- Monthly Outlook

Supply & Demand

Pulses-Wise Summary

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- **All India kharif Pulses area is lagging behind by 1.11 % to 137.93 against 139.49 lakh ha last year as on 20th Sep-2018.** Farmers have covered 45.83 lakh ha against 45.56 last year under Tur till date, higher by 0.58% from last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 8.97 % to 40.37 against 44.35 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 7.41 % to 34.36 lakh ha against 31.99 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is down by 0.45 % than last year. It is 16.46 against 16.53 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has decreased by 13.08 % to 0.92 lakh ha against normal of 2.27 lakh ha so far. Kharif sowing season is almost ended now.
- **Nafed is intended to sell chana stock at around Rs 4000 per qtl, from mid Oct and it may cap uptrend in the market.** Higher MSP for Chana for crop year 2018-19 has been declared at Rs 4620 against 4400 last year including bonus of Rs 200. It has lent some support to cash market. As stock is at higher side and Nafed has to procure kharif pulses, selling by Nafed soon seems very much on the sight. Import is not possible due to higher import duty. Despite all these bullish factors, sowing progress starting from third week of Oct would be main price affecting factor. If sowing decreases, as expected, price of chana may cross MSP level. So sowing progress from 15th Oct to Nov remains vital force for chana price trend in the third quarter of the year.
- **Lower kharif Urad area by 8.97% to 40.37 lakh ha, likely lower yield in Latur & Udgir line and unexpected rains at maturity stage affecting quality of crop** would remain price supporting factors for urad cash market in coming weeks. Cash market may move up by Rs 200-300 from current level. Quality of Urad was affected in MP and Chhattisgarh too and lower yield in other area have encouraged mills to commence buying. Stockists too are active now and it has supported market to a certain extent. Yield loss in Udgir and Latur line is said to be 200 KG per ha against normal of 275-300 KG per ha. Mills would continue to buy for their immediate requirement. Besides, stock to use ration is coming down. So, overall outlook for Urad seems positive.
- **Lemon Tur in Mumbai market is being traded at Rs3375 to 3450 per qtl, depending on quality of crop.** Millers are active in buying in narela, Bawana and Raiee line at Rs3550-3575 per qtl. New buying spree may push up price by Rs100 -150 from current level. Notably, arrival from Jaitua Tur in Katni, Indore line has decreased considerably. There is no supply from Nimuch line. So Agriwatch expects market to move up despite availability of imported stock from Sudan and Mozambique. Imported stock is decreasing now. Millers are buying imported Tur and selling it at Rs5500-5600 in Varanasi, Dewaria and Gorakhpur line on delivered basis. As imported stock is decreasing, market is expected to get support at this level. Report of crop loss in Karnataka too seems favorable for cash market. Festive demand for dal would help market to recover.
- **Moong crop was affected in Ajmer and Bikaner line by recent rains and discoloured grain is affecting price sentiments.** Shortage of quality grain in these areas and its higher price have eroded parity for Delhi market. Poor quality moong in Delhi market is being traded in the range of Rs4500 to Rs4600 per qtl. Even pressure from UP too has decreased now. Besides, sellers have retained stock of good quality in Allahabad line even at Rs5000 per qtl. Arrival from old stock too has decreased. However new moong started hitting the market from Kishangarh region of Rajasthan. Arrival is below expectation from Kehriline too. Arrival is expected to increase from Shekhawatiline. So price of good quality crop may move up in coming weeks. Procurement drive is expected to keep market supported.
- **Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as Indian export quotes are high.** Nepal is offering lentils at \$800-810 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. NAFED sold 10815 MT of masoor at an average price of Rs 3551.46 per quintal until 29th September'18. NAFED has balance of 223707.39 tonnes and 8959.57 tonnes in Madhya Pradesh and Uttar Pradesh respectively. NAFED will try to sell 60 percent of its masoor stock in order to make space for procuring moong and urad in upcoming Rabi season. Furthermore, export demand is also low, as Nepal is offering lentils at \$835-845 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$875-885 per tonne for the same destination.
- **Govt may decide incentives for agri-exports soon. If incentive is raised from 7 percent to 10 or 15 percent, it may support all pulses market at current level.** Demand too for all pulses is likely to increase. Procurement drive in major states too would commence from 20 Oct. So Agriwatch expects market to improve.

International Market Update:

- **Global chickpea market traded steady during the week under review.** Demand remains weak and higher availability of medium and small chana continues to weigh on market fundamental. According to Statistics, Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Lentil Production in Canada is expected to decline by 15.31 % from 25.59 to 21.67 lakh tonne in 2018-19.** Import has been estimated same as last year at 35,000 MT. Despite lower production, carryout is expected to decrease slightly from 8.76 to 8 lakh tonnes. Even area is expected to decline by 14.47 % to 15.25 lakh ha. It was 17.83 lakh ha last year. Yield has been estimated to remain same as last year at 1.44 tonne per ha. Export may increase by 16.88 % to 18 lakh tonnes in 2018-19. It was 15.40 lakh tonne in 2017-18. Prices are likely to hinge in the range of \$370 to 400 per MT
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19.** It was 16.56 lakh ha last year. Yield is expected to increase slightly from 2.50 to 2.55 tonnes per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonnes in 2018-19. It was 41.12 lakh tonnes in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonnes in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonnes. Prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to aggressive buying by Turkey and EU. Despite India being out of global market, carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year. Average price is expected to decrease considerably as global supply side is ample right now. It may hinge in between \$450 to \$485 per MT. Area in US is expected to increase to 0.66 million acres. Production in US may increase to 0.43 MMT in 2018-19.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonnes, lower by 69.43% from last year (2017-18). Even lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonnes. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India is out of global market right now due to ample availability of pulses in India.
- **Myanmar exported around 7 lakh tonne pulses and beans in last six months beginning from April-2018** despite restricted buying by Indian importers. Till August, India imported pulses and beans from Myanmar under restricted quota and considering the ample availability in domestic market, India is not going to allow pulses import beyond limit with certain conditions/license to import according to Min Ko Oo, secretary of Myanmar Pulses, Beans & Sesame Seeds Merchants Association.
- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually.** This year Myanmar might be able to export 12 lakh tonnes pulses and beans. Pulses prices are lower in Myanmar as major buyers like India is almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar
- **Lentil markets traded slightly down from previous week as harvests are on in both the United States and Canada.** Pressure is likely to on in August as farmers seem to sell 50 % of their crop as soon as soon as possible. Markets were not helped by rising tensions between the United States and Turkey. Fears that it will devolve into another trade war had a negative impact on the value of the Turkish lira.
- **Global peas market traded under pressure before likely commencement of harvesting in northern hemisphere.** Major buyers like India & Pakistan are out of market right now and others are waiting for new crop pressure to build up. However, trading activities are seen in feed grade peas. Exporters in Canada have enough stock to cater to the incoming demand in the weeks ahead. After harvesting pressure coming to an end, stockists/exporters may be active once again, that may help prices to recover from mid-August.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in Oct.

Pulses Supply & Demand:

Note: Agriwatch 1st Adv Estimate For 2018-19 for Urad ,Moong & Tur, Feedback source: MoA, IPGA, Trade source, Agriwatch & CACP

Urad: Urad production is likely to decline by 3.49 % from 25.47 to 24.58 lakh tonne due to lower crop area by 8.97% to 40.37 lakh ha. Import is expected to increase by one lakh tonne to 2.5 lakh tonne including G2G import. Total supply would increase slightly from 35.67 to 36.05 lakh tonne in 2018-19. Export would increase to 0.3 lakh tonne due to export incentive. Consumption would increase from 26.7 to 27.8 lakh tonne in 2018-19. So, carryout would decrease slightly from 8.97 to 8.25 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So any unexpected spike is unlikely.

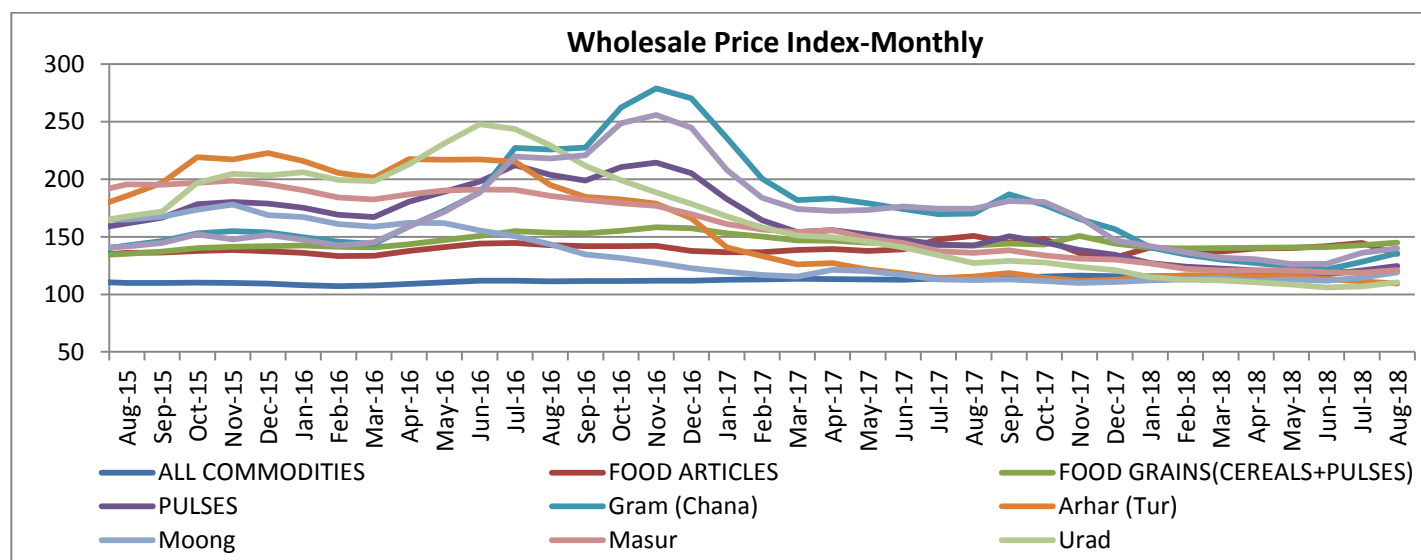

Moong: Moong production is likely to increase by 5.24 % from 19.25 to 20.26 lakh tonne due to higher crop area by 7.41% to 34.36 lakh ha in kharif season. Import is expected to remain same at 1.5 lakh tonne as last year. Total supply is expected to increase from 28.96 to 29.02 lakh tonne in 2018-19. As there is a demand from overseas market amid export incentive, export is likely to increase from 0.2 to 1 lakh tonne this year. Consumption would increase from 21.5 to 23.5 lakh tonne. Total usage is expected to touch 24.5 lakh tonne. Increase in export and consumption figure this year would drag down carryout from 7.26 to 4.52 lakh tonne. So any major decline in moong price is unlikely.

Tur: Tur production is likely to increase by 0.8 % from 38.67 to 38.98 lakh tonne due to higher crop area by 0.58 to 45.83 lakh ha. Import is expected to increase by 2 lakh tonne to 2.5 lakh tonne due to cheaper availability in Myanmar. Total supply would decrease slightly from 50.32 to 49.55 lakh tonne due to decrease in carryin stock from 9.65 to 8.07 lakh tonne. Export may increase from 0.25 to 0.50 lakh tonne due to export incentive. Consumption may increase from 42 to 43.5 lakh tonne in 2018-19 due to cheaper availability of dal. With export, total consumption has been pegged at 44 lakh tonne. Higher consumption would drag down carry out to 5.55 lakh tonne this year. Market is expected to find balance now and price would improve.

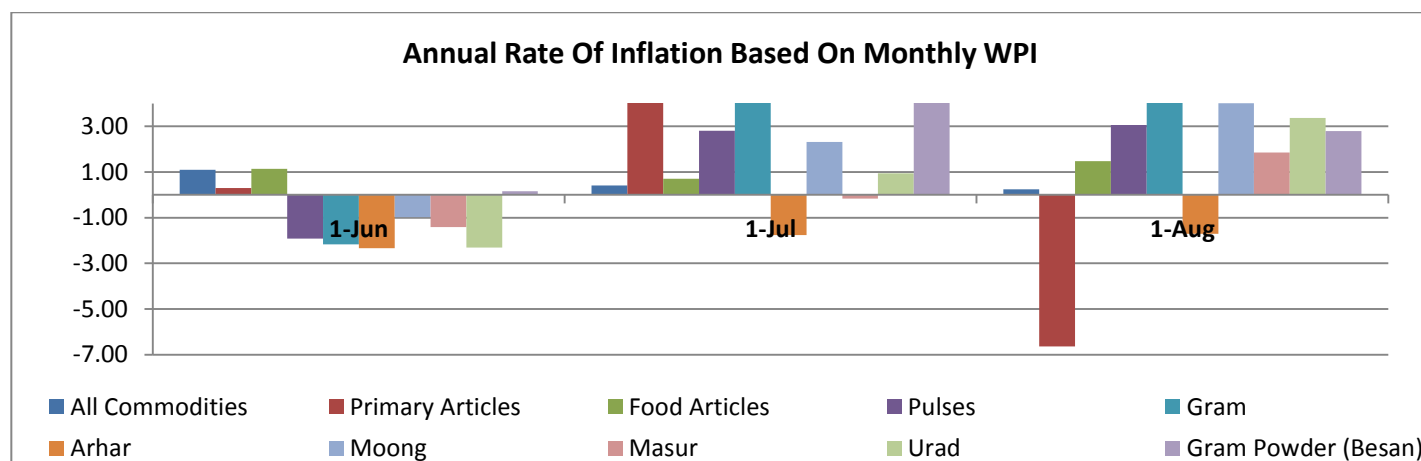

Chana: Higher carry-in of 11.66 lakh tonne and 94.54 lakh tonne reduction in 2018-19 amid 2 lakh tonne import total supply increased from 101.91 to 108.2 lakh tonne. As chana price is lower in domestic market India is expected to export 2 lakh tonne chana/dal this year. Consumption has been pegged at 91 lakh tonne, so total usage is expected to increase to 93 lakh tonne this year. Due to higher production, new season (Mar-2019) would start with 15.2 lakh tonne as carryin. Supply side is at comfortable level and Nafed has enough stock (27 lakh tonne) to take care of any spike in chana price. However, higher MSP (Rs4620) for next crop would keep market supported at current level. Planting area (starting from oct end) would influence chana price in domestic market.

Masur: MY 2018-19 started with 7.09 lakh tonne amid 12 lakh tonne production. Import has declined from 7.96 to 3 lakh tonne in 2018-19 due to higher import duty of 40%. It may be increased further. So, import would not exceed from 3 lakh tonne in any case. It would drag down total supply from 25.92 to 22.09 Lakh tonne. Export would increase slightly from 0.11 to 0.2 lakh tonne this year. Consumption has been pegged slightly up from 18.72 to 19 lakh tonne. Thus, total usage is expected to move up to 19.2 lakh tonne. It drags down carry in to 2.89 lakh tonne for next season beginning from Feb-2019. As supply side is at comfortable level, higher MSP may support market at current level. Steady to slightly firm tone may prevail.

Agri Commodity Indices –August-2018:

Pulses WPI: Pulses WPI increased by 3.7 point from 120.8 in Jul to 124.5 in Aug-2018

Chana (Chickpeas /Bengal Gram): Fundamental Analysis and Outlook:

Market Recap:

Cabinet has approved hike in Chana MSP by Rs 220 per qtl to Rs4620 against 4200 plus Rs 200 per qtl as bonus. It is still unclear whether MSP hike has been approved over and above Rs4400 or on Rs4200 per qtl. Masur MSP has been hiked by Rs 225 per qtl. to Rs 4475. It may help market to recover, if Nafed delays selling. Chana cash market traded steady at Rs 4350-4450 in Delhi market despite increase in MSP. Nafed's restricted selling may lend support to cash chana market in the short term. Buyers and millers are active to meet their festive demand. Import is not possible at higher duty while stockists have started retaining stock for better price in coming months. So, any major correction in chana market is unlikely in Oct. It may move up towards MSP level first. If area is decrease from last year, it may support cash market after Nov.

All India average price for Chana decreased by 3.41 percent from Rs 4266(Aug) to 4130 per qtl. in Sep Australian Chana(imported crop) price too decreased by 4.0 percent to Rs 3968 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

Higher MSP and retention by stockists amid NAFED intention to sell not below 4000 may help market to improve to a certain extent. Festive demand and lower arrivals in various mandis would remain supportive. Prices are likely to stay steady to slightly firm in Oct due to:

- Higher MSP(Rs4620) for new crop.
- Halted import due to 60/70 % import duty for various origins on chana
Lower arrival in mandis / Nafed intention to sell near Rs 4000 from its stock
- Good export prospects if govt. increase export incentive from 7 to 10- 15 %

Seasonality Index hints that Chana (gram) is likely to notice steady to slightly firm movement in the Spot market in Oct-2018.

Chana Future Market Analysis:

Technical Commentary:

- Increasing price & OI hint firm market.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed above 9 and 18 days EMAs

Strategy: Buy on dip

Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Nov	Buy on dip	4150	4285	4320	4080

Market Outlook for Oct-2018

Overall sentiment seems steady to slightly firm

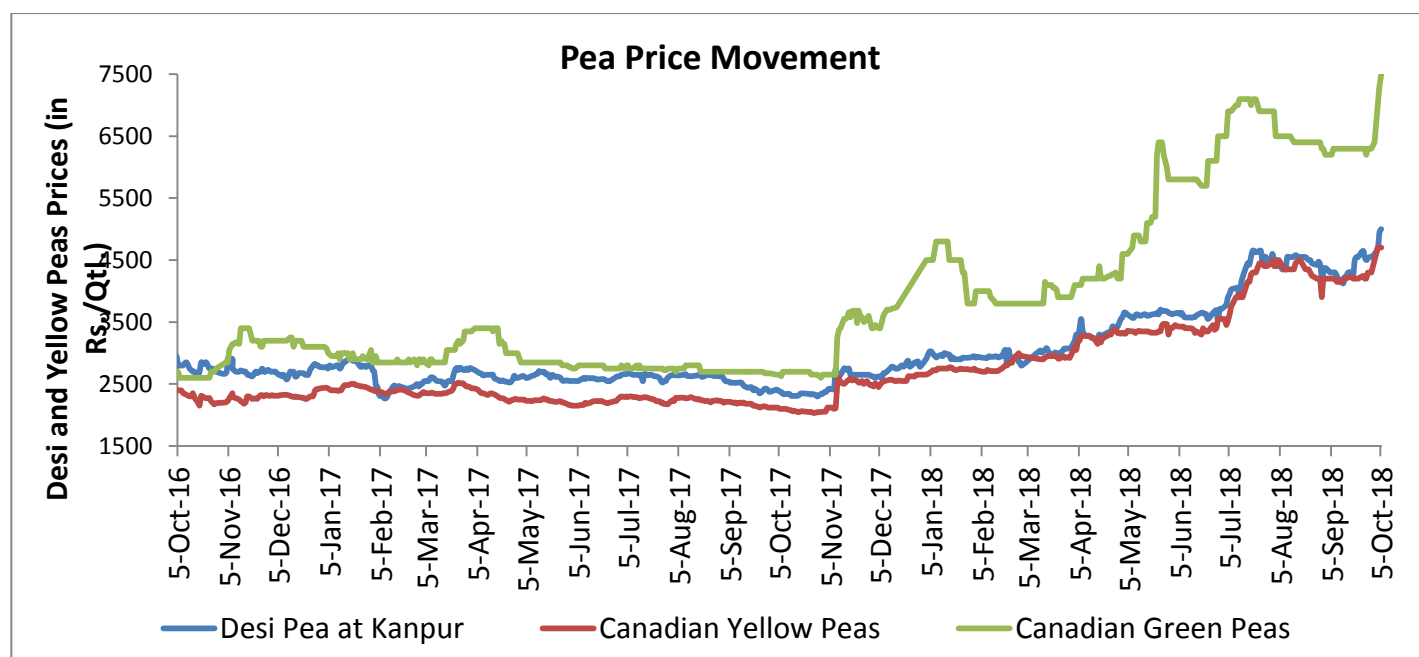

Field Pea (Matar /Dry Pea):

Fundamental Analysis and Outlook:

Market Recap:

Pea prices gained smartly by the end of Sep due to restriction on import extended till Dec. Stock available in domestic market and at ports is said to be lower than consumption till Dec. Demand in domestic market started improving due to festive season and it would keep pea price supported at current level. Chana price too is increasing, so any major downward trend in Oct is unlikely. India has imported 34757.26 MT of yellow pea at an average CiF of \$274.95 per tonnes during the month of August -2018. Of the total quantity around 16977 tonnes has been purchased from Russia, 16592.48 tonnes from Ukraine and the remaining quantity from Unites States and Canada India has imported 4626.03 MT of green pea at an average CiF of \$312.38 per tonnes during the month of August-2018. Of the total quantity around 3864.87 tonnes has been purchased from Canada and the remaining quantity from Unites States. Overall tone seems firm.

All India average price increased by 8.91 % to Rs 4580 per qtl. in Sep. In Kanpur market, it traded firm at Rs 5000 per qtl. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the near to medium term. Import is not possible till 30th Dec-2018.

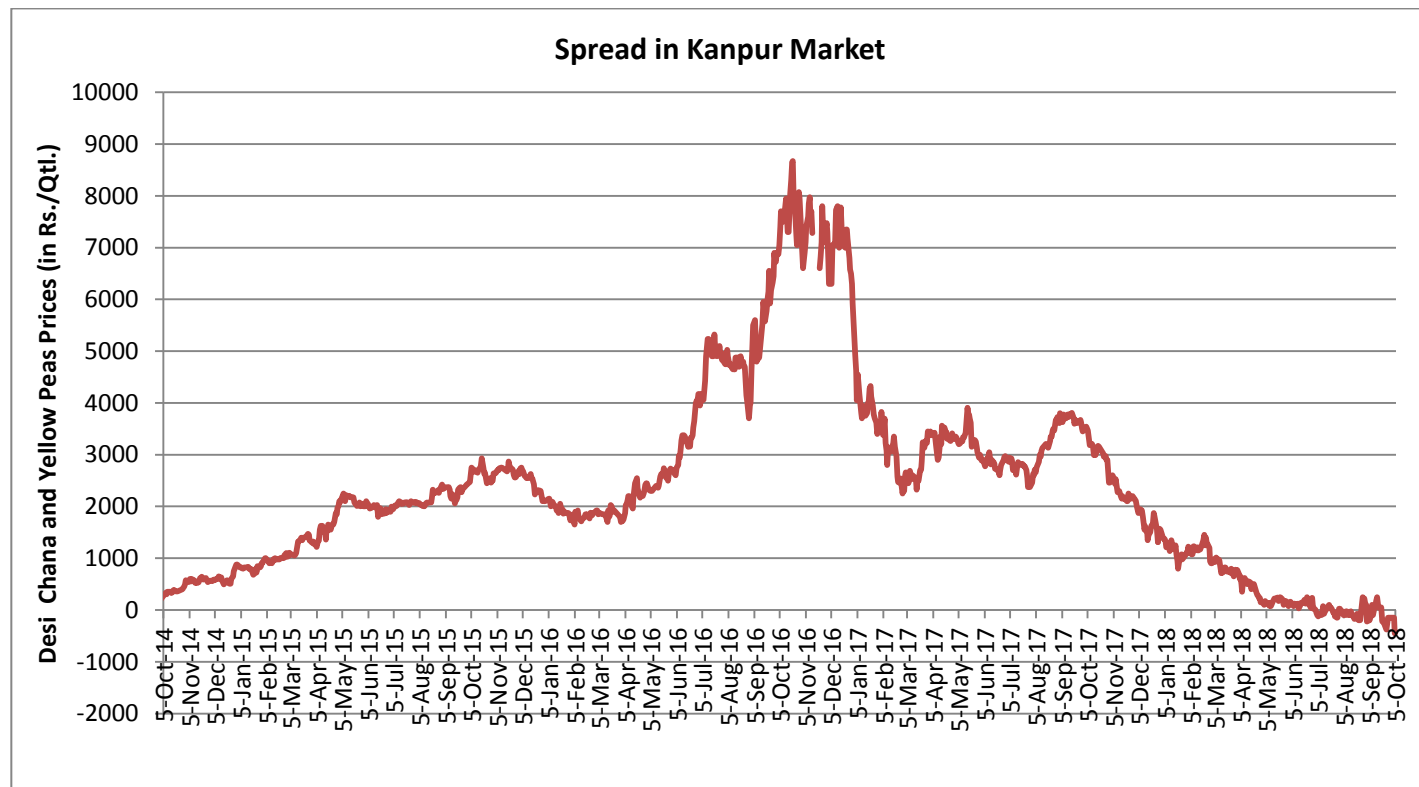

Price Dynamics:

In Sep-2018 market traded up due to import restriction and lower stock and is expected to trade steady to slightly firm in Oct due to:-

- Import restriction
- Lower stock in domestic market
- Firm Chana price &
- Good festive demand

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved smartly in negative zone due to smart gain in pea price. Spread is expected to move in the negative range of 400 to 600 per quintal in the Oct on relative movement in Chana prices. Overall outlook seems steady to slightly firm due to expected improvement in demand and restricted import.

Seasonality Index depicts that pea prices are likely to notice firm movement in Oct-2018.

Market Outlook For Oct- Steady to slightly firm movement is expected.

Masoor (Lentils/ Masoor):

Fundamental Analysis and Outlook:

Market Recap:

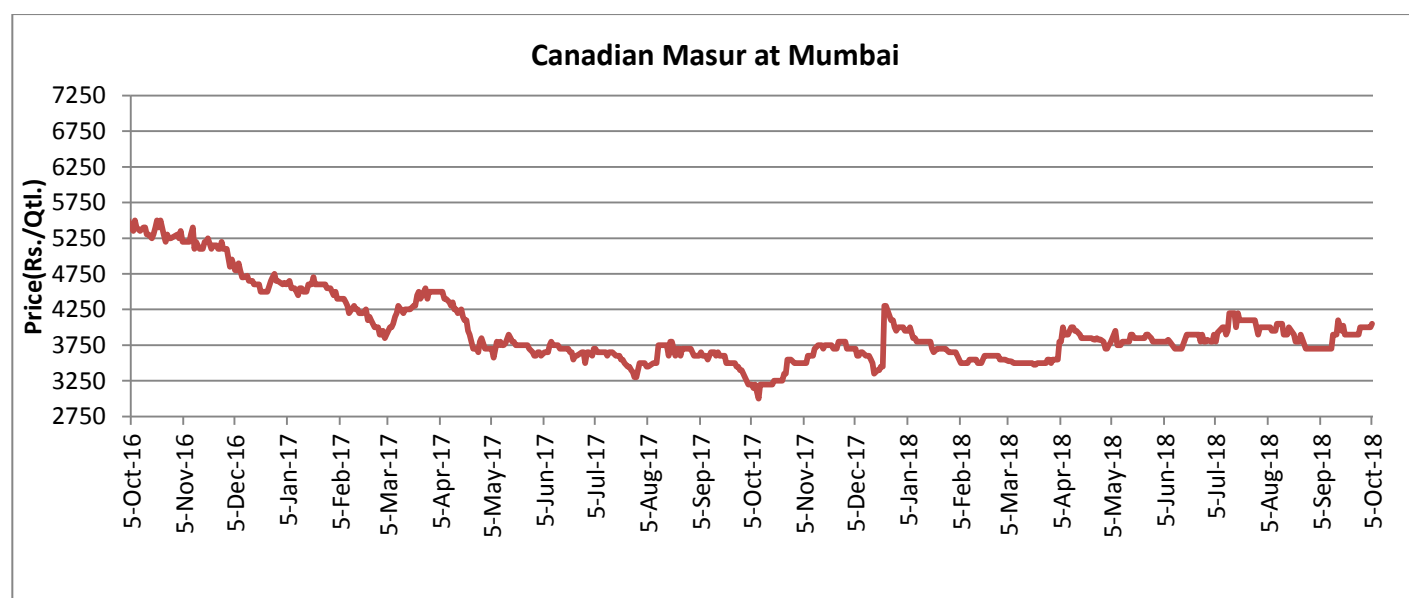

Lentil market is expected to move steady to firm on expectation of import duty hike and export incentive in Oct. Import quantity remains restricted amid hope for improvement in demand due to festive season. As there is plenty of stock lying in NAFED godowns, any major spike is unlikely. India has imported 34757.26 MT of yellow pea at an average CiF of \$274.95 per tonnes during the month of August -2018. Of the total quantity around 16977 tonnes has been purchased from Russia, 16592.48 tonnes from Ukraine and the remaining quantity from United States and Canada. As per notification issued by DGFT, import of peas (Yellow peas, Green peas, Dun peas and Kaspas peas) remains restricted until 30.12.2018. Prices are expected to recover from current level. So, upward momentum is likely to a certain extent.

Price Dynamics:

In Sep-2018, average price in key market Kanpur was down by 1.81 % to Rs 3892 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Oct to a certain extent.

Firmness is expected due to:

- Higher MSP (Rs 4475 per qtl) for new crop
- Likely export incentive
- Declining stock/higher retention
- Likely improvement in demand
- Higher percentage of Stockists holding &
- Costly import. lower crop size in Canada

Seasonality Index depicts range bound to slightly firm movement in Oct-2018.

Tur (Toor/ Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Demand for tur dal is increasing and is likely to continue till November. Besides, there is a fear of yield loss in Karnataka. So Agriwatch expects prices to move up from current level. However, import flow is restricting uptrend. New crop is two months away from now while Maghee tur would come in January from Maharashtra and Karnataka. Old imported tur stock (around one lakh tonne) of Malawi and Mozambique is still left unsold, which may cap the market. However, demand from dal millers around Rs 3500-3600 may help market to sustain at current level. Tur price may move up if fear of lower yield and likely festive demand materialize into reality.

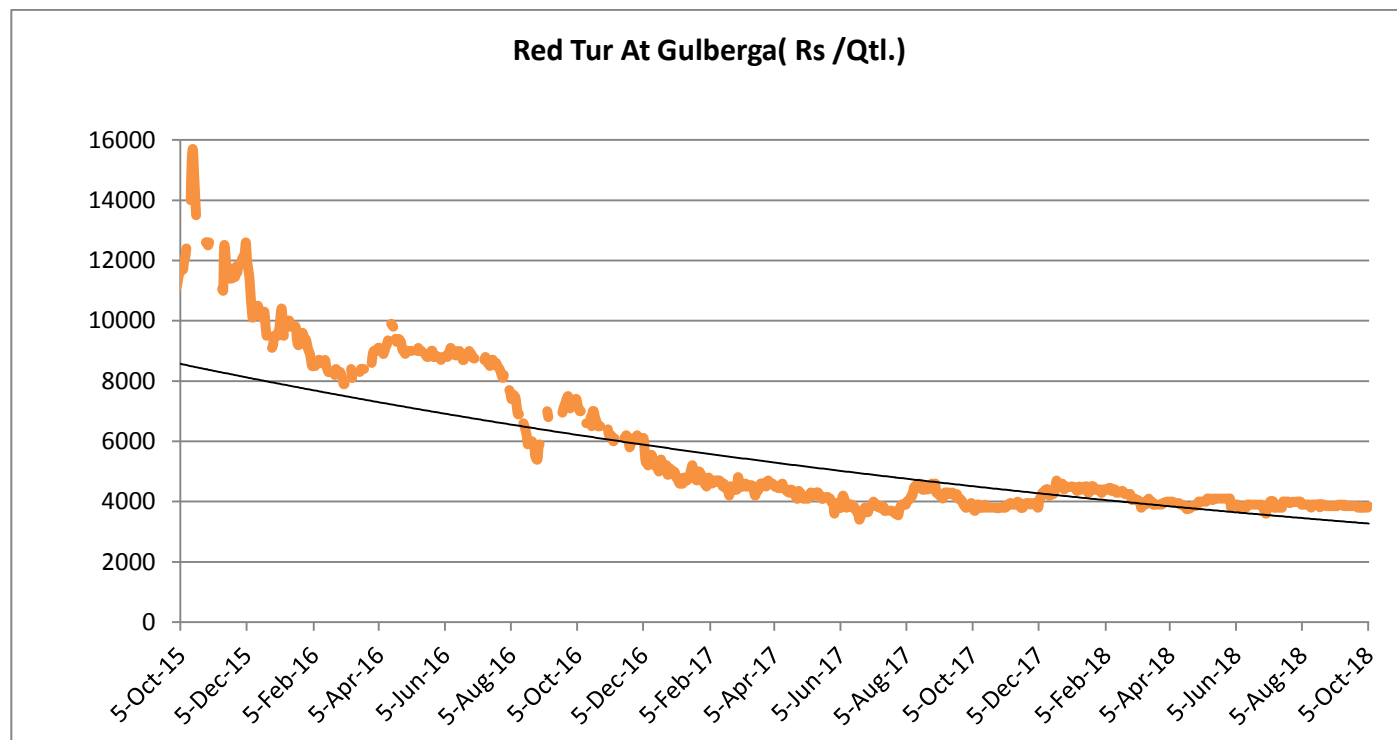

Market Recap:

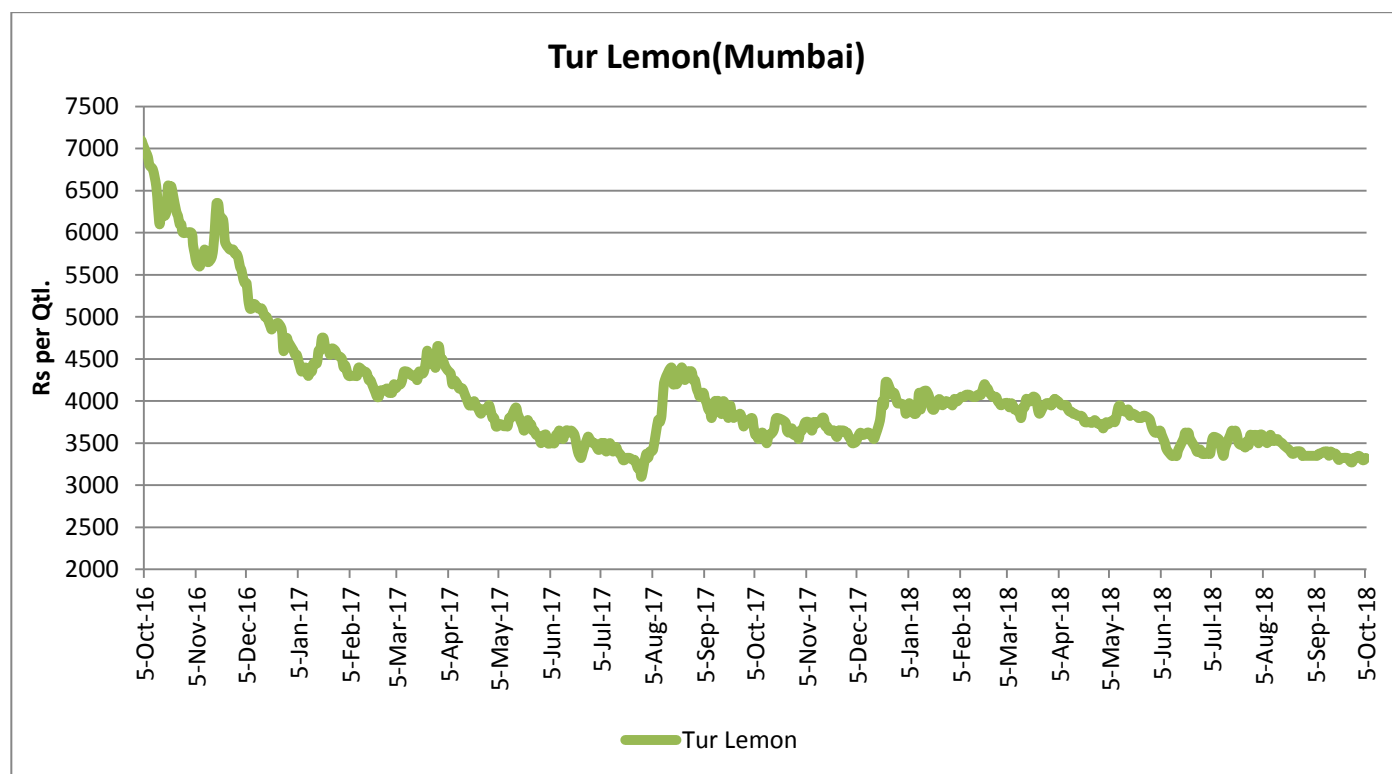

Tur market is expected to stay steady to slightly firm on the back of higher MSP(Rs5675). Burma offered lemon tur new & old at \$360 per tonne basis Indian port. Linkely was offered at \$370 per tonne basis Indian port. Overall trend seems firm.

Price Dynamics:

In Sep-2018, average price in Mumbai market was down by 1.13 % to Rs 3345 per qtl. due to poor demand against higher supply side. In Oct, market is likely to improve due to

- Higher MSP
- Likely festive demand
- Fear of lower yield & and uneven rainfall in major growing region specially Karnataka and Gujarat
- Comparatively Lower stock in mills.

Seasonality Index- depicts steady to firm movement in Oct

Production- According to the Agriwatch preliminary estimate, Tur production for MY 2018-19 has been pegged at 38.95 lakh tonne, slightly up from last year(38.67 lakh tonne). Govt. has revised Tur production estimate slightly up from 4.18 MMT to 4.25 MMT in 4th adv. estimate released on 28.09.2018 against set target of 4.25 MMT for 2017-18. Govt has released final production fig for 2016-17 at 4.87 MMT. In first adv estimate for 2018-19 it has been pegged at 40.8 lakh tonne.

Market Outlook for Oct:

Fundamental remains supportive for Tur cash market and outlook seems firm.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

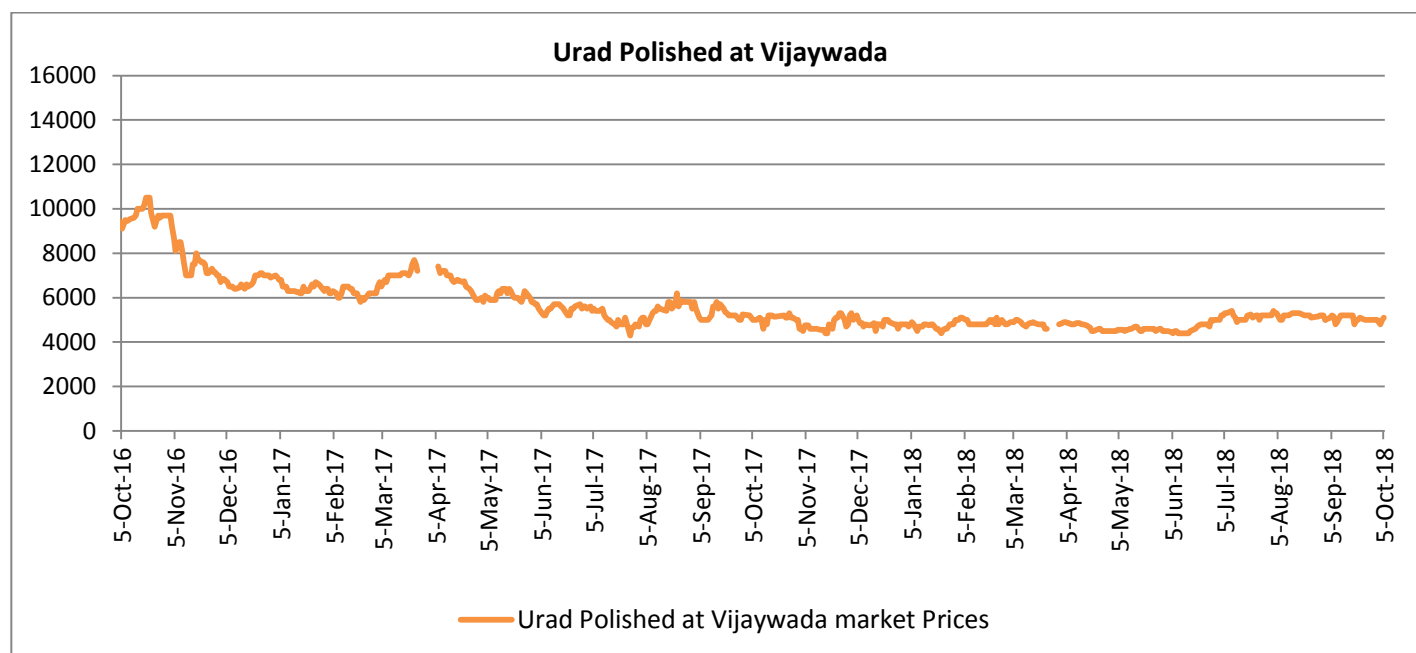

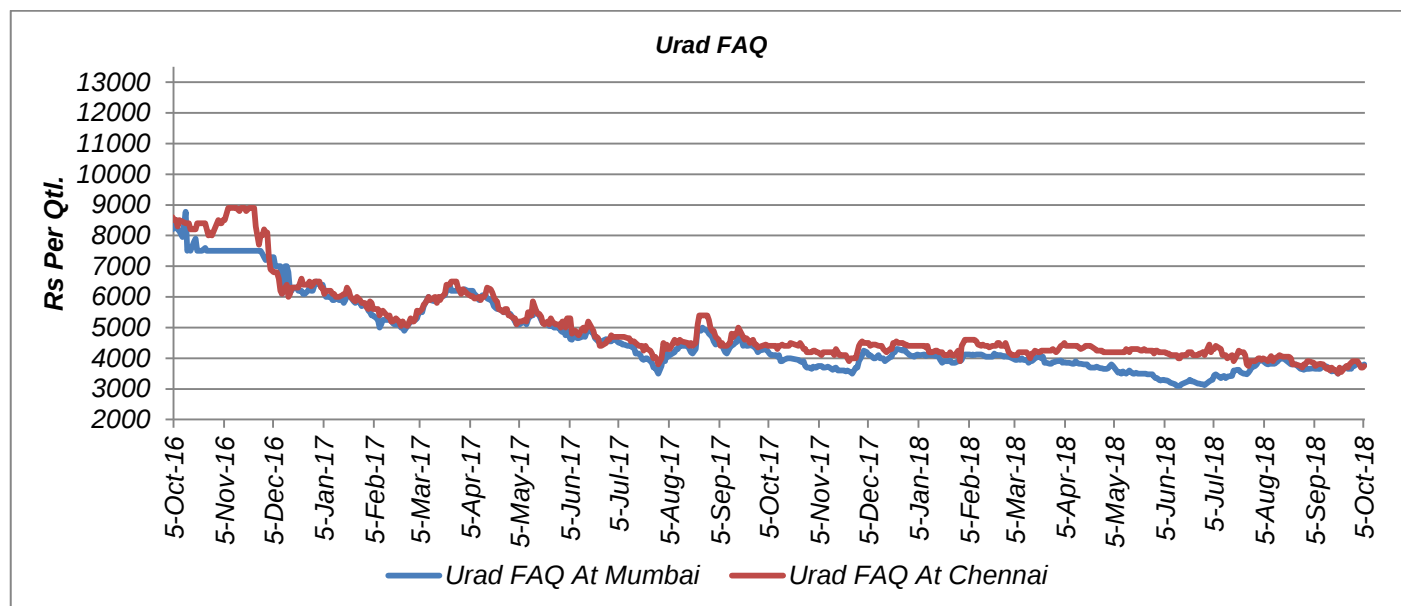

Lower kharif area by 8.97% to 40.37 lakh ha, likely lower yield in Latur & Udgir line and unexpected rains at maturity stage affecting quality of crop would remain price supporting factors for urad cash market in coming weeks. Cash market may move up by Rs 200-300 from current level. Quality of Urad got affected in MP and Chhattisgarh and lower yield in other area have encouraged mills to commence buying. Stockists too are active now and it has supported market to a certain extent. Yield loss in Udgir and Latur line is said to be 200 KG per ha against normal of 275-300 KG per ha. Mills would continue to buy for their immediate requirement. Besides, stock to use ration is coming down. So, overall outlook for Urad seems positive.

Price Dynamics:

In Sep, average prices in key markets including Mumbai/were down by 4.46 % percent, from 3878 to Rs 3705 per qtl. In Chennai it is being traded at Rs 3750-3850. Prices may stay steady to slightly firm due to

- Procurement on MSP
- Crop loss in Raj, Mah and Raj
- Lower area coverage

- Commencement of buying by mills &
- Poor quality of new crop

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad production for MY 2018-19 has been pegged at 18.81 lakh tonne against 19.19 lakh tonne 2017-18. In first adv estimate govt has projected 2.65 MMT urad production for 2018-19.

Market Outlook for Oct: Prices are likely to trade steady to slightly firm in Oct.

Fundamental Analysis and Outlook For Moong:

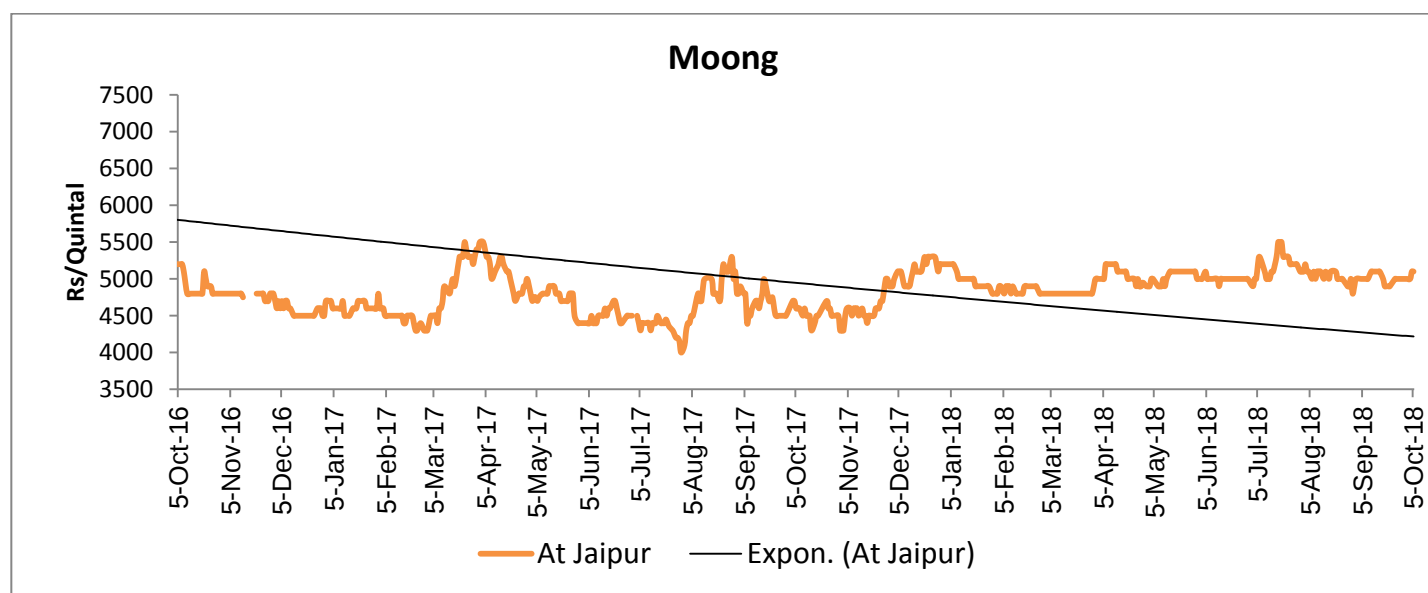

Market Recap:

Moong crop got affected in Ajmer and Bikaner line by recent rains and discoloured grain is affecting price sentiments. Shortage of quality grain in these areas and its higher price have eroded parity for Delhi market. Poor quality moong in Delhi market is being traded in the range of Rs4500 to Rs4600 per qtl. Pressure from UP too has decreased now. Besides, sellers have retained stock of good quality in Allahabad line even at Rs5000 per qtl. Arrival from old stock too has decreased. However, new moong started hitting the market from Kishangarh region of Rajasthan. Arrival is below expectation from Kehriline too. Arrival is expected to increase from Shekhawatiline. So price of good quality crop may move up in coming weeks.

Price Dynamics:

Higher MSP, crop loss and procurement drive may lend support to cash moong market. Burma offers Moong At \$710-715per tonne. Prices may stay steady to slightly firm due to

- Procurement drive
- Poor quality of new moong
- Active buying by mills &
- Restricted arrivals

Seasonality Index depicts steady to slightly weak movement .

Market Outlook for Oct:

Steady to slightly firm movement is expected in Oct

Pulses Wise Technical Outlook for September-2018 :-

Chana:

Outlook –We expect prices to notice steady to slightly firm movement in the near to medium term. Improvement in demand is likely at current level. Import would remain halted due to lower crop size in Australia and hefty import duty.

- ❖ Chart depicts steady to slightly firm movement in Oct.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4300 to 4600 levels in this month.

Trade Strategy: Buy on dip.

Trade Recommendations: Go long around 4350 with the first target of 4475 and second target 4575 with stop loss at 4300 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4150	4300	4425	4575	4750

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to firm movement in this month taking clue from import restriction , improved demand and decreasing stock at ports. Costly import would keep market supported.

- Candlestick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4600- 5200 in this month.

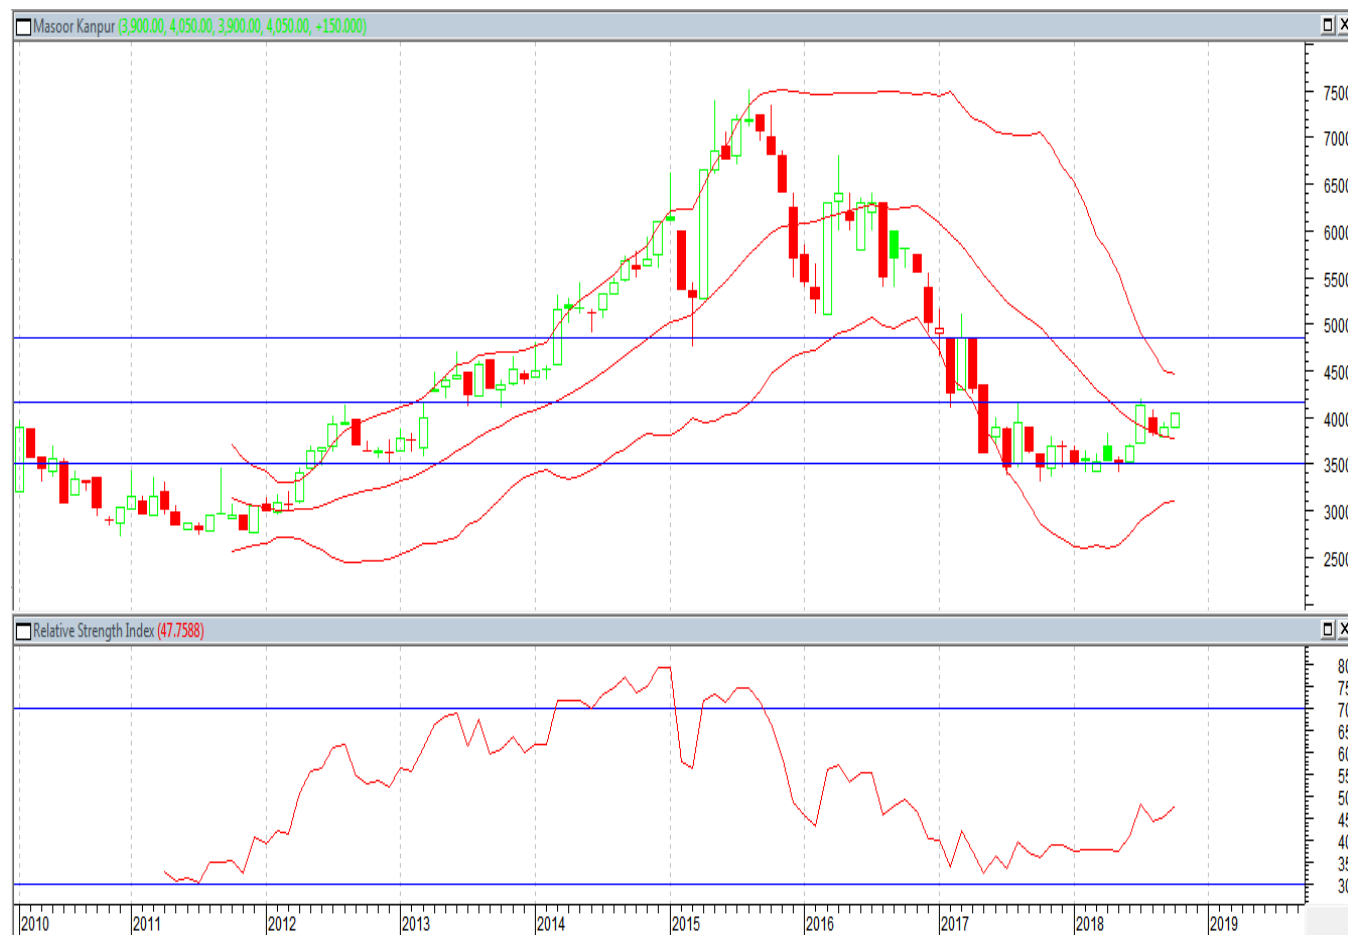

Strategy: Buy on dip

Trade Recommendations: Go long around 4650 with the first target of 4950 and second target 5100 with stop loss at 4550 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4450	4550	4700	5100	5400

Masoor :

Desi Masoor (at Kanpur) Spot Market Monthly Chart:

Outlook –Steady to firm movement is likely to be noticed in coming week.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3800-4050

Strategy: Buy on dip

Trade Recommendations: Buy around 3850 with the first target of 4000 and second target 4050 with stop loss at 3800level.

Support & Resistance				
S2	S1	PCP	R1	R2
3700	3800	3900	4050	4150

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to show range bound to firm movement in the coming week.

- Candlestick chart denotes firm movement in the market.
- Oscillator RSI is moving up in neutral region.
- Expected price range is 3900-4250

Strategy: Buy on dip

Trade Recommendations: -Go long around 3850 with the first target of 3950 and second target 4000 with stop loss at 3800level.

Support & Resistance				
S2	S1	PCP	R1	R2
3750	3800	3900	4150	4250

Urad
Urad FAQ- Burma Origin (at Mumbai) Spot Market Monthly Chart

Outlook – We expect steady to slightly firm momentum in the coming week.

- Candlestick chart shows steady to firm movement in the market.
- RSI is moving up in neutral region.
- Expected price range is 3650-3950

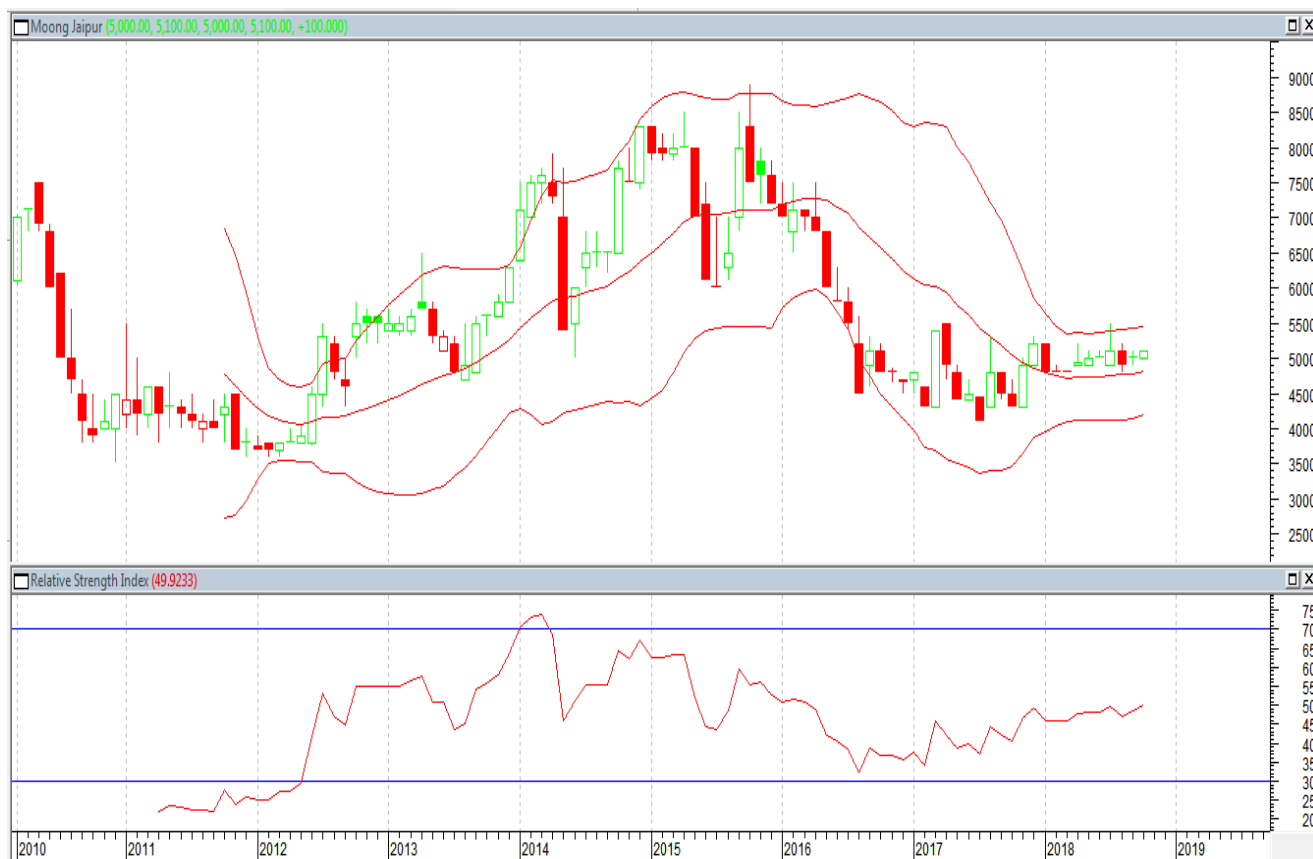

Strategy: Buy on dip

Trade Recommendations: Go long near 3700 for a target of 3850 and 3900 keeping stop-loss at 3600

Supports & Resistances				
S2	S1	PCP	R1	R2
3500	3600	3750	3900	4050

Moong:

Desi Moong (at Jaipur) Spot Market Monthly Chart:

Outlook - We expect prices to notice steady to firm movement in this month.

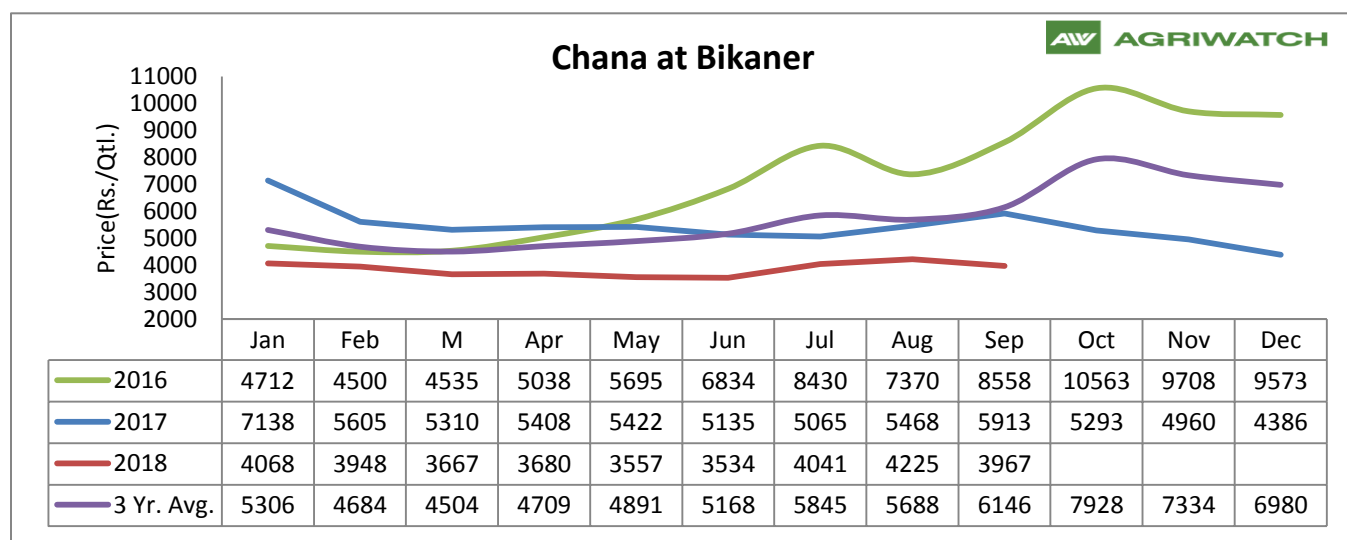

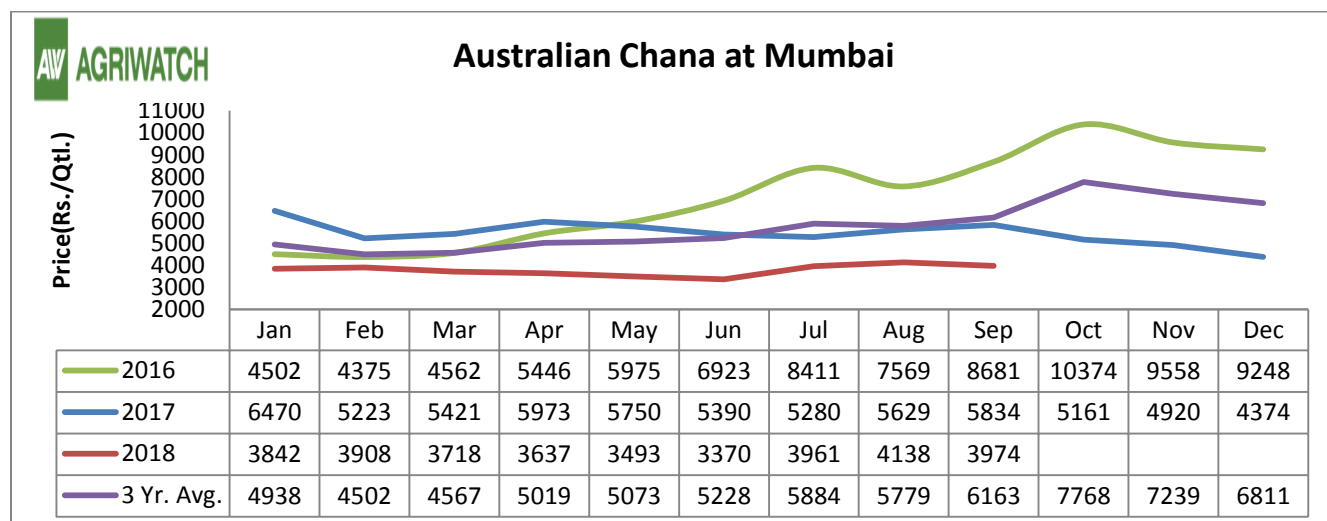

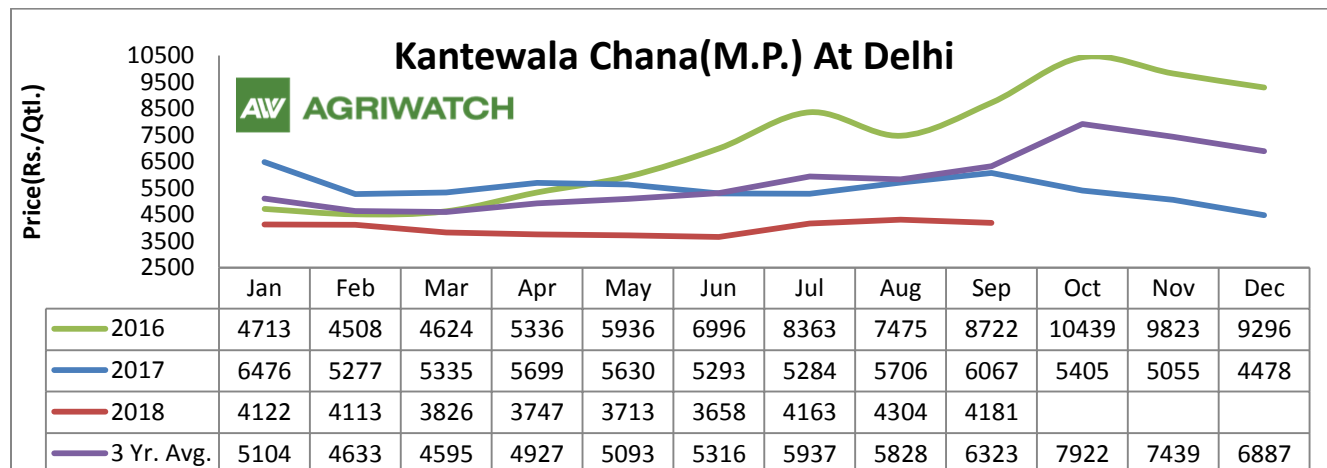

- Candlestick chart depicts firm movement in the market.
- RSI is moving up in the neutral zone.
- Expected price band is 4900-5400 levels.

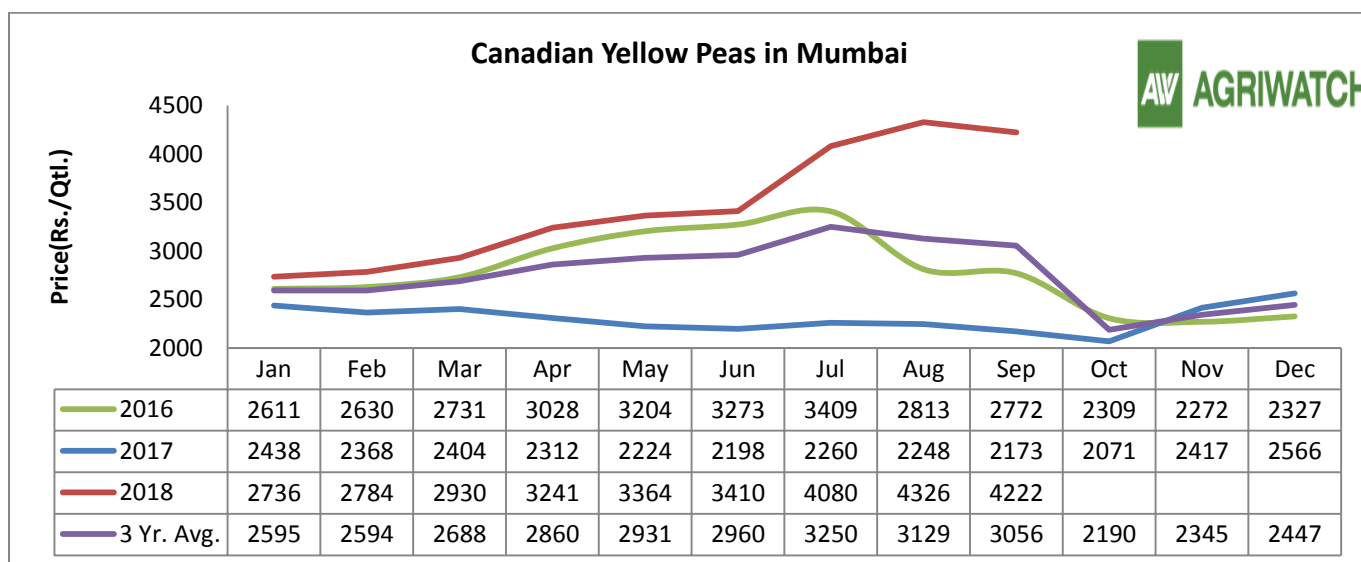

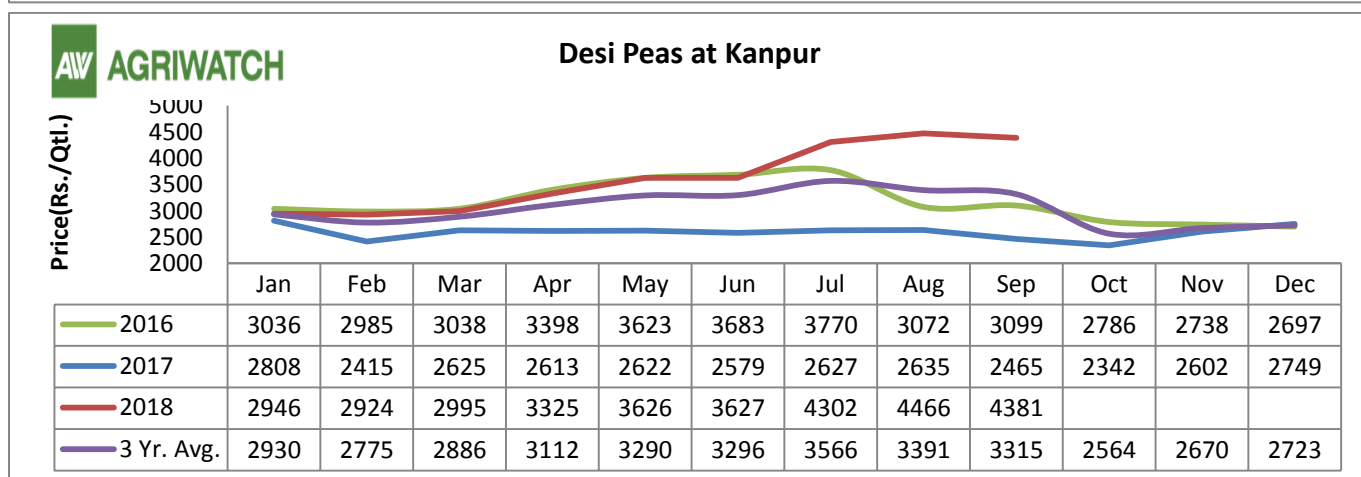

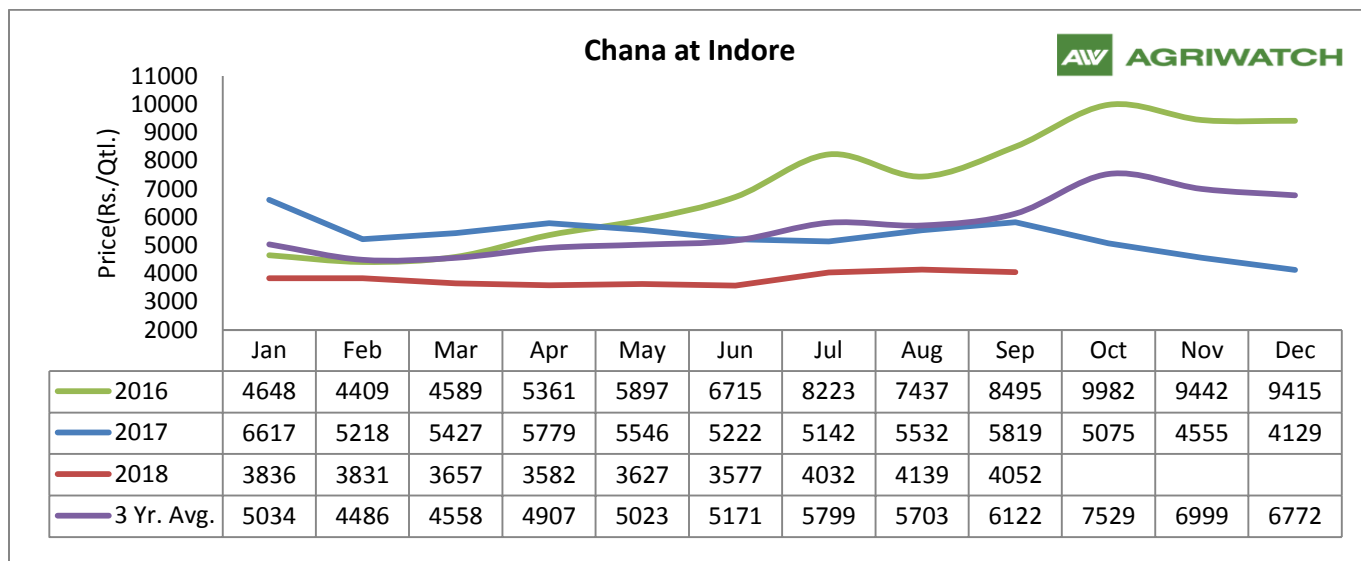

Strategy: Buy on dip.

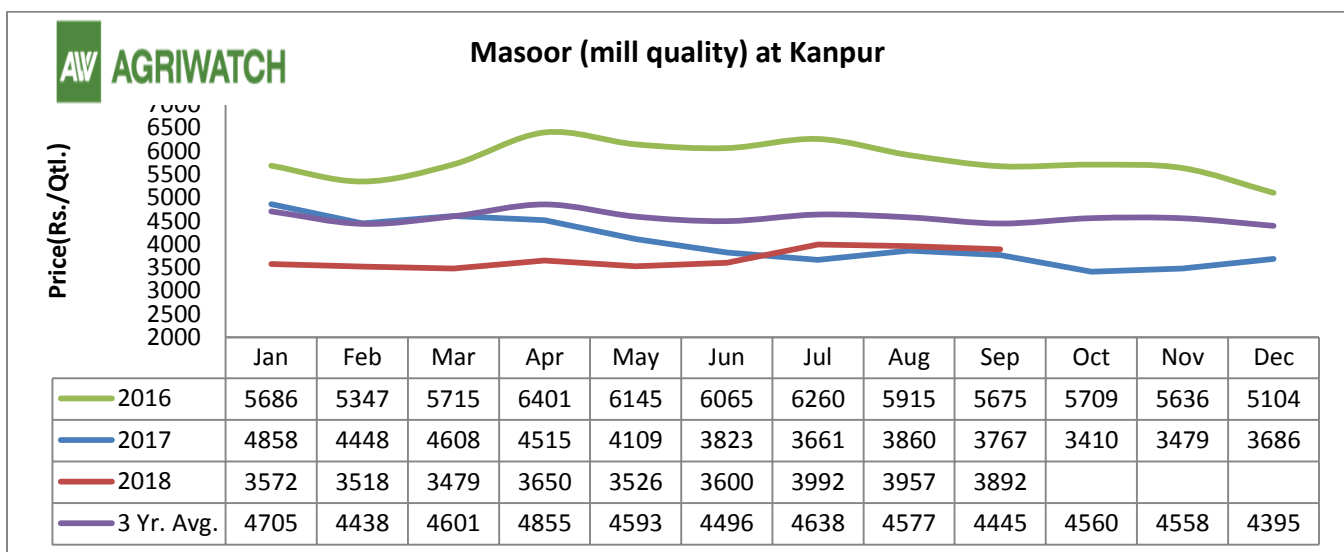

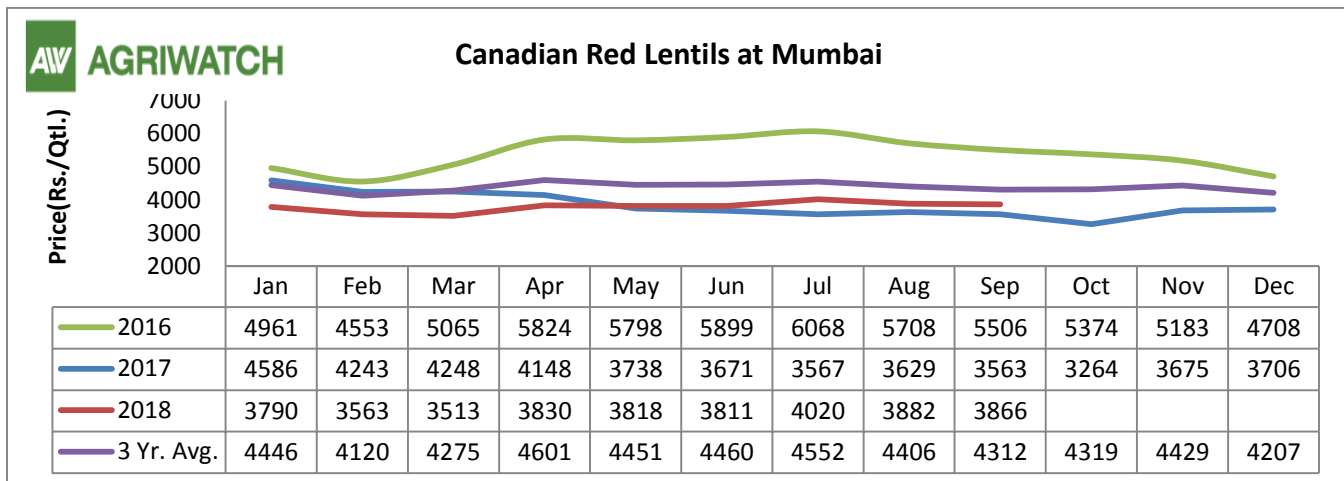

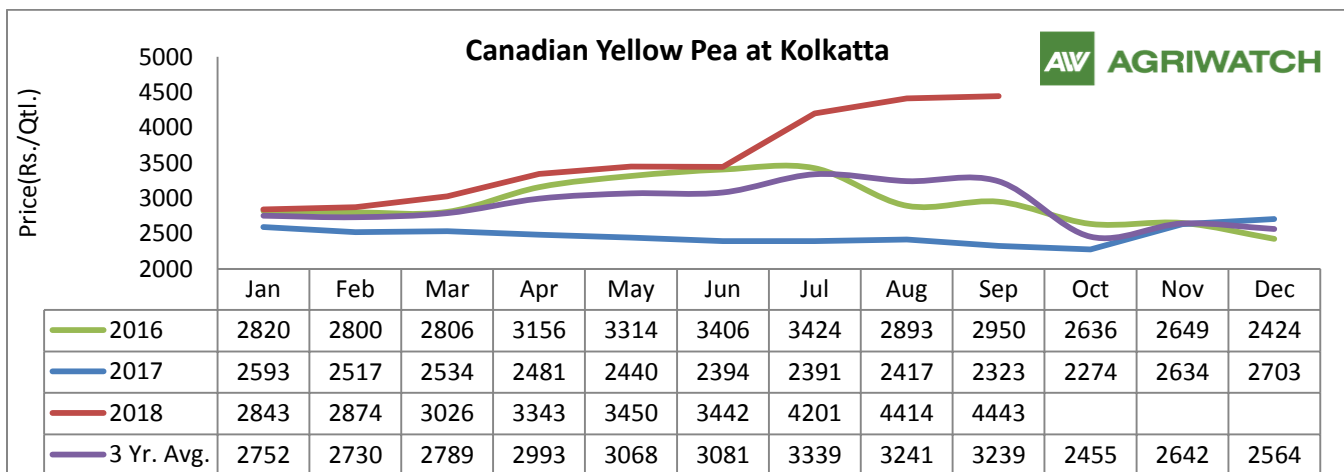

Trade Recommendations: Buy near 5000 with target of 5300 and 5400 keeping stop loss of 4900 level.

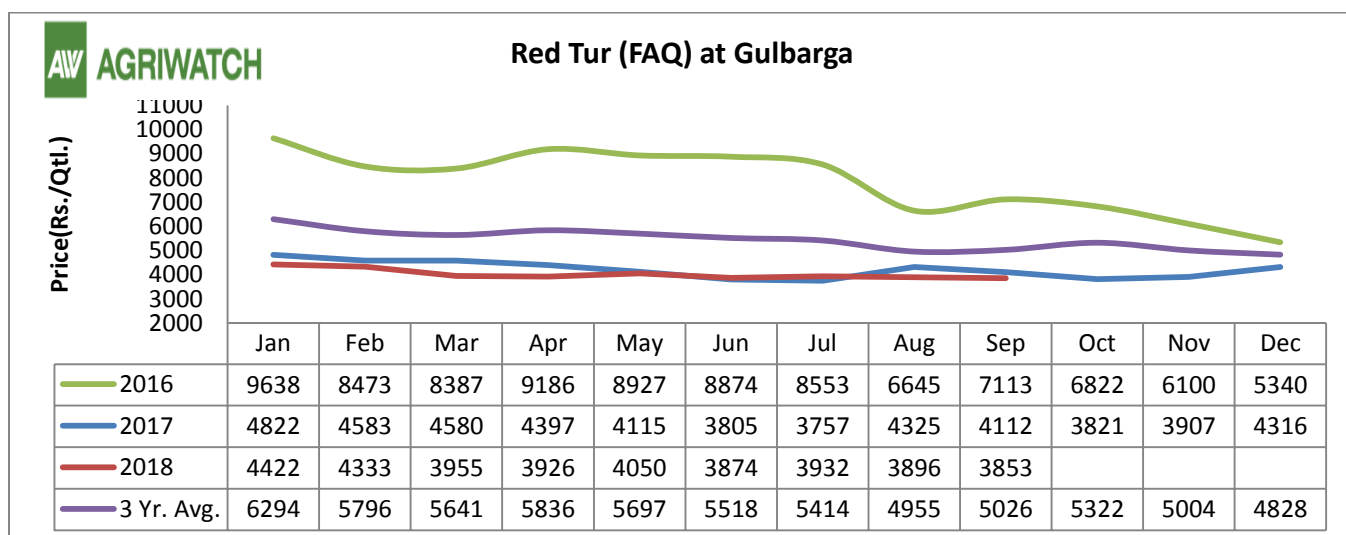

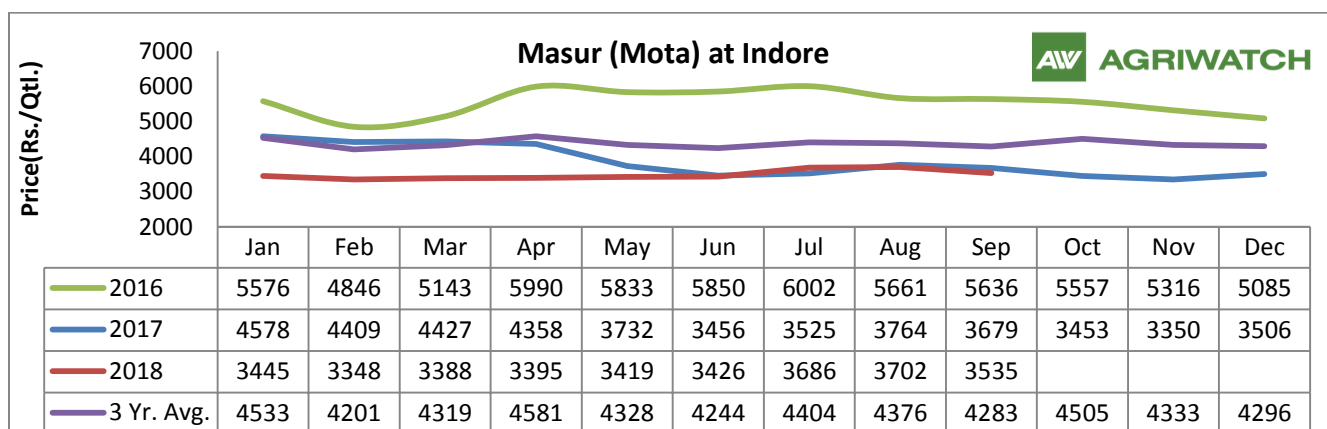

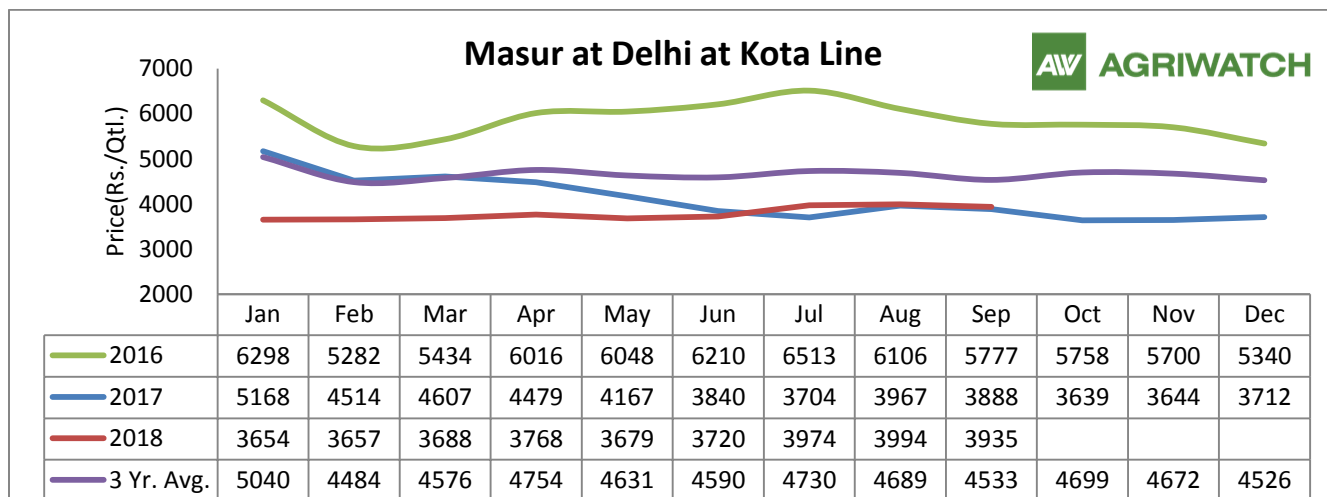

Support & Resistance				
S2	S1	PCP	R1	R2
