- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic:

- **Pulses market continued to reel under pressure despite govt.'s continuous efforts** to arrest declining prices of pulses. Imposition of import duty, procurement drive, quantity restriction, provision for procurement funds and allowing export could not help pulses market up to desired extent. Two bumper crop years and excess import volume continued to toll normal market sentiments. Govt.'s all positive efforts would take time to support market and it is expected from the second half of 2018. By then, Agriwatch expects burden of excess stock to be consumed.
- **Import duty applicable on various pulses is likely to continue till pressure of excess stock decreases.** Currently, Chana & Lentils attract 30 percent duty while all peas attract 50 % duty. Tur attracts 10 % duty. Besides, import quantity restriction of Moong and Urad has been fixed at 3 lakh tonne for both while for Tur it is 2 lakh tonne/ (already imported). Besides, G 2 G basis import too has been restricted from 3 to 1.24 lakh tonne from African countries.
- **Rabi pulses sowing area is running ahead by 8.89 % to 150.63 lakh ha as on 29th Dec-2017.** Chana area was registered at 101.88 against 89.26 lakh ha. Masur area was registered at 16.83 against 16.11 lakh ha, peas area was recorded at 9.39 against 9.65 lakh ha. Even Urad and Moong area was recorded at 6.47 against 6.73 & 2.97 against 3.63 lakh ha. Other pulses area was recorded at 5.34 against 5.48 lakh ha. Overall sowing progress is running good and it is now in last phase of sowing.
- **Pressure starts to build up on Tur with increasing arrivals.** Steady to slightly weak tone may prevail in cash Tur market despite lower crop size (30.26 lakh tonne) against 39.19 lakh tonne last year as per Agriwatch estimate. As govt. and private trade would remain active for procurement, any major decrease is unlikely. So buying on dip is good. Tur price in domestic market hovers in the range of Rs 4000 to Rs 4500 per qtl. depending on quality. Burma offers new Tur at \$400 per tonne while old Tur is being offered at \$ 355/360 per tonne basis Indian port.
- **Pressure on Urad market continues despite govt.'s efforts to arrest price. Higher** carryout for Urad (8.77 lakh tone) and good crop size expected to be around 24.97 lakh ton would not allow market to move up from current level. Total availability is around 35 lakh tonne against AW projected consumption fig. of 25.5 lakh tone for MY 2017-18. Myanmar is offering FAQ Urad at \$500 and SQ at \$625 per tonne basis Indian port. Range bound movement is expected for Urad in January-2018. Mumbai market may trade in the range of Rs 3900 to Rs 4300 while Chennai market it may hover in the range of Rs 4200 to Rs 4600 per qtl.
- **There is no respite for Chana as production size is expected to cross 9.5 MMT** against 9.1 MMT last year. Old stock is around 15 lakh tonne, while new crop starts in Karnataka and Maharashtra. Arrival from MP & Rajasthan is expected from Feb & March Chana southward journey would continue and it may trade near Rs 3500 in March & April. Delhi chana is trading at Rs 4350 per qtl. In Jan Chana price may trade in the range of Rs 3900 to Rs 4200 per qtl. Australia is offering Chana at \$595 per tonne at Indian port. No fresh import trade was reported due to 30 % duty. Overall tone remains weak.
- **Demand for Moong got affected at higher level. Slight downward correction is** expected in January despite lower rabi coverage area. Down side would be limited as new Arrival is expected from March-April. So, after correction it may move towards MSP level of Rs 5575. Moong trades at Rs 5200 per qtl in Jaipur market. It may hover in the range of Rs 5000 to 5400 per qtl. Burma offers moong Pakako at \$690 per tonne ,basis Indian port. range bound movement may prevail in cash moong market.
- **Rajasthan would procure 2.74 lakh ton Moong in the state and Rs 1527 crore** has been allocated for this procurement. It would support Moong price from current level. Arrival pressure is declining in major markets. Improvement may continue. It would procure 60,000 metric ton Urad in the state. For procurement Rs 324 crore has been allocated to state agencies engaged in procurement. It may support market to a certain extent.
- **Lentils may trade steady to slightly weak till new crop hits the market. Peas market may** trade steady to slightly weak as stock is higher despite imposition of 50% duty on all peas. Import flow would decrease. Overall sentiment remains weak. There is no export parity at current level for lentil.
- **The Maharashtra government has received an extension for the purchase of Moong and Urad** from the Centre till January 12. The targets for Urad procurement have been met at 52,000 tonne. Moong trades steady at Rs 5200 in Jaipur market. Range bound movement might be seen in coming weeks.

International:

- **Frost has severely affected peas crop in Australia. Plant growth was limited to an alarming level** due to cold and frost. Yield has decreased from 2000 kg per ha to 200 kg per ha in parts of Riverland. Canadian laird lentils no. 2 moved slightly up by 2.5 cents to 27 to 32 cents per pound while Richlea 2 decreased by 2 cents to 22 to 28 cents per pounds. Yellow peas were holding firm in a range of C\$5.75 to C\$7.00 a bushel.
- **Global lentil markets ended with a mixed tone. Prices of red, traded range bound** in the week, while the spread between U.S. and Canadian green lentils widened to some extent. There is a concern in global market that India could impose an import duty on the product given the risk that seeded area in India could match or exceed last year. Though the pace of seeding has slowed compared to last year, farmers in that country have sown 1.553 million hectares as of December 15, compared to 1.526 million during corresponding period of the previous rabi season.
- **Kabuli chickpea markets finished the week's trading on an uncertain note, with markets** for small caliber product destabilized by an increase in the number of Argentine farmers, by passing traditional exporters. Markets for large caliber product were unchanged in the week, with Mexico virtually sold out of product and Indian exporters holding firm on prices for 10mm and larger caliber kabuli chickpeas.
- **As per latest US dry pea and lentil council dry pea export from US declined** around 75% lower than last year in Sept-2016. Indian demand has decreased considerably due to bumper crop size. China too, has procured less quantity of peas. China has procured 2890 MT followed by India 2005 MT and Mexico 1740 MT. Export data for pea from US for Oct is awaited.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.55 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha** in 2017-18. It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.55 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for Chickpeas** for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81,000 tonne against 82,000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 tonne against 16,000 tonne last year.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Imposition of import duty on all peas by 50 % has started impacting export volume** from Canada According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT (2016-17) to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas prices are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year

Outlook: Pulses market is likely to trade steady to slightly weak.

Urad Kharif –Rabi combined production is bound to increase slightly from 23.9 to 24.97 lakh ton in crop year 2017-18. Production increase is due to higher area coverage. Import would remain restricted at 1.5 lakh tone, applicable till March-2018. Over 1.1 lakh ton Urad import has already been reported. Govt may review quantity restriction in March-2017. Consumption is likely to increase by 2 lakh ton due to cheaper availability in domestic market. Carryout would increase due to higher total supply and higher production. It will increase from 8.77 lakh ton to 9.74 lakh ton. Supply side will remain at comfortable level.

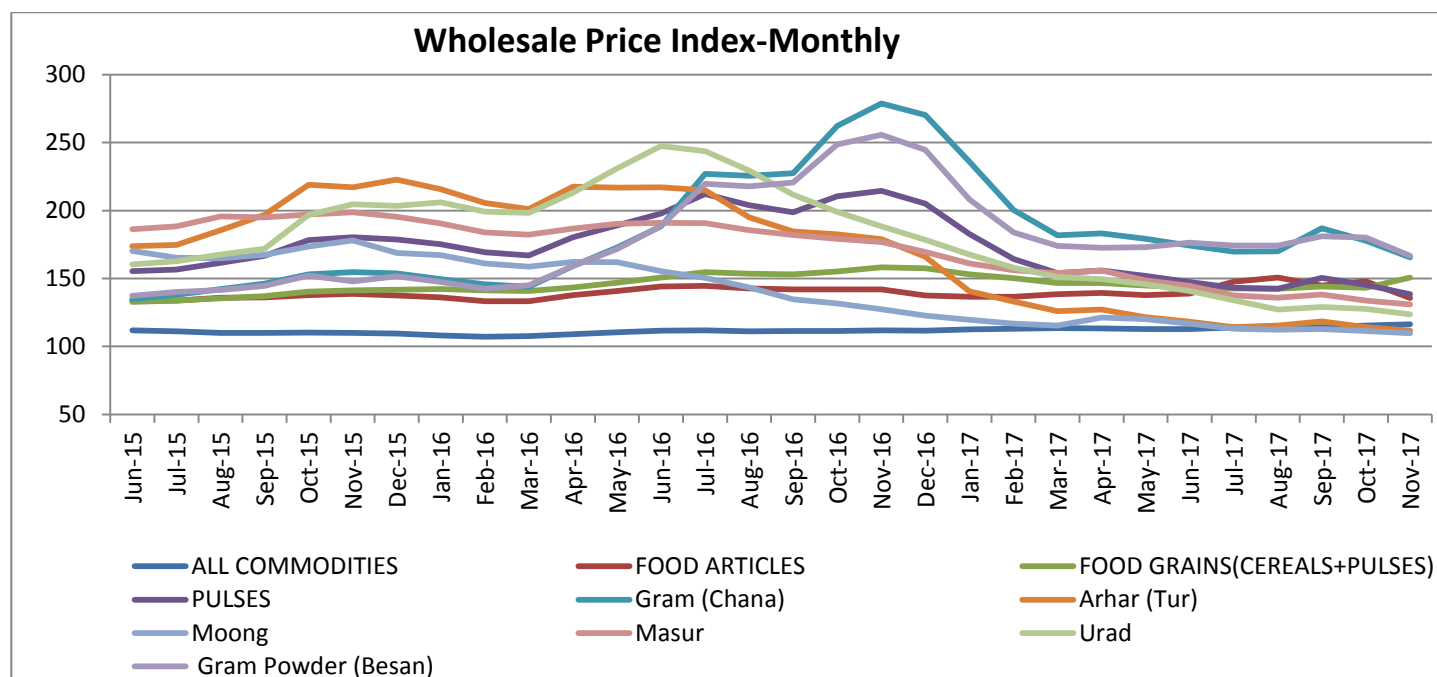

Moong Kharif-Rabi production is expected to decrease from 20.3 lakh ton to 19.25 lakh ton in 2017-18. Import would remain at 1.5 lakh ton as fixed by govt. Total supply would increase to 29.65 lakh ton due to higher carryout stock. Govt may review import quantity restriction March-2018 onward. Over 1.25 lakh ton Moong has been imported so far. Consumption would increase slightly from 18.8 to 20.5 lakh ton. The season 2017-18 would end with higher carryout stock (9.15 lakh ton). Supply side will remain at comfortable level.

Tur production is expected to decline to 30.26 lakh ton in 2017-18 from record production of 39.18 lakh ton last year. Decrease in production is due to over 22/24 % decline in area planted this year. Total supply is expected to decline to 42.72 lakh ton due to lower crop size. Consumption is expected to increase from 37 to 38.25 lakh ton due to higher availability at competitive price. Ending stock would decline from 10.67 to 4.68 lakh ton. Supply side is comfortable. Import restriction continues and fixed at 2 lakh ton.

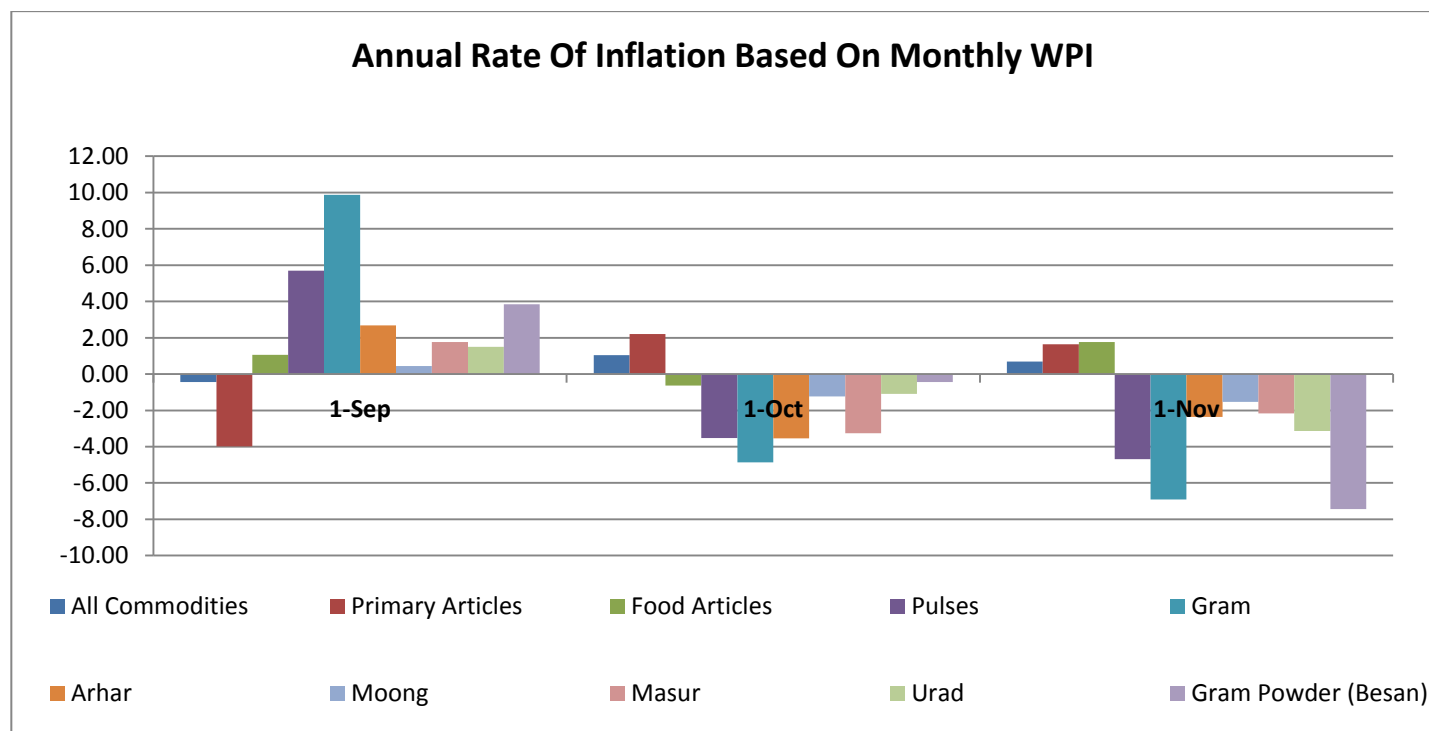

Chana production is likely to increase from 90.19 to 95.56 lakh ton in 2017-18 as per Agriwatch 1st adv estimate. As season would start with hefty carryout of 12.91 lakh ton Chana, total supply would increase from 101.89 to 110.4 lakh ton. As supply side is higher, import might decrease from hefty 9.8 lakh ton to 2 lakh ton. Consumption is likely to increase from 89 to 91 lakh ton. The season would end with 17.47 lakh ton carry out. So, pressure on Chana market may continue without govt.'s interference.

Lentil production is expected to increase from 10.40 to 11.68 lakh ton this year due to higher area coverage. Higher carry out and higher production would increase total supply to 23.63 lakh ton. Import is expected to remain steady at 7/8 lakh ton. Availability is higher. The season may end with 3.63 lakh ton carry out. Supply side would remain at comfortable level.

Agri Commodity Indices –Nov, 2017

Pulses Index decreases by 6.8 point from 145.2 in Oct to 138.4 in Nov -2017(M-o-M basis)

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

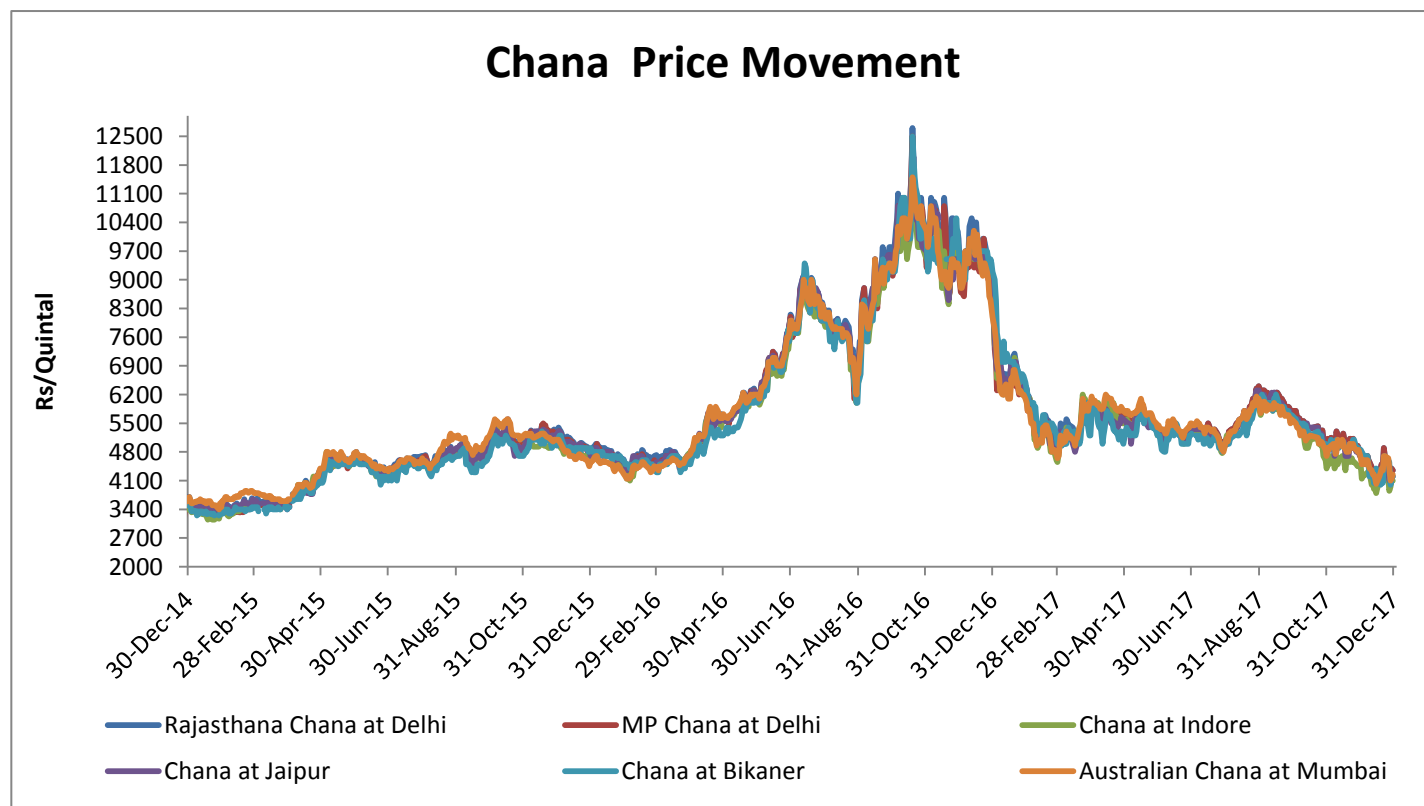

Market Recap:

Chana cash market is expected to reel under pressure in month of January-2018 just ahead of bumper crop over 95 lakh tonne. Crop condition is good so far.Govt. has imposed 30% import duty on Chana to curb import flow from Australia.MSP for Chana has been fixed at Rs 4400 per qtl. including bonus of Rs 200.New crop has started trickling in parts of Karnataka and Maharashtra. Outlook for Chana remains week and it may trade in the range of Rs3800 to Rs 4300 per qtl in January. Pressure would start building up from Mid Feb. Australia is offering Chana at \$645 per tonne for Jan/ Feb delivery, much higher than domestic prevailing price. So import flow is expected to decrease considerably. Recovery in futures is expected and it may move up to 4100 level. To remain in selling side is good. Recovery in futures would not help cash market

Price Dynamics:

In Dec-2017, all India average price was down by 10.74 % to Rs 4370 per qtl..Average price in Nov was 4896 per qtl. Prices are likely to move down side in Jan due to:

- Higher area coverage (up by 14.14 % to 101.88 lakh ha so far against normal of 86.80 lakh ha.)
- Higher old stock & import around 1 lakh tonne in January-2018.
- Lower Australian quotes at \$640/45 per tonne and
- New arrivals & good crop condition..

Seasonality Index hints that Chana (gram) is likely to notice weak movement in the Spot market in January-2018

Chana Future Market Analysis:

Technical Commentary:

Rising price & falling OI hints short covering in the market.
RSI is moving up in neutral region, hints caution to bulls.
Prices closed above 9 and 18 days EMAs

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	March	3744	3670	3800	4100	4250
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	March	Buy above	3790	3950	4000	3750

Production- According to the Agriwatch preliminary estimate, Chana MY 2017-18 production has been estimated at 95.56 Lakh tonne. Upward revision is likely due to higher area coverage.

Market Outlook for Jan-2018

Chana prices are likely to witness weak movement. 30 % Import duty and additional margin on NCDEX Futures by 20 % on short side would not impact much. It would help market in the second half of the year .Overall sentiments remain weak.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

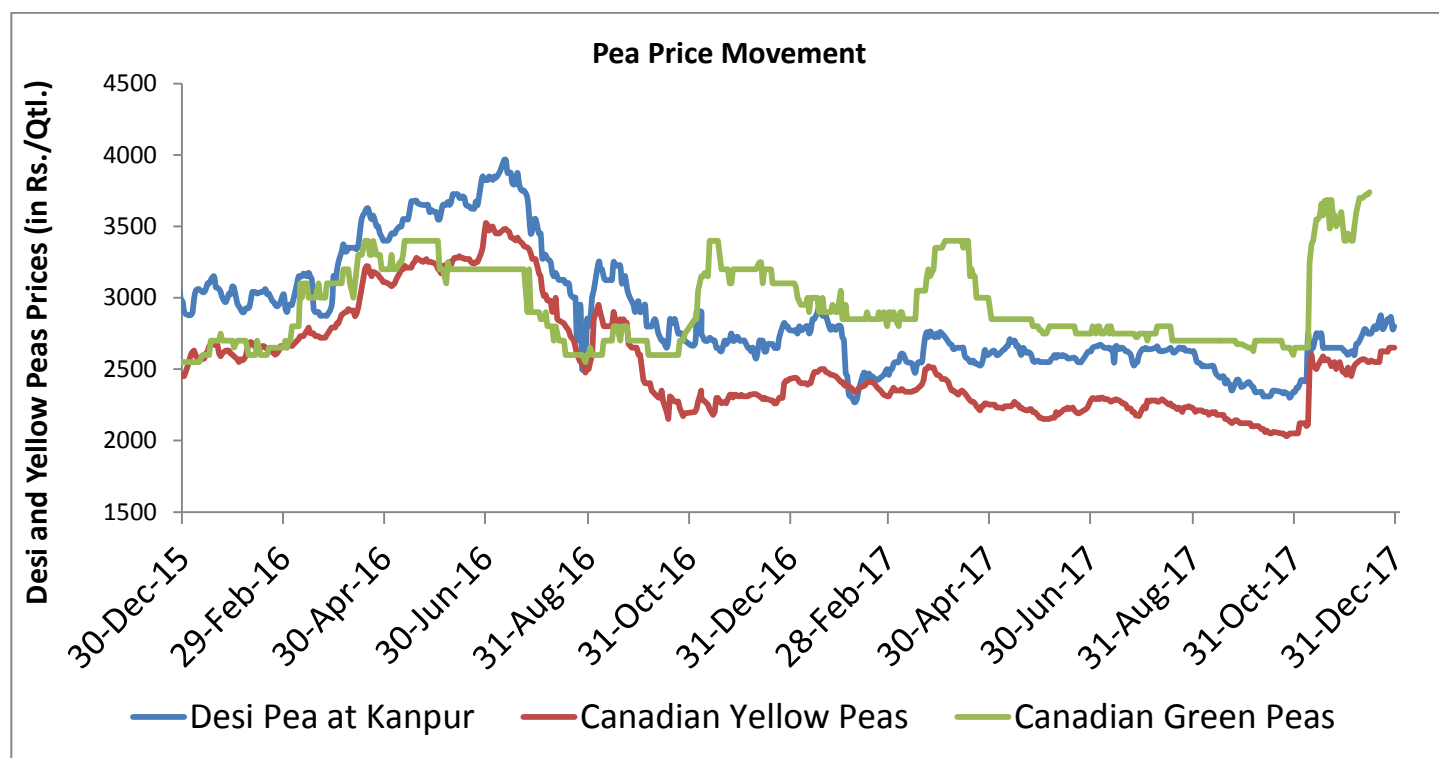

Market Recap:

Imposition of 50 % duty on all peas has restricted import flow to a considerable extent. As stock is at higher side and new crop is hardly one and a half month away, supply side is expected to be at comfortable level. Chana price is bound to decrease so uptrend in peas market is unlikely in January. Range bound movement is expected with weak bias likely to continue. Market has adjusted with duty impact. Major impact of duty might be seen after April, when new crop flow would decrease and by then excess stock would be consumed. The average price increases by 5.77 % to Rs 2656 per qtl. In Kanpur market it moved up by 5.035 to 2747 per qtl in last one month. Steady to slightly weak tone may be seen in January. Import flow is expected to come to a halt. Coverage area is ~~stay~~ steady as last year. However, ~~it~~ is running behind by 2.70 % to 9.39 lakh ha so far. New crop is due in Feb-2018. So, there is no concern at supply side. Old stock is ample to cater to the current demand.

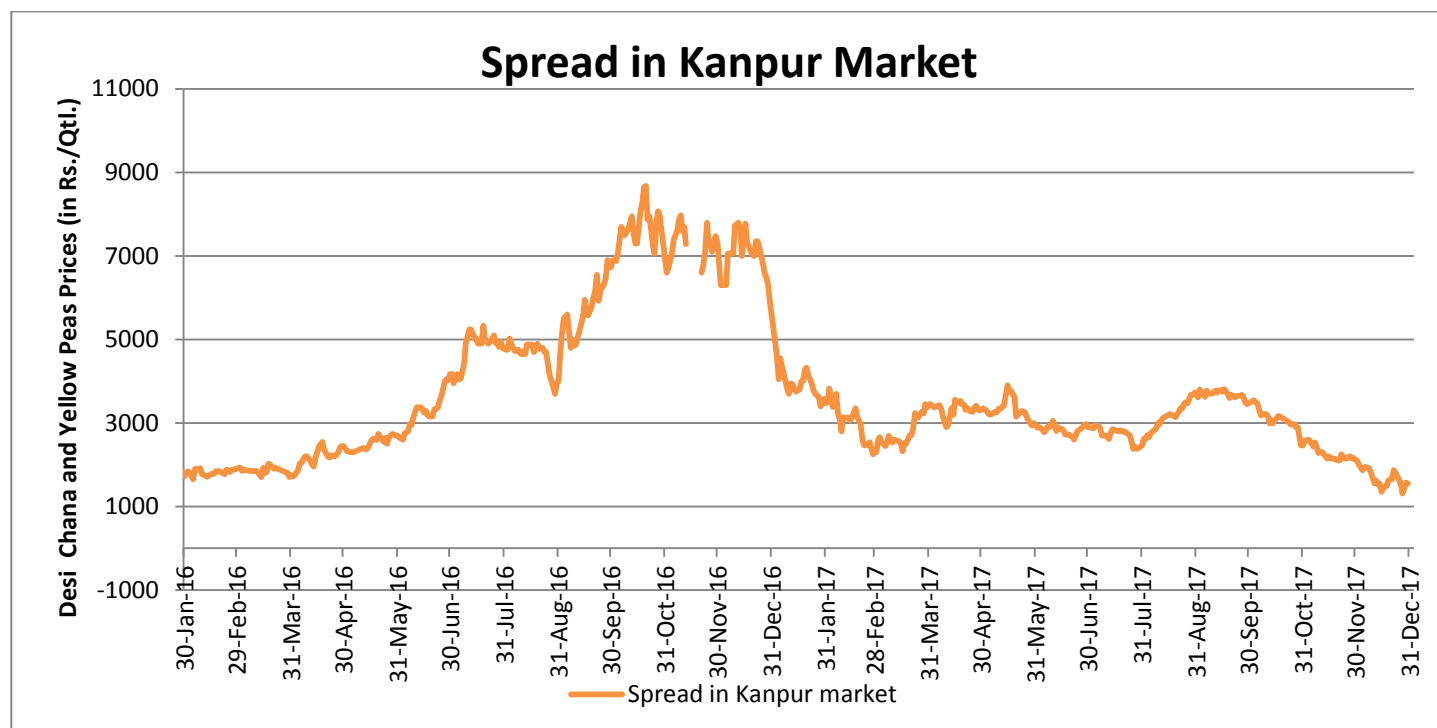

Price Dynamics:

In Dec-2017., yellow pea all India average prices traded up by 5.77 % to Rs 2677 per qtl. Steady to weak movement is expected in Jan due to:-

- Higher stock.
- Steady area coverage & cheaper availability of other pulses
- Decreasing Chana price &
- Weak demand

Spread With Chana:

[\(Back to Content\)](#)

The spread between Chana and Pea at Kanpur market decreased considerably by around 1000) mainly because of decreased Chana price. As pressure would continue, spread is expected to remain between Rs 1400 to Rs 1500 per quintal in Jan on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound movement in January-2017.

Market Outlook for Nov: Prices of Pea are likely to trade steady to slightly weak due to subdued demand at current level and weak chana price. Stock is ample, New crop is due in February. Ample old stock and expected good crop size would not allow market to move unexpectedly up in the near term. Gov. may consider revision in duty (currently 50 %) after new crop. It might be in next financial year, starting from April-2018.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

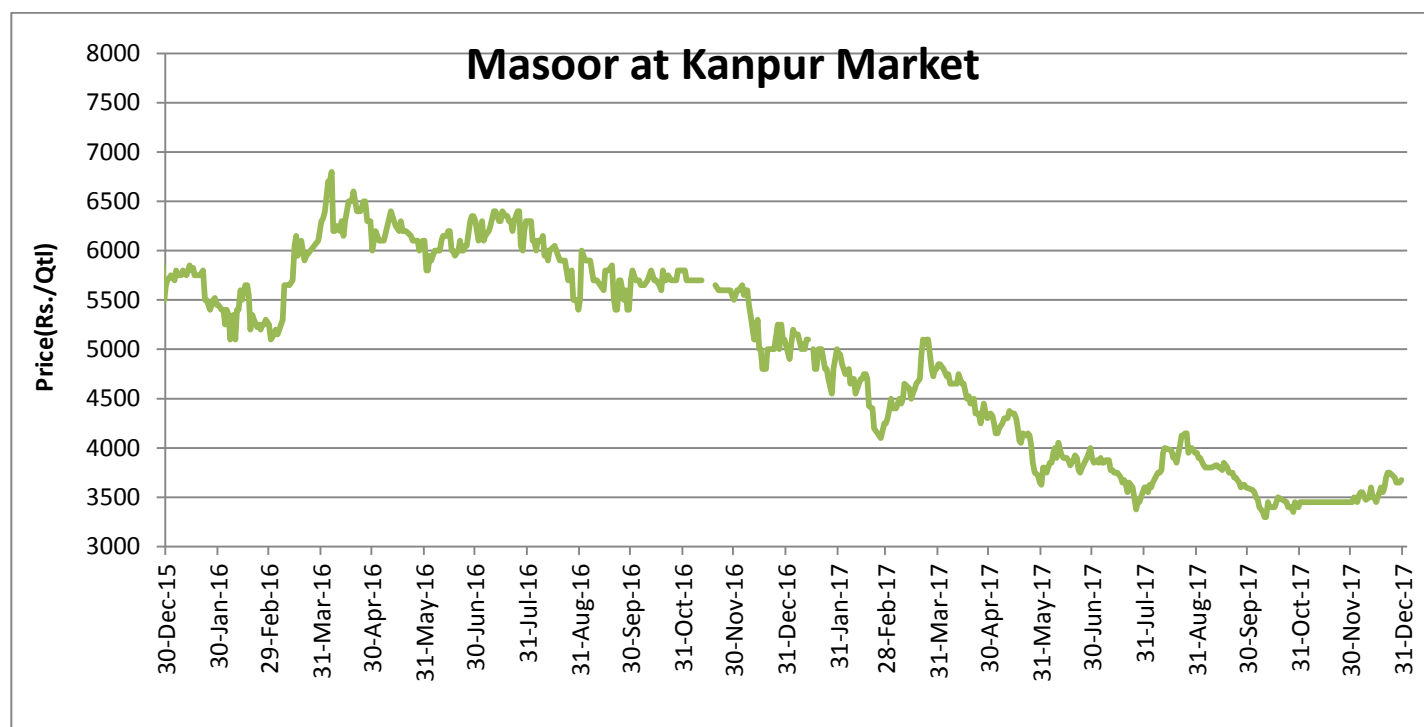

Market Recap:

Kanpur market opened with a firm note in the beginning of the week and could not sustain at higher level despite restricted import flow and opening up of dal export. Area under Lentils is bound to increase this year as overall sowing trend is higher by 7.39 % to 13.55 lakh ha so far. Overall sentiments remain steady to slightly firm in the short to medium term. Australian Red whole Lentils (nipper Type) is being offered at \$505 for tone for Dec delivery. Nugget type is being offered at \$495 per ton for Dec delivery. Stakeholders should buy on dip..

Price Dynamics:

In Nov-2017, average price in key market Kanpur was down by 8.29 % to Rs 3450 per qtl MoM basis. Prices are likely to recover in December too. Prices are firm due to:

- Improved forward quotes (\$490/500) Australia.
- Fresh demand at current level and fear of imposition of import duty in coming weeks.
- Restricted Import flow and improved CnF quote in Canada(\$460)
- Fumigation issue remains intact affecting bulk import.

Seasonality Index depicts range bound to slightly weak movement in January-2017.

Market Outlook for Jan:

Despite imposition of 30 % import duty and restricted import volume pressure continues on Masur market. New crop is hardly one and a half month away from now. Area under Masur is 48 % higher than last year. Indian farmers have covered 16.83 lakh ha so far. Crop condition is good. Surplus old stock too is weighing in market. Steady to slightly weak tone may prevail in the month of January. Recovery is expected after April when pressure from new crop would start decreasing.

Average price of Masur increased by 6.91 % to Rs 3679 per qtl in Dec-2017. Market has already adjusted with duty impact. Demand factor is weighing on to the market as availability of other pulses is higher at attractive price. Besides, selling through auction continues in a limited way. Steady to weak tone may continue.

Price Dynamics:

- Market may stay steady to weak due to:
- Higher crop size
- Higher Old stock
- Weak demand &
- Good crop condition so far

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

During review month, Desi and imported Tur traded firm on lower crop size (30.26 lakh tonne) against 39.19 lakh tonne last year. Besides, procurement drive is expected to support market to a certain extent. However, pressure from new crop is yet to build up. So, steady to slightly weak tone might be seen in January. It may trade in the range of Rs 3900 to Rs 4400 per qtl. depending on quality of the crop. Stock is ample and supply side would remain at ease. Burma offers new Tur at \$400 per tonne. Old is being offered at \$360 per tonne.

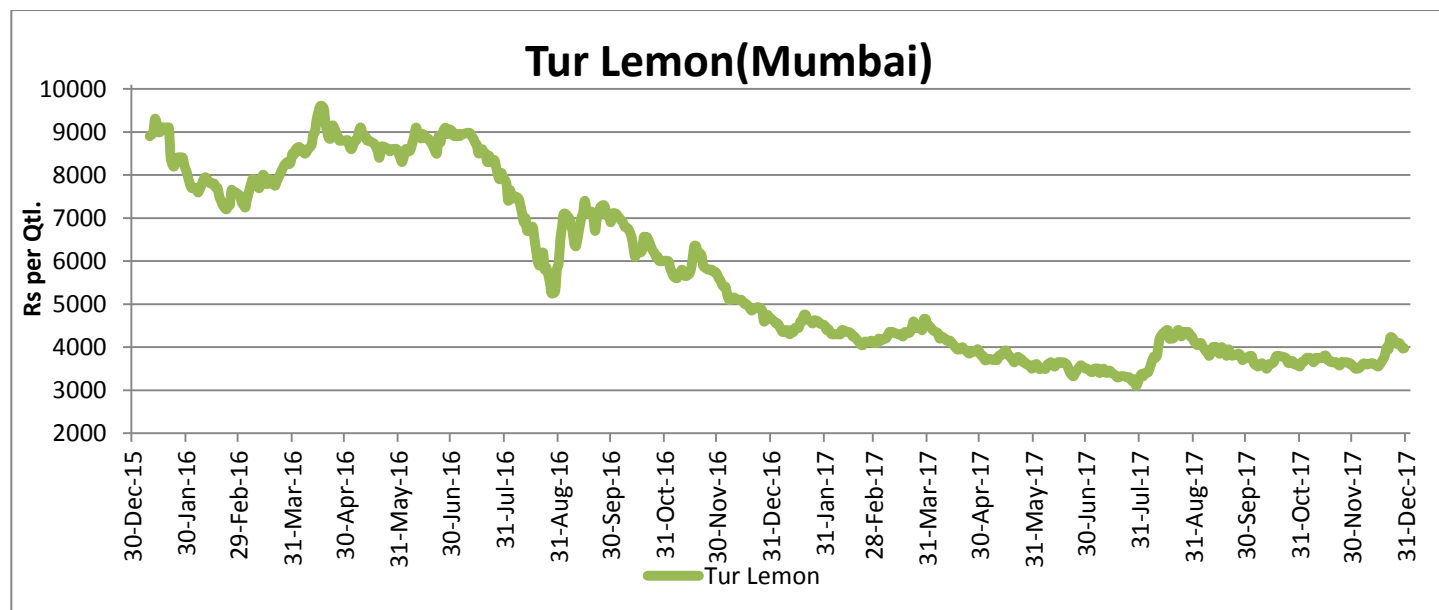

Market Recap:

Average price of Tur increased 15.12 % from 3901 to Rs 4491 per qtl. in Dec-2017 in Gulberga market. Price may decrease slightly in Jan with increasing arrival pressure. Buying at lower level is good as procurement drive would support market to a certain extent. Normal trade is expected after April. Imported Tur price in Mumbai increased from Rs 3681 to 3769 per qtl. in December.

Price Dynamics:

In Dec-2017, average price in Mumbai market was up by around 2.39% to Rs 3769 per qtl. from Rs 3681 in Nov due to

- Restricted selling from central pool stock
- Expected lower crop size
- Improved demand at current level
- & likely procurement from mid Jan-2018.

Seasonality Index- depicts steady to slightly weak movement in this month. Average price increased by 2.39 % MoM basis to Rs 3769. Farmers have restricted selling at current level. Steady to slightly weak movement might be seen in Jan.

Production- According to the Agriwatch estimate, Kharif Tur MY 2017-18 production is estimated at around 30 Lakh tonne against 39.19 lakh tonne in 2016-17. New crop starts now. Tur area ended with 42 lakh ha as per Agriwatch estimate.

Market Outlook for January:

Tur prices are likely to trade steady weak in January-2018. New crop has started hitting the market in Maharashtra and Karnataka region. Buying at dip is good. Market may move up April Onward.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

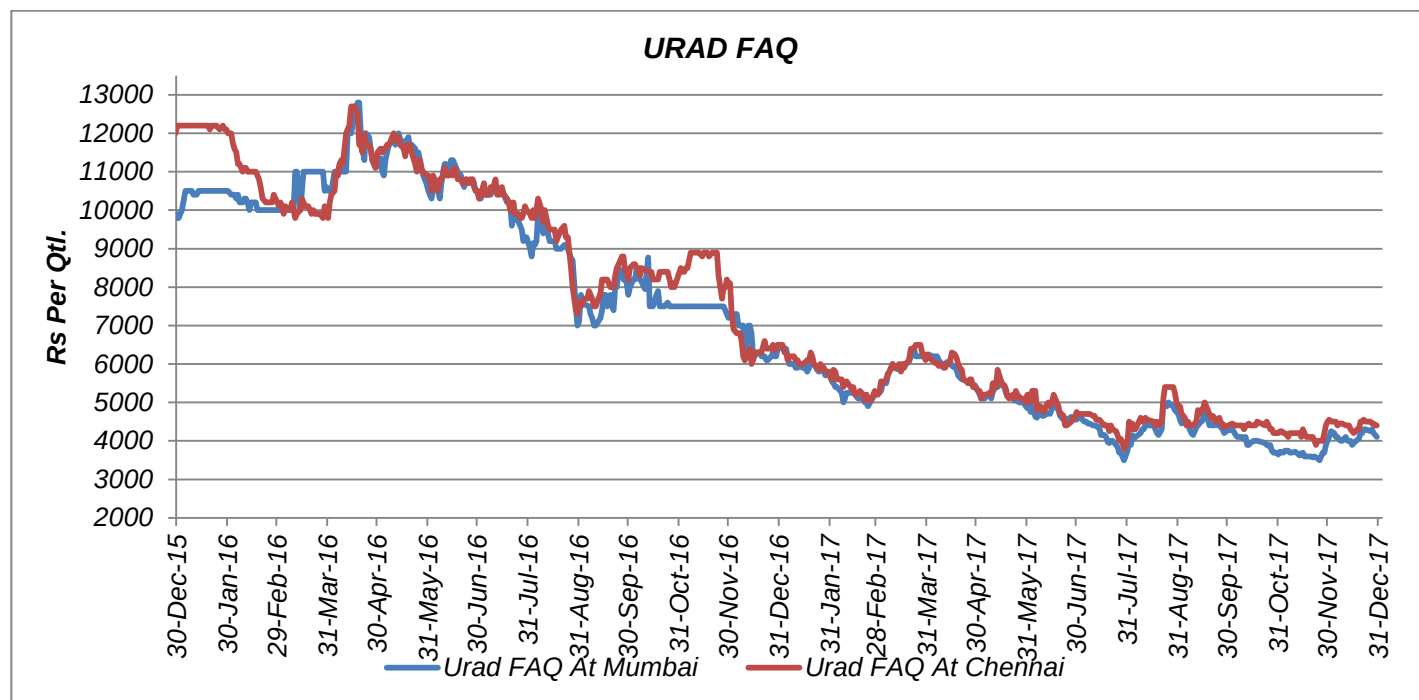

Market Recap:

During the review period, imported and desi Urad prices noticed range bound movement. It moved up in the beginning of the month and decreased in the end of the month due to stockists booking at higher level. Commencement of procurement may support Urad market in coming weeks. Rajasthan govt is going to buy 60,000 ton on MSP. Urad FAQ Urad market trades range bound. Slack demand from millers end & comfortable supply side remains unsupportive to Urad cash market. It is being offered at Rs 3900/4000 per qtl. in Mumbai market while it is being traded at Rs 4350/4400 in Chennai market. Steady to weak tone may prevail. Burma offers FAQ Urad at \$505 per tonne, basis Indian port. SQ is offered at \$625 per tonne.

Price Dynamics:

In Dec, average prices in key markets including Mumbai/Chennai were up by 8.87 % percent from 3920 to Rs 4267 per qtl. Prices may stay steady to weak due to

- New arrival
- Higher crop size
- Ample stock
- Lower forward quotes and restricted buying in domestic market.

Seasonality Index depicts steady to weak movement in the near term to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2017-18 production is estimated at 24.97 lakh tonne against 23.97 lakh tonne 2015-16. See supply and demand side. Crop condition is good.

Market Outlook for Dec:

Prices are likely to trade range bound.

Fundamental Analysis and Outlook For Moong:

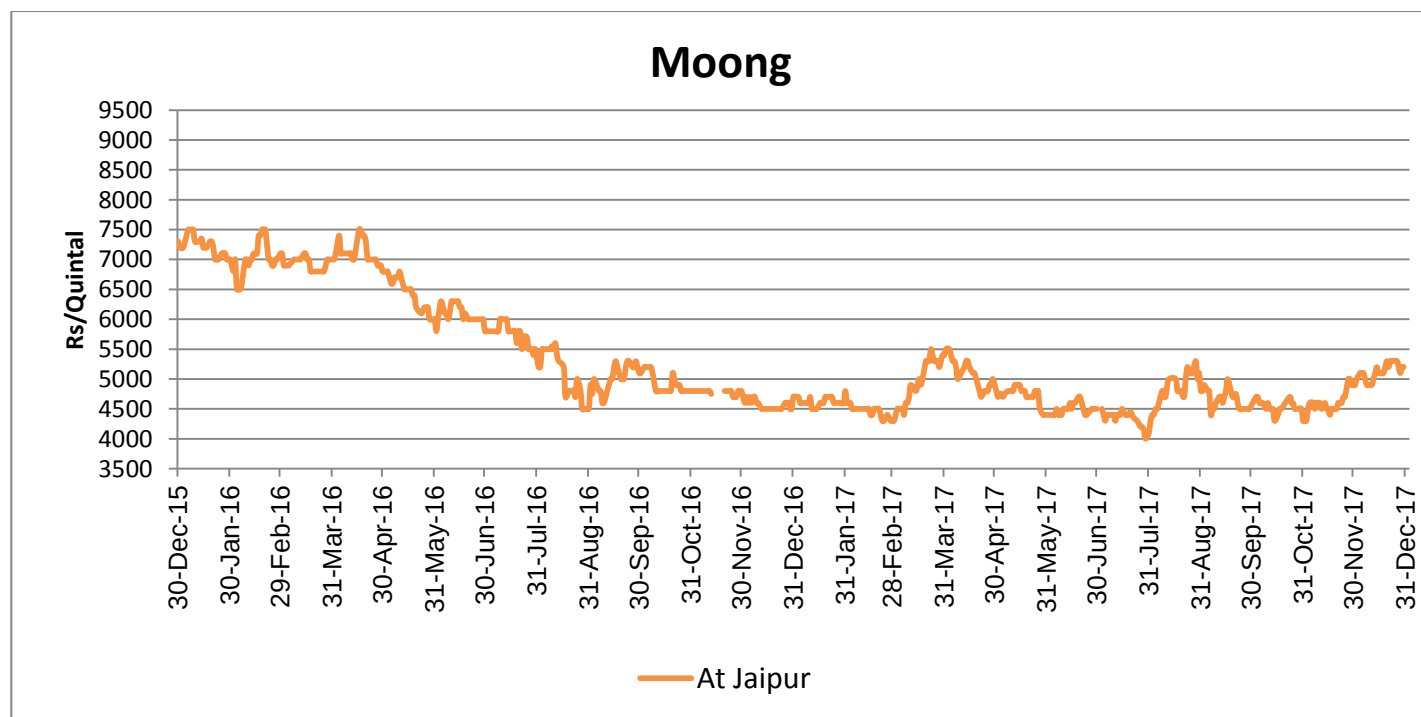

Market Recap:

Rajasthan govt would buy Moong worth Rs 1524 crore to support price. Besides, arrival is declining. Cash market may stay steady at current level despite new arrival in Tamil Nadu. Desi moong prices noticed firm movement during the week under review. Overall tone remains firm due to declining arrivals. Steady forward quotes and commencement of procurement remain supportive for Moong market. Sellers have restricted selling. Moong moved up at Rs from Rs 4500 5200 during the under review month. Steady to firm tone may prevail. It would continue to move towards MSP level.

Price Dynamics:

Moong at Jaipur showed steady to firm movement and traded in the range of Rs 5100to Rs 5250 per quintal. Market may trade steady this month due to stockists demand. From last one month, it moved up by 5.95% to Rs5250 per qtl. in Jaipur market .Procurement begins on MSP to begin at (Rs 5575 per 100kg). Buying at dip is good . Burma offers Moong At \$690 per tonne.Prices may stay steady due to

- Stockiest activeness in firm market
- improved demand at current level
- Export deals for 25,000 tone.
- Lower crop size.

Seasonality Index depicts steady to slightly weak movement in Jan.

Production- According to the Agriwatch preliminary estimates, Kharif and rabi Moong 2017-18 production is estimated at 19.25Lakh tonne. It was 20.13 in 2016-17.

Market Outlook for Jan:

Prices may continue to move towards MSP level (Rs 5575 per qtl. including bonus of Rs200 per qtl. But not without a downward correction.

Pulses Wise Technical Outlook for Jan-2018 :-

Chana:

Outlook –We expect prices to notice weak movement in the near term. Improvement in demand is unlikely. Higher area coverage and production over 95 lakh tonne would put further pressure on Chana price. Impact of duty would be felt in second half of the year.

- ❖ Chart depicts weak movement in prices.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 3900 to 4400 levels in this month.

Strategy: Sell on Rise.

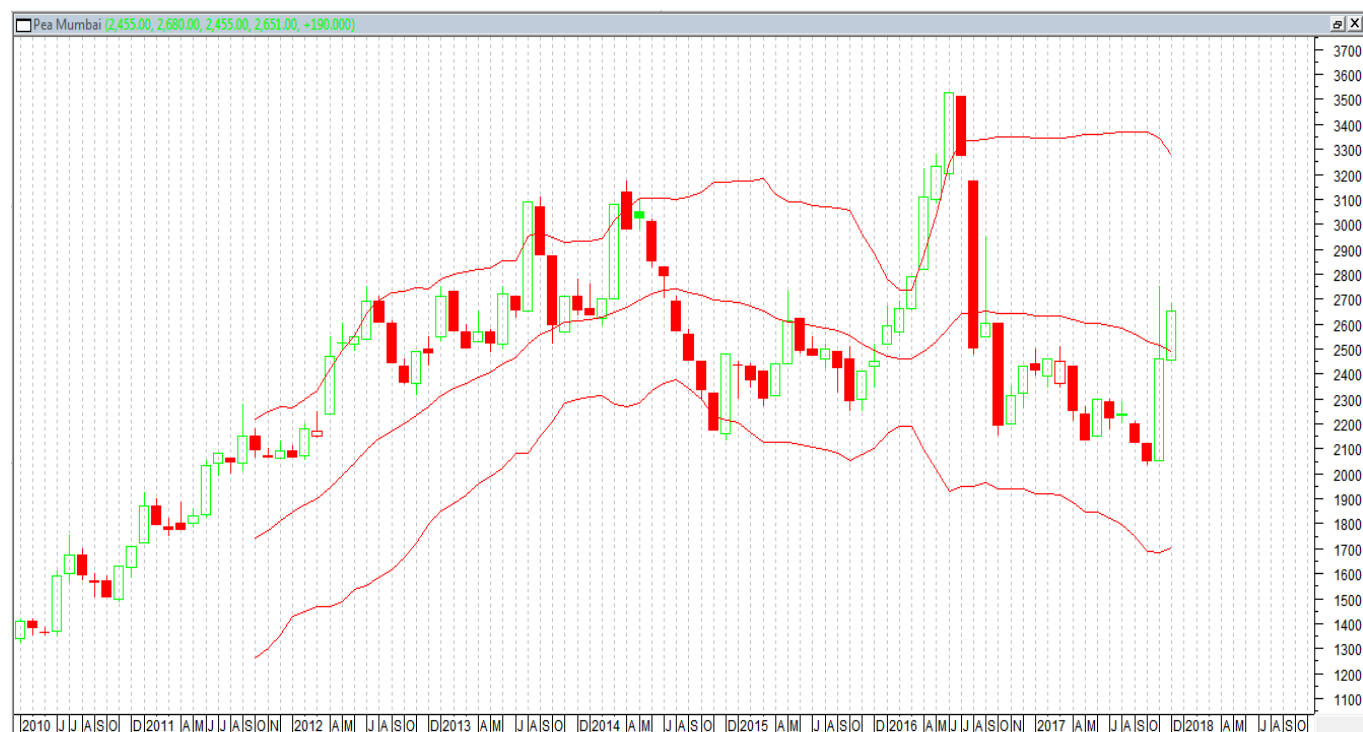

Trade Recommendations:

- **Spot Market outlook:** Chana is likely to trade weak.

Trade Recommendations: Go short around 4450 with the first target of 4200 and second target 4100 with stop loss at 4500 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3900	4000	4400	4450	4600

Pea:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slight firm movement in this month taking clue from restricted import flow delay in new crop..

- Candlestick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 2600-2750 in this month.

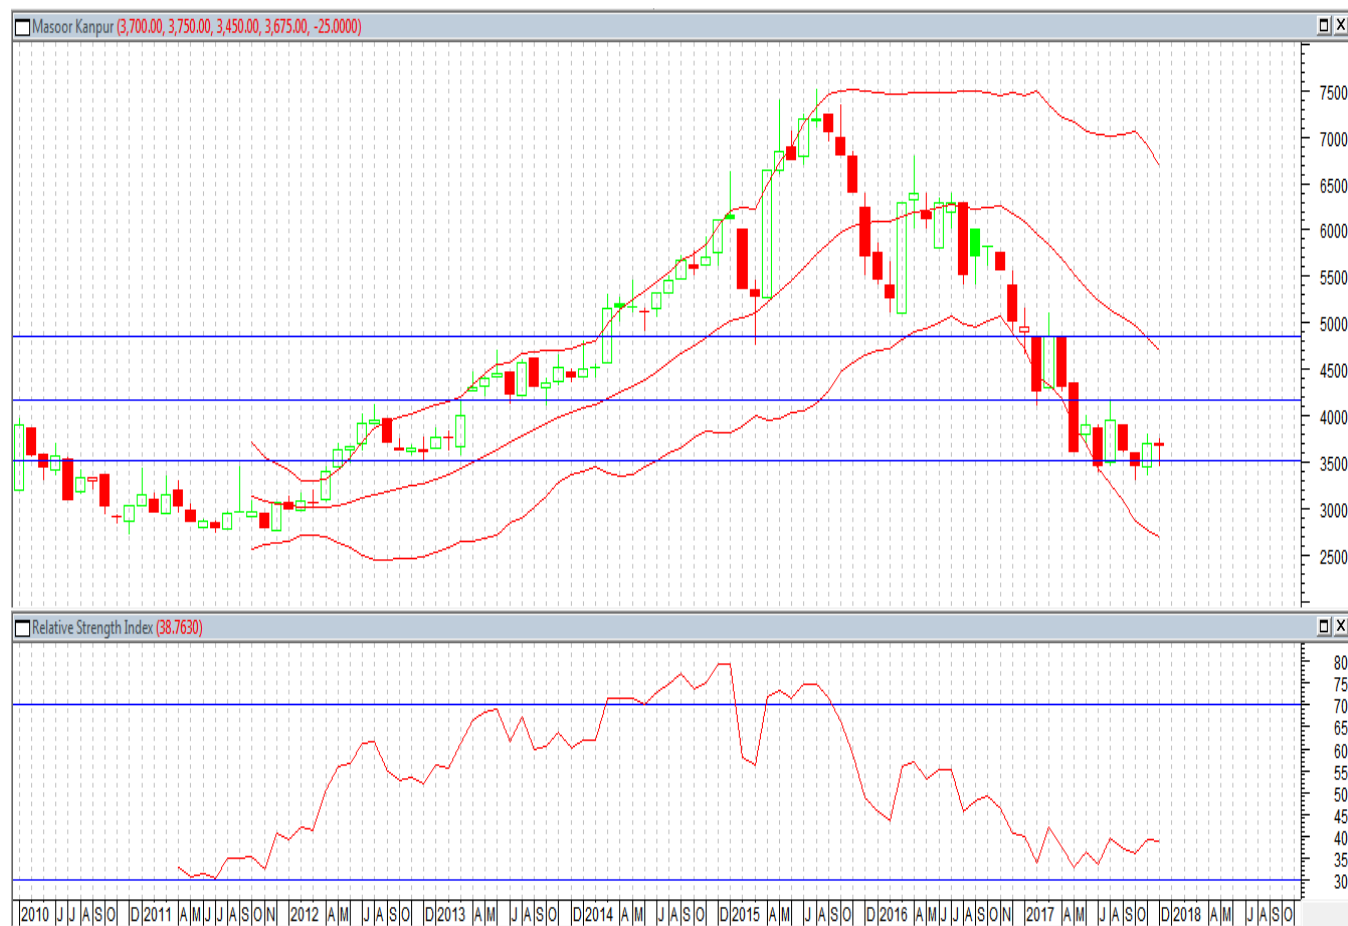

Strategy: Buy on dip

Trade Recommendations: Go long around 2600 with the first target of 2750 and second target 2800 with stop loss at 2550 level.

Support & Resistance				
S2	S1	PCP	R1	R2
2500	2600	2651	2800	2900

Masoor:

Desi Masoor (at Kanpur) Spot Market Monthly Chart:

Outlook –Range bound to slightly weak movement is likely to be noticed in this month.

- Chart depicts weak movement in the market.
- RSI oscillator is moving down in the neutral region.
- Expected price band is 3600 to 3900

Strategy: Buy on dip

Trade Recommendations: Buy around 3600 with the first target of 3750 and second target 3800 with stop loss at 3550 level.

Support & Resistance				
S2	S1	PCP	R1	R2
