Domestic Market Fundamentals:

- **Pulses markets have started improving with various govt.'s efforts including procurement drive, export incentives & import restriction.** Consecutive two bumper crop years have made local market well supplied and pulses are ruling below minimum support price for all pulses. Now with active private buying and continuous procurement on MSP by govt.'s agencies have started supporting market. However, any major spike in the month of April is unlikely as there is plenty of stock available in the market and selling from central pool stock too continues. Agriwatch expects pulses market to stay steady to slightly firm in the short to medium term.
- **With 7 % export incentive for export of pulses including chana and chana dal, amid removal of mandatory roasted chana/ chana dal, export in consumer pack of one kg by DGFT would encourage chana price in local market.** Farmers have restricted selling of chana in expectation of higher price. Demand from mills too has improved. Chana buying at Jodhpur started by govt.'s agencies at Rs4400 per qtl. Arrival in Jodhpur mandi is not up to the mark. Australian Chana at Mumbai was quoted at Rs 3750-3800 per qtl. Steady to slightly firm tone may prevail in the short to medium term. Buying at current level seems riskless. Chana is expected to move towards MSP level of 4400 per qtl. in the near term.
- **Demand for Moong dal is not good right now but sowing area in MP is likely to decline .It is already lower by 18 to 20 % in Gujarat and Haryana.** In Uttar Pradesh sowing has just commenced and it would end by 10th May-2018. New arrival from Bihar and UP is expected from June. So some improvement in Moong market is likely. Moong market in Jaipur improved to Rs5000 and it may move up Rs200 further, in April. Myanmar is offering moong at \$690 per tonne. Uptrend might be restricted by central pool selling, as stock in govt's custody is still higher.
- **Central govt has given approval for buying 3000 tonne Urad from rabi season-2018 in Tamil Nadu on MSP.** Demand for Dhoya and Chilaka Urad is not up to the mark, import from overseas market at cheaper rate is unlikely and lower price in local market has helped to decrease stock to a considerable level. It helped market to recover slightly. It would move up by Rs 100 more from current level. Urad from Jhansi & Lalitpur is available at parity, so any major jump is unlikely. Besides new Urad in AP & Telangana started now.it may restrict any major jump in Urad market.
- **Tur Old stock accumulated in govt stock in past years has started declining now.** It had been imported from African countries. Restricted import quantity would not hamper cash market much this year. Yield in Bihar, Jharkhand & Vishrampur is said to be lower by 25 % this year. Besides, marriage season would commence from mid-May to June, which will encourage demand for tur dal in the short to medium term. Procurement is on and it would remain supportive to Tur cash market in April.
- **Masur market seems under recovery phase and it is likely to move up further as import flow is almost halted due to import tariff and lower than expected crop in MP and Uttar Pradesh .Imported stock is decreasing and demand from Nepal has increased.** Stockists have started retaining stock and it may push market further up. Masur at Mumbai market is being offered at Rs3550 to Rs3700,containers at rs3700 to Rs3800 per qtl. It may touch MSP in the short to medium term.
- **Taking clue from Chana, yellow pea gets firmer. It may move further up as import is almost halted and old stock is fast depleting.** Russian pea is being offered at Rs3300-3350 per qtl in Mumbai. Overall tone remains firm.
- **Nafed procures 678101.10 MT Tur till 4th April-2018 from kharif 2017-18 crop.** Out of total procurement Maharashtra contributed 198602.81MT, Gujarat contributed 13098.42 MT, Karnataka procured 335499.88MT,Andhra Pradesh procured 55600 MT and Telangana procured 75300 MT on MSP.

International:

- **Production of urad and moong has decreased in Myanmar due to lower price realization**, quality issue and virtually no demand from India, as per latest update by Myanmar Pulses, Beans and Sesame Seeds Merchant Association. U Aung Htoo, deputy commerce minister of Myanmar is on India visit (18 to 20 th Mar-2018) and discussion with Indian counterpart is on. The minister has requested to end quantity limit imposed on import, valid upto 31st March-2018. Under quantity restriction Indian cannot import more than 1.5 lakh tonne Urad & Moong (each) and 2 lakh tonne Tur in a marketing year.
- **After two consecutive bumper crop years of pulses in India, prices of pulses decreased below MSP level** and pressure is still on. So Indian govt is unlikely to increase import quantity in the first half of the current MY, starting from April. Farmers in Myanmar may reduce area under Moong and Urad this year and may shift to other alternate crops as prices are much below the production cost. Myanmar govt is planning to buy Moong to support farmers.
- **Global lentil market traded unchanged during the week under review. Weak demand** from India and other importing nations has pressurized the Canadian lentil market too. Lentil export from Canada has been decreasing continuously. In the first half of MY 2016-17 only 26% of the opening season supply of lentils was exported. It is down by 51% from last season and 59% during the first half of the 2015-16 marketing year.
- **CEO of Myanmar Pulses Beans and Sesame Seeds Merchants Association (MPBSMA) San U Myat Soe**, has given hint that Indian and Burmese Govt.'s official are still engaged in sorting out issues related to pulses purchase from Myanmar. Price modalities are being set. Myanmar govt is eager to sell pulses to India at locally prevailing price while Indian govt wants to fix pulses price below prevailing market price. Market is awaiting decision.
- **Lentil price has come down from \$500 to \$475-80 per tonne. Major buyers like India** are not going to enter the market for any bulk purchasing. So, buying interest of other countries would not fill the gap. So price is likely to stabilize at current level.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18. It is lower by 23.54 %** from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Imposition of 50% import duty on all peas, has started impacting export volume from Canada**, According to Agriculture and Agri-Food, Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow pea prices are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.

Note: Agriwatch Preliminary Estimate For 2018-19, Feedback source: MoA, IPGA, Trade source & CACP, Chana 1st adv estimate has been revised down from 95.56 to 94.54 lakh tonne due to crop loss in Maharashtra and lower yield in Rajasthan, MP.

Urad Kharif –Rabi combined production is bound to increase slightly from 23.9 to 24.97 lakh ton in crop year 2017-18. Production increase is due to higher area coverage. Import would remain restricted at 1.5 lakh tone, applicable till March-2018. Over 1.1 lakh ton Urad import has already been reported. Govt may review quantity restriction in March-2017. Consumption is likely to increase by 2 lakh ton due to cheaper availability in domestic market. Carryout would increase due to higher total supply and higher production. It will increase from 8.77 lakh ton to 9.74 lakh ton. Supply side will remain at comfortable level.

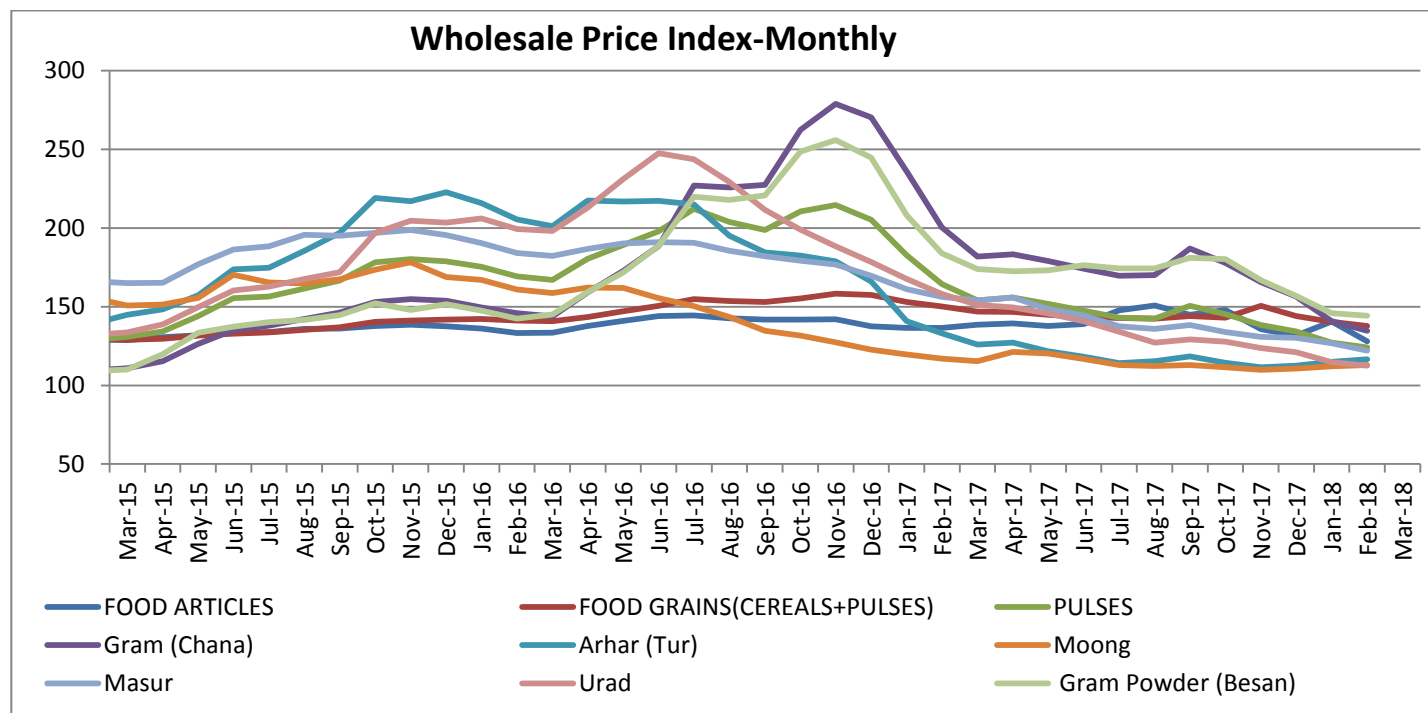

Moong Kharif-Rabi production is expected to decrease from 20.3 lakh ton to 19.25 lakh ton in 2017-18. Import would remain at 1.5 lakh ton as fixed by govt. Total supply would increase to 29.65 lakh ton due to higher carryout stock. Govt may review import quantity restriction, March-2018 onward. Over 1.25 lakh ton Moong has been imported so far. Consumption would increase slightly from 18.8 to 20.5 lakh ton. The season 2017-18 would end with higher carryout stock (9.15 lakh ton). Supply side will remain at comfortable level.

Tur production is expected to decline to 30.26 lakh ton in 2017-18 from record production of 39.18 lakh ton last year. Decrease in production is due to over 22/24 % decline in area planted this year. Total supply is expected to decline to 42.72 lakh ton due to lower crop size. Consumption is expected to increase from 37 to 38.25 lakh ton due to higher availability at competitive price. Ending stock would decline from 10.67 to 4.68 lakh ton. Supply side is comfortable. Import restriction continues and fixed at 2 lakh ton.

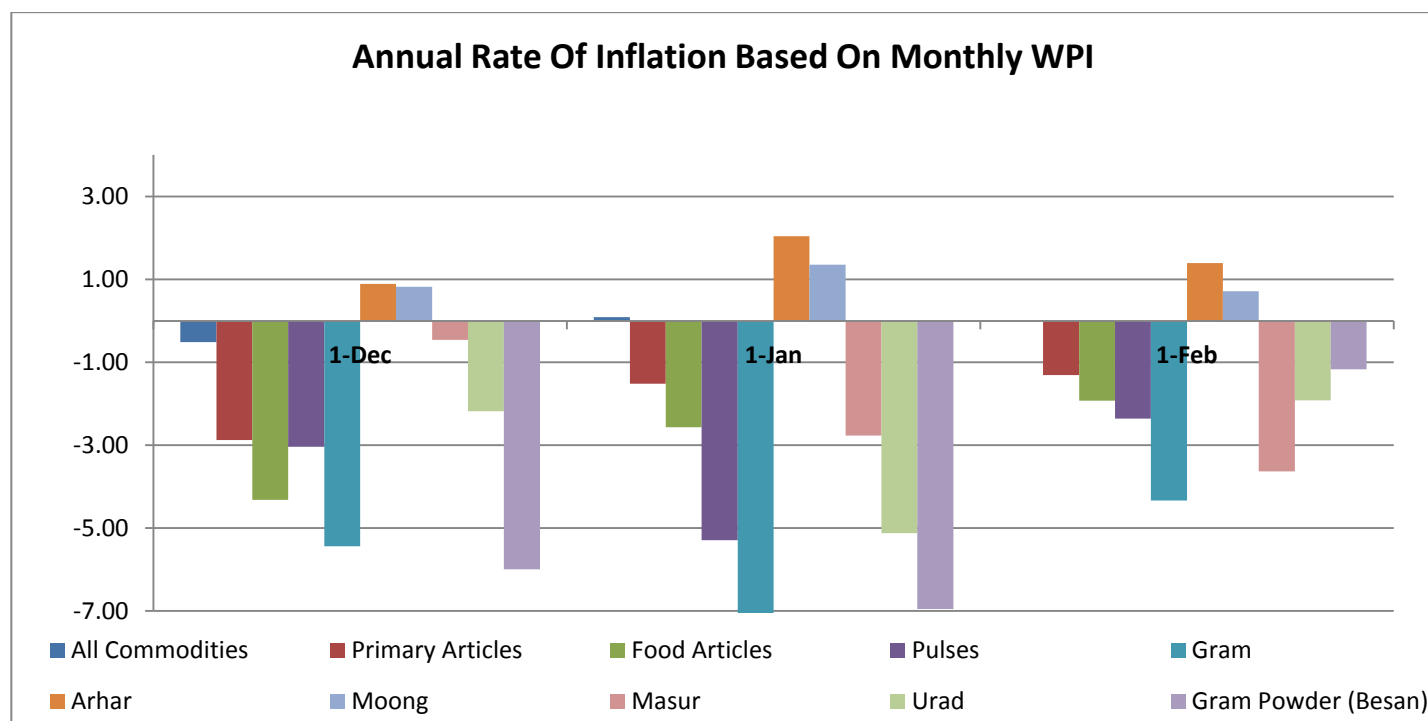

Chana production estimate has been revised down from 95.56 lakh ton to 94.54 lakh tonne for MY 2018-19 as per Agriwatch 2nd adv estimate, due to crop loss in Maharashtra and yield loss in MP and Rajasthan. As season would start with hefty carryout of 11.91 lakh ton Chana, total supply would increase from 101.91 to 108.45 lakh ton. As supply side is higher, import might decrease from hefty 9.8 lakh ton to 2 lakh ton. Consumption is likely to increase from 90 to 91 lakh ton. The season would end with 15.45 lakh ton carry out. So, pressure on Chana market may continue without govt.'s interference.

Lentil production is expected to increase from 10.40 to 11.68 lakh ton this year due to higher area coverage. Higher carry out and higher production would increase total supply to 23.63 lakh ton. Import is expected to remain steady at 7/8 lakh ton. Availability is higher. The season may end with 3.63 lakh ton carry out. Supply side would remain at comfortable level.

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

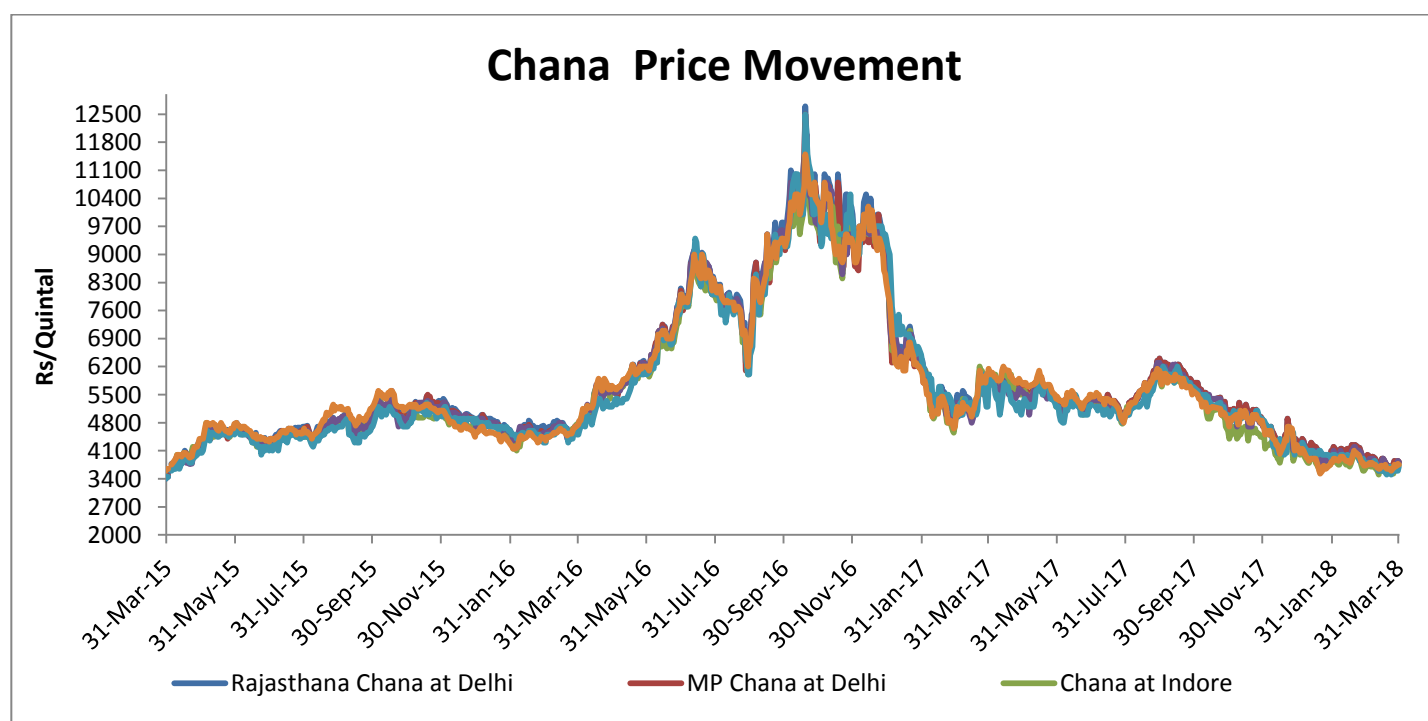

Madhya Pradesh government has decided to procure Rabi crops of chana and masur at MSP instead of using Bhavantar Bhugtan Yojana (BBY). This step by Madhya Pradesh government will reduce the flow of chana and masur in open market thereby providing support to domestic prices. Madhya Pradesh government is likely to procure 21 lakh tonnes of chana. Besides, retention by farmers may lend support to chana cash market in coming weeks. Besides, DGFT removes mandatory roasted chana/ chana dal export in consumer pack of one kg. It would support market amid farmers restricted selling for higher price in coming weeks.

All India average price for Chana increased by 1.38percent to Rs 3770 per qtl. Market is expected to move further up. In Delhi market, it is being traded at Rs 3800-3850 per qtl. In Mumbai, Australian Chana is being offered at Rs 3800 per qtl. (old stock). There is no fresh import deal as there is no parity on higher duty. Steady to slightly firm sentiment may prevail in the near term. Dal export is possible in the second quarter of the year. Import is expected to remain halted due to 60 % duty. Buyers should buy on correction. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

In March-2018, all India average price was down by 3.75 % to Rs 3737 per qtl. in comparison to Feb-2018. By March end it started recovering. Prices are likely to stay steady to slightly firm in April due to:

- Higher import duty(60%)
- Active private buying at lower level.
- Extended credit for Nafed from 9500 to 19000 crore and
- Higher usage due to lower price for gram flour industries.
- Export incentive of 7% & removal of export in1kg pack

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

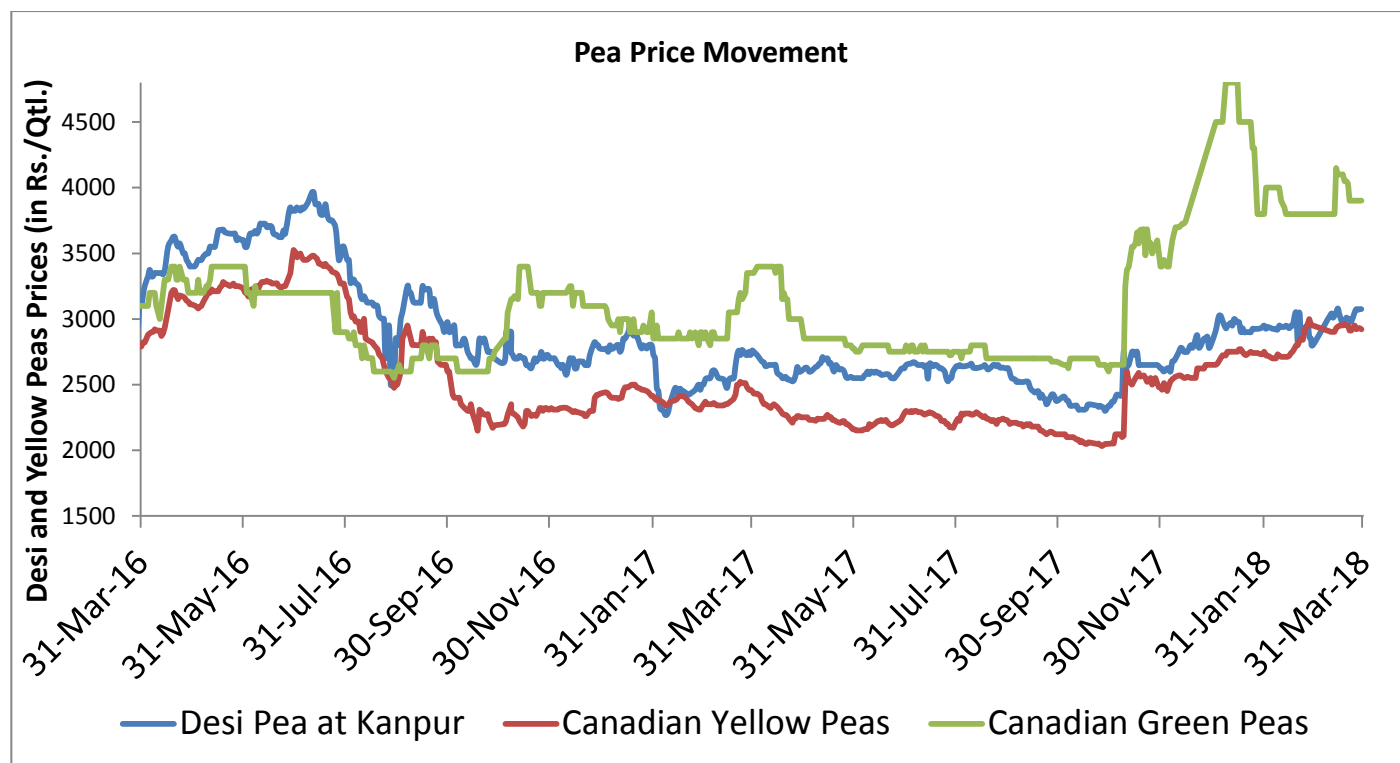

Market Recap:

Imposition of 50 % duty on all peas has restricted import flow to a considerable extent. Peas market traded slightly up during the month under review. Firm chana may support pea market in April .As supply side is decreasing from domestic crop, slight firm movement might be seen in cash market in the near term.
