would continue to move towards MSP level.

Price Dynamics:

Moong at Jaipur showed steady to firm movement and traded in the range of Rs 4900 to Rs 4950 per quintal. Market may trade steady to firm this week due to some export demand and retention of stock. From last one month it moved up by 8.74 % to Rs 4900 per qtl. Firmness may continue due to procurement on MSP, retention by stockists and new arrivals not before April.

- Procurement on MSP to begin at (Rs 5575 per 100kg)
- Stockiest activeness in firm market
- improved demand at current level
- Export deals for 20,000 tone.

Seasonality Index depicts steady to slightly firm movement in Dec.

Production- According to the Agriwatch preliminary estimates, Kharif and rabi Moong 2017-18 production is estimated at 19.25Lakh tonne. It was 20.13 in 2016-17.

Market Outlook for Dec:

Prices may continue to move towards MSP level (Rs 5575 per qtl. including bonus of Rs200 per qtl..

Pulses Wise Technical Outlook for Dec-2017 :-

Chana:

Outlook –We expect prices to notice weak movement in the near term. Improvement in demand is unlikely. Higher area coverage would put further pressure on Chana price. Import flow continues.

- ❖ Chart depicts weak movement in prices.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4400 to 4800 levels in this month.

Strategy: Sell on Rise.

Trade Recommendations:

- **Spot Market outlook:** Chana is likely to trade weak

Trade Recommendations: Go short around 4850 with the first target of 4600 and second target 4500 with stop loss at 4950 level.

Support & Resistance
