4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- **With weak buying support, excess supply and liquidity crunch, chana market continued** to reel under pressure despite procurement drive in various states. Lower demand for dal from retail sector too remains discouraging factor. As market is ruling below normal expected level, recovery in market is expected to start from mid-May. Buyer's interest might increase at current level. Australian Chana in Mumbai market is being quoted at Rs.3575-3600 per qtl. It is being traded at Rs.3650-3675 in Delhi market. MP Chana in Delhi is being traded at Rs.3650-3700. Slight recovery in market is expected this month.
- **7% export incentive for export of pulses including chana and chana dal, amid removal** of mandatory roasted chana/chana dal export in consumer pack of one kg by DGFT, would encourage chana price in local market to a certain extent. Farmers have restricted selling of chana in expectation of higher price. Demand from mills too is not expected to improve immediately. So only government's buying would not help market much.
- **Moong seems under pressure due to lack of demand. However, stockists have restricted selling** at decreased price in Delhi market. Unlike in Delhi, Moong offtake in Rajasthan was seen improving. It is being traded at Rs.4900 to Rs.5400 in Maharashtra. In Gulbarga it is being traded at Rs.4400 to Rs.5300 per quintal. As parity for import seems in sight, traders expect consignments from Myanmar may start arriving in India by May. Moong import is possible despite quantity restriction at 1.5 lakh tonne for the year. Prices of Moong in domestic market is hovering in the range of Rs.4800-5000, while Mozambique and Burma are offering Moong at \$545 & \$690 per tonne which convert to Rs.3536 and Rs.4475 per quintal respectively.
- **New rabi moong from Bihar and UP is expected to arrive mid-May onwards. Moong** from MP is expected to hit market in June. So supply side is expected to remain comfortable and it would cap any move of uptrend in May.
- **Urad market traded almost flat during the week under review. As per pre-sowing intention**, area under kharif urad across the country may decline by 10-15%. Lower price realization remains discouraging for farmers. Steady to slightly weak tone may prevail in cash Urad market this week. Urad at Mumbai market is being traded at Rs 3650 to 4000 per quintal. Market is waiting for demand. Bulk buyers like millers, remain sidelined with prevailing weak undertone.
- **In a recent development, central government has approved procurement of 3000 MT Urad in Tamil Nadu and 1 lakh MT in Andhra Pradesh from Rabi season 2018 at MSP.** Demand for urad finished products- Dhoya and Chilaka Urad is not up to the mark. Urad from Jhansi and Lalitpur is available at parity, so any major jump is unlikely. Besides, arrivals of new Urad in AP and Telangana have started now. This may restrict any major upside in Urad market. Import is possible as government has not notified any ban on fixed quota of 1.5 lakh tonne for the year starting from 1st April-2018. Import is possible from Myanmar as it is offering Urad at much lower prices- FAQ at \$360-365 and SQ at \$450-460 per tonne.
- **Tur market continued to move in a narrow range and is likely to trade steady this week. Lack of liquidity in private hands and lower realization this year is expected to encourage farmers to shift tur area to other lucrative crops like groundnut, chilli, turmeric and others.** In Gulbarga market Tur is being traded at Rs 3750 to Rs 4350 per qtl. Demand for Tur and Tur dal has not been up to the mark in recent weeks. There is a common view in the market that all India area for Tur may decline by 15 to 20 percent this year. This may support cash market in the second half of the year. Prediction for good monsoon rainfall too has impacted market sentiment.
- **Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018. It will be affective from 1st April to 30th June-2018 for three months.** The restricted quantity also includes import from 1April to 25th April. Till 24 th April, around 40,000 tonne yellow peas have been imported. So the import till June 2018 will be restricted to another 60,000 tonnes of yellow peas..new restriction is on yellow peas . Green peas and Duunn peas import remains unaffected. It would badly affect France. France had exported 41000 tonne yellow peas to Indian from

April to June last year. This means residual supplies of yellow peas in global market would be higher than normal expectation. This will affect global peas price in coming weeks. Yellow peas market may move up by Rs100 to Rs200 from current level in domestic market in May.

- **There is news circulating in the market that Indian exporters have been able to clinch order of around 6000 tonne chana export to west Asian countries & Bangladesh after announcement of 7 % export incentive to exporters.** Around 5000 tonne chana has been shipped to Bangladesh last week at \$540 per tonne basis B, desh port. Besides, around 1000 tonne Chana & Chana dal are in process to be loaded for Dubai and Jeddah at the rate of \$575 & 675 basis CnF in the 2nd week of May.
- **Masur market is expected to trade up as demand starts to improve and procurement drive in major growing region is on full swing.** Import with 30 % duty would remain costly. So market is expected to move up from current level.

International Market Update:

- **Despite price distortion caused by Indian prohibitive import policy (50 % duty) on yellow peas,** import & quantity restriction up to the level of 1lakh tonne till 30th June-2018, farmers in Canada may not reduce their peas area. Preliminary intention shows that farmers would plant 2.171 million acres of peas this year, slightly higher(2.165 million acres) than last year. Actually, yellow peas demand from Canada is increasing, as China has started importing more peas for feed industry. Besides, Canadian fractionation plants' demand is increasing continuously. It has helped to reduce dependency on India to a certain extent.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus is another factor behind the strength in chickpeas market.
- **Despite price distortion caused by Indian prohibitive import policy (30 % duty on Lentil import)** farmers in Canada may not reduce their lentil area as much as expected for the year. This year Saskatchewan farmers may plant 3.591 million acres of lentils against 3.920 million acres last year. It is not as much lower as expected. However, market participants say that area may be lower than actual intention. farmers may shift to green peas as Canada is not much dependent on India for green peas export.
- **Lentil price has come down from \$500 to \$475-80 per tonne. Major buyers like India** are not going to enter the market for any bulk purchasing. So, buying interest of other countries would not fill the gap. So price is likely to stabilize at current level.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Imposition of 50% import duty on all peas, has started impacting export volume from Canada,** According to Agriculture and Agri-Food, Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow pea prices are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Burma is offering lemon tur at \$330 and \$335 (new) per tonne basis CnF.** Burma is offering Urad FAQ at \$365 and SQ at \$480 per tonne basis CnF Indian port. At this price, possibility of import seems very much in sight.

Under current norm, importers can import 1.5 lakh tonne Urad. Burma is offering Moong at \$545 & \$690 per tonne against Indian prevailing price of \$730-740 per tonne.

Note: Agriwatch Preliminary Estimate For 2018-19, Feedback source: MoA, IPGA, Trade source & CACP, Chana 1st adv estimate has been revised down from 95.56 to 94.54 lakh tonne due to crop loss in Maharashtra and lower yield in Rajasthan, MP.

Urad Kharif –Rabi combined production is bound to increase slightly from 23.9 to 24.97 lakh ton in crop year 2017-18. Production increase is due to higher area coverage. Import would remain restricted at 1.5 lakh tone, applicable till March-2018. Over 1.1 lakh ton Urad import has already been reported. Govt may review quantity restriction in March-2017. Consumption is likely to increase by 2 lakh ton due to cheaper availability in domestic market. Carryout would increase due to higher total supply and higher production. It will increase from 8.77 lakh ton to 9.74 lakh ton. Supply side will remain at comfortable level.

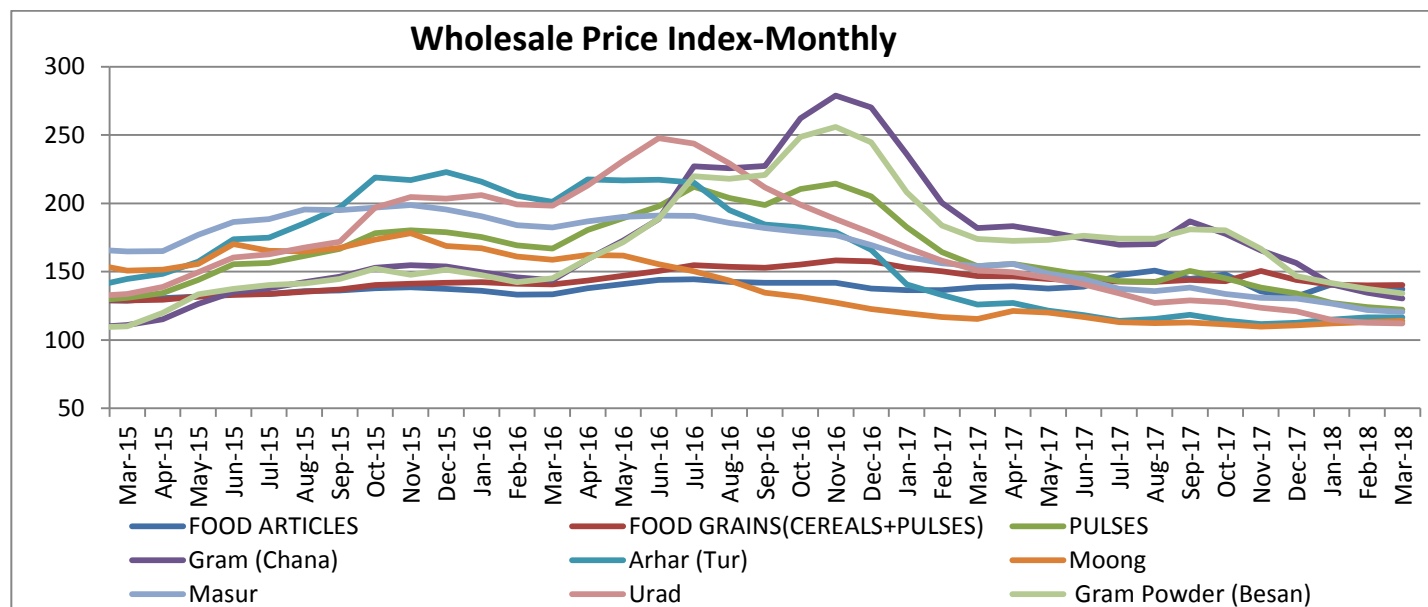

Moong Kharif-Rabi production is expected to decrease from 20.3 lakh ton to 19.25 lakh ton in 2017-18. Import would remain at 1.5 lakh ton as fixed by govt. Total supply would increase to 29.65 lakh ton due to higher carryout stock. Govt may review import quantity restriction, March-2018 onward. Over 1.25 lakh ton Moong has been imported so far. Consumption would increase slightly from 18.8 to 20.5 lakh ton. The season 2017-18 would end with higher carryout stock (9.15 lakh ton). Supply side will remain at comfortable level.

Tur production is expected to decline to 30.26 lakh ton in 2017-18 from record production of 39.18 lakh ton last year. Decrease in production is due to over 22/24 % decline in area planted this year. Total supply is expected to decline to 42.72 lakh ton due to lower crop size. Consumption is expected to increase from 37 to 38.25 lakh ton due to higher availability at competitive price. Ending stock would decline from 10.67 to 4.68 lakh ton. Supply side is comfortable. Import restriction continues and fixed at 2 lakh ton.

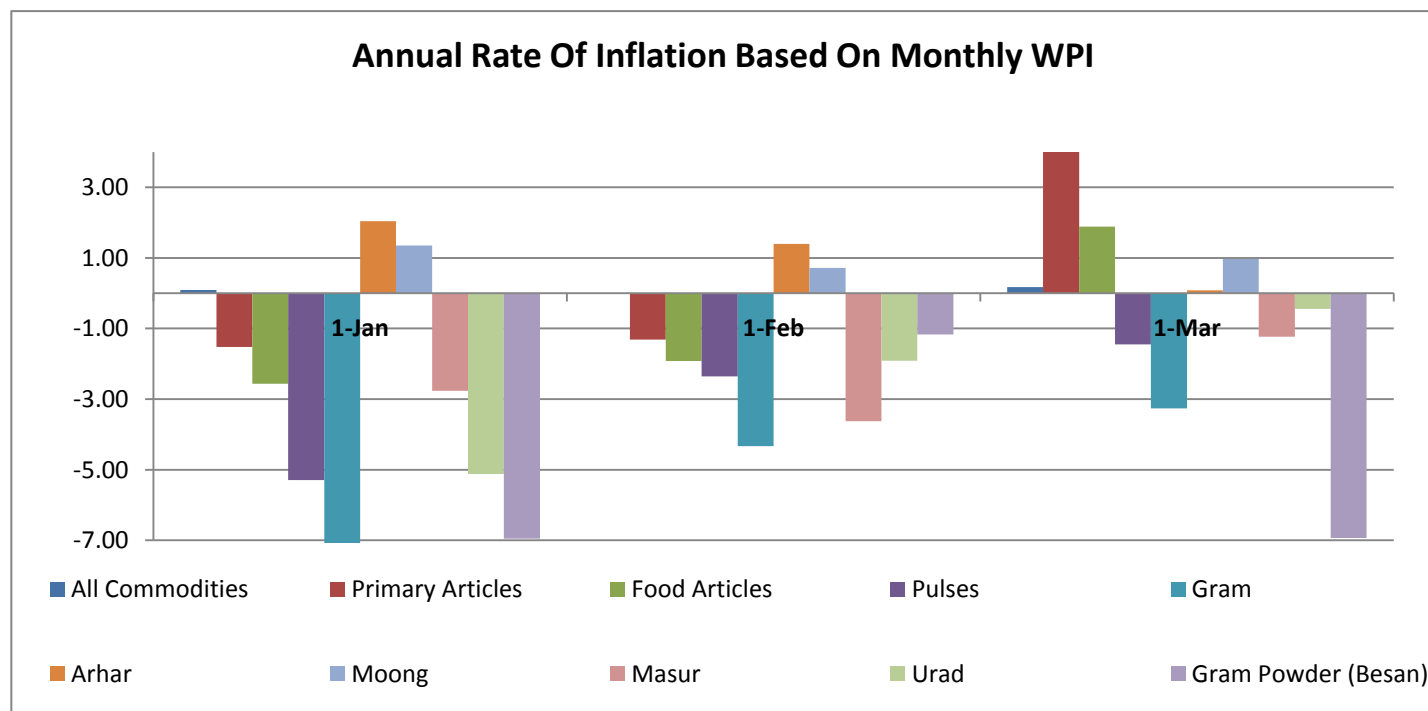

Chana production estimate has been revised down from 95.56 lakh ton to 94.54 lakh tonne for MY 2018-19 as per Agriwatch 2nd adv estimate, due to crop loss in Maharashtra and yield loss in MP and Rajasthan. As season would start with hefty carryout of 11.91 lakh ton Chana, total supply would increase from 101.91 to 108.45 lakh ton. As supply side is higher, import might decrease from hefty 9.8 lakh ton to 2 lakh ton. Consumption is likely to increase from 90 to 91 lakh ton. The season would end with 15.45 lakh ton carry out. So, pressure on Chana market may continue without govt.'s interference.

Lentil production is expected to increase from 10.40 to 11.68 lakh ton this year due to higher area coverage. Higher carry out and higher production would increase total supply to 23.63 lakh ton. Import is expected to remain steady at 7/8 lakh ton. Availability is higher. The season may end with 3.63 lakh ton carry out. Supply side would remain at comfortable level.

Agri Commodity Indices –Mar, 2018:

*Pulses WPI: Pulses WPI decreased by 0.08 point from 124.1 in **Feb** to 122.3 in **Mar**-2018.*

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

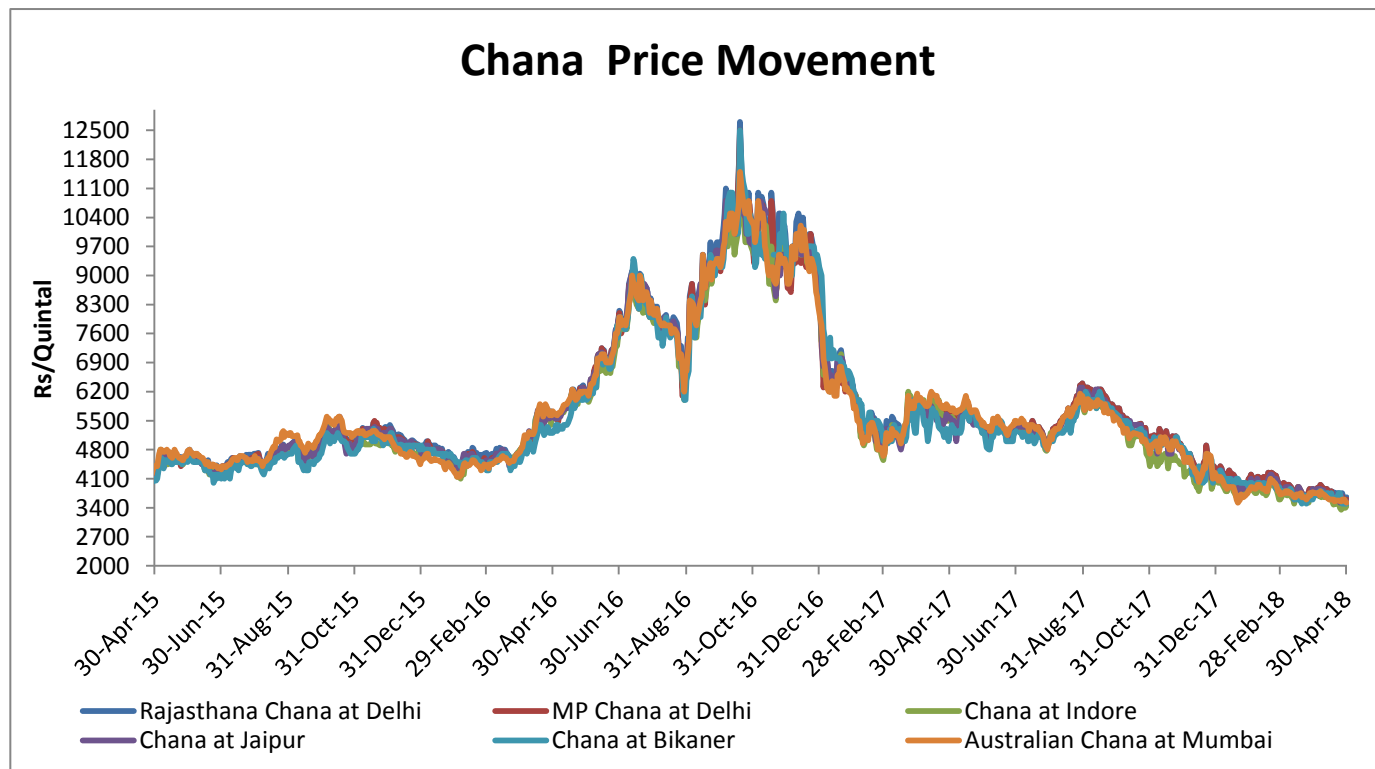

Market Recap:

Pressure on chana cash market continues, as private buying remains restricted on prevailing weak inner tone in cash market. As crop size is higher amid limited private buying, procurement drives in various states are not able to provide much support to cash market at current level. Uptrend in Chana market is unlikely in the near term. 7 % export incentive for export of pulses including chana and chana dal amid removal of mandatory roasted chana/ chana dal export in consumer pack of one kg by DGFT, would encourage chana price in local market to a certain extent. Farmers have restricted selling of chana in expectation of higher price. Demand from mills too is not expected to improve immediately. So only govt.'s buying, would not help market much. In a latest development, govt is planning to export chana in Afganistan through MMTC. Recent firmness is unlikely to sustain. Cash market is expected to stabilize near 3750 to 3850 in Delhi market. Despite the commencement of export and 7% export incentive, volume is expected to remain at lower level. It would not help market much in May.

Price Dynamics:

In April-2018, all India average price was down by 4.23 % to Rs 3577 per qtl. in comparison to March-2018. Slight recovery is expected in May. Prices are likely to stay steady to slightly firm in May due to:

- Higher import duty (60%) & commencement of export.
- Stockists unwilling to sell at current prevailing price
- Arrival started declining, export incentive of 7% & removal of export in 1kg pack
- Extended credit for Nafed from 9500 to 19000 crore and
- Ongoing procurement drive on MSP

Seasonality Index hints that Chana (gram) is likely to notice steady to slightly firm movement in the Spot market in May-2018.

Chana Future Market Analysis:

Technical Commentary:

Increasing price & OI hint firm market.

RSI is moving up in neutral region, hints caution to bears.

Prices closed below 9 and 18 days EMAs

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	June	3505	3400	3584	3772	3900
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	June	Buy on dip	3550	3675	3700	3500

Production- According to the Agriwatch revised estimate, Chana CY 2017-18 production has been estimated at 94.54 Lakh tonne. To be marketed in 2018-19.

Market Outlook for May-2018

Chana prices are likely to witness steady to slightly firm tone on decreasing arrivals. Higher duty 60 % on import would continue to restrict import. Besides, procurement drive, beginning of export may support market to a certain extent. Stake holders should start buying on dip.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

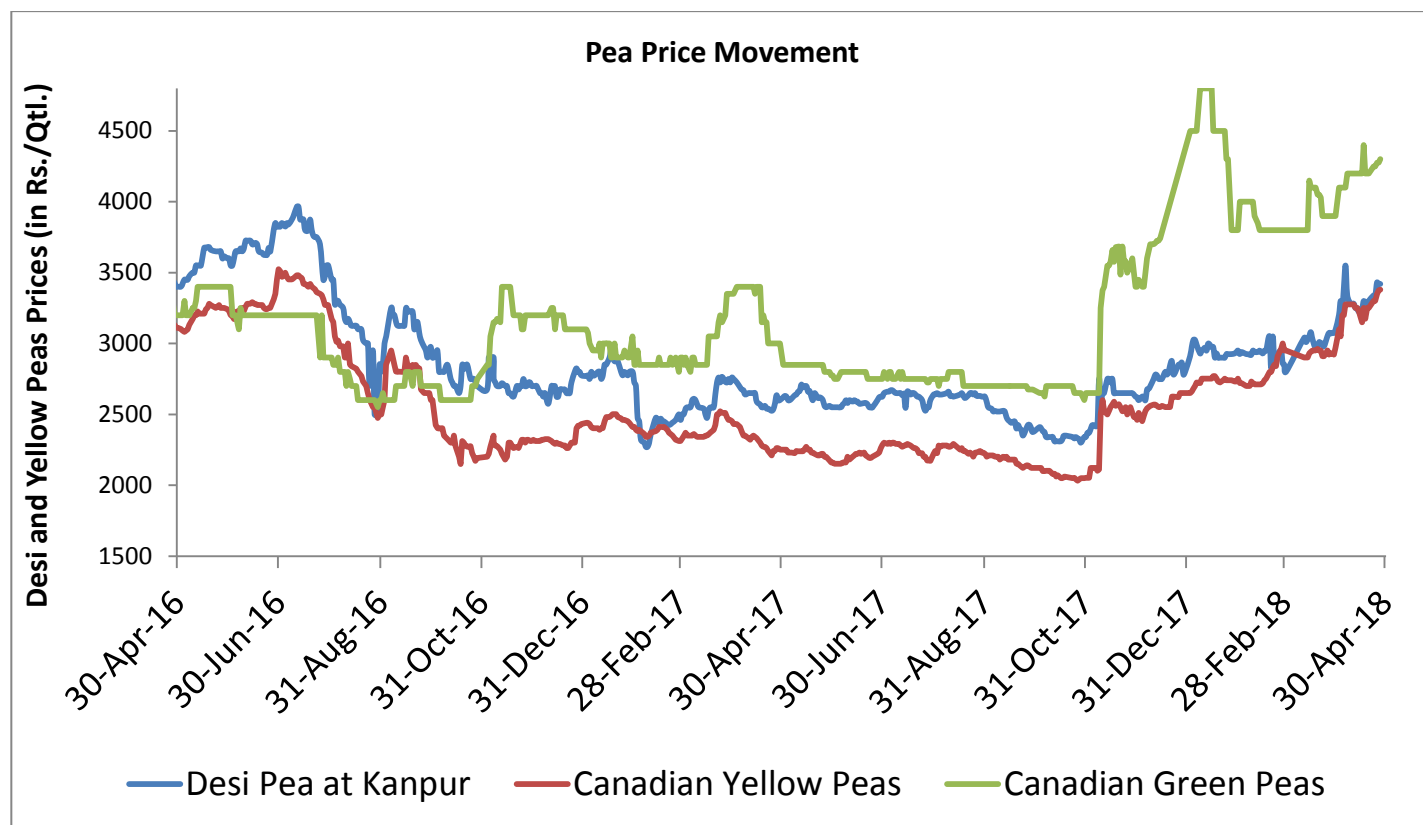

Market Recap:

Imposition of 50 % duty on all peas has restricted import flow to a considerable extent. Peas market traded slightly up during the month under review. Firm chana may support pea market in May to a certain extent .As supply side is decreasing from domestic crop, slight firm movement might be seen in cash market in the near term. Pea may trade steady to slightly firm taking clue from increased import cost and restricted import quantity till June-2018.. Right now, 50 % duty is applicable on all peas. The average price increased by 9.73 % to Rs 3315 per qtl. in Kanpur market, Canadian pea increased by 2.11 to Rs 3380. It may trade range bound to slightly firm in the near term. Import flow would remain restricted in May-2018.

Price Dynamics:

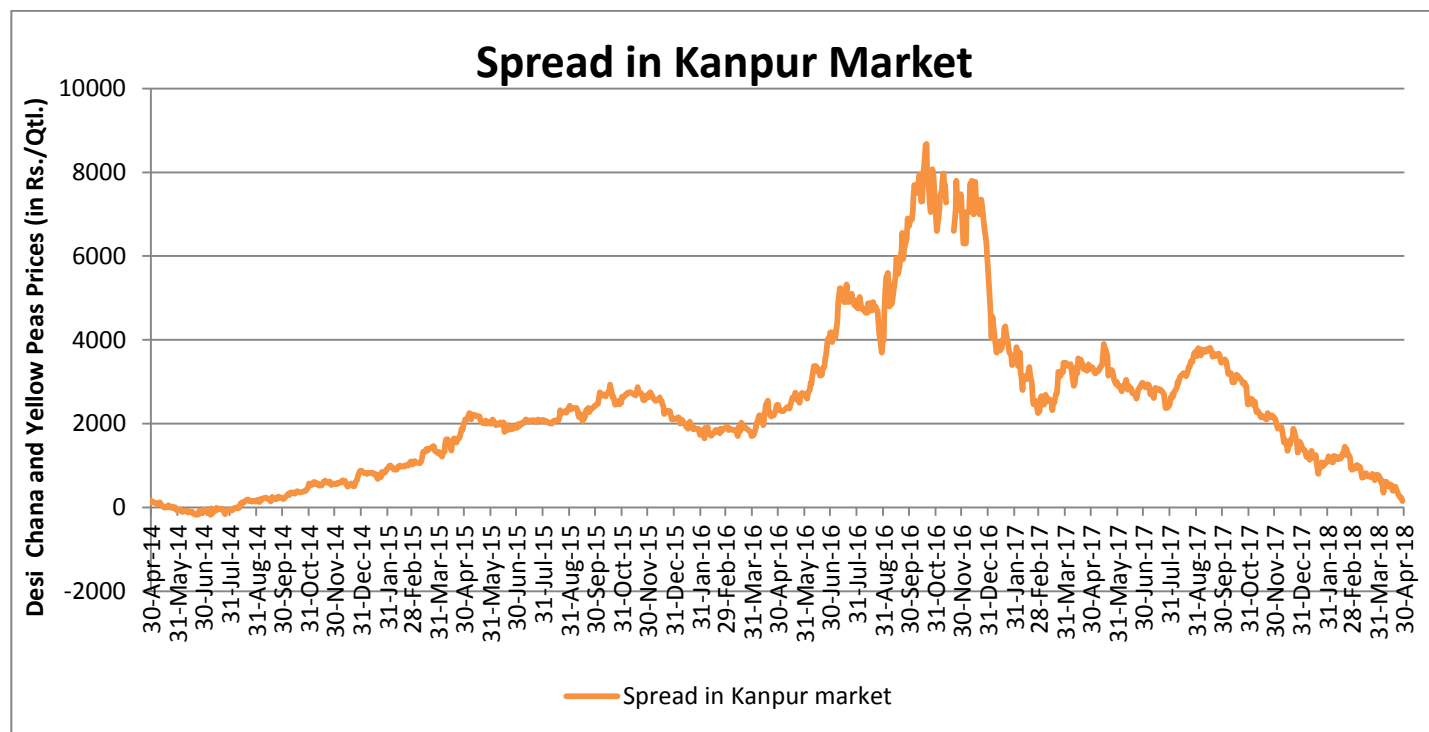

In April-2018., yellow pea all India average prices traded up by 9.77% to Rs 3315 per qtl. Steady to slightly firm movement is expected in May due to:-

- Decreasing stock & arrivals
- Higher quotes for imported stock
- Increasing Chana price &
- Improved buying.

Spread With Chana:

[\(Back to Content\)](#)

Spread between Chana and Peas, at Kanpur market decreased by Rs 234 to Rs 250 per qtl owing to increased prices of peas. Spread is expected to move in the range of 100 to 200 per quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to slightly firm due to increasing retention of old stock available in domestic market. Buying on dip is good.

Seasonality Index depicts that pea prices are likely to notice firm movement in May-2018.

Market Outlook For May- Prices of Pea are likely to trade steady to slightly firm due to improved demand at current level and firm chana price. Besides, flow of arrival from new crop has decreased. Imported stock is declining. Govt. is unlikely to consider revision in duty (currently 50 %) in first half of the year. Steady to firm tone may prevail. Stake holders should buy on dip.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

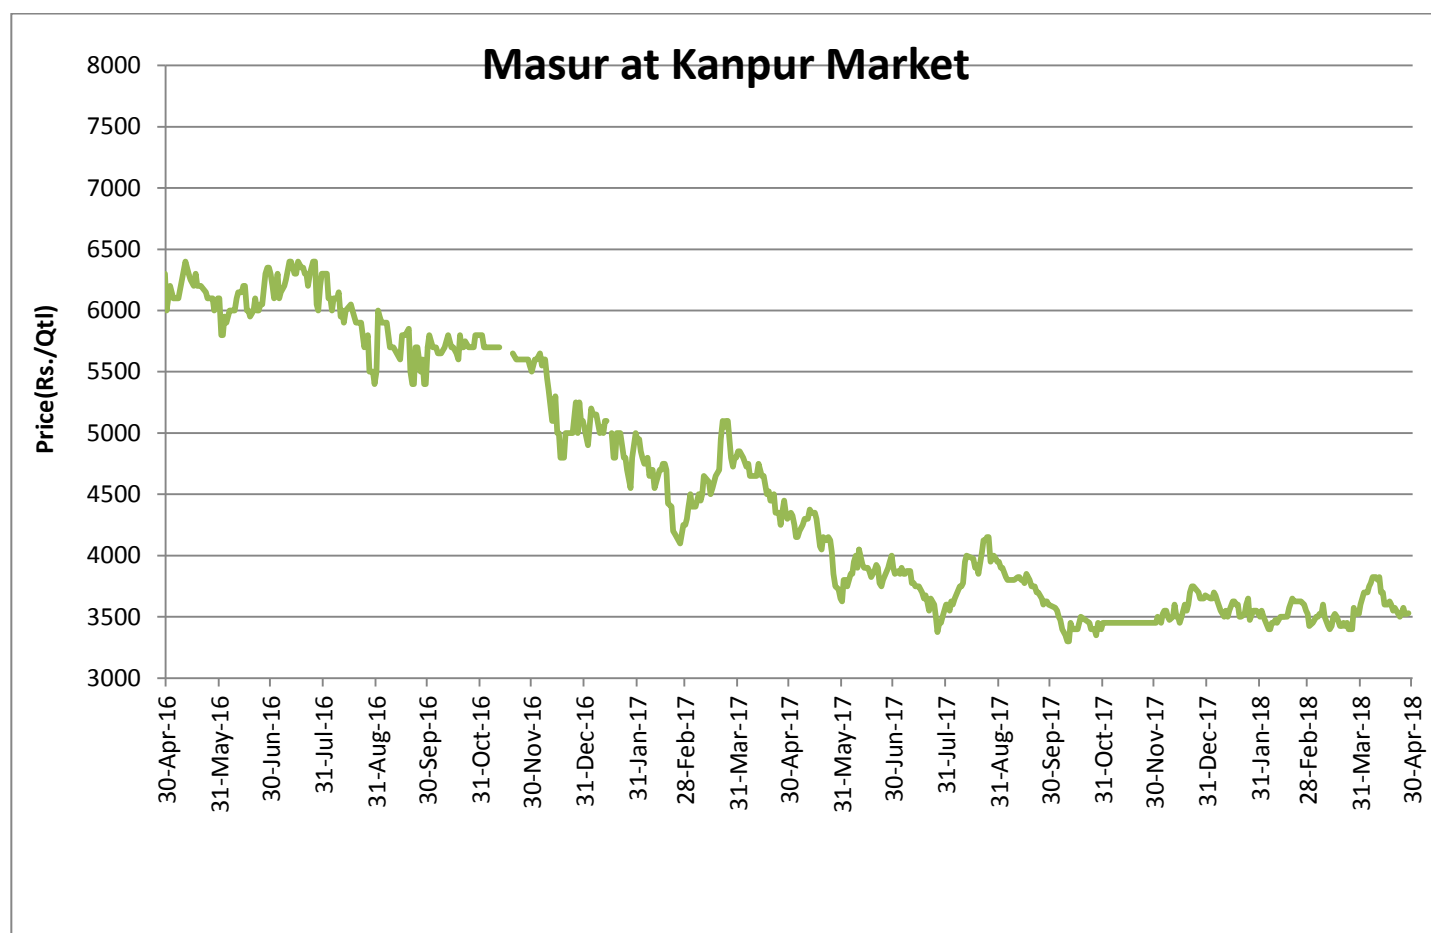

Market Recap:

Kanpur market opened with a firm note in the beginning of first fortnight and stayed steady in the second half of the review month. Imposition of 30% import duty would continue to restrict import. New crop is coming into mandis. Procurement drive is on and it would remain supportive for cash market fundamentals. Buyers should take possession after correction. Production is expected to be slightly lower than normal expectation. Overall sentiments remain steady to slightly firm in the medium term. Stakeholders should buy on dip. Demand from Bengal & Nepal would continue to support market.

Price Dynamics:

In April-2018, average price in key market Kanpur was up by 1.46 % to Rs 3530 per qtl MoM basis. Prices are likely to trade firm in May. Firmness is due to:

- Procurement drive in producing states
- Steady forward quotes (\$495/505) Australia/Canada-\$455/65.
- Lower than expected production.
- Improved demand

Seasonality Index depicts range bound to slightly firm movement in May-2018.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

As expected last month, demand for Tur dal is likely to increase due to marriage season and retention by stockists. Besides, procurement pace too would support price. Its impact is being seen on cash market price. Tur prices in various markets increased by around Rs100 per qtl. It is being traded at Rs 3850 to Rs 4450 per qtl in various market. Myanmar offers old Tur at \$335-45 per tonne while new Tur is being offered at \$355-360 per tonne, still much lower than prevailing price in India. Import from Myanmar is possible if prices move above Rs4500 per qtl inspite of import duty of 30 %.

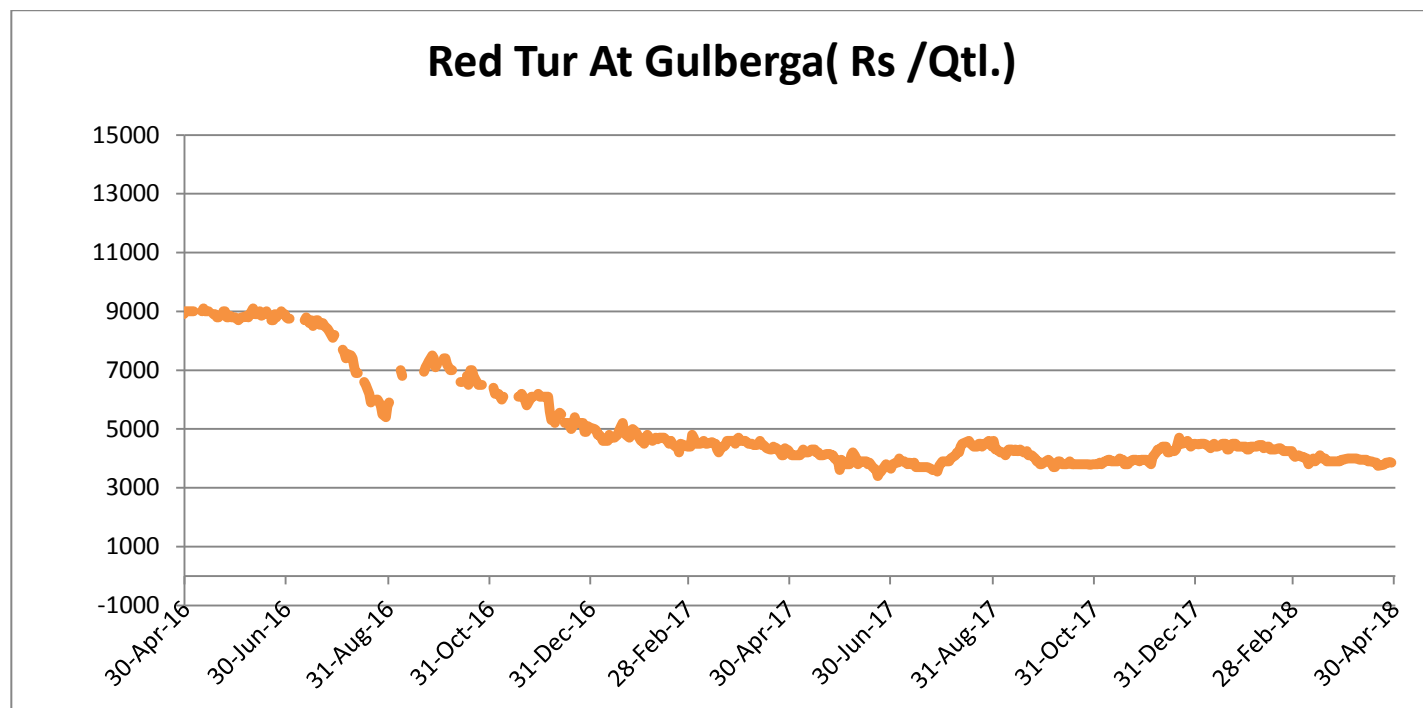

Market Recap:

Average price of Tur decreased 2.25% from 3920 to Rs 3833 per qtl. in April-2018 in Gulberga market. Price may increase slightly in May. Stake holders should buy on dip as market is expected to recover as fundamental remains firm. Procurement drive and private buying interest would prevent market from falling below a certain level. Normal trade is expected from mid-May. Price of imported Tur, in Mumbai decreased from Rs 3975 to 3730 per qtl. in April-2018. Steady to slightly firm tone may prevail in May as buyers may return to market at lower level.

Price Dynamics:

In April-2018, average price in Mumbai market was down by around 2.55% to Rs 3965 per qtl. due to

- Lower demand &
- higher stock available in central pool stock.
- Possibility of import at lower price remain intact

Seasonality Index- depicts steady to slightly firm movement in May

Production- According to the Agriwatch estimate, Kharif Tur MY 2017-18 production is estimated at around 30 Lakh tonne against 39.19 lakh tonne in 2016-17. New crop starts now. Tur area ended with 42 lakh ha as per Agriwatch estimate.

Govt. has made a slightly upward revision in Tur production estimate; from 3.99 MMT to 4.02 MMT in second adv. estimate released on 27.02.2018 against set target of 4.25 MMT for 2017-18. Govt has released final production fig for last year at 4.87 MMT.

Market Outlook for May:

Tur prices are likely to trade steady to slightly firm. However, stake holders should start buying on dip. Market may move up, once again, May onward as area is bound to decline.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

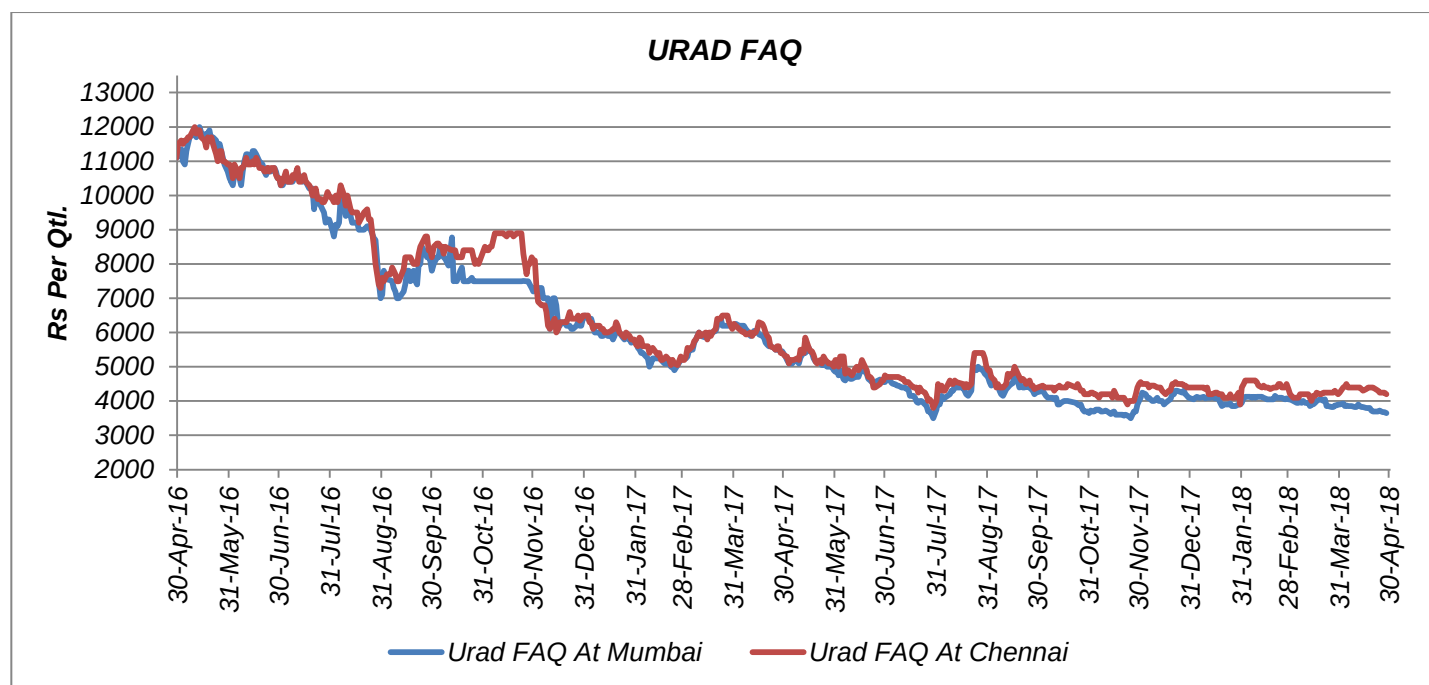

Market Recap:

While import restriction has helped check imports immediately and arrest sharp fall in prices, opening up of exports hardly impacted the market in the immediate term as international prices of urad are well below Indian prices. Purchases by NAFED helped farmers realize remunerative prices for the material. Allocation to MDM is a measure to manage the government stocks which will not impact the market price directly, but enable the government to sustain its procurement program. Selling through central pool stock continues through weekly auction at various centers of states. Higher stock in private as well as in govt.'s custody amid weak demand from millers, continues to weigh on market fundamental despite ongoing procurement drive for rabi Urad.

Price Dynamics:

In April, average prices in key markets including Mumbai/were down by 0.39 % percent, from 4250 to Rs 4240per qtl. In Chennai it is being traded at Rs 4150-4250. Prices may stay steady to slightly weak due to

- New arrival from Rabi and weak demand from millers
- Normal crop size
- Ample availability of old crop

Seasonality Index depicts range bound movement in the near term to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2017-18 production is estimated at 24.97 lakh tonne against 23.97 lakh tonne 2015-16. See supply and demand side. Crop condition is good.

Market Outlook for May: Prices are likely to trade steady.

Fundamental Analysis and Outlook For Moong:

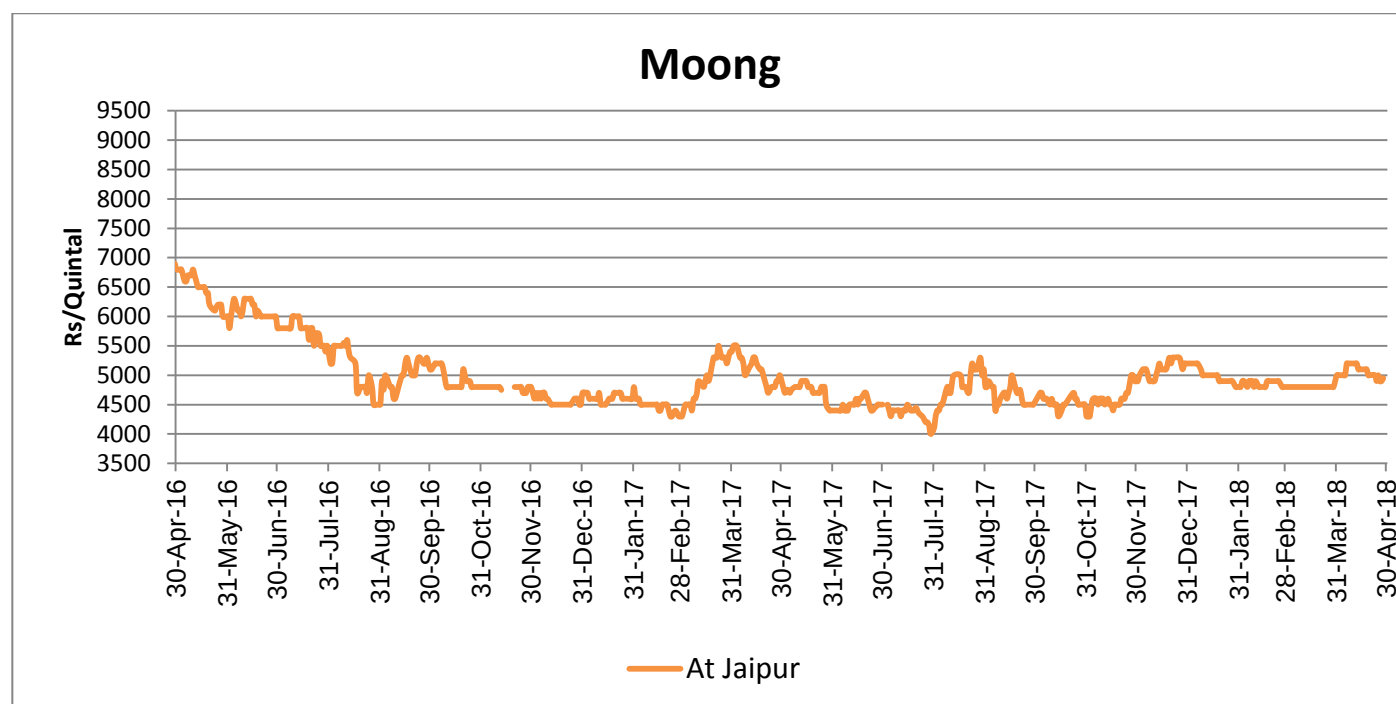

Market Recap:

Moong market traded steady to slightly weak at Rs 4900 in Jaipur market. As arrival has decreased, more dip is unlikely from current level. It is likely to trade in the range of Rs. 4700-5000 per qtl.in Jaipur market. Dal demand is likely to improve as availability of vegetables starts decreasing with increasing temperature. However, selling by Nafed and Markfed would restrict market from moving beyond a certain level. Markfed has issued tender for sale of 1.93 lakh tonne Moong in MP. It would continue to balance supply side and would continue to affect market sentiments in the weeks ahead.

Price Dynamics:

Moong at Jaipur showed steady to weak movement and traded in the range of Rs 4800 to Rs 5000 per quintal, down by Rs100 from March. Market may trade steady to slightly weak. Average price in Mar moved down by 1.10% to Rs4875 per qtl. in Jaipur market. Burma offers Moong At \$695-700 per tonne. Prices may stay steady to slightly weak due to

- Weak demand & selling through central pool stock
- Possibility of import
- No export parity/Burma offers Moong at lower rate

Seasonality Index depicts steady to slightly weak movement in May.

Production- According to the Agriwatch preliminary estimates, Kharif and rabi Moong 2017-18 production is estimated at 19.25Lakh tonne. It was 20.13 in 2016-17.

Moong production for kharif season has been pegged at 1.42 MMtT against the set target of 1.65 MMT for 2017-18 in 2nd adv estimate. Final kharif moong production for rabi has been pegged at 0.32 against target of 0.65 MMT. Total moong production has been pegged at 1.74 MMT against target of 2.3 MMT. Final moong production for last year has been pegged at 2.16 MMT.

Market Outlook for May:

Steady to weak movement is expected in May
