

Pulses Monthly Research Report-July- 2018

Content

Pulses Sector-Highlights

- Domestic
- International
- Monthly Outlook

Supply & Demand

Pulses-Wise Summary

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- **All India Kharif pulses sowing is on and is expected to improve this month with revival of monsoon and rains in major growing belts.** Kharif MSP for 2018-19 for Green gram, Black Gram & Pigeon pea is likely to be revised up by Rs 200 to 400 per qtl. It would encourage farmers to grow more pulses this season. Farmers may increase area under Green gram as they have received comparatively better price for the same. Pigeon pea and Black Gram area might be retained at previous year's level. Govt. is expected to fulfill its promise to ensure 1.5 times of actual production cost for the farmers. MSP for Tur may be increased from Rs5450 to Rs 5850 per qtl., for black gram from Rs 5400 to Rs 5800 & for Green gram from Rs5575 to Rs5925 per qtl.
- **As per current status at the end of June, all India Kharif sowing area of pulses, is lagging by 41.07 % to 10.72 lakh ha against 18.18 lakh ha last year as on 29th June-2018.** Tur & Moong area is running behind by 18.62 and 53.44 % to 4.74 & 3.06 lakh ha. Normal kharif area under Tur is 41.90 lakh ha while it is 24.93 lakh ha for Moong. Urad area too is running behind by 37.64 to 1.25 lakh ha so far. For details see table at page no.8.
- **Demand for chana/chana dal is likely to improve ahead of festive season and declining arrivals in major mandis.** It will help local market to recover from current level. Chana in Delhi market may trade in the range of Rs 3700 to Rs4000 per qtl. Firmness in cash market would be limited as there is plenty of stock available in private hands and central pool. Govt. would start releasing chana stock before new kharif pulses hit the market from Sept onward. Govt has around 28 lakh tonne chana stock. Its continuous releasing would cap firmness beyond a certain level despite negligible import due to hefty duty (60% on any origin and 70% on US origin).
- **Pressure continued on Tur market during month under review. Higher stock in private hands as well as in central pool and weak demand amid continuous release from central pool and private stock at prevailing market price has eased supply side in the market.** Big buyers like mills are buying only for 15 days requirements. Besides, there is a rumour in the market that dal distributed through PDS is coming into small hotels. In addition to this, fear of higher quantity sale from central pool stock from Sep too, is weighing on market fundamentals. Besides, import in limited quantity at cheaper price is likely to continue. Some support to cash market is expected due to higher MSP. But its impact would not last long as stockists would start selling at higher level and it would limit uptrend. Tur in Gulberga may be traded at Rs 3700 to Rs4000 per qtl. Steady to slightly movement is expected in July.
- **As expected by Agriwatch, Urad cash market could not sustain at previous level and it lost around Rs 150 per qtl in major mandis, during the month under review.** New Urad in Bursi mandi in Maharashtra started pressurizing prices of Urad once again. However, hike in MSP may support cash market to some extents. However, excess stock available in private hands and with govt.'s custody would limit firm momentum. Problem of plenty & selling from govt's stock much below MSP and at prevailing market price would continue to affect market and it would continue to distort normal trading in the market in coming months. Slight recovery is expected due to MSP hike from Rs 5400 to Rs5800 per qtl.
- **Lentil cash market is facing demand problem and there is talk in the market that consumers are shifting from massor to tur.** It has affected normal demand in the market. Besides, there is 235140.65 MT stock in central pool and it may go up further as procurement is still on. Govt would start selling it before kharif crop starts. It would restrict cash market from move up one way. As prices have come down, slight recovery is expected as stock of imported masoor is decreasing fast.
- **Bulk buyers are not active as inner tonne in cash moong market remains weak.** Need based buying remains unsupportive to the cash market. Release from stockists and central pool stock and expectation of higher acreage from last year would not allow market to improve in the near term. Temporary support might be seen due to hefty MSP hike. It may trade in the range of Rs 4500 to Rs5500, depending on quality. Actually, market is

well aware of hefty stock lying with govt. As procurement drive is on for summer crop, stock is likely to move up further. Steady slightly firm tone may prevail this month.

- **Yellow pea import is not possible till 30th Sept-2018 as govt has extended ban for another three months.** It may push up peas price in coming months. Right now stock position is at comfortable level.

International Market Update:

- **The latest release of The Canadian Grain Commission, hints that Canada exported** around 19600MT lentils through licensed facilities in May-2018. It was lower than 83,900MT shipped in May-2017. It is 17000MT lower than April. Canada had exported 36600MT in April-2018. Total export in this marketing year was registered at 254,800 MT against 784,600MT during the corresponding time last year. Demand remains unexpectedly at lower level.
- **The latest release of The Canadian Grain Commission hints that Canada exported** around 373,000 MT pea through licensed terminal in May-2018. Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **80% of newly sown pulses crop in Canada, are passing through normal developmental stages** and almost 20% are below normal development stages. Recent rains in major growing areas have helped standing crops in most of the regions. More rains are required for better growth of pulses. According to Saskatchewan Agriculture and Food crops some areas are still stressed and showing the impact of dry conditions. Available moisture level in the field is not enough to ensure better growth of the crop. However, some areas like East and central Saskatchewan condition remains favorable.
- **Field Pea exporters in France are trying to fulfill regional demand as opportunity in** bulk importers countries remains bleak. France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. Major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093MT together out of 21235 MT shipped in April-2018.
- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne in 2018.** Lentil production may be steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus, is another factor behind the strength in chickpeas market.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition

Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Chana (Chickpeas /Bengal Gram): Fundamental Analysis and Outlook:

Market Recap:

Chana cash market could not move up despite continuous support from procurement drive and almost halted import due to higher import duty imposition (60% on Australian Chana & 70 % on US origin Chana). Govt.'s procurement agency Nafed has procured around 27.68 lakh tonne chana this season. Higher production, ample availability in domestic market, weak demand & sluggish private buying due to liquidity crunch continued to cap any move of uptrend. Overall , scenario for cash chana market remains weak as govt has to sell stock accumulated in last two months. As arrivals in markets have decreased by 60 to 70 % from normal, chana market may improve slightly in July. It may touch 4000 till govt. starts releasing from central pool stock. As stock & carryout are higher, any major jump in Chana market is unlikely. In July chana in Delhi market is expected to trade in the range of Rs 3700 to 3950.

All India average price for Chana decreased by 1.30 percent to Rs 3620 per qtl. in comparison to May. Australian Chana (old imported crop) price decreased by 3.73 percent to Rs 3352 per 100kg. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

Lack of demand and excess availability in local market with hefty stock in central pool would not allow cash market to move beyond a certain level. Prices are likely to stay steady to slightly firm in July due to:

- Higher stock in govt.'s warehouse and its likely retention for two more months.
- Halted import due to 60/70 % import duty for various origins on chana.
- Declining arrivals,
- Hope for improvement in demand &
- 30% lower stock in private hands

Seasonality Index hints that Chana (gram) is likely to notice steady to slightly firm movement in the Spot market in July-2018.

Chana Future Market Analysis:

Technical Commentary:

Decreasing price & OI hint weak market.

RSI is moving up in neutral region, hints caution to bears.

Prices above below 9 and 18 days EMAs

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Aug	3519	3480	3595	3724	3824
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Aug	Buy on dip	3550	3700	3750	3615

Market Outlook for July-2018

There is no respite for Chana cash market as buyers remained sidelined under prevailing weak inner tone. Trading activities remain limited. Hefty stock (over 28 lakh tonne) accumulated in central pool and its likely release from August onward, are discouraging private buying. There is a common perception in the market that govt. would start selling Chana much below MSP price like other pulses. So any major recovery at this point of time is unlikely. Chana in Delhi market may trade in the range of Rs 3750 to Rs 3950 in the near term.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

Market Recap:

Slight recovery was seen in peas price despite 50% import duty and restriction on import till 30th Sept-2018. Prices of peas are expected to move slightly up in July after downward correction. There is ample stock available at ports (around 4.5 lakh tonne & 1.5 lakh tonne in domestic market). It would continue to cap any major uptrend in July. Against it green pea may see better upward move as stock is decreasing fast. Demand is normal against lower supply. Overall pea market is expected to improve from current level but not before a downward correction.

All India average price decreased by 5.54 % to Rs 4318 per qtl. In Kanpur market, it traded steady at Rs 3628 per qtl. Higher import cost may remain supportive in the near to medium term. Import is not possible till 30th Sept-2018

Price Dynamics:

In June-2018 market traded up and is expected to trade firm in July due to:-

- Retention & lower stock available for green peas
- Import restriction
- Improving Chana price &
- Improved demand from retail sector.

Spread between Chana and Peas, at Kanpur market decreased by Rs 81 to Rs 89 per qtl owing to increased prices of peas. Spread is expected to move in the range of 100 to 200 per quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to slightly firm due to expected improvement in demand at current price. If chana demand remains weak, parity may turn into negative as was seen in 2014.

Seasonality Index depicts that pea prices are likely to notice firm movement in July-2018.

Market Outlook For July- Steady to slightly firm movement is expected.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

Market Recap:

Kanpur market opened with a firm note in the beginning of the month and continued to trade firm in June. Imposition of 30% import duty would continue to restrict import. Govt has imposed 40% duty on US origin lentil. As demand has decreased for lentil dal, any spike in lentil price is unlikely. Stock is ample to take care of three to four months need. However, at the time of sowing supply contraction might be seen. It may lend support to cash market. Right now govt has 2.45 lakh tonne lentil stock and govt. would continue to release lentil at regular intervals and it would put a cap on any expected spike. Stakeholders should buy on dip.

Price Dynamics:

In June-2018, average price in key market Kanpur was up by 2.36 % from Rs 3526 to Rs 3603 per qtl. MoM basis. Prices are likely to trade firm in July. Firmness is expected due to:

- Higher stock retention by govt, would not hit market before Aug
- Likely improvement in demand
- Decreasing stock in pipeline &
- Costly import

Seasonality Index depicts range bound to slightly firm movement in July-2018.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur cash market is likely to improve slightly due to higher MSP for new season. However, any spike is unlikely as sellers/stockists may be active at higher price as stock in private hands & central pool is ample. At improved price regular release might be seen, that would cap uptrend. Tur market traded almost steady at Rs 3750 to Rs 4050 in Gulberga market. Dal demand is expected to improve while area is expected to decrease as farmers have received lower price than MSP. Liquidity crunch too have impacted market. Besides, govt has stock of over 8.0 lakh tonne (new over 8.0 lakh tonne & old around 1.0 lakh tonne) right now. Selling through auction would continue and it would not allow market to move beyond a certain level despite fear of lower area coverage this year. Around 3.5 lakh tonne import would put further pressure on Tur cash market.

Market Recap:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs 5850). Burma is offering Tur lemon at \$430 & old \$420 per tonne basis Indian port. At improved price stockists would start selling as they are well aware of higher stock in central pool.

Price Dynamics:

In June-2018, average price in Mumbai market was down by around 8.35% to Rs 3490 per qtl. due to lower demand against higher supply. In July market is likely to improve due to

- Higher MSP
- Likely festive demand
- Fear of lower area coverage&
- Comparatively Lower stock in mills

Seasonality Index- depicts steady to range bound movement with firm bias in July.

Production- According to the Agriwatch estimate, Kharif Tur MY 2017-18 production is estimated at around 30 Lakh tonne against 39.19 lakh tonne in 2016-17. New crop starts now .Tur area ended with 42 lakh ha as per Agriwatch estimate.

Govt. has revised Tur production estimate slightly up from 3.99 MMT to 4.18 MMT in 3rd adv. estimate released on 23.05.2018 against set target of 4.25 MMT for 2017-18. Govt has released final production fig for last year at 4.87 MMT.

Market Outlook for July:

Tur prices are likely to trade steady to slightly firm . However, stake holders should start buying on dip. Market may move up once again to a certain extent.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

Steady to slightly firm tone might be seen in Urad market due to MSP be hike. MSP for kharif 2018-19 has been hiked from Rs 5400 to Rs 5800 per qtl . It may support Urad market to some extent. However, higher stock and continuous release from central pool stock may cap upward movement in coming months. There is not much stock in Pipeline so

improvement in price is expected from current level. Import is possible as govt has not notified any ban on fixed quota of 1.5 lakh tonne for three years, starting from 1st April-2018. Import is possible from Burma as it is offering Urad at much lower prices- FAQ at \$440 and SQ at \$560 per tonne..

Price Dynamics:

In June, average prices in key markets including Mumbai/were down by 0.98 % percent, from 3886 to Rs 3671 per qtl. In Chennai it is being traded at Rs 4100-4150. Prices may stay steady to slightly firm due to

- Higher MSP
- Lower area coverage
- Lower stock in mills &
- Likely improvement in demand

Seasonality Index depicts steady to slightly firm movement in the near term to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad MY 2017-18 production is estimated at 24.97 lakh tonne against 23.97 lakh tonne 2015-16. See supply and demand side. Crop condition is good.

Market Outlook for July: Prices are likely to trade steady to slightly firm.

Fundamental Analysis and Outlook For Moong:

Market Recap:

Bulk buyers are not active as inner tonne in cash moong market remains weak. Need based buying remains unsupportive to the cash market. Release from stockists and central pool stock would not allow market to improve in the medium term. However, recent massive hike in MSP may support Moong market in the near term. Market is well aware of hefty stock lying with govt and stockists may resort to release stock at improved price. Govt too would sell

stock before new crop starts hitting market by August end. Stake holders should sell at improved price and wait for market price to come down.

Price Dynamics:

Moong market may move up due to hike in MSP for kharif 2018-19 crop. Demand remains limited as buyers are well aware of hefty stock available with govt. Burma offers Moong At \$695-700 per tonne. Prices may stay steady to slightly firm due to

- Massive hike in MSP
- Limited Import
- Lower kharif coverage area &
- Lower stock in mills

Seasonality Index depicts steady to slightly firm movement .

Market Outlook for July:

Steady to firm movement is expected in July

Comparative Import fig during Feb to May-2018 in India with Average CiF:

Pulses Wise Technical Outlook for July-2018 :-

Chana:

Outlook –We expect prices to notice steady to slightly firm movement in the medium term. Improvement in demand is likely at lower level. Duty hike and hope for improvement in demand may continue to support cash market. Import would remain halted.

- ❖ Chart depicts steady to slightly firm movement in the weeks ahead.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 3800 to 3950 levels in this month.

Strategy: Buy on dip.

Trade Recommendations:

- **Spot Market outlook:** Chana is likely to trade firm.

Trade Recommendations: Go long around 3650 with the first target of 3850 and second target 3950 with stop loss at 3600 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3450	3600	3750	3950	4050

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slight firm movement in this month taking clue from costly import and declining stock in domestic market.

- Candlestick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 3450-3750 in this month.

Strategy: Buy on dip

Trade Recommendations: Go long around 3450 with the first target of 3650 and second target 3700 with stop loss at 3400 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3100	3200	3550	3700	3850

Masoor :

Desi Masoor (at Kanpur) Spot Market Monthly Chart:

Outlook –Range bound to slightly firm movement is likely to be noticed in this month.

- Chart depicts firm movement in the market.
- RSI oscillator is moving up in the neutral region.
- Expected price band is 3550 to 3850

Strategy: Buy on dip

Trade Recommendations: Buy around 3650 with the first target of 3750 and second target 3850 with stop loss at 3600 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3500	3600	3700	3850	3950

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to notice range bound to slightly firm movement.

- Candlestick chart denotes firm tone in the market.
- Oscillator RSI is moving up in neutral region.
- We expect Tur prices to trade in the range of 3800-4400.

Strategy: Buy On dip

Trade Recommendations:-Go long around 3750 with the first target of 4050 and second target 4150 with stop loss at 3700 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3600	3800	3850	4350	4550

Urad

Urad FAQ- Burma Origin (at Mumbai) Spot Market Monthly Chart

Outlook - We expect steady to slightly weak price movement in current month .

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price range is 3000 -3450

Strategy: Buy on dip.

Trade Recommendations: Buy around 3000 for a target of 3200 and keeping stop-loss at 2950

Supports & Resistances				
S2	S1	PCP	R1	R2
2800	2950	3100	3600	3700

Moong:

Desi Moong (at Jaipur) Spot Market Monthly Chart:

Outlook - We expect prices to notice steady to weak movement in this month.

- Candlestick chart depicts weak movement in the market.
- RSI is moving down in the neutral zone.
- Expected price band is 4800-5500 levels.

Strategy: Buy on dip.

Trade Recommendations: Buy near 4750 with target of 5200 and 5300 keeping stop loss of 4700 level.

Total Pulses	205.35	172.27	199.69	337.52	207.57	245.55	96.5	102

Export fig for 2017-18 is tentative

India MSP For Pulses:

MSP (Rs/Quintal) For Crop Year From 2011-12 To 2017-18 (It includes Bonus too)								
MSP (Rs/Quintal)	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19*
Tur (Arhar)	3200	3850	4300	4350	4625	5050	5450	5675
Moong	3500	4400	4500	4600	4850	5225	5575	6975
Urad	3300	4300	4300	4350	4625	5000	5400	5600
Gram	2800	3000	3100	3175	3425	4000	4400	
Lentil (Masur)	2800	2900	2950	3075	3325	3950	4250	

Note:* recommended by CACP

- Central govt.has given approval to increase MSP for kharif 2018-19 crops and tried to fulfill its promise to ensure 1.5 times of production cost for farmers which was made in the budget.In pulses segment a hefty hike was seen in green moong price.As per the CACP estimate, production cost for moong is Rs4650 per qtl.for ensuring 50% over this price for farmers,govt. has green signaled to increase it from Rs 5575 to Rs6975 per qtl.It is higher by Rs 1400 per qtl.
- In pigeon peas case it has been increased by Rs 200 from 5450 to Rs5675 per qtl.As per govt.'s external estimate production cost for Tur is Rs3432 per qtl.On this basis of production cost the increase ensures 65.36 % of production cost for farmers.
- In case of Black Gram, it has been hiked by Rs 200 from Rs5400 to Rs 5600 per qtl.As per govt.'s external estimate production cost of black gram is Rs3438 per qtl.With increased price farmers would get 62.89% higher than actual production cost for kharif crop under planting stages now.
- Impact of this hike may disturb acreage of various pulses as farmers would grow more green gram and reduce area under pigeon pea and black gram,specially in MP,Rajasthan,Maharashtra,Gujarat,UP and Bihar.Private buying would decrease from moong and govt.would have to buy more crop under price support scheme.As there would be no option for export at higher rate,govt would have to sell it in domestic market at lower price and it would distort normal market trading.
