

Pulses Monthly Research Report- September- 2018

Content

Pulses Sector-Highlights

- Domestic
- International
- Monthly Outlook

Supply & Demand

Pulses-Wise Summary

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- All All India kharif Pulses area is lagging behind by 2.5 % to 132.66 against 136.12 lakh ha** last year as on 31st Aug 2018. Farmers have covered 44.47 lakh ha against 44.70 last year under Tur till date, slightly lower than last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 12.8 % to 37.57 against 43.09 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 6.5 % to 33.70 lakh ha against 31.65 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is up by 0.9 % than last year. It is 16.15 against 16.00 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has increased by 47.09 % to 0.73 lakh ha against normal of 2.27 lakh ha so far.
- Despite 7.3 % higher kharif Moong area (34.05 lakh ha) this year so far and commencement of new arrival in Karnataka, Telangana and AP, bearish trend is unlikely to prevail in coming weeks.** In major producing states, area is up by 22.46 % to 19.23 lakh ha in Rajasthan, 16.20% to 4.23 lakh ha in Karnataka. In other major states like Maharashtra, Telangana, Odisha, MP and Gujarat it is down by 12.10, 18.86, 13.63, 7.89 and 53.69 % respectively. Besides, there are reports of lower sowing in Kekri kishangarh, Shekhawati and Merta line. Under these developing scenario, Moong moved up by Rs 100 to Rs 150 in Kanpur, Allahabad region. Rains have affected standing crop in Maharashtra too. There is not much stock in dal mills located in Jalgaon, Akola. Commencement of procurement in Karnataka too remains supportive to cash moong market. Cash market may move up further as soon as demand for Dhjoya and chilka increases. Overall outlook remains firm in the medium term.
- Arrival of chana in major markets has decreased drastically during last one month. Arrival in major mandi like Bikaner has decreased to 10-12 thousand bags against normal of 50 thousand bags at this point of time.** Poor arrival has lent support to chana cash market and it moved up Rs 75 per qtl to Rs 3900. It is still lower by Rs 500 to 550 from MSP. However, futures traded lower at 3925-30 for Sep month. As Nafed is unwilling to sell chana below MSP, cash market is expected to move up further by Rs 100-200 this month. Demand for dal and besan is expected to improve in the weeks ahead. So Agriwatch expects market to recover soon. Sebi needs to have a close eye on bears in futures. Import is not possible due to 70% import duty and lower crop size in Australia.
- Demand for Tur dal remains limited despite ongoing festive season. Millers are not buying large quantities as** available stock of dal is said to be sufficient to cater the need for 15 to 20 days. Tur market extended its loss further by Rs.75 to Rs.3725 in Gulbarga market. As major growing region of Karnataka is facing drought-like condition and there are some reports of damage from AP too, it may limit downside in coming weeks. In other states crop condition is good. So overall crop size is likely to be slightly higher than last year. Normally tur dal demand increases from Sep and continues till Nov when new crop hits the market. So Agriwatch expects prices to stabilize near current level and move up once demand for festive season starts. Crop condition in all growing states except Karnataka is good and recent rains are said to be beneficial for standing crop. It would limit uptrend.
- Bulk buying for Urad by mills is still awaited and demand from cash market remains weak** It has affected local Urad dal prices in Delhi and other major cash market too. Offtake from mills located in Narela, Bawana and NCR has decreased considerably. Pressure is likely to continue as new Urad from MP is expected from first week of Sept, followed by Udgir and Latur from Maharashtra line. In Delhi market SQ quality is being traded at Rs.4900-5000 and Desi at Rs 3700-3800 per qtl. So under prevailing condition any major recovery is unlikely. However, procurement on MSP from mid Sep would not allow market to decrease from current level. Lower area coverage may remain supportive for Urad market to some extent in months ahead.
- Moong and its dal demand get affected at higher level. Besides, new moong commences in Tamil Nadu, AP & Chhattisgarh.** Moong traded at Rs.4900 per quintal in Jaipur market. It may extend loss by Rs 200 more from current level in Jaipur market against declared MSP of Rs 5575 per qtl. It may trade in the range of Rs 4700 to Rs 5200 in Feb-2018 despite short supply of quality Moong this year. All India Rabi Moong acreage till 19th January 2018 is up by 1.6% to 5.77 lakh ha. It is up in AP by 22.5% to 0.87 lakh ha while down by 1.9% and 50% in Tamil Nadu and Telangana respectively.
- Lentil market is expected to trade steady due to low domestic demand.** Furthermore export demand is also low, as Nepal is offering lentils at \$835-845 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$875-885 per tonne for the same destination. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no

short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip.

International Market Update:

- **Statistics Canada estimated pea yields at 2.217 pounds per seeded acre for a 3.635 million metric tons (MT) crop**, down from last year's 4.112 million MT harvest. Provincial agriculture departments reckon yields are closer to 2,269 pounds for a 3.72 million MT crop.
- **With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks.** Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **As per the latest market update production of Chickpeas in Australia may be around 2.65 lakh tonne.** Queensland production has been pegged at 2.17 lakh tonne. Field Pea production may touch 2.63 lakh tonne, Lentil production has been pegged at 3.47 lakh tonne. Total pulses production including Lupins and Faba beans has been pegged at 1713 lakh tonne. It is 72% lower in case of chickpeas, 9% up in case of peas, 26% down in case of lentils when compared to 2017.
- **Lentil markets traded slightly down from previous week as harvests are on in both the United States and Canada.** Pressure is likely to be on in August as farmers seem to sell 50 % of their crop as soon as possible. Markets were not helped by rising tensions between the United States and Turkey. Fears that will devolve into another trade war had a negative impact on the value of the Turkish lira.
- **Global peas market traded under pressure before likely commencement of harvesting in northern hemisphere.** Major buyers like India & Pakistan are out of market right now and others are waiting for new crop pressure to build up. However, trading activities are seen in feed grade peas. Exporters in Canada have enough stock to cater the incoming demand in the weeks ahead. After harvesting pressure coming to an end, stockists/exporters may be active once again, that may help prices to recover from mid Sep.
- **Global peas market traded under pressure before likely commencement of harvesting in northern hemisphere.** Major buyers like India & Pakistan are out of market right now and others are waiting for new crop pressure to build up. However, trading activities are seen in feed grade peas. Exporters in Canada have enough stock to cater the incoming demand in the weeks ahead. After harvesting pressure coming to an end, stockists/exporters may be active once again, that may help prices to recover from mid August.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,800 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Chana (Chickpeas /Bengal Gram): Fundamental Analysis and Outlook:

Market Recap:

Nafed selling through auction in Mah, Raj,MP and AP has pressurized chana cash market last week and prices are expected to stay steady as millers would prefer to buy chana from central pool stock through auction. In fact selling decision from central pool stock has directly affected demand in cash market and resultantly cash market moved down by Rs 200-300 during last two weeks. In coming weeks upside movement would be limited as availability is expected to be ample. However, lower bids received by Nafed for Chana may encourage it to restrict bulk selling through auction. The future course of chana price would depend on Nafed strategy and planting intention of farmers in Oct. Area in AP is bound to decline by 20 % as farmers have planted chili crop in Chana area. Major price driver would be area coverage in Raj,Mah,MP and Gujarat. Besides, govt may increase MSP for rabi crop like kharif. Overall, tone for chana seems firm in the near to medium term.

All India average price for Chana increased by 3.01 percent to Rs 4266 per qtl. in comparison to July. Australian Chana (imported crop) price increased by 4.49 percent to Rs 4135 per 100kg. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

Nafed selling strategy may cap uptrend in Chana market despite festive demand and lower arrivals in various mandis. Prices are likely to stay steady to slightly firm in Sept due to:

- Improvement in demand and lower availability in private hands.
- Halted import due to 60/70 % import duty for various origins on chana. \lower Australian crop
- Halted arrivals in mandis &
- Good export prospects if govt. increase export incentive from 7 to 15 %

Seasonality Index hints that Chana (gram) is likely to notice steady to slightly firm movement in the Spot market in Sep-2018.

Chana Future Market Analysis:

Technical Commentary:

- Increasing price & OI hint firm market.
- RSI is steady in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Oct	3952	3897	4015	4237	4403
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Oct	Buy on dip	3950	4150	4200	3955

Market Outlook for Sep-2018

Nafed selling would ease supply and cap uptrend in cash market. As stock is lower in private hands and stockists would prefer to hold stock till Nov-Dec, prices of chana may move up from current level. There is a growing perception in the market that govt would increase MSP for rabi crop including chana to like kharif crop and it would influence farmers to grow more. However, it is too early to talk about area. Overall tone for chana market seems firm in the medium term. Nafed has already cancelled Chana selling in Rajasthan and Gujarat due to lower bid received in recent floated tenders.

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

Market Recap:

Pea price did not sustain its higher level in August unlike July. Actually demand got affected at higher level despite lower availability of stock at ports lower chana price and other pulses affected demand in local market. Firmness in pea market depends on govt.'s strategy for import. As stock is lower in domestic market, any unexpected decline is unlikely. Stake holders should buy on dip. If chana prices moves up, it would support peas price too in coming months. As price is lower govt may extend import restriction from Sept upto Dec.

All India average price increased by 0.5 % to Rs 4470 per qtl. in August. In Kanpur market, it traded steady at Rs 4300 per qtl. Higher import cost and lower stock in domestic market may remain supportive in the near to medium term. Import is not possible till 30th sept-2018. more downside revision is unlikely.

Price Dynamics:

In Aug-2018 market traded up due to import restriction and lower stock and is expected to trade steady to slightly weak in Sep due to:-

- Cheaper availability of other pulses
- Weak demand from besan industry
- Weak Chana price&
- Higher availability in local market.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market increased to around 100 per qtl owing to decreased prices of peas. Spread is expected to move in the range of 150 to 250 per quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to slightly weak due to expected improvement in demand at current price.

Seasonality Index depicts that pea prices are likely to notice weak movement in Sep-2018.

Market Outlook For Sep- Steady to slightly weak movement is expected.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

Market Recap:

Lentil market is expected to trade steady due to low domestic demand. Furthermore export demand is also low as Nepal is offering lentils at \$840 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per tonne for the same destination. However, there is no short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip. As per latest update, NAFED will sell lentil at MSP of Rs 4150 per quintal. NAFED has procured 243450.18 MT in MP and UP till 7th July-2018. Government has offered 23994.12 tonnes of lentils in four tender since 13th August until 04th September. Quantity sold by NAFED won't

make much difference as it will be consumed locally. Furthermore, buyers may be reluctant in participating in lentil tenders offered by NAFED, as domestic price of lentil in open market is ruling below MSP.

Price Dynamics:

In Aug-2018, average price in key market Kanpur was down by 0.65 % from Rs 3990 to Rs 3964 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Sep to a certain extent. Firmness is expected due to:

- Declining stock/higher retention
- Likely improvement in demand
- Higher percentage of Stockists holding &
- Costly import. lower crop size in Canada

Seasonality Index depicts range bound to slightly firm movement in Sep-2018.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Normally tur dal demand increases from Sep and continues till Nov when new crop hits the market. So Agriwatch expects prices to stabilize near current level and move up once demand for festive season starts. Continued selling by stockists of imported Tur in Mumbai pressurized tur market by Rs. 100 to Rs 3300 -3400 per quintal. New crop is three months away now while Maghee tur would come in January from Maharashtra and Karnataka. Old imported tur stock (around one lakh tonne) of Malawi and Mozambique is still left unsold, which may pressurize the market. However, demand from dal millers around Rs 3500-3600 may help market to sustain at current level. Tur price may move up if fear of lower yield and likely festive demand materialize into reality.

Market Recap:

Tur market is expected to stay steady to slightly firm on the back of higher MSP(Rs5850) . Burma offered lemon tur new & old at \$320 per tonne basis Indian port. Linkely was offered at \$360 per tonne basis Indian port.

Price Dynamics:

In Aug-2018, average price in Mumbai market was up by around 1.75% to Rs 3800 per qtl. due to improved demand against lower supply. In Sep market is likely to improve due to

- Higher MSP
- Likely festive demand
- Fear of lower area coverage& and uneven rainfall in major growing region specially Karnataka, and Gujarat
- Comparatively Lower stock in mills.

Seasonality Index- depicts steady to range bound movement with firm bias in Sep

Production- According to the Agriwatch preliminary estimate, Tur production for MY 2018-19 has been pegged at 38.95 lakh tonne, slightly up from last year(38.67 lakh tonne). Govt. has revised Tur production estimate slightly up from 4.18 MMT to 4.25 MMT in 4th adv. estimate released on 28.09.2018 against set target of 4.25 MMT for 2017-18. Govt has released final production fig for 2016-17 at 4.87 MMT.

Market Outlook for Sep:

Tur prices are likely to trade steady to slightly firm. However, stake holders should start buying on dip. Market may move up once again to a certain extent as demand for dal is likely to improve. There is a fear of damage in Karnataka as standing crop is facing drought like condition and it has hampered plant growth. However, crop condition in other states are good so far and it may negate impact of lower yield in Karnataka. Cash market is expected to move up by Rs 200 from current level as stock is decreasing. New crop is due in Dec and govt would procure it at higher price, so any downward move from current level is unlikely.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

New Urad started in Karnataka, Maharashtra, MP and is due in other markets too. State agencies have yet to start procurement and it may support market at current level. Right now market is trading under pressure and decreased by Rs 100. More downside movement is unlikely. Likely commencement of procurement, report of crop damage in some pockets in MP and Gujarat and retail demand from mid Sep may push up urad market up from current level. As new crop has higher moisture level, prices are lower and it would improve soon. Stake holders should buy urad and hold it for two three months. If rains continue in the second half of Sept too, standing and late sown crop may get damaged and would affect final size of the crop. Area under kharif sowing is already lower by 12 percent and it is heading towards end now.

Price Dynamics:

In Aug, average prices in key markets including Mumbai were up by 0.86 percent, from 3796 to Rs 3878 per qtl. In Chennai it is being traded at Rs 3950-4050. Prices may stay steady to slightly weak due to

- New arrival
- High moisture level in crop
- Lower demand from bulk buyers &
- Higher carryout

Seasonality Index depicts steady to slightly weak movement in the near term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad production for MY 2018-19 has been pegged at 19.95 lakh tonne against 26.7 lakh tonne 2017-18. Govt., in 4th adv estimate, has estimated 28.4 lakh tonne crop for 2017-18 against the set target of 18.5 lakh tonne. Rabi estimate is 7.3 lakh tonne for 2017-18.

Market Outlook for Sep: Prices are likely to trade steady to slightly weak.

Fundamental Analysis and Outlook For Moong:

Market Recap:

There is no parity for moong from any markets. However, weak demand for dal has suppressed moong price in major domestic markets. As supply is lower from Rajasthan this year, further downside from current level is unlikely. There are reports of lower crop from Kekri, Shekhawati and Kishangarh regions. Besides, some quality issue may surface from Akola and Khamgaon regions of Maharashtra. Moong from Kanpur and Allahabad is of lower quality. All these developments may keep moong market supported. It is being traded at Rs4400 to Rs 5300 per qtl in Kanpur. Besides, govt. would procure moong at MSP. So any major dip in cash moong market is unlikely. In Jaipur market moong is being traded at Rs.4800-4900. Major mandis may trade in the range of Rs 4800-5400 per qtl. in Sept, where procurement agencies are not active. Stake holders should hold stock.

Price Dynamics:

Moong market may move up due to hike in MSP for kharif 2018-19 crop but not before correction of Rs200 to Rs300 per qtl due to kharif arrival. New arrival may pressurize market first ,so buying at dip is good. Burma offers Moong At \$680-7005per tonne. Prices may stay steady to slightly weak due to

- Kharif arrival despite massive hike in MSP
- Higher stock available in domestic market
- Higher area coverage in kharif season
- Weak demand from bulk buyers&
- Continuous selling from central pool stock.

Seasonality Index depicts steady to slightly weak movement .

Market Outlook for August:

Steady to weak movement is expected in Sept

Pulses Wise Technical Outlook for September-2018 :-

Chana:

Outlook –We expect prices to notice steady to slightly firm movement in the near to medium term. Improvement in demand is likely at current level. Import would remain halted due to lower crop size in Australia and hefty import duty.

- ❖ Chart depicts steady to slightly firm movement in the weeks ahead.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4100 to 4400 levels in this month.

Trade Strategy: Buy on dip.

Trade Recommendations: Go long around 4050 with the first target of 4350 and second target 4450 with stop loss at 4000 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3900	4000	4100	4550	4700

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slight weak movement in this month taking clue from lower demand and ample stock at ports to cater the need for one month. Cheaper availability of other pulses too has impacted peas demand.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4000-4400 in this month.

Strategy: sell on rise

Trade Recommendations: Go short around 4350 with the first target of 4100 and second target 4050 with stop loss at 4450 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3950	4000	4200	4500	4750

Masoor :

Desi Masoor (at Kanpur) Spot Market Monthly Chart:

Outlook –Range bound to slightly firm movement is likely to be noticed in this month.

- Chart depicts firm movement in the market.
- RSI oscillator is moving up in the neutral region.
- Expected price band is 3750 to 4150

Strategy: Buy on dip

Trade Recommendations: Buy around 3750 with the first target of 3950 and second target 4050 with stop loss at 3700 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3700	3850	3825	4200	4350

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to notice range bound to slightly firm movement.

- Candlestick chart denotes firm tone in the market.
- Oscillator RSI is moving up in neutral region.
- We expect Tur prices to trade in the range of 3700-4300.

Strategy: Buy On dip

Trade Recommendations:-Go long around 3800 with the first target of 4000 and second target 4150 with stop loss at 3750 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3600	3750	3850	4350	4550

Urad

Urad FAQ- Burma Origin (at Mumbai) Spot Market Monthly Chart

Outlook - We expect steady to slightly weak price movement in current month .

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price range is 3600-4000

Strategy: Buy on dip.

Trade Recommendations: Buy around 3550 for a target of 3800 -3850 and keeping stop-loss at 3500

Supports & Resistances

Export fig for 2017-18 is tentative

India MSP For Pulses:

MSP (Rs/Quintal) For Crop Year From 2011-12 To 2017-18 (It includes Bonus too)								
MSP (Rs/Quintal)	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19*
Tur (Arhar)	3200	3850	4300	4350	4625	5050	5450	5675
Moong	3500	4400	4500	4600	4850	5225	5575	6975
Urad	3300	4300	4300	4350	4625	5000	5400	5600
Gram	2800	3000	3100	3175	3425	4000	4400	
Lentil (Masur)	2800	2900	2950	3075	3325	3950	4250	

Note:* recommended by CACP

- Central govt.has given approval to increase MSP for kharif 2018-19 crops and tried to fulfill its promise to ensure 1.5 times of production cost for farmers which was made in the budget.In pulses segment a hefty hike was seen in green moong price.As per the CACP estimate, production cost for moong is Rs4650 per qtl.for ensuring 50% over this price for farmers,govt. has green signaled to increase it from Rs 5575 to Rs6975 per qtl.It is higher by Rs 1400 per qtl.
- In pigeon peas case it has been increased by Rs 200 from 5450 to Rs5675 per qtl.As per govt.'s external estimate production cost for Tur is Rs3432 per qtl.On this basis of production cost the increase ensures 65.36 % of production cost for farmers.

- In case of Black Gram, it has been hiked by Rs 200 from Rs5400 to Rs 5600 per qtl. As per govt.'s external estimate production cost of black gram is Rs3438 per qtl. With increased price farmers would get 62.89% higher than actual production cost for kharif crop under planting stages now.
- Impact of this hike may disturb acreage of various pulses as farmers would grow more green gram and reduce area under pigeon pea and black gram, specially in MP, Rajasthan, Maharashtra, Gujarat, UP and Bihar. Private buying would decrease from moong and govt would have to buy more crop under price support scheme. As there would be no option for export at higher rate, govt would have to sell it in domestic market at lower price and it would distort normal market trading.
