Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic:

- **Excess stock from last year's crop and good incoming Rabi crop would prevent cash market from moving towards MSP level** in the month of February, despite procurement drive by various state agencies. Slight recovery in the second half of Jan was seen due to buying interest at lower level. As Rabi crop size is higher, supported by ample old stock, uptrend in pulses cash market is unlikely to continue. Tur & Urad may move up to a certain extent but would not cross 5000 level this month. Pressure on Chana, Moong, Lentils and Pea is likely to continue due to new arrivals. Higher prices encourage stockiest of old crop to sell and make space for the new one and sort out money issue too. It remains restrictive for pulses price. Besides, Urad and Moong is being sold from central pool stock.
- **Rabi pulses sowing area is running ahead by 5.34 % to 166.47 lakh ha as on 2nd Feb-2018.** Chana area was registered at 107.24 against 99.04 lakh ha. Masur area was registered at 17.34 against 17.25 lakh ha, peas area was recorded at 11.90 against 11.93 lakh ha. Even Urad and Moong area was recorded at 8.47 against 9.21 & 7.15 against 6.31 lakh ha. Other pulses area was recorded at 6.22 against 6.34 lakh ha. Sowing, has entered the last phase now & bumper production seems very much on the cards in Rabi season too.
- **Govt. has intended to give 1.5 times more than actual production cost of food-grains, to farmers** and would develop infrastructure for the same. It may support pulses market too in the medium term. Budget is said to be favorable to the farmers. Pulses market traded steady to weak. Arrival pressure is expected to increase for Chana, Tur, Moong. Besides, Urad and Moong is being sold from central pool stock. It would restrict the market from getting firmer in the near term.
- **Tur procurement in Maharashtra commences. It may check decreasing prices of Tur** in mandis of Maharashtra. Central govt has green signaled, to buy 4.46 lakh tonne Tur in the state. Around 1.2 lakh farmers have registered so far
- **Nafed procured 66897.20 tonne Tur at MSP till 23rd Jan-2018 from kharif 2017-18 crop.** Karnataka has contributed around 33392.83 tonne so far. Telangana has procured 33504.37 tonne so far. Telangana has met its procurement target. However, procurement target has been revised up and procurement date extended to 28th Feb-2018. Total Tur purchased by Nafed has increased to 1,33,794.41 tonne till 23rd Jan-2018.
- **Import duty applicable on various pulses is likely to continue till pressure of excess stock decreases.** Currently, Chana & Lentils attract 30 percent duty while all peas attract 50 % duty. Tur attracts 10 % duty. Besides, import quantity restriction of Moong and Urad has been fixed at 3 lakh tonne for both while for Tur it is 2 lakh tonne/ (already imported). Besides, G 2 G basis import too has been restricted from 3 to 1.24 lakh tonne from African countries.
- **Government's procurement drive at MSP (Rs 5400) including bonus of Rs. 200, remains supportive to Urad cash market.** However, overall condition is that of very high surplus. New arrivals from Rabi crop and selling through auction by central pool may restrict any upward momentum in the short term. Range bound movement may prevail in Urad market. It is likely to trade in the range of Rs.4200 to Rs.-4700 per quintal in the open market in coming weeks. Urad FAQ Chennai is being traded at Rs 4400 to 4600 per quintal while in Mumbai it traded at Rs.4000 - 4100 per quintal. There is no export opportunity for Indian Urad at prevailing prices as Myanmar offers FAQ Urad at \$460 and SQ at \$590 per tonne.
- **New Tur crop has started arriving in markets of Maharashtra and Karnataka and will arrive** in MP, Gujarat and Rajasthan soon. New Tur is being traded at Rs.4000-4600 per quintal. Procurement drive, marginally firm quotes in Myanmar and increased private buying would prevent market from sinking from current level. Myanmar offers old Tur at \$3545-6550 per tonne while new Tur is being offered at \$405-410395-400 per tonne, still much lower than prevailing price in India.
- **Stockiest's selling just ahead of new crop from Odisha, major(Rabi moong) producing states** and commencement of arrival in ,Gujarat, AP & Tamil Nadu from Rabi crop, would prevent market from moving up from current level. Besides, Nafed and Markfed are selling Moong from last year's crop. Markfed has issued tender for sale of 1.93 lakh tonne Moong in MP. It would continue to affect market sentiments in the weeks ahead.
- **Lentils may trade steady to slightly weak till new crop hits the market. Peas market may trade steady to slightly weak** as stock is higher despite imposition of 50% duty on all peas. Import flow would decrease. Overall sentiment remains weak. There is no export parity at current level for lentil.

International:

- **Active buying by Bangladesh and rumour of Pakistan's likely buying, have helped Australian pulses market to move up smartly last week.** Harvesting of Chickpeas is on in India. Pakistan would not import Chana from India due to tensed political issues. However, current firmness is unlikely to continue. Australian market would drop once again. Notably, Australian market moved up around \$125 to around \$1000 and lentil moved up by \$85-90 to \$880 per tonne. Prices moved up by \$50 per tonne in last 10 days. However, it has started falling once again. Quotes in Queensland has dropped from \$600 to \$565 per tonne.
- **Even lentil price has come down from \$500 to \$475-80 per tonne. Major buyers like India are not going to enter the market for any bulk purchasing.** Other countries' buying interest would not fulfill the gap. So price is likely to stabilize at current level.
- **Chickpeas production estimate for the US has been increased from 2.50 lakh tonne (2016) to 3.15 lakh tonne in 2017** despite lower area coverage of 6.23 lakh acres. US farmers had covered 3.31 lakh acres in 2016. However, Chickpeas stock on 1st Dec-2017 was recorded at 72000 tonne, lower from 65000 tonne from Dec-2016. Small Chickpeas stock was recorded at 45750 tonne against 32600 tonne last year. It is a tentative figure. Combined stock is higher by around 20,000 tonne from 2016.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.65 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.55 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture, Canada, has updated its production estimate for Chickpeas for marketing year 2017-18.** According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81000 tonne against 82000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 tonne against 16,000 tonne last year.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Imposition of import duty on all peas by 50 % has started impacting export volume from Canada.** According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas prices are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the cards. Ukraine produced 7.45 lakh tonne peas last year

Outlook: Cash market is likely to steady to weak for Chana, Masur, Moong & pea while steady to slightly firm for Tur, Urad.

Urad Kharif –Rabi combined production is bound to increase slightly from 23.9 to 24.97 lakh ton in crop year 2017-18. Production increase is due to higher area coverage. Import would remain restricted at 1.5 lakh tone, applicable till March-2018. Over 1.1 lakh ton Urad import has already been reported. Govt may review quantity restriction in March-2017. Consumption is likely to increase by 2 lakh ton due to cheaper availability in domestic market. Carryout would increase due to higher total supply and higher production. It will increase from 8.77 lakh ton to 9.74 lakh ton. Supply side will remain at comfortable level.

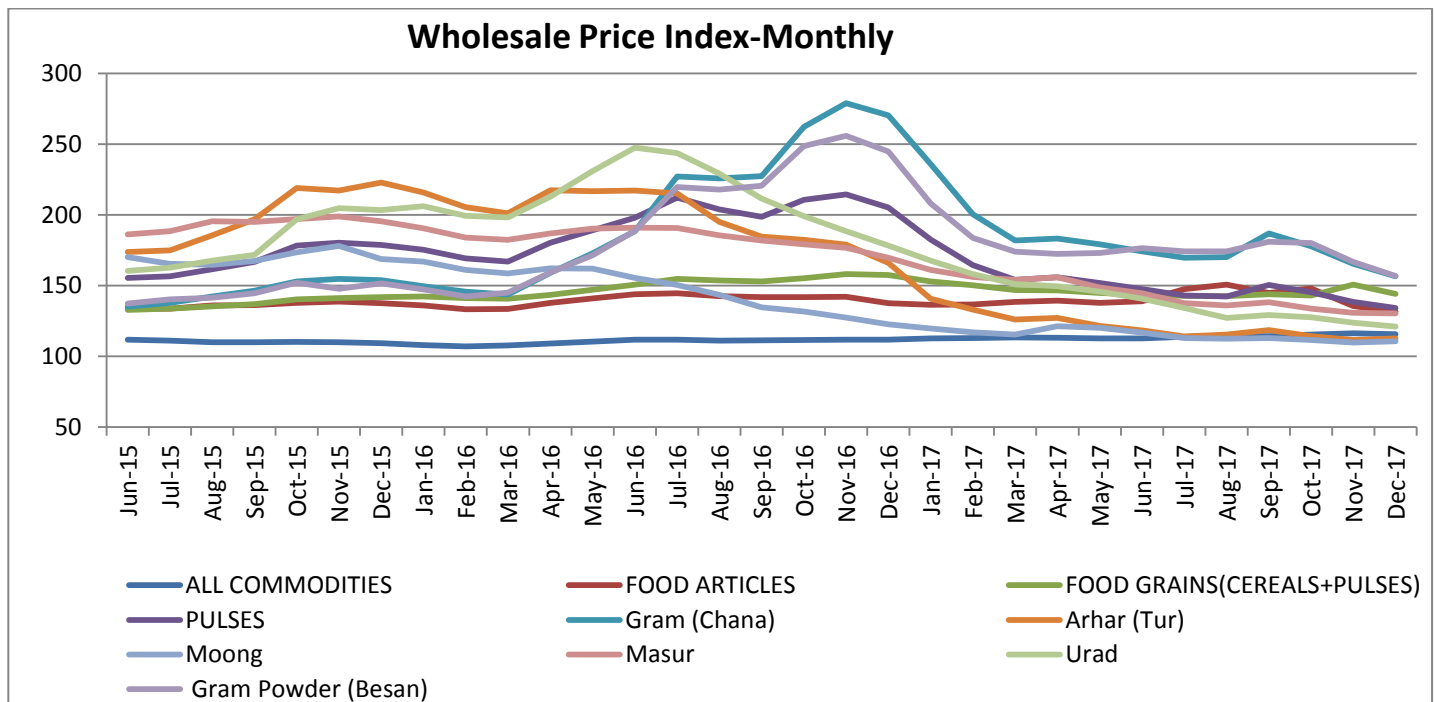

Moong Kharif-Rabi production is expected to decrease from 20.3 lakh ton to 19.25 lakh ton in 2017-18. Import would remain at 1.5 lakh ton as fixed by govt. Total supply would increase to 29.65 lakh ton due to higher carryout stock. Govt may review import quantity restriction, March-2018 onward. Over 1.25 lakh ton Moong has been imported so far. Consumption would increase slightly from 18.8 to 20.5 lakh ton. The season 2017-18 would end with higher carryout stock (9.15 lakh ton). Supply side will remain at comfortable level.

Tur production is expected to decline to 30.26 lakh ton in 2017-18 from record production of 39.18 lakh ton last year. Decrease in production is due to over 22/24 % decline in area planted this year. Total supply is expected to decline to 42.72 lakh ton due to lower crop size. Consumption is expected to increase from 37 to 38.25 lakh ton due higher availability at competitive price. Ending stock would decline from 10.67 to 4.68 lakh ton. Supply side is comfortable. Import restriction continues and fixed at 2 lakh ton.

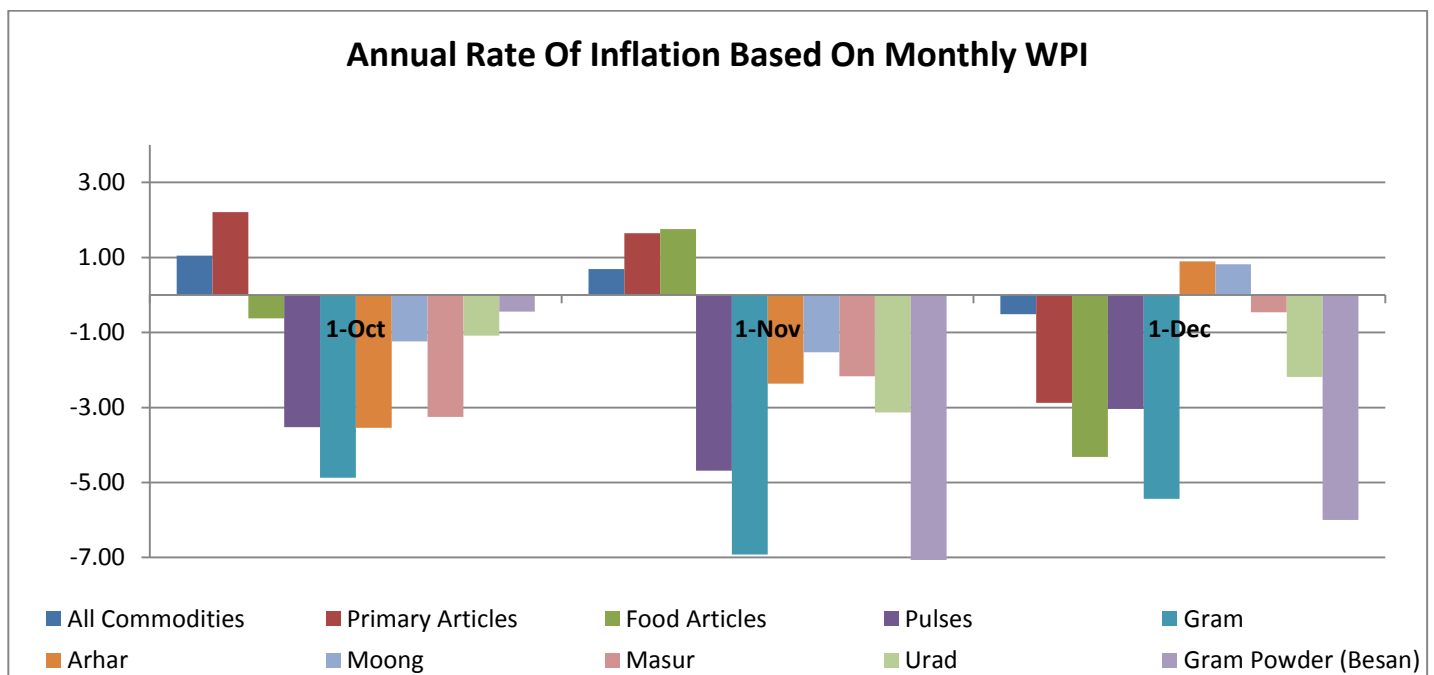

Chana production is likely to increase from 90.19 to 95.56 lakh ton in 2017-18 as per Agriwatch 1st adv estimate. As season would start with hefty carryout of 12.91 lakh ton Chana, total supply would increase from 101.89 to 110.4 lakh ton. As supply side is higher, import might decrease from hefty 9.8 lakh ton to 2 lakh ton. Consumption is likely to increase from 89 to 91 lakh ton. The season would end with 17.47 lakh ton carry out. So, pressure on Chana market may continue without govt.'s interference.

Lentil production is expected to increase from 10.40 to 11.68 lakh ton this year due to higher area coverage. Higher carry out and higher production would increase total supply to 23.63 lakh ton. Import is expected to remain steady at 7/8 lakh ton. Availability is higher. The season may end with 3.63 lakh ton carry out. Supply side would remain at comfortable level.

Agri Commodity Indices –Dec, 2017

Pulses Index decreases by 4.4 point from 138.4 in Nov to 134.2 in Dec -2017(M-o-M basis)

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

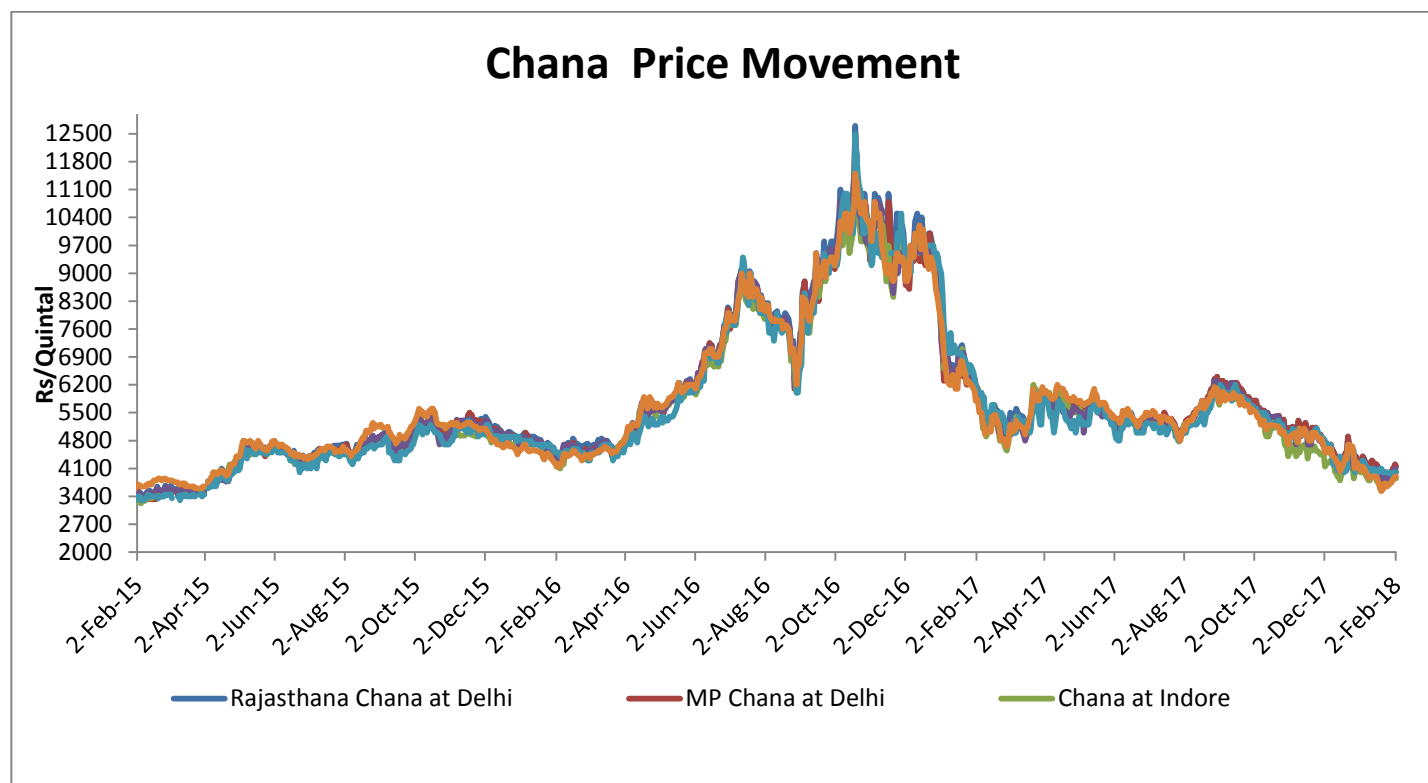

Market Recap:

With increasing arrival pressure and higher crop size (over 96 lakh tonne) cash market is bound to trade lower in month of Feb-Mar-2018. Crop condition is good so far. Govt. has imposed 30% import duty on Chana to curb import flow from Australia and it has halted import flow to a great extent. Restricted private buying, uncertainty over govt.'s procurement drive for Chana and cheaper availability of other pulses continue to weigh on market fundamentals. However, weather related concerns remain intact. Light rains in growing regions may boost up yield for late sown varieties. In MP new crop is expected to hit market from 20th Feb-2018. Hailstorm and increasing temperature in Rajasthan, Maharashtra in second half of Feb may damage crop. Overall outlook for Chana is weak under prevailing condition.

Price Dynamics:

In Jan-2017, all India average price was down by 4.62 % to Rs 4040 per qtl..Average price in Dec was 4236 per qtl. Prices are likely to move down side in Feb due to:

- Higher area coverage (up by 8.28 % to 107.24 lakh ha so far against normal of 86.80 lakh ha.)
- Higher old stock & new arrivals in Karnataka & Maharashtra, MP & Rajasthan yet to begin.
- Lower Australian quotes at \$635/40 per tonne

Seasonality Index hints that Chana (gram) is likely to notice weak movement in the Spot market in February-2018

Chana Future Market Analysis:

Technical Commentary:

Rising price & falling OI hints short covering in the market.
RSI is moving up in neutral region, hints caution to bears.
Prices closed below 9 and 18 days EMAs

Strategy: Sell on rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	March	3700	3651	3820	4000	4150
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	March	Sell below	3900	3800	3775	3960

Production- According to the Agriwatch revised estimate, Chana MY 2017-18 production has been estimated at 95.56 Lakh tonne. Upward revision is likely due to higher area coverage.

Market Outlook for Feb-2018

Chana prices are likely to witness weak movement. 30 % Import duty and additional margin on NCDEX Futures by 20 % on short side would not have much impact. There is a rumour in the market that govt may increase import duty on chana from 30% to 40 %. It may halt import completely. Overall sentiments remain weak.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

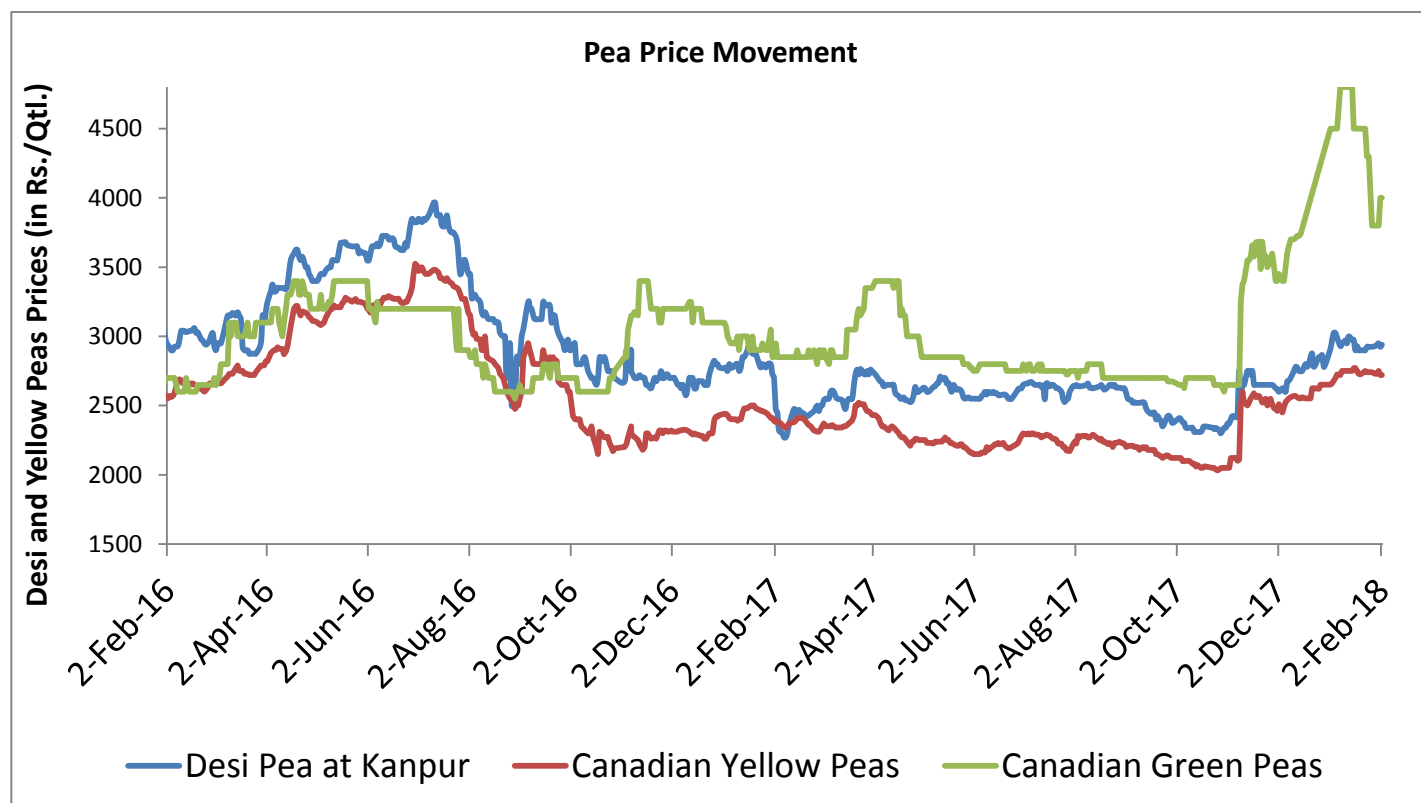

Market Recap:

Imposition of 50 % duty on all peas has restricted import flow to a considerable extent. As stock is at higher side and new crop is hardly one month away, supply side is expected to be at comfortable level. Chana price is bound to decrease so uptrend in peas market is unlikely in February. Range bound movement is expected with weak bias likely to continue. Market has adjusted with duty impact. Major impact of duty might be seen after April, when new crop flow would decrease and by then the excess stock would be consumed. The average price increases by 6.65 % to Rs 2652 per qtl. In Kanpur market it moved up by 3.34 to 2940 per qtl in last one month. Steady to slightly weak tone may be seen in February. Coverage area is almost steady as in last year. So, there is no concern at supply side. There is ample Old stock to cater to the current demand.

Price Dynamics:

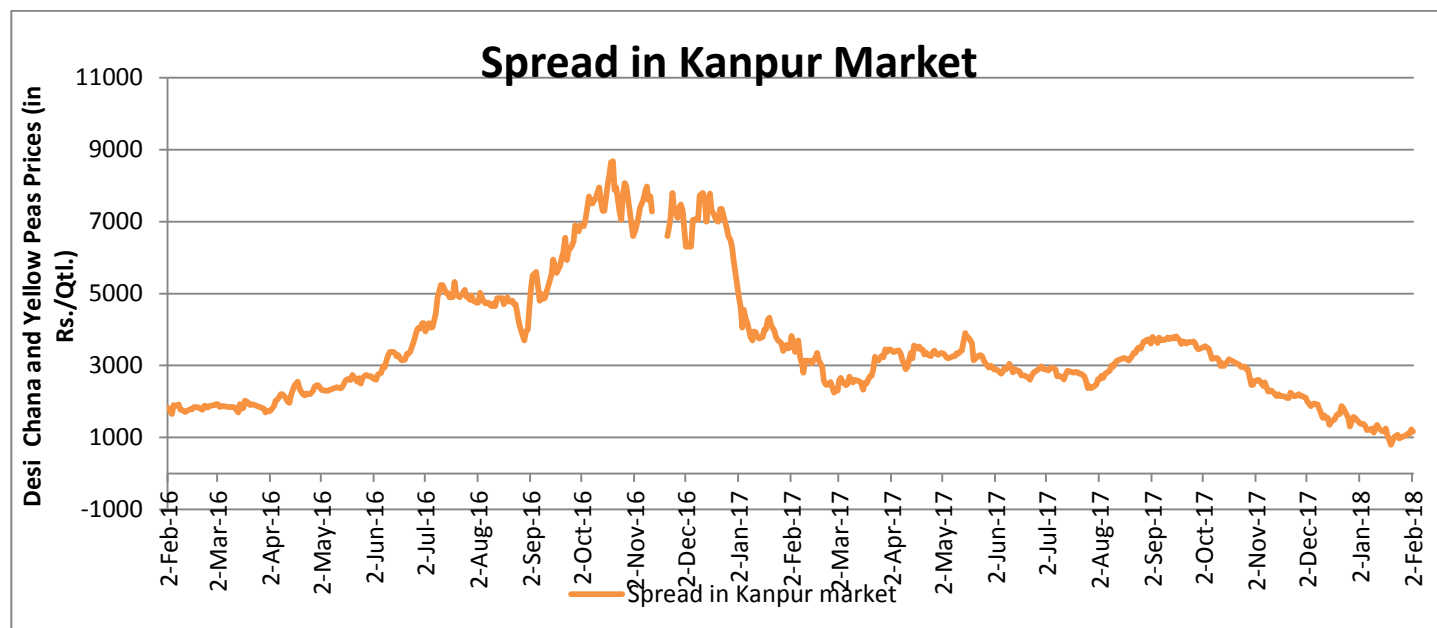

In Jan-2017., yellow pea all India average prices traded up by 4.87 % to Rs 2732 per qtl. Steady to slightly weak movement is expected in Feb due to:-

- Higher stock.
- Steady area coverage & cheaper availability of other pulses
- Decreasing Chana price &
- Weak demand/new arrival soon

Spread With Chana:

[\(Back to Content\)](#)

The spread between Chana and Pea at Kanpur market has decreased considerably by around 524 mainly because of decreased Chana price from Dec to January-2018. As pressure would continue, spread is expected to remain between Rs 1000 to Rs 1200 per quintal in Feb on relative movement in Chana prices.

Seasonality Index depicts that pea prices are likely to notice range bound movement in February-2018.

Market Outlook For Feb: Prices of Pea are likely to trade steady to slightly weak due to subdued demand at current level and weak chana price. Stock is ample, New crop is due in February. Ample old stock and expected good crop size would prevent market from unexpected upward movement in the near term. Gov. may consider revision in duty (currently 50 %) after new crop. It might be in next financial year, starting from April-2018. Current upward momentum is unlikely to continue.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

Market Recap:

Kanpur market traded weak in January on good production prospects and good crop condition so far. Despite imposition of duty market continued to rule under pressure. Recovery is unlikely as new crop is at hand now. Area under Lentils is bound to increase this year as overall sowing trend is higher by 0.55 % to 17.34 lakh ha so far. Procurement drive may support market to a certain extent. Australian Red whole Lentils (nipper Type) is being offered at \$500/ton for Feb delivery. Nugget type is being offered at \$490 per ton for Feb delivery. Weak tone may prevail in Feb and March.

Price Dynamics:

In Jan-2018, average price in key market Kanpur was down by 4.07 % to Rs 3529 per qtl MoM basis. Prices are likely to move further down in February. Weakness is due to:

- Lower forward quotes (\$490/500) Australia/Canada-\$455/60.
- Higher area/good crop condition so far.

- Weak demand

Seasonality Index depicts range bound to slightly weak movement in February-2018.

Market Outlook for Feb:

Despite imposition of 30 % import duty and restricted import volume, pressure continues, on Masur market. New crop is likely to hit market by the end of this month. Area under Masur is 0.55 % higher than last year. Indian farmers have covered 17.34 lakh ha so far. Crop condition is good. Surplus old stock too is weighing in market. Steady to slightly weak tone may prevail in the month of February-2018. Recovery is expected after April when pressure from new crop would start decreasing.

Average prices of Masur decreased by around 4 % to Rs 35.29 per qtl in Jan-2018. Demand factor and likely new arrival is weighing on to the market as availability of other pulses is higher at attractive price. Besides, selling through auction continues. Steady to weak tone may continue. Market may dip Rs100 more from current level.

Price Dynamics:

Weak demand for dal and new crop being at hand may lead to continued pressure on Masur in Feb and March. It would trade weak due to:

- Higher crop size/area
- Higher Old stock
- Weak demand &
- Limited buying approach by state agencies on MSP

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Steady to slightly weak movement might be seen in Tur cash market this week too, with increasing arrivals. However, any major fall is unlikely due to private buying, supported by government's procurement. Overall tone remains firm due to lower crop size and stockists' buying interest at current level. Tur market is expected to move in the range of Rs.4200 to Rs.4800 in February-2018. New crop has started arriving in markets of Maharashtra and Karnataka and will arrive in MP, Gujarat and Rajasthan soon. New Tur is being traded at Rs.4000 to Rs.4600 per quintal. Procurement drive, marginally firm quotes in Myanmar and increased private buying would prevent market from sinking from current level. Myanmar offers old Tur at \$355-65 per tonne while new Tur is being offered at \$400-410 per tonne, still much lower than prevailing price in India which converts to \$640-645 per tonne.

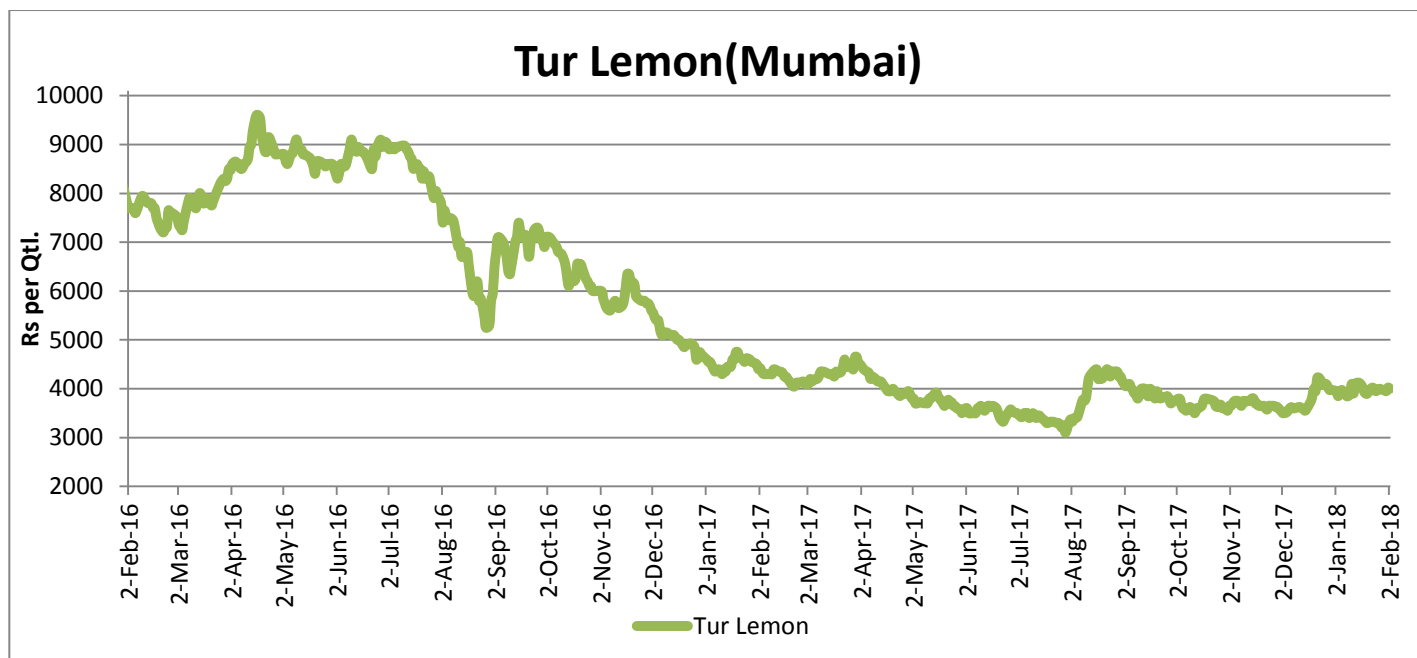

Market Recap:

Average price of Tur decreased 1.55 % from 4500 to Rs 4430 per qtl. in Jan-2018 in Gulberga market. Price may decrease slightly in February too to a certain extent. As fundamental remains firm, buying on dip is good. Procurement drive and private buying interest would prevent market from falling below a certain level. Normal trade is expected after April. Imported Tur price in Mumbai increased from Rs 3760 to 3969 per qtl. in January-2018. Steady to slightly weak tone may prevail in February.

Price Dynamics:

In Jan-2018, average price in Mumbai market was up by around 2.81% to Rs 3969 per qtl. from Rs 3760 in December due to

- Higher arrival
- Selling from central pool stock(old crop)
- Steady retail demand for dal at current level
- Cheaper availability of other pulses.

Seasonality Index- depicts steady to slightly weak movement in this month. Average price decreased by 1.85 % MoM basis to Rs 3869.

Production- According to the Agriwatch estimate, Kharif Tur MY 2017-18 production is estimated at around 30 Lakh tonne against 39.19 lakh tonne in 2016-17. New crop starts now .Tur area ended with 42 lakh ha as per Agriwatch estimate.

Market Outlook for February:

Tur prices are likely to trade steady to slightly weak in February-2018. New crop has started hitting the market in Maharashtra and Karnataka region. Buying at dip is good. Market may move up April Onward once again.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

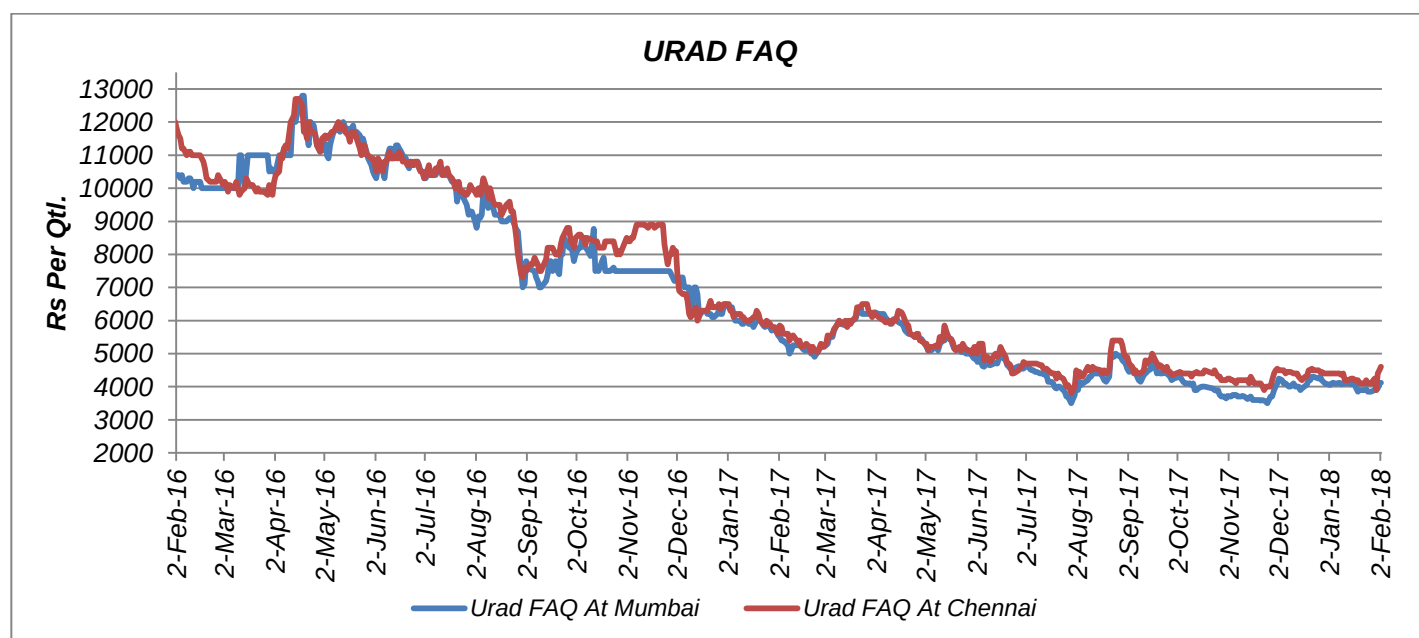

Government's procurement drive at MSP (Rs.5400, including bonus of Rs.200) remains supportive to cash Urad market. However, overall condition is that of very high surplus. New arrivals from Rabi crop and selling through auction by central pool may restrict any upward momentum in the short term. Range bound movement may prevail in Urad market. It is likely to trade in the range of Rs.4200 to Rs.4700 per quintal in the open market in coming weeks.

Urad FAQ Chennai is being traded at Rs.4400 to Rs.4600 per quintal while in Mumbai it traded at Rs.4000 – Rs.4100 per quintal. There is no export opportunity for Indian Urad at prevailing prices as Myanmar offers Urad at much lower prices- FAQ at \$460 and SQ at \$590 per tonne.

Price Dynamics:

In Jan, average prices in key markets including Mumbai/Chennai were down by 2.85 % percent from 4268 to Rs 4146 per qtl. Prices may stay steady to weak due to

- New arrival from Rabi at hand
- Higher crop size
- Ample old stock
- Lower forward quotes and restricted buying in domestic market.

Seasonality Index depicts steady to weak movement in the near term to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2017-18 production is estimated at 24.97 lakh tonne against 23.97 lakh tonne 2015-16. See supply and demand side. Crop condition is good.

Market Outlook for Feb: Prices are likely to trade steady to weak.

Fundamental Analysis and Outlook For Moong:

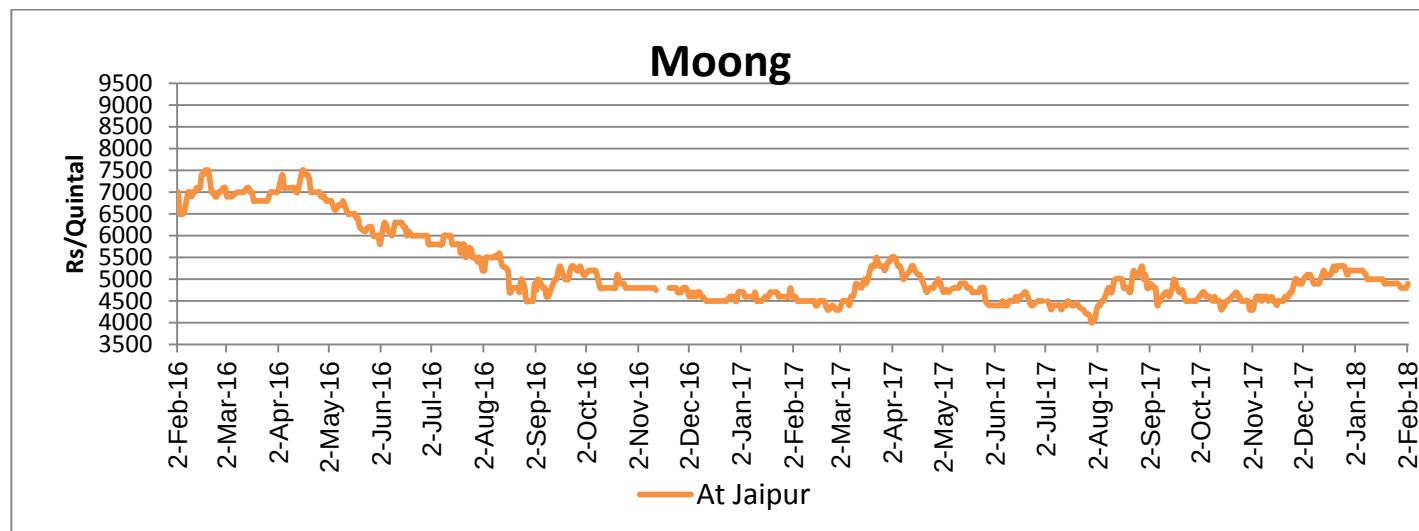

Market Recap:

Stockist's selling just ahead of new crop from Odisha, and commencement of arrival in Gujarat, AP and Tamil Nadu from Rabi crop would prevent upward movement of market from current level. Besides, lack of buying interest puts further pressure on Moong market. Actual trading remains affected amidst weak market sentiments. Arrival of Black Moong from southern Gujarat and northern Maharashtra has commenced and is due shortly from Odisha. This has pressurized stockists to release stock and they have started selling at discounted prices. Besides, Nafed and Markfed are selling Moong from last year's crop. Markfed has issued tender for sale of 1.93 lakh tonne Moong in MP. It would continue to affect market sentiments in the weeks ahead.

Price Dynamics:

Moong at Jaipur showed steady to weak movement and traded in the range of Rs 4700 to Rs 4900 per quintal, lower by Rs 200 from December. Market may trade steady to slightly weak ahead of Odisha crop. Average price in Jan moved down by 2.34 % to Rs 4992 per qtl. in Jaipur market. Burma offers Moong At \$690 per tonne. Prices may stay steady to weak due to

- Stockiest selling at higher level market
- Selling from central pool stock
- No export parity/Burma offers Moong at lower rate
- Higher carryout/New arrivals

Seasonality Index depicts steady to slightly weak movement in February.

Production- According to the Agriwatch preliminary estimates, Kharif and rabi Moong 2017-18 production is estimated at 19.25 Lakh tonne. It was 20.13 in 2016-17.

Market Outlook for Feb:

Range bound movement with weak bias is expected in February.

Pulses Wise Technical Outlook for Feb-2018 :-

Chana:

Outlook –We expect prices to notice weak movement in the near term. Improvement in demand is unlikely. Higher area coverage and production over 95 lakh tonne would put further pressure on Chana price. There is rumour of duty increase. Govt may increase import duty from 30 to 40 %.If duty is increased, market may move up Rs 100 from current level and again it will decrease. Impact of duty would be felt in second half of the year.

- ❖ Chart depicts weak movement in prices.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 3800 to 4300 levels in this month.

Strategy: Sell on Rise.

Trade Recommendations:

- **Spot Market outlook:** Chana is likely to trade weak.

Trade Recommendations: Go short around 4250 with the first target of 4000 and second target 3900 with stop loss at 4500 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3700	3850	4150	4250	4400

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightweak movement in this month taking clue from weak chana and new arrival in domestic market from 2nd half of Feb-2018.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 2650-2800 in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 2800with the first target of 2700 and second target 2675 with stop loss at 2850 level.

Support & Resistance

Canadian Pulses

Canadian Pulses – Area, Production, and Export (Source- Agriculture and Agri-Food Canada & Statistics Canada)

Total Pulses and Special Crops			
	2015-2016	2016-2017[f]	2017-2018[f]
Area seeded (kha)	3,592	4,620	3,898
Area harvested (kha)	3,556	4,475	3,831
Yield (t/ha)	1.81	1.97	1.93
Production (kt)	6,424	8,805	7,412
Imports (kt)	149	274	158
Total supply (kt)	7,837	9,393	8,155
Exports (kt)	5,554	6,901	6,115
Total Domestic Use (kt)	1,968	1,907	1,660
Carry-out Stocks (kt)	315	585	380

Canada Dry Pea Production Estimate

Canada Dry Peas	2015-2016	2016-2017[f]	2017-2018[f]
Area seeded (kha)	1,489	1,715	1,656
Area harvested (kha)	1,470	1,686	1,630
Yield (t/ha)	2.18	2.87	2.45
Production (kt)	3,201	4,836	4,000
Imports (kt) [b]	15	25	25
Total supply (kt)	3,900	5,037	4,150
Exports (b)	2,647	3,800	3,200
Total Domestic Use (c)	1,077	1,112	900
Carry-out Stocks (kt)	176	125	50
Stocks-to-Use Ratio	5	3	1
Average Price (d)	365	300	280-310

Canada Lentil Production Estimate

Canada Lentils (Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
Area seeded (kha)	1,633	2,372	1,783
Area harvested (kha)	1,630	2,323	1,753
Yield (t/ha)	1.56	1.4	1.55
Production (kt)	2,541	3,248	2,725
Imports (kt) [b]	16	100	15
Total supply (kt)	2,922	3,422	3,065
Exports (b)	2,145	2,400	2,200
Total Domestic Use (c)	704	697	665
Carry-out Stocks (kt)	73	325	200
Stocks-to-Use Ratio	3	10	7
Average Price (d)	965	575	720-750

Canada Chickpea Production Estimate

Canada Chickpeas(Crop year is August-July)	2015-2016	2016-2017[f]	2017-2018[f]
Area seeded (kha)	50	68	58
Area harvested (kha)	50	44	57
Yield (t/ha)	1.8	1.86	1.84
Production (kt)	90	82	105
Imports (kt) [b]	14	25	8
Total supply (kt)	229	122	118
Exports (b)	151	115	110
Total Domestic Use (c)	63	2	3
Carry-out Stocks (kt)	15	5	5
Stocks-to-Use Ratio	7	4	4
Average Price (d)	815	1,000	960-990
