4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- **Tur cash market seems under pressure once again as supply side would ease** further with green signal for import up to the level of 3.5 lakh tonne in current MY, starting from April-2018. Private importers/millers can import 2 lakh tonne under quota system and 1.5 lakh tonne Tur would be imported through G2G basis. Besides, govt.s agencies have enough tur stock (around 8.57 lakh tonne procured from kharif-2017 under PSS) and it would continue to sell it through auction at prevailing market price. All these developments continue to put pressure on Tur price despite fear of lower area coverage. In month of June prices of Tur would remain under pressure. Kharif sowing starts with slower pace and farmers may shift Tur area by 15 to 20 percent this year as their preliminary intension shows.
- **Other bearish factor regarding Tur is Maharashtra govt.,s latest decision to sell** Tur dal at Rs35 per kg instead of Rs 55 per kg through ration shop. Besides, there is plenty of stock in private hands too with good carryin stock (7.65 lakh tonne) for the new season. So supply side is expected to be at ease even in the second half of the year. Preliminary intension shows that production this year may be same as last year as yield would increase due to good expected rainfall.
- **Pressure seems to building up on chana cash market too despite around 15 lakh tonne** procurement by govt.'s agencies till first week of June. Despite negligible import volume due to 60 % import duty, supply side is higher due to bumper crop (94.54 lakh tonne, AW estimates) this year. Buyers are avoiding bulk buying as inner tone remains weak. Arrivals in various mandis have decreased. There is a common perception in the market that new stockists would not retain chana stock if there is good rainfall in monsoon season. Higher moisture level affects chana quality and there is no hope for any spike in chana price. Agriwatch expects chana price to move in the range of Rs3650 to Rs 3950 in Delhi market during June-2018.
- **Normal Urad area for kharif season is 27 lakh ha. It is running behind by 34% to 0.28 lakh ha** as on 1st June-2018. Kharif Urad planting too started with slower pace. However, higher MSP for kharif urad (Rs 5800 recommended by The CACP) and possibility of good rainfall may encourage farmers to maintain urad kharif area as last year level or increase slightly this year. There is plenty of stock available in domestic market. Besides, 1.5 lakh tonne import has been allowed this year too. New Urad from Jhansi line is entering into mandis and putting pressure on cash market. Even govt agencies have over 1.87 lakh tonne stock procured through PSS (price support scheme). Pressure on Urad is likely to continue as new season starts with 10.81 lakh tonne carryout. As consumption is steady, and production would be lower inspite of same area coverage, carryout would decrease slightly to 9.16 lakh tonne. higher than normal of 3 to 3.5 lakh tonne.
- **There is no respite for Moong too. Initial planting progress is not very encouraging.** However, moong area might be same as last year or increase slightly, as farmers received comparatively better price for moong. Area in Maharashtra, MP, AP may increase as state govt is more active there. Normal kharif moong area is 24.93 lakh ha. It is running behind by 29% to 0.23 lakh ha so far. The CACP has recommended to increase MSP for moong from Rs5575 to Rs 5925 per qtl. Over all scenario for kharif moong production seems good this year. Moong in Jaipur market is being traded at Rs 4800-5000 while it is being traded at Rs 4500 to 5000 in Indore. New Moong is being traded at Rs 5000 -5100 per qtl. Moong production estimate has been revised down from 1.42 to 1.39 MMT in 3d Adv estimate against the set target of 1.65 MMT for 2017-18 for kharif.
- **Yellow pea import is not possible till 30th June-2018, as quota set for one lakh tonne** is over and it has helped market to move up suddenly. After June import would resume at 50 percent import duty. Till then, steady to slightly firm trend may prevail in yellow & green pea market.
- **As stock of lentil is not enough to meet domestic demand dependency of import would** continue. As there is 30% import duty applicable right now import would be costly and it would push Masur market slightly up in June. Stockists in domestic market would prefer to retain stock of lentil till Oct-Nov for better price realization.

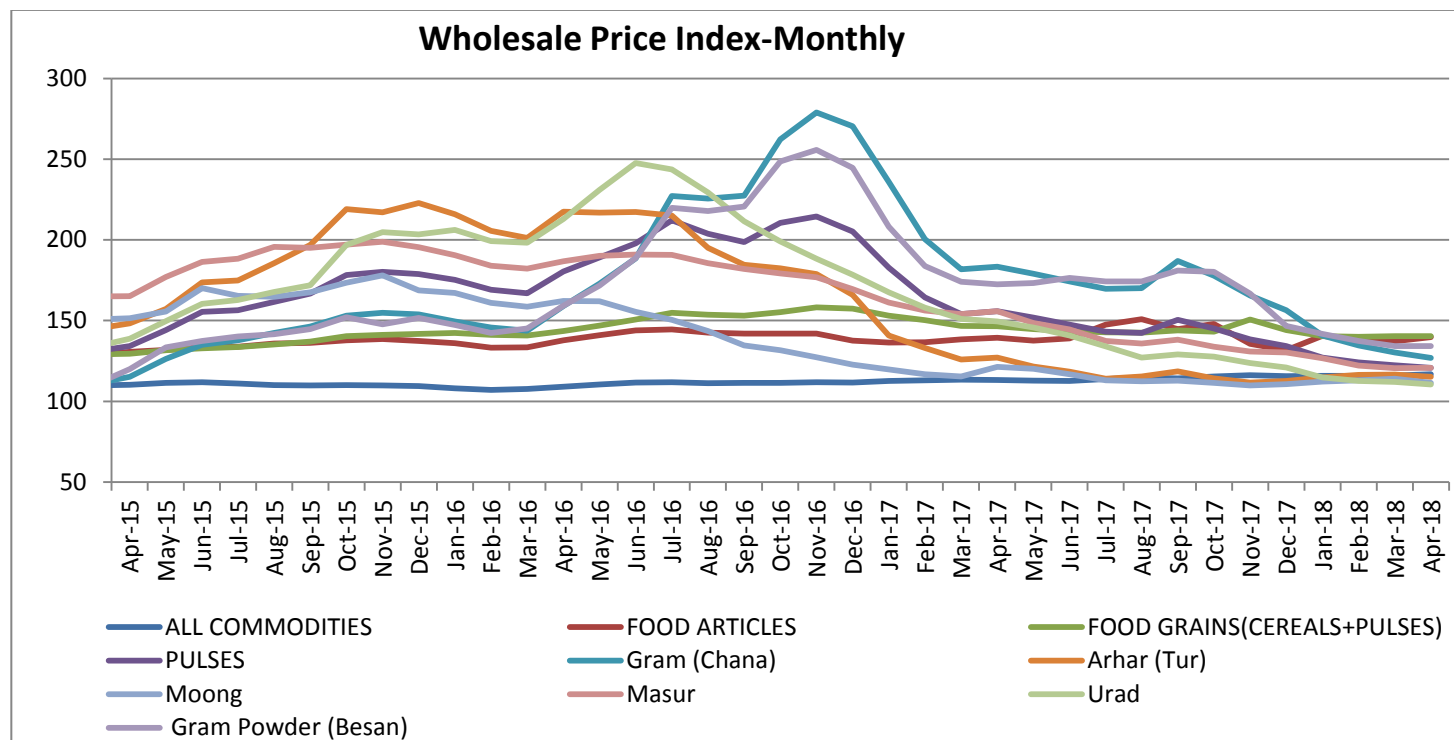

International Market Update:

- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.** The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from march shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018. It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B'desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries, continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne in 2018.** Lentil production may be steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus, is another factor behind the strength in chickpeas market.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

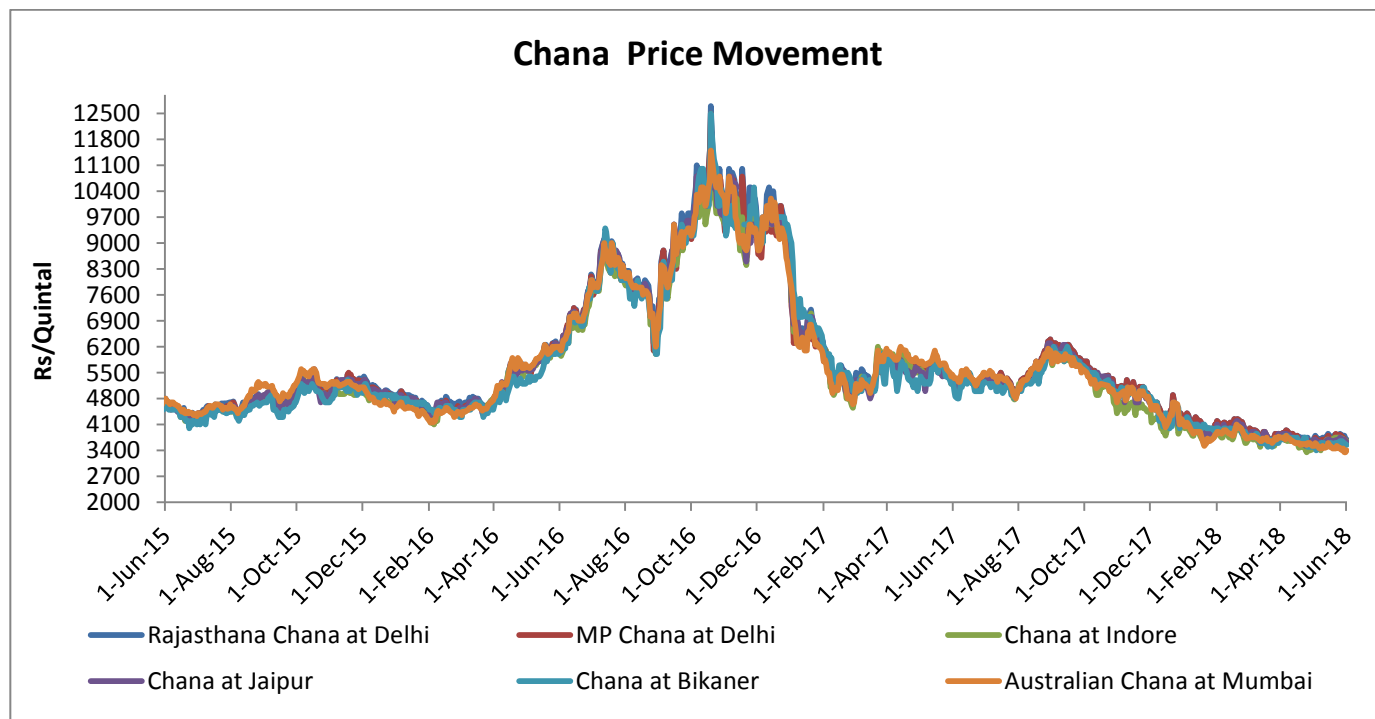

Chana cash market traded under pressure taking clue from weak futures despite procurement drive in MP, Maharashtra and Rajasthan. As maximum approved quantity (1577000 MT) for procurement is nearing completion, pressure is building up on cash market once again. Nafed & other agencies have procured over 14 lakh tonne chana so far, pace of procurement would decrease now. Arrival in mandis has started decreasing. However, demand remains weak against normal expectation. Chana in Delhi market is being traded down by Rs 50 to Rs 3700 per qtl. It may trade Rs50 down further. Improvement in Chana market is expected June onward

All India average price for Chana increased by 1.15 percent to Rs 3675 per qtl. Australian Chana(old imported crop) price decreased by 2.23 percent to Rs 3390per 100kg. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

In May-2018, all India average price was up by 2.72 % to Rs 3675 per qtl. in comparison to April-2018. Steady to slightly firm tone may prevail in June. Prices are likely to stay steady to slightly firm in June due to:

- Higher import duty (60%) & commencement of export.
- Buying expected at current level.
- Declining arrivals, export incentive of 7%
- Extended credit for Nafed from 9500 to 19000 crore and
- Ongoing procurement drive on MSP

Seasonality Index hints that Chana (gram) is likely to notice steady to slightly firm movement in the Spot market in June-2018.

Chana Future Market Analysis:

Technical Commentary:

Decreasing price & OI hint weak market.
RSI is moving down in neutral region, hints caution to bulls.
Prices closed below 9 and 18 days EMAs

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Jul	3460	3300	3539	3675	3782
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Jul	Buy on dip	3500	3600	3650	3450

Market Outlook for June-2018

Chana prices are likely to witness steady to slightly firm tone on decreasing arrivals and buyers increased interest at prevailing price.. Higher duty (60 %)on import would continue to restrict import. Besides, procurement drive, beginning of export may support market to a certain extent. Buying after downward correction seems riskless.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

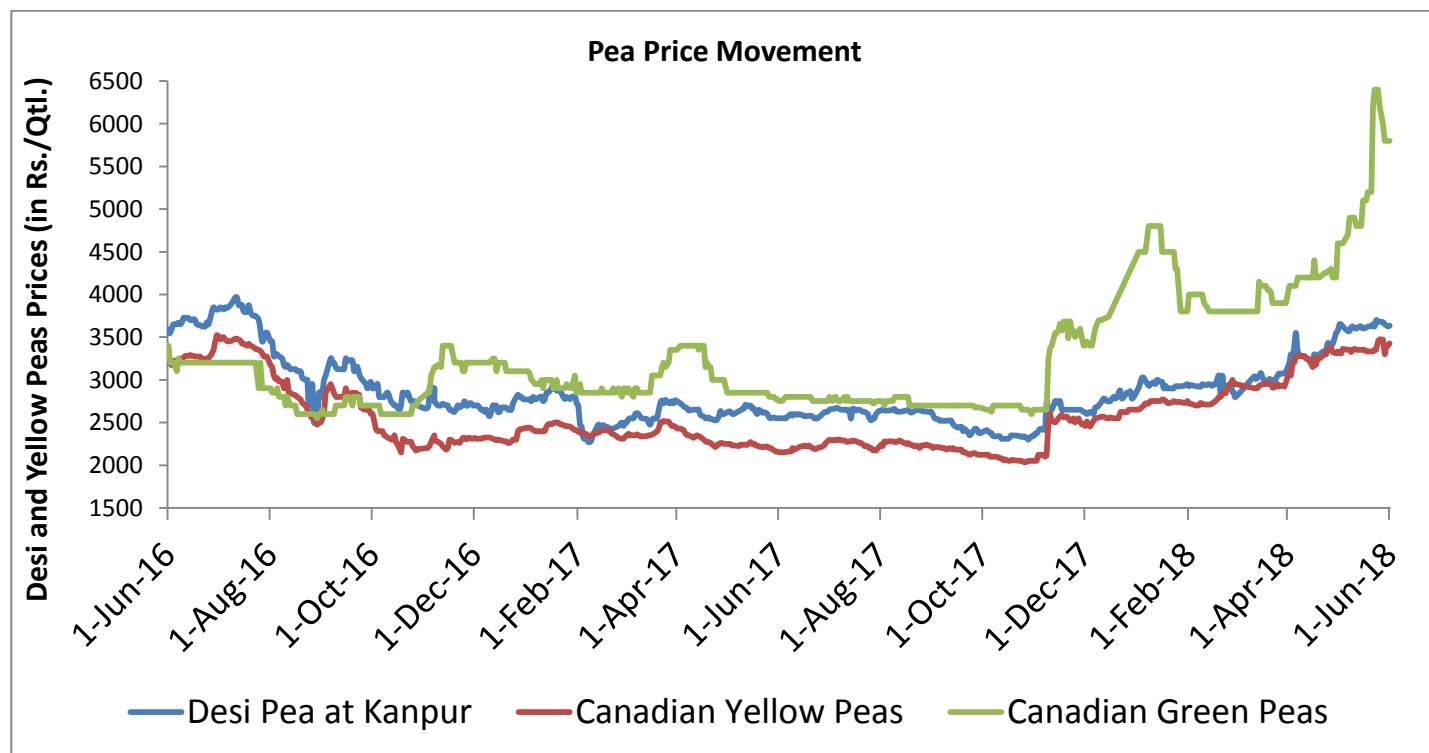

Market Recap:

Desi pea, green pea and Canadian pea traded down this week due weak demand and declining chana price. Overall tone seems firm in the medium term. Supply-demand side seems balance right now but may turn mismatched in coming months. Downward correction is not expected, as Chana price is likely to stay steady at current level. Right now, 50 % duty is applicable on all peas. All India average price decreased by 1.77 % to Rs 4294 per qtl. In Kanpur market, it traded down at Rs 3635 per qtl. Higher import cost may remain supportive in the near to medium term. Import is not possible till 30th June, as quota of 1 lakh tonne from Apr to Jun-2018 is over now.

Price Dynamics:

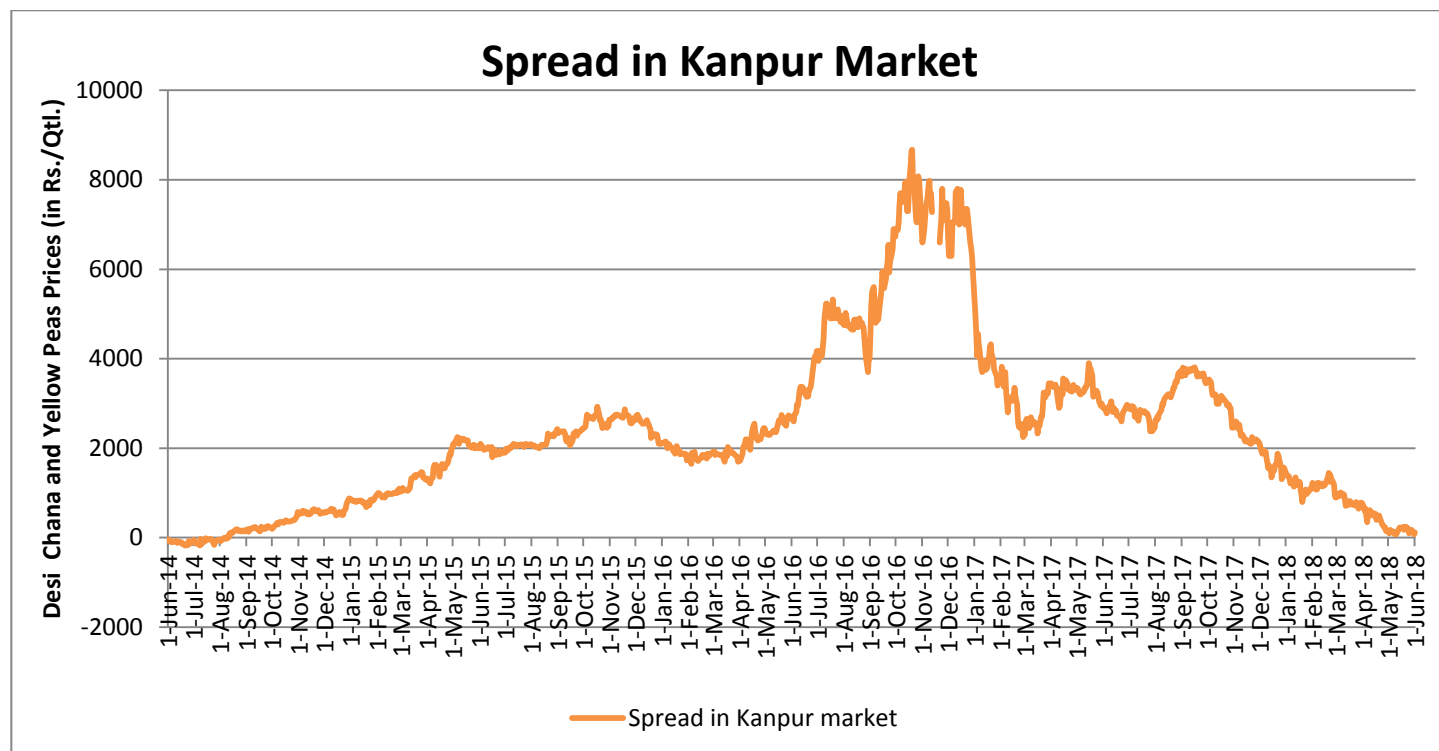

In May-2018., yellow pea all India average prices traded up by 10.75% to Rs 3425 per qtl. Steady to slightly firm movement is expected in June due to:-

- Decreasing stock & arrivals
- Higher quotes for imported stock
- Increasing Chana price &
- No import till June-2018

Spread With Chana:

[\(Back to Content\)](#)

Spread between Chana and Peas, at Kanpur market decreased by Rs 250 to Rs 125 per qtl owing to increased prices of peas. Spread is expected to move in the range of 100 to 200 per quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to slightly firm due to expected improvement in demand at current price. If chana demand remains weak, parity may turn into negative as was seen in 2014.

Seasonality Index depicts that pea prices are likely to notice firm movement in June-2018.

Market Outlook For June- Prices of Pea are likely to trade steady to slightly firm due to improved demand at current level and declining stock. Govt. is unlikely to consider revision in duty (currently 50 %) in first half of the year. Steady to firm tone may prevail. Stake holders should buy on dip.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

Market Recap:

Kanpur market opened with a firm note in the beginning of the week but could not sustain firm momentum at the end of the week. Imposition of 30% import duty would continue to restrict import. Arrival has decreased. Buyers should take possession after correction. Overall sentiments remain firm in the medium term. Stakeholders should buy on dip. Demand from Bengal would support market. Masur dal demand is likely to improve in coming weeks. demand for Masur dal improves in summer.

Price Dynamics:

In May-2018, average price in key market Kanpur was up by 0.23 % to Rs 3545 per qtl MoM basis. Prices are likely to trade firm in June. Firmness is due to:

- Procurement drive in producing states
- Steady forward quotes (\$495/505) Australia/Canada-\$455/65.
- Lower than expected production.
- Improved demand

Seasonality Index depicts range bound to slightly firm movement in June-2018.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur market traded almost steady at Rs 3850 to Rs4250 in Gulberga market. Uptrend is unlikely this month as demand for dal remains subdued. Private buying is weak as market is still facing liquidity crunch. Besides, govt has stock of over 10 lakh tonne (new over 8.5 lakh tonne & old around 1.5 lakh tonne) right now. Selling through auction would continue and it would not allow market to move beyond a certain level despite fear of lower area coverage this year. Around 3.5 lakh tonne import would put further pressure on Tur cash market.

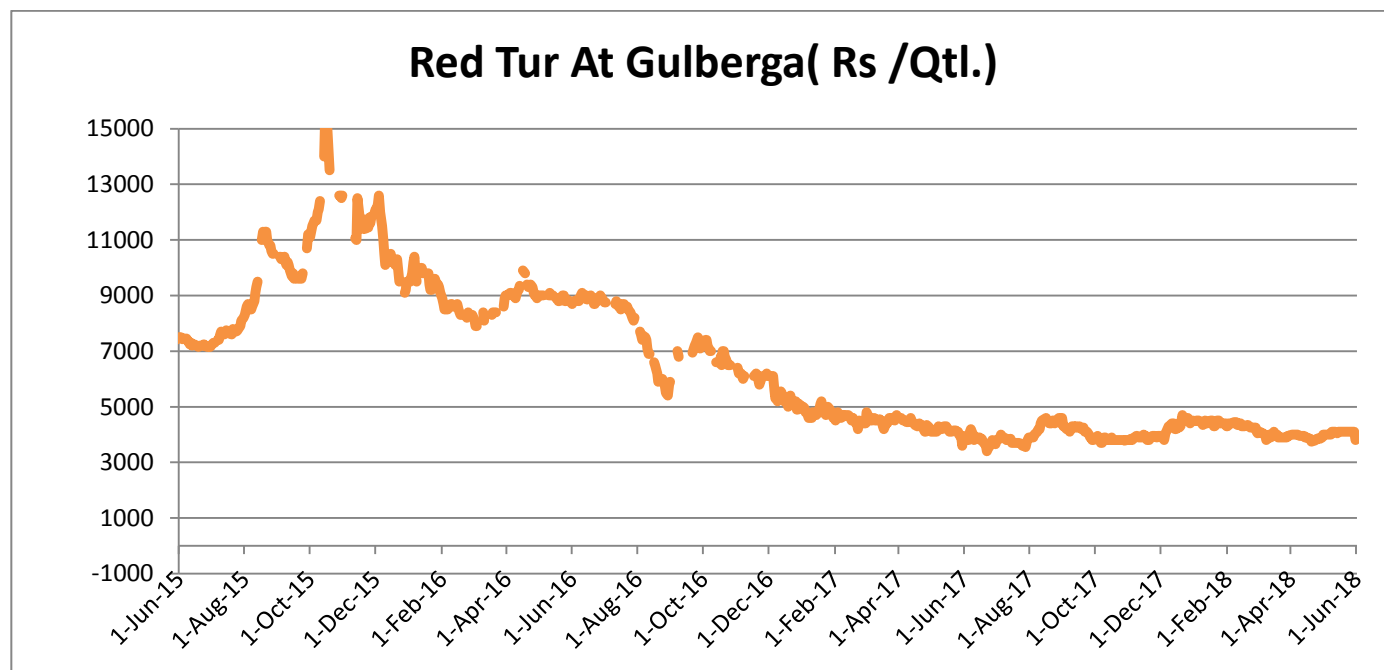

Market Recap:

Tur market is expected to stay steady to slightly weak as import through quota system would impact market fundamental. 3.5 lakh tonne import seems very much in sight and it would ease supply side in already oversupplied market. Burma is offering Tur lemon at \$450 & old \$440 per tonne basis Indian port.

Price Dynamics:

In May-2018, average price in Mumbai market was down by around 0.55% to Rs 3625 per qtl.due to

- Lower demand &
- higher stock available in central pool stock.
- Possibility of import at lower price remain intact

Seasonality Index- depicts steady to slightly range bound movement in June.

Production- According to the Agriwatch estimate, Kharif Tur MY 2017-18 production is estimated at around 30 Lakh tonne against 39.19 lakh tonne in 2016-17. New crop starts now .Tur area ended with 42 lakh ha as per Agriwatch estimate.

Govt. has revised Tur production estimate slightly up from 3.99 MMT to 4.18 MMT in 3rd adv. estimate released on 23.05.2018 against set target of 4.25 MMT for 2017-18.Govt has released final production fig for last year at 4.87 MMT.

Market Outlook for June:

Tur prices are likely to trade steady to slightly weak . However, stake holders should start buying on dip. Market may move up, once again, June onward as area is bound to decline.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

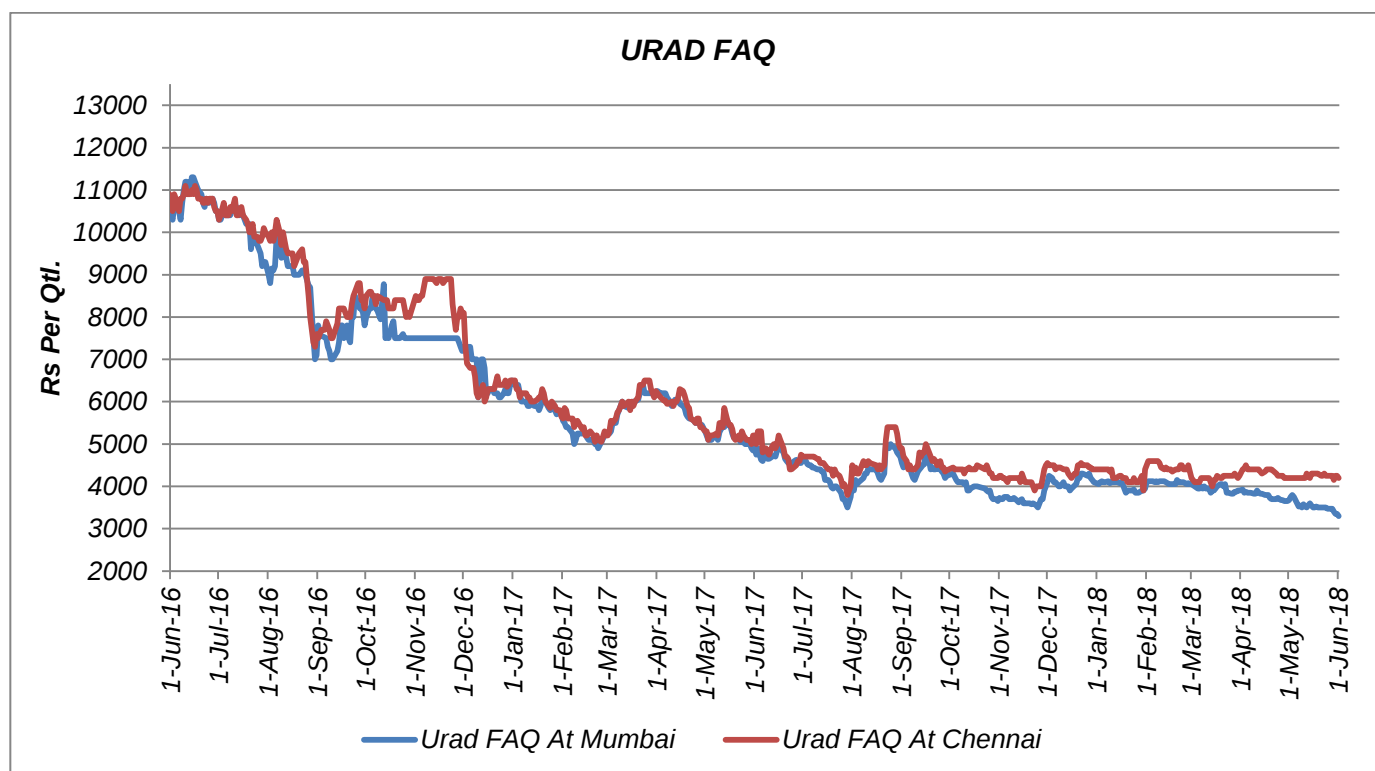

Market Recap:

Steady to slightly weak tone is likely to prevail in Urad market due to normal supply –demand side. Increased quotes in Burma has capped downward trend in domestic market. As prevailing price in domestic market is ruling lower,,farmers may reduce Urad area this kharif season. Both selling by stockists and buying by mills remained restricted. As stock is higher, planting area this kharif season may be major price influencing factor in coming months. Selling from central pool stock would continue.. Import is possible as govt has not notified any ban on fixed quota of 1.5 lakh tonne for three years, starting from 1st April-2018.Import is possible from Burma as it is offering Urad at much lower prices- FAQ at \$450 and SQ at \$570per tonne..

Price Dynamics:

In May, average prices in key markets including Mumbai/were down by 0.32 % percent, from 4150 to Rs 4200per qtl. In Chennai it is being traded at Rs 4150-4250.Prices may stay steady to slightly weak due to

- New arrival from summer crop and weak demand from millers
- Normal crop size
- Ample availability of old crop

Seasonality Index depicts range bound movement in the near term to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2017-18 production is estimated at 24.97 lakh tonne against 23.97 lakh tonne 2015-16. See supply and demand side. Crop condition is good.

Market Outlook for June: Prices are likely to trade steady. To slightly weak

Fundamental Analysis and Outlook For Moong:

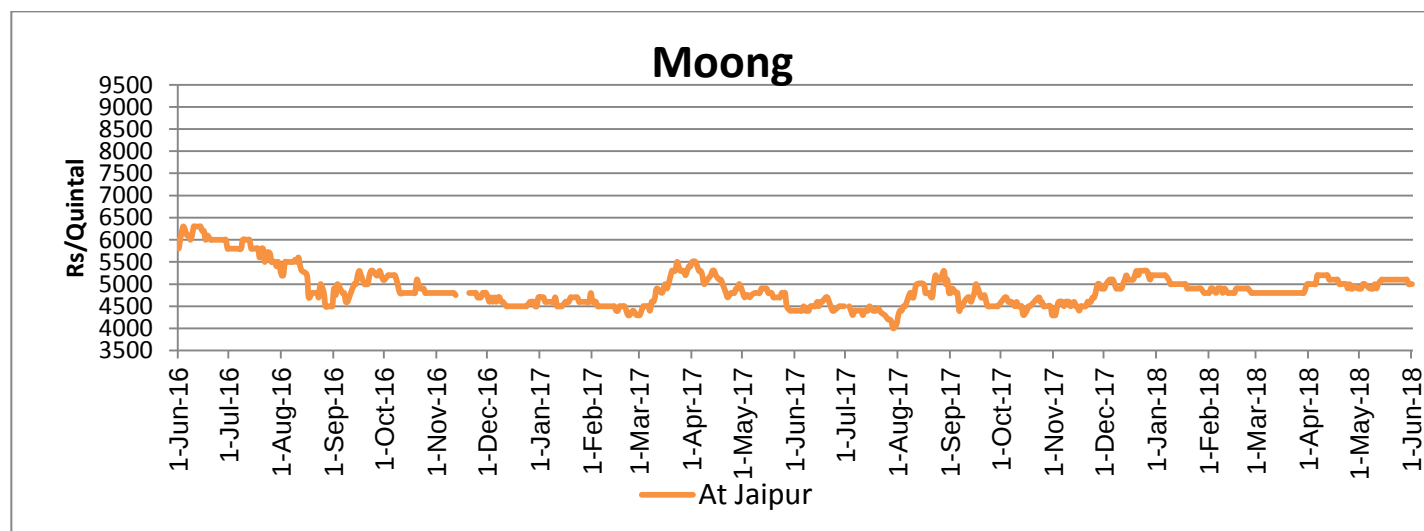

Market Recap:

Moong market traded slightly down with new arrival in Bihar and U.P. Quality of new moong is good and pressure would continue till 20th June. Rains and hailstorm have affected moong crop in Gaya region. If it continues, quality may be affected and moong may be discoloured. As stock in central pool is over 1.87 lakh tone, supply side is expected to be normal. As on 25.05.2018, Nafed has procured 2.02 lakh tonne. Out of this only 19000 tonne has been sold out. Demand is weak and steady to weak tone may prevail in moong market in next two-three weeks.

Price Dynamics:

Moong at Jaipur showed steady to weak movement and traded in the range of Rs 4800 to Rs 5000 per quintal, down by Rs 100 from April. Market may trade steady to slightly weak. Average price in April moved down by .34% to Rs 4860 per qtl. in Jaipur market. Burma offers Moong At \$695-700 per tonne. Prices may stay steady to slightly weak due to

- Weak demand & selling through central pool stock
- Possibility of import
- No export parity/Burma offers Moong at lower rate

Seasonality Index depicts steady to slightly weak movement in June.

Production- According to the Agriwatch preliminary estimates, Kharif and rabi Moong 2017-18 production is estimated at 19.25 Lakh tonne. It was 20.13 in 2016-17.

Moong production for kharif season has been pegged at 1.42 MMtT against the set target of 1.65 MMT for 2017-18 in 2nd adv estimate. Final kharif moong production for rabi has been pegged at 0.32 against target of 0.65 MMT. Total moong production has been pegged at 1.74 MMT against target of 2.3 MMT. Final moong production for last year has been pegged at 2.16 MMT.

Market Outlook for June:

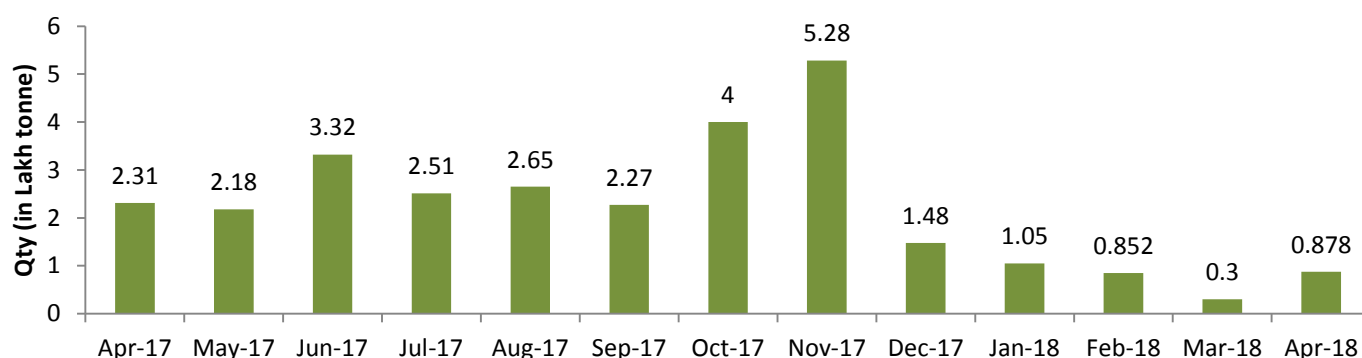

Steady to weak movement is expected in June

Comparative Import fig during Feb & Mar-2018 in India with Average CiF:

Chana Import by India

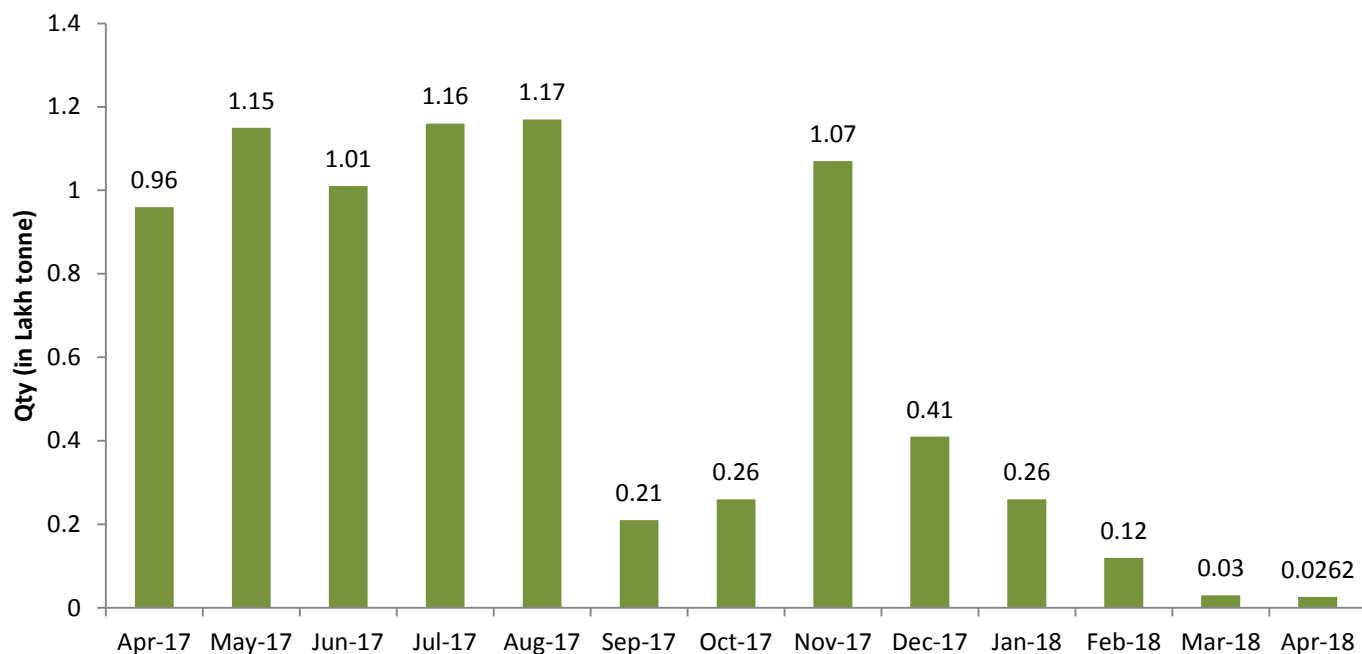

Moong Import by India

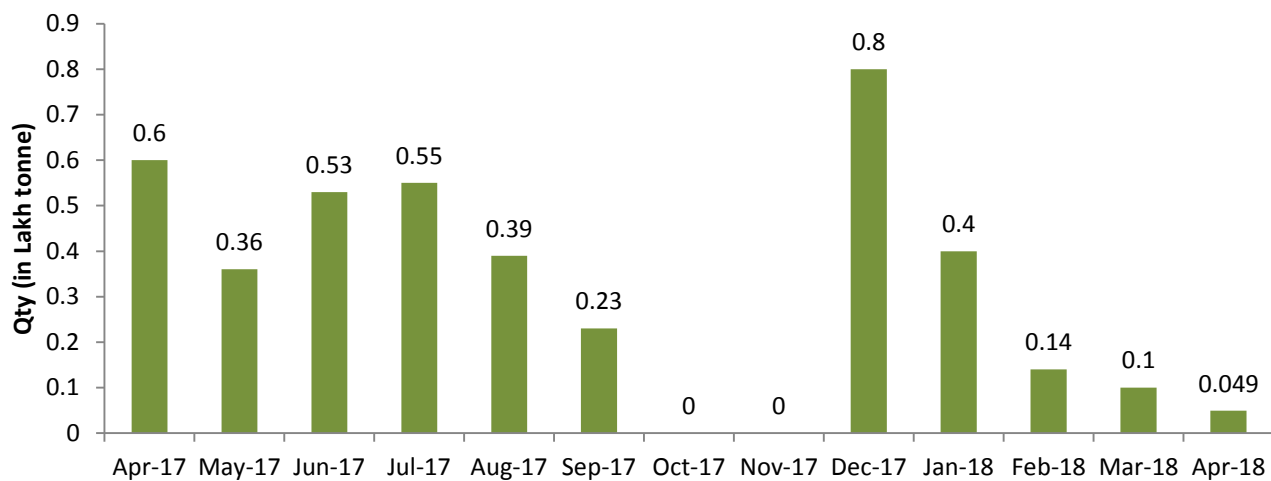

Urad Import by India

Masoor Import by India

Tur Import by India

Pulses Wise Technical Outlook for June-2018 :-

Chana:

Outlook –We expect prices to notice steady to slightly firm movement in the medium term. Improvement in demand is likely at lower level. Duty hike and hope for procurement may continue to support cash market. Import would remain halted. Impact of duty would be felt in second half of the year.

- ❖ Chart depicts steady to slightly firm movement in the weeks ahead.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 3600 to 3900 levels in this month.

Strategy: Buy on dip.

Trade Recommendations:

- **Spot Market outlook:** Chana is likely to trade range bound.

Trade Recommendations: Go long around 3650 with the first target of 3750 and second target 3850 with stop loss at 3600 level.

S2	S1	PCP	R1	R2
3450	3600	3650	3772	3950

Pea:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slight firm movement in this month taking clue from costly import and declining stock in domestic market.

- Candlestick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 3400-3800 in this month.

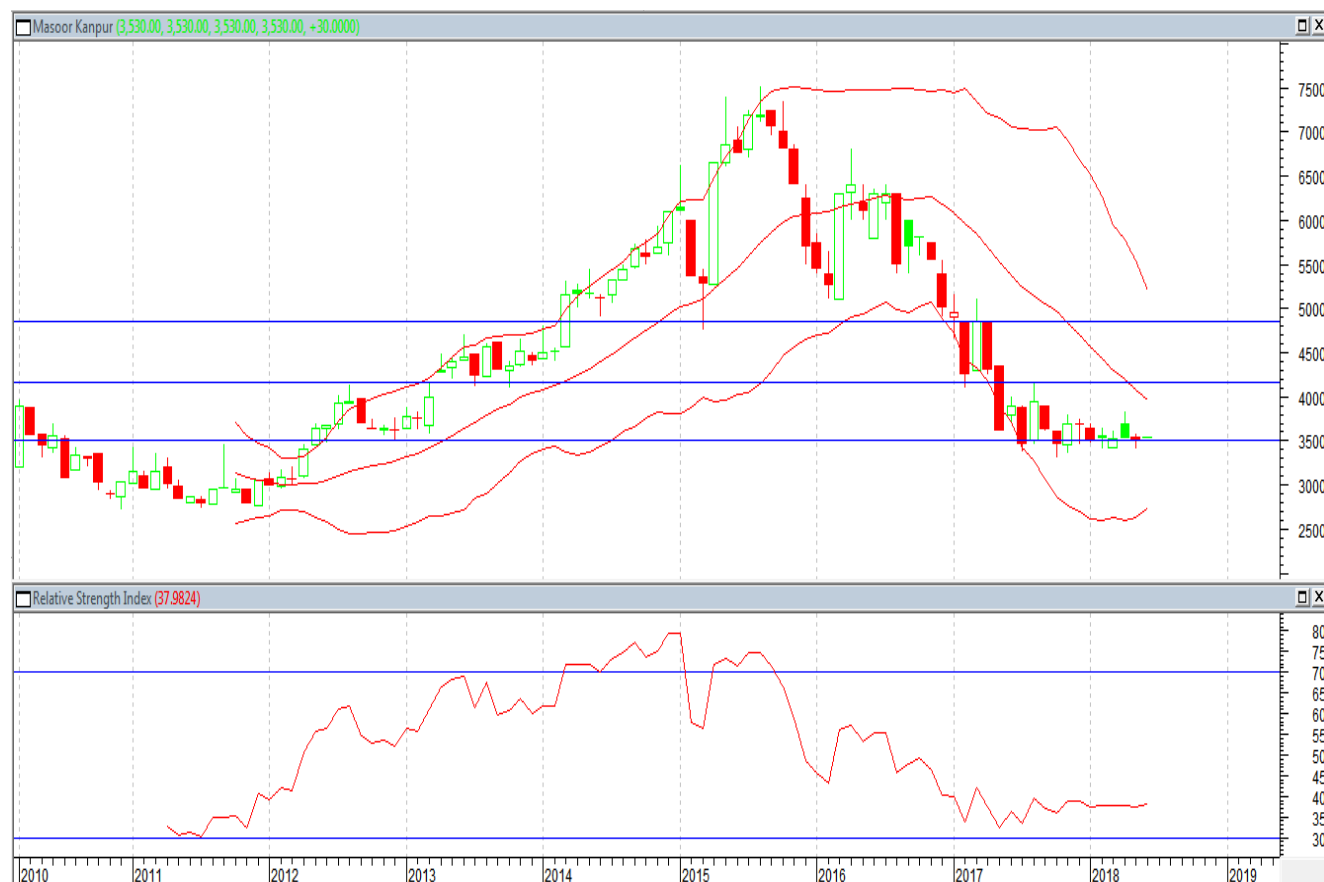

Strategy: Buy on dip

Trade Recommendations: Go long around 3400 with the first target of 3550 and second target 3600 with stop loss at 3350 level.
