

Pulses Monthly Research Report-December- 2018

Content

Pulses Sector-Highlights

- Domestic
- International
- Monthly Outlook

Supply & Demand

Pulses-Wise Summary

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- **Rabi pulses area decreased by 12.40 % at 101.90 lakh ha against 116.33 lakh ha last year as on 30 Nov-2018.** Chana area is lagging by 15.13% at 70.46 lakh ha against 83.02 last year. Farmers have covered 6.83% lower area under lentil so far at 12.68lakh ha against 13.61 lakh ha last year. Pea area is lower by 6.62 % at 6.63 lakh ha. Urad area is lagging by 7.06 % at 2.37 lakh ha against 2.55 lakh ha last year. area too is lower by 13.64% at 0.76 lakh ha against 0.88 lakh ha so far. Overall area may decline further as fields are facing moisture stress and it would impact final rabi crop size. See sowing table on page no 6 for details.
- **As per the latest IMD update India is likely to experience a warmer winter for a second consecutive year** due to the influence of a brewing El Nino over the Pacific Ocean. The ongoing winter season – to last till February 2019 – will record above normal sub-divisional average temperatures across all meteorological sub-divisions. El Nino is a climatic phenomenon that occurs due to an abnormal warming of Pacific Ocean and is known to impact global weather patterns. El Nino has had a direct influence on monsoons in India. A strong El Nino was reported during 2014 and 2015. A weak El Nino is likely to develop by the end of winter, towards February 2019. Now, indications are that it could be an El Nino event lasting for a short duration.
- **Cash chana market traded almost unchanged at previous level despite futures traded lower. There was no actual physical trade in Delhi market.** Buyers preferred to wait for bulk buying despite firm inner tone. As per Agriwatch preliminary estimate, chana production this year, would decrease from 94.56 to 83.32 lakh tonne, to be marketed in 2019-20, starting from Mar-2019. If moisture stress prevails in the field and area declines by 10 %(likely), it would support chana price at current level, however, a downward correction of Rs100-150 is expected from current level. The only price capping factor is higher stock (23-24 lakh tonne) in central pool. In new season govt would procure chana at MSP of Rs4620 per qtl. So, prices of chana is unlikely to decrease from current level. If 1 million MT is retained as buffer stock, Nafed would not sell more than 12-14 lakh tonne in Dec, Jan & Feb-2019. In Delhi market chana was quoted at Rs4600-4650 per qtl. Buying on dip seems riskless.
- **Tur cash market at Amrawati traded at Rs4900-4950 per qtl while in Gulberga is traded at Rs 4800-4850.** As crop size is lower so, private trades are active at higher level. As per Agriwatch estimate, tur production would decrease from 38.67 to 36.21 lakh tonne in 2018-19. So carryout is expected to decline from 8.07 to 2.78 lakh tonne. Supply side would be tight as stock in central pool is decreasing fast. Import is not possible beyond set quota of 2 lakh tonne. Besides, govt may import 1lakh MT under G2G basis. Private trades and mills are aware of this situation and they would remain active until prices touch MSP level. Govt would procure at MSP. So, the fundamental remains strong for tur this year. Tur may touch MSP in the medium term. So stake holders should buy on downward correction and hold it.
- **Urad cash market traded lower due to imported stock and its selling at discounted price at ports.** Besides, higher import than allocated quota too, remains price impacting factor, despite good demand in domestic market. Now commerce ministry has decided to check imported urad brought on the back of stay order by Madras High Court. Importers took advantage of stay order and continued to import beyond limit set by the govt. So, further import in bulk volume is not possible now, as stern action may be taken against importers by commerce ministry. Re- hearing on this matter is expected on 17th Dec. Lower production prospects in rabi season, rough weather condition and procurement drive may support urad cash market once again if Madras high court's decision goes in favor of govt. In Chennai market, Urad FAQ is being traded at Rs4250 to Rs4450 per qtl. Cash market may trade steady to slightly firm in Dec. Demand is good from mills.
- **Moong market stayed steady due to lower supply in the cash market. Farmers and stockists are unwilling to sell stock at current price amid ongoing procurement drive in various states.** Besides, New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Ujbekistan is higher at around Rs 7600-7700 and Rs 6600-6700 per qtl respectively. Availability of moong in Myanmar too is lower. So, millers are active in local market. However, Agriwatch expects market to decrease by Rs100-150 from current level, as mill may restrict buying for some time. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs5200-5250 while Jodhpur line is being traded at 5500-5600. Moong in Jaipur market is being traded at Rs 5400. Overall tone in moong market remains firm.
- **Crop size of lentil is expected to be lower due to lower seeding, weak monsoon and low soil moisture.** Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED sold 36452.57 MT of masoor at an average price of Rs 3382.09 per quintal until 16th November-2018. NAFED has balance of 197986.75 tonnes and 6953.50 tonnes in Madhya Pradesh and Uttar Pradesh respectively. NAFED would like to sell as much quantity as it can to make space for fresh procurement in rabi season. Agriwatch expects lentils to remain in uptrend in near future.

International Market Update:

- **Global lentil markets showed some sign of improvement led by good demand for red and green lentil in the first opening quarter and inner tone remains strong.** Due to restriction, pea import is unlikely to continue in India till Dec. As long as India maintains quantitative limits on pea imports, lentils are the cheapest pulses, which can be freely imported. Area under lentil in India is 6.83 % lower than last year to 12.68 lakh ha so far. So demand is expected to improve and it may push price up, in coming weeks.
- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in For MY 2018-19.** Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield, at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India, export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- **Global field pea markets traded firm on the back of likely good buying for export, during the first quarter of 2019.** This has contributed to firming export asking prices. Market tone has also been helped by the reduction in surplus stocks because of shipments to China's livestock feed industry.
- **Lower area coverage in Saskatchewan and Alberta which contribute 96% pea production in Canada, may reduce pea production by 9 %** at 3.7 million tonne for MY 2018-19. In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US have been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year, when chickpea production was registered at 3.16 lakh MT.** Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT.** Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19. It was 16.56 lakh ha last year.** Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.
- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans.** Pulses prices are lower in Myanmar as major buyers like India, are almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

Monthly Outlook: -Pulses are likely to trade steady to slightly weak in Dec.

(*All quantities in Lakh tonnes)	Urad (Kha-Rabi) MY S to A)		Moong (Kha-Rabi) (MY-S to A)		Tur (MY-D to N)		Chana(MY-M to F)		Masur (MY-M to F)

Note: Agriwatch 1stAdv Estimate For 2018-19 for Urad ,Moong & Tur & preliminary estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to decline by 3.49 % from 25.47 to 24.58 lakh tonne due to lower crop area by 8.97% to 40.37 lakh ha.Import is expected to increase by one lakh tonne to 2.5 lakh tonne including G2G import. Total supply would increase slightly from 35.67 to 36.05 lakh tonne in 2018-19.Export would increase to 0.3 lakh tonne due to export incentive. Consumption would increase from 26.7 to 27.8 lakh tonne in 2018-19. So, carryout would decrease slightly from 8.97 to 8.25 lakh tonne.As carryout is higher, supply side is expected to be at comfortable level this year too. So any unexpected spike is unlikely under prevailing condition.

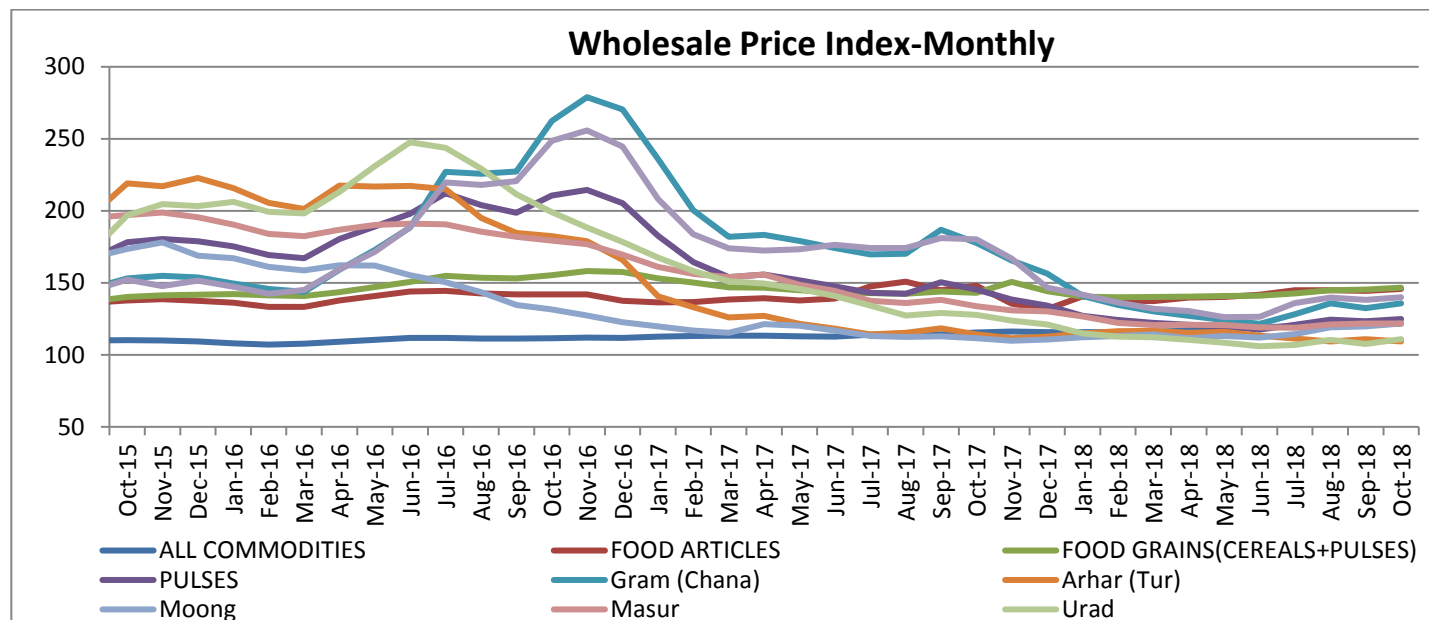

Moong: Moong production is likely to increase by 5.24 % from 19.25 to 20.26 lakh tonne due to higher crop area by 7.41% to 34.36 lakh ha in kharif season. Import is expected to remain same at 1.5 lakh tonne as last year. Total supply is expected to increase from 28.96 to 29.02 lakh tonne in 2018-19.As there is a demand from overseas market amid export incentive, export is likely to increase from 0.2 to 1 lakh tonne this year. Consumption would increase from 21.5 to 23.5 lakh tonne. Total usage is expected to touch 24.5 lakh tonne. Increase in export and consumption figure this year would drag down carryout from 7.26 to 4.52 lakh tonne .So any major decline in moong price is unlikely.

Tur: Tur production is likely to decrease by 6.36 % from 38.67 to 36.21 lakh tonne due to higher moisture stress during growth stage. Import is expected to increase by 2 lakh tonne to 2.5 lakh tonne due to cheaper availability in Myanmar. Total supply would decrease slightly from 50.32 to 46.78 lakh tonne due to lower production size. Export may increase from 0.25 to 0.50 lakh tonne due to export incentive. Consumption may increase from 42 to 43.5 lakh tonne in 2018-19 due to cheaper availability of dal. With export ,total consumption has been pegged at 44 lakh tonne. Higher consumption would drag down carry out to 2.78 lakh tonne for next year. Market is expected to find balance now and price would improve.

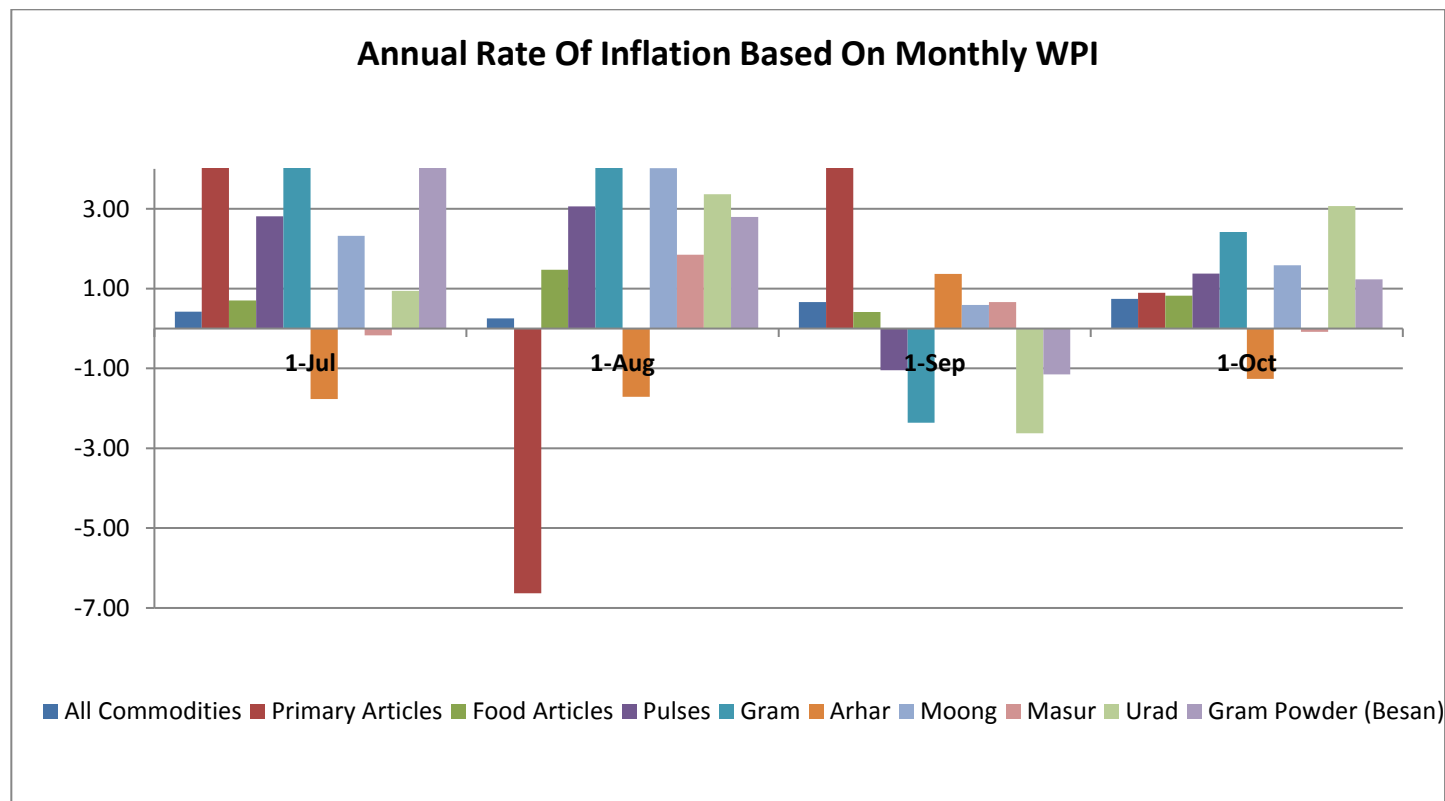

Chana: Higher carry in of 14.5 lakh tonne and 83.32 lakh tonne production for MY2019-20 amid 6.5 lakh tonne expected import total supply would decrease from 108.5 to 104.3 lakh tonne in new season, starting from Mar-2019. As chana price is ruling lower in domestic market India is expected to export only 1 lakh tonne chana/dal in new season. Consumption has been pegged at 93.5 lakh tonne , so total usage is expected to increase to 94.5 lakh tonne this year. Due to lower production , new season would start with 14.5 lakh tonne as carry in. Supply side is at comfortable level and Nafed has enough stock(23 lakh tonne) to take care of any spike in chana price. However, higher MSP (Rs4620) for next crop would keep market well supported at current level. Planting area (starting from Oct end) would influence chana price in domestic market. It is lagging by 15.13 % to 70 .46 lakh ha so far. It was 83.03 lakh ha last year by end Nov-2018. Sowing has entered in last phase now.

Masur: MY 2018-19 started with 7.09 lakh tonne amid 12 lakh tonne production. New season starting from Mar is likely to start with 2.89 lakh tonne as carryout Import. Import is likely to increase as crop size is expected lower for MY 2019-20 and touch 7.5 lakh tonne in new season.. lower production would drag down total availability at 21.89 lakh tonne.would drag down total supply from 25.92 to 22.09 Lkh tonne.Export would increase slightly from 0.11 to 0.2 lakh tonne this year. Consumption has been pegged slightly up from 19 to 20 lakh tonne in MY 2019-20. So ,prices are expected to move up further.Import would remain costly at 40% duty.

Agri Commodity Indices –Oct -2018:

Pulses WPI: Pulses WPI increased by 1.7 point from 123.2 in Sep to 124.9 in Oct-2018

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Despite firm inner tone one downward correction in cash chana market is expected as there is plenty of stock in central pool. Nafed would try to release 60 to 70 % chana stock out of 22-23 lakh tonne in Dec-Jan and Feb. New crop would start hitting the market from mid Feb. So any major spike in Chana price is unlikely Despite lower size of the crop and 70 % import duty. As stock in private hand is 60 % lower than last year, price would not decrease below 4500 in Delhi market. In prevailing condition Agriwatch expects Delhi market to touch 5000 level after correction. So, buying at lower level seems riskless as crop size is expected to be lower by 10-11% this year.

All India average price for Chana increased by 4.96 percent from Rs 4210 (Oct) to 4419 per qtl.in Nov Australian Chana(imported crop) price too increased by 4 percent to Rs 4425 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

.Prices are likely to stay steady to slightly firm in Dec due to:

- Higher MSP (Rs4620) for new crop
- Lower yield due to moisture stress in the field
- Costly import due to 70% import duty
- Good demand in domestic market, lower stock in private hands
- Lower availability in Australia/Myanmar and increasing global quotes.

Seasonality Index hints that Chana (gram) is likely to notice steady to firm movement in the Spot market in Dec-2018.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed above 9 and 18 days EMAs

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Jan	4623	4510	4660	4805	5000
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Jan	Buy on dip	4600	4800	4850	4510

Market Outlook for Dec-2018

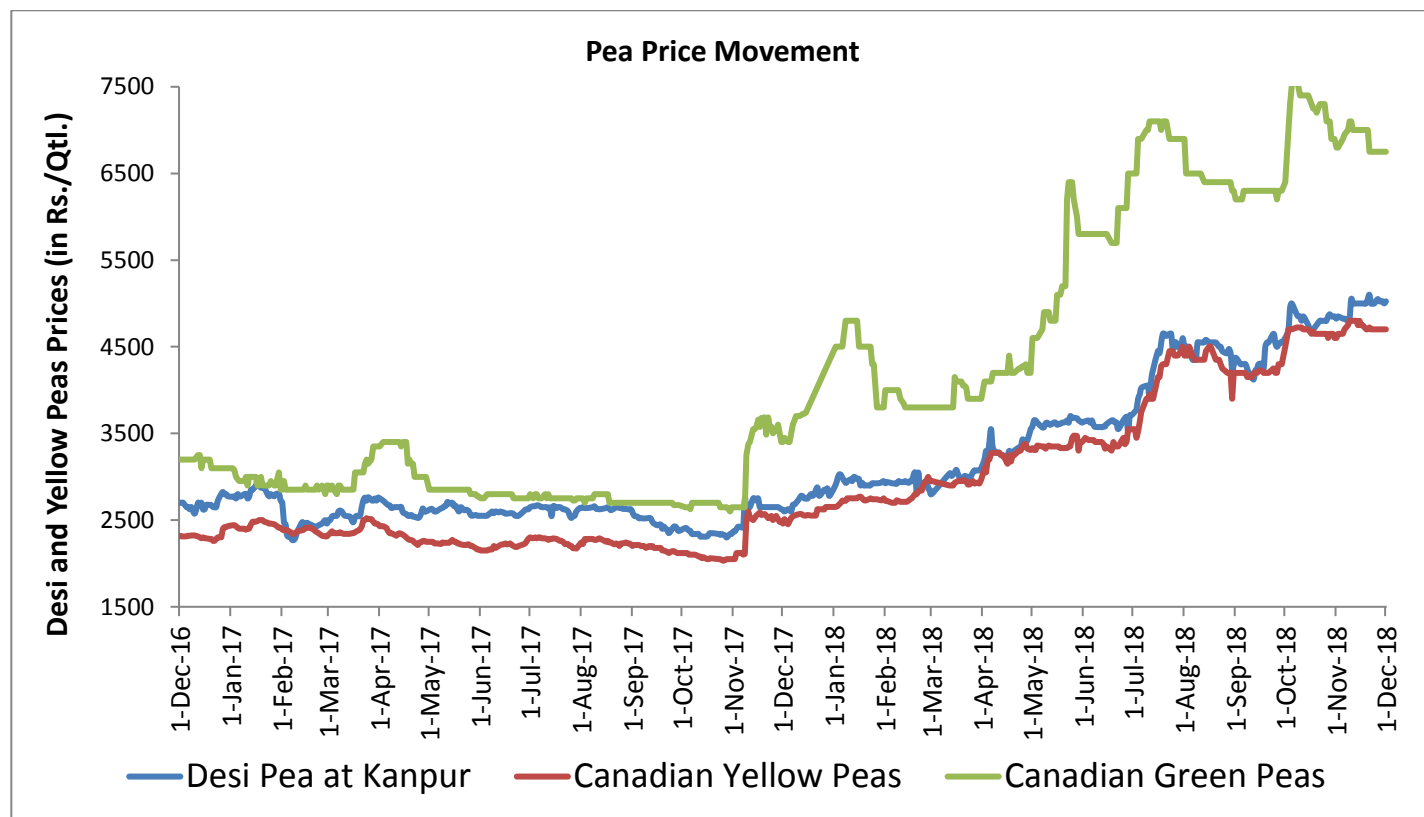

Overall sentiment seems firm
 Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Market Recap:

Pea prices could not sustain its upward momentum. Stock is lower at port and import remains restricted. No import is possible till December. Demand decreased at higher level and decrease in chana price too pressurized pea market. Stock available in domestic market and at ports is said to be lower than consumption till Dec. Prices may move down by Rs 100 more from current level as /chana dal are cheaper right now. Firmness in pea market depends on chana price movement and govt.'s decision on import Dec onward. Overall area is lagging by 6.62% to 6.63 lakh ha so far. Overall tone seems weak. Stake holders should buy on dip and retain stock as chana price is expected to move up once again.

All India average price decreased by 0.87 % to Rs 5569 per qtl.in Nov. In Kanpur market, it traded steady to slightly weak at Rs 4700 per qtl. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the near to medium term. However, demand got affected at higher level. Import is not possible till 30th Dec-2018. Weak sentiment may prevail in Dec too.

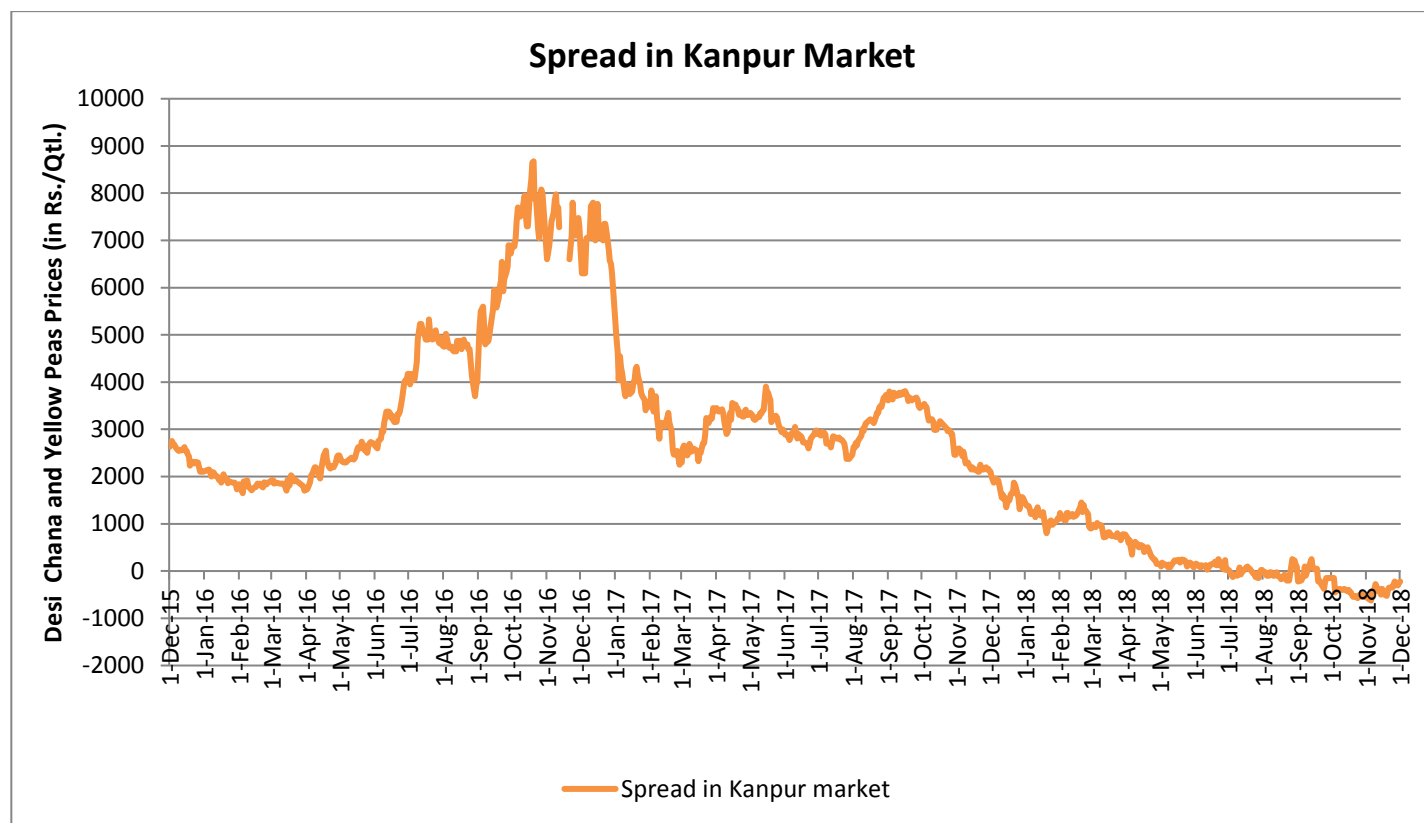

Price Dynamics:

In Dec-2018 market traded down due to weak demand and higher availability of other pulses at cheaper price. Pea market is expected to trade steady to slightly weak in Dec due to:-

- Weak demand at higher level despite import restriction
- Other pulses dal availability at cheaper price
- Likely improvement in planting area
- Govt.'s decision on import remains crucial for pea price direction in the medium term

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone despite improvement in chana price . However, gap has contracted from Rs500 to Rs 250-300. Spread is expected to move in the negative range of 200 to 350 per quintal in the Dec on relative movement in Chana prices. Overall outlook seems steady to slightly weak due to weak demand.

Seasonality Index depicts that pea prices are likely to notice firm movement in Dec-2018.

Market Outlook For Dec-Steady to slightly weak movement is expected.

Masoor (Lentils/Masoor):

Fundamental Analysis and Outlook:

Market Recap:

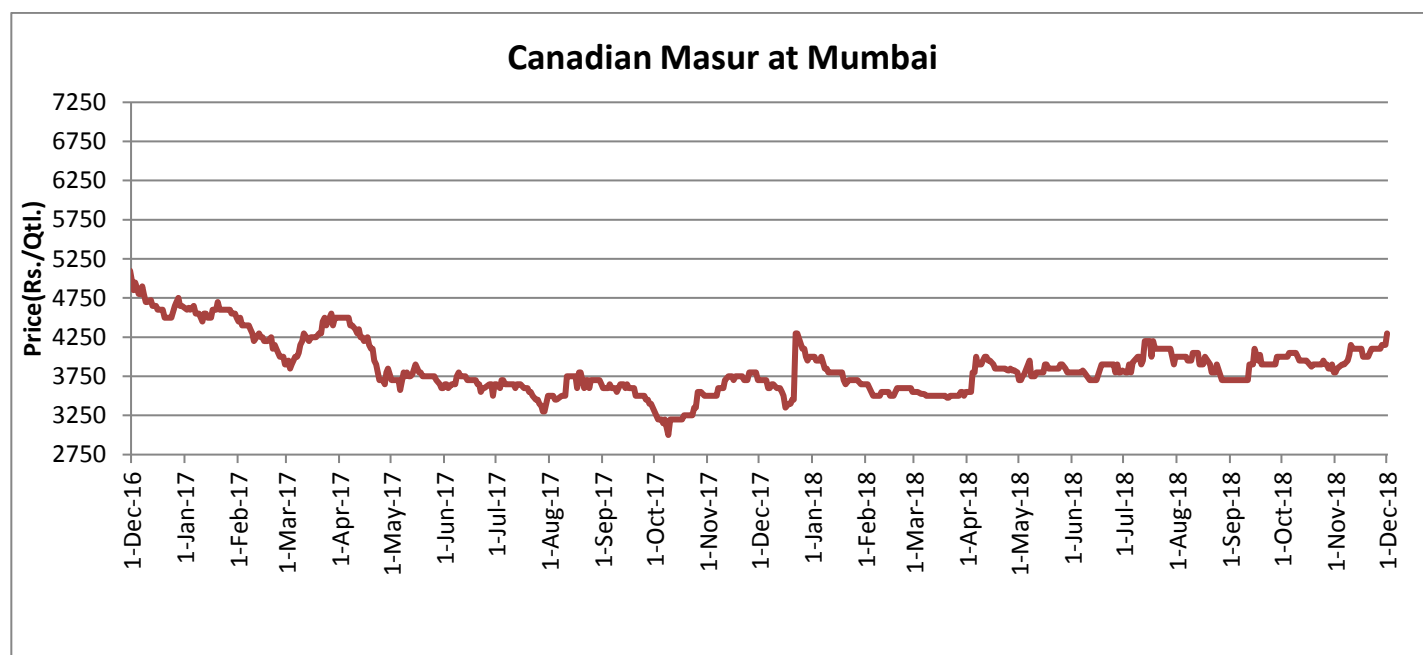

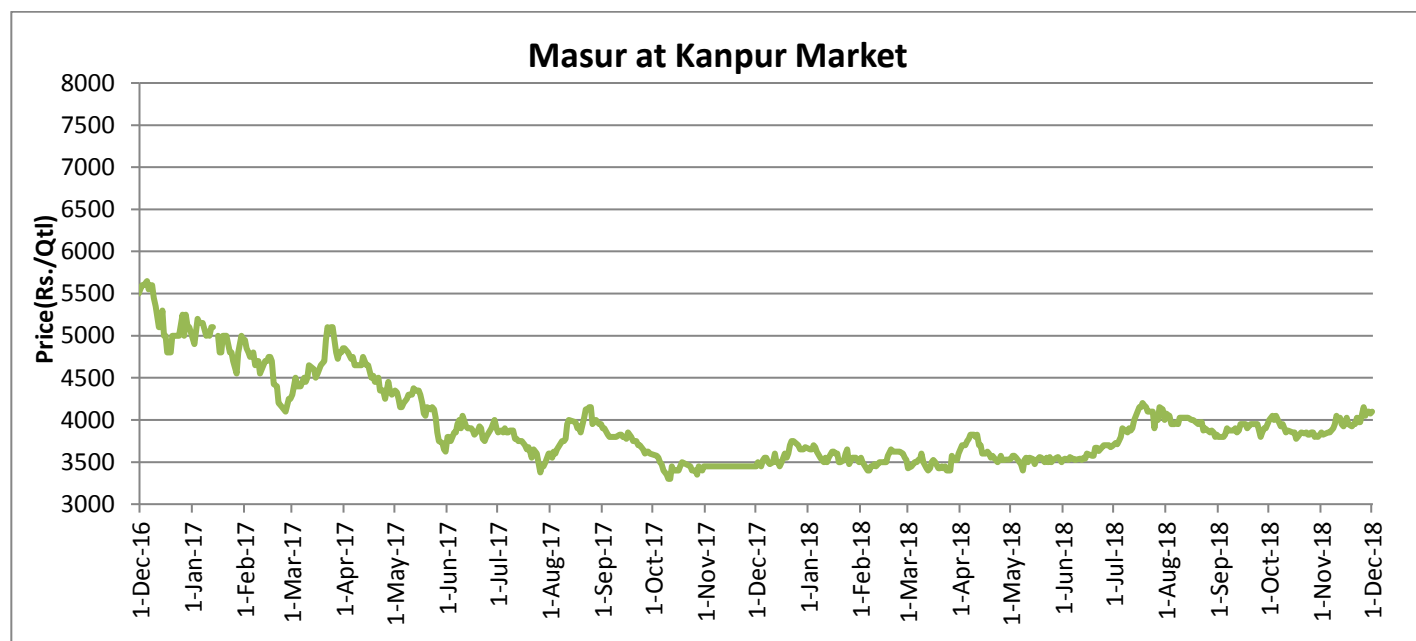

Crop size of lentil is expected to be lower due to lower seeding, weak monsoon and low soil moisture. Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED sold 36452.57 MT of masoor at an average price of Rs 3382.09 per quintal until 16th November-2018. NAFED has balance of 197986.75 tonnes and 6953.50 tonnes in Madhya Pradesh and Uttar Pradesh respectively. NAFED would like to sell as much quantity as it can to make space for fresh procurement in rabi season. Agriwatch expects lentils to remain in uptrend in near future.

Price Dynamics:

In Nov-2018, average price in key market Kanpur was up by 2.65 % to Rs 3976 per qtl. MoM basis. Prices are likely to trade slightly firm in Dec.

Firmness is expected due to:

- Higher MSP (Rs 4475 per qtl) for new crop
- Likely lower production due to dry condition
- Declining stock
- Likely improvement in demand &
- Costly import at 40 % duty

Seasonality Index depicts range bound to slightly firm movement in Dec-2018.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur cash market at Amrawati traded at Rs4900-4950 per qtl while in Gulberga is traded at Rs 4800-4850. As crop size is lower so, private trades are active at higher level. As per Agriwatch estimate tur production would decrease from 38.67 to 36.21 lakh tonne in 2018-19. So carryout is expected to decline from 8.07 to 2.78 lakh tonne. Supply side would be tight as stock in central pool is decreasing fast. Import is not possible beyond set quota of 2 lakh tonne. Besides, govt may import 1lakh MT under G2G basis. Private trades and mills are aware of this situation and they would remain active until prices touch MSP level. Govt would procure at MSP. So, fundamental remains strong for tur this year. Tur may touch MSP in the medium term. So stake holders should buy on downward correction and hold it.

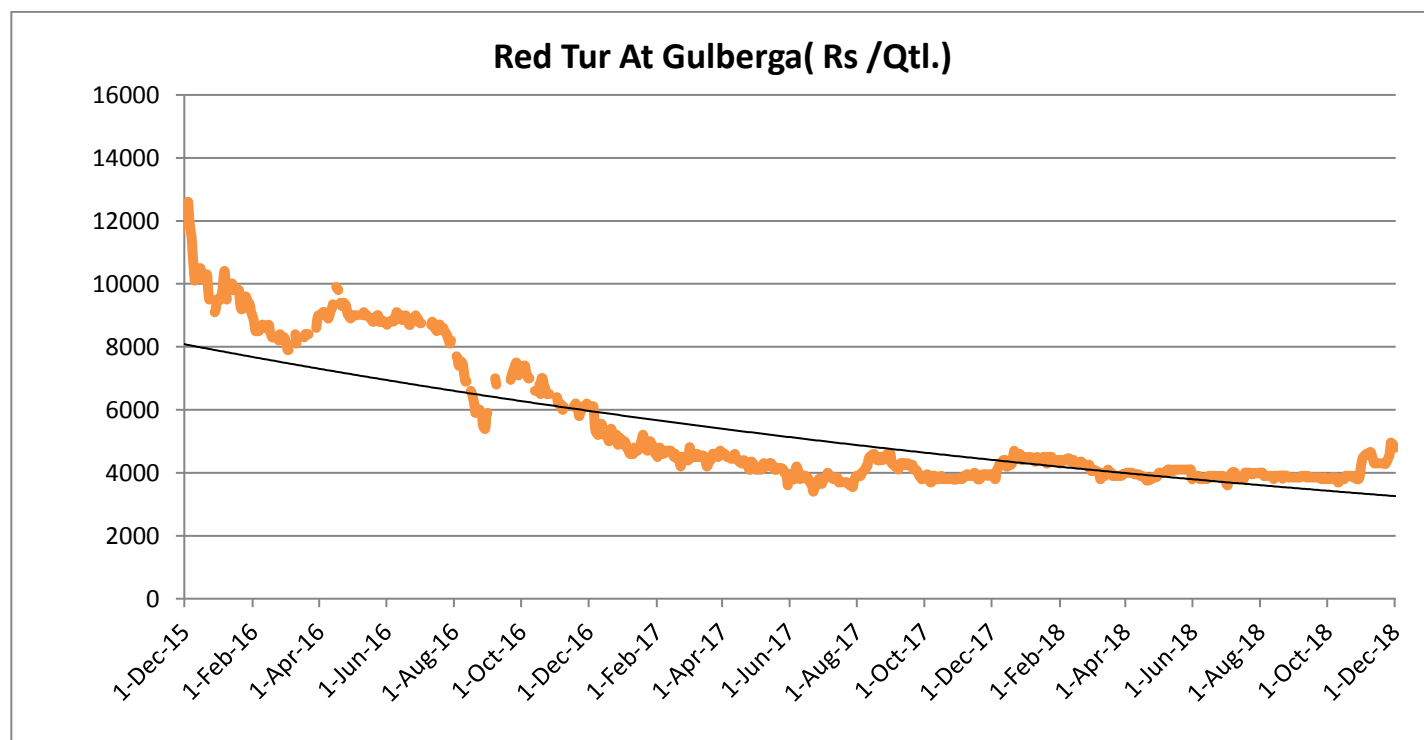

Market Recap:

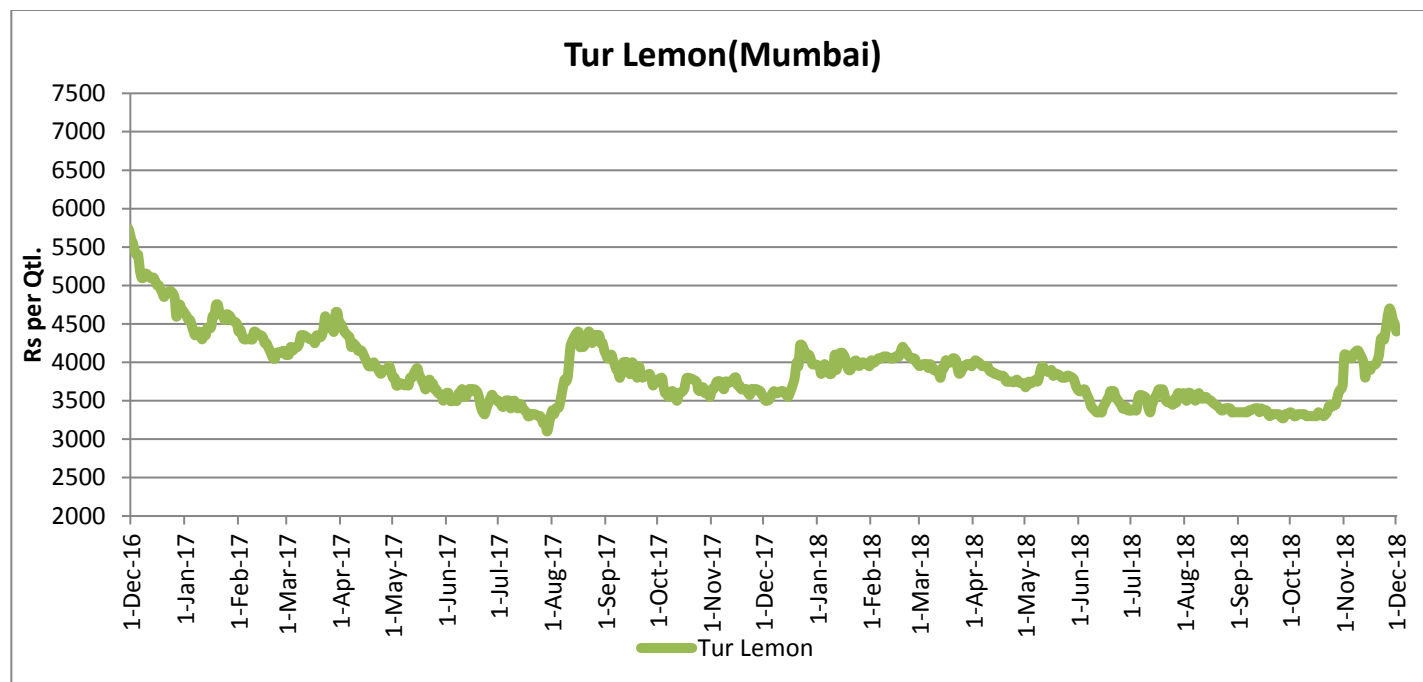

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size despite new arrival from early sown variety. Stock in private hand is said to be lower. Burma offered lemon tur new & old at \$540 per tonne basis Indian port. Linkely too was offered at \$540 per tonne basis Indian port. Overall trend seems firm as private buyers are active analyzing short supply in the mid of next year.

Price Dynamics:

In Nov-2018, average price in Mumbai market was up by 23.03 % from 3392 to 4173 per qtl. due to good demand and lower crop size.. In Dec market is likely to improve due to

- Higher MSP
- Lower crop size
- Festive demand
- Fear of lower yield & and uneven rainfall in major growing region specially Karnataka, Mah and Gujarat
- Comparatively lower stock in mills.

Seasonality Index-depicts steady to firm movement in Dec

Market Outlook for Dec:

Fundamental remains supportive for Tur cash market and outlook seems firm.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

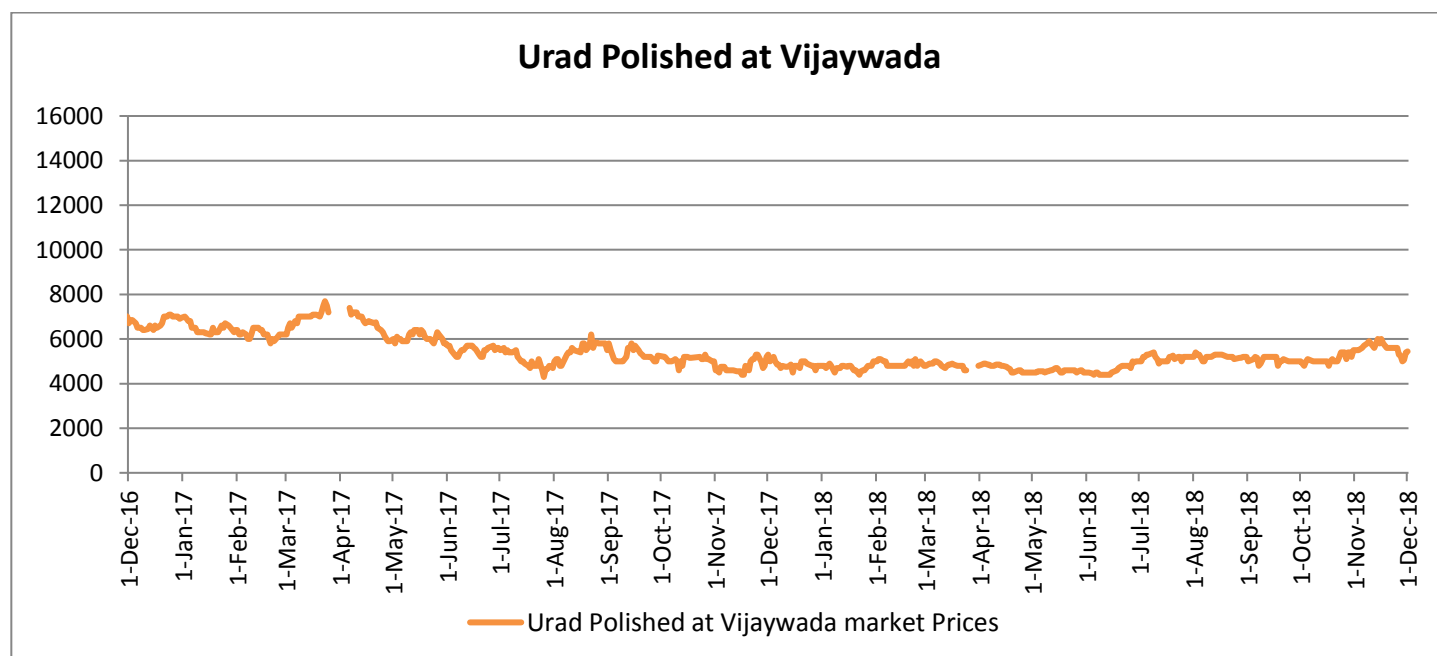

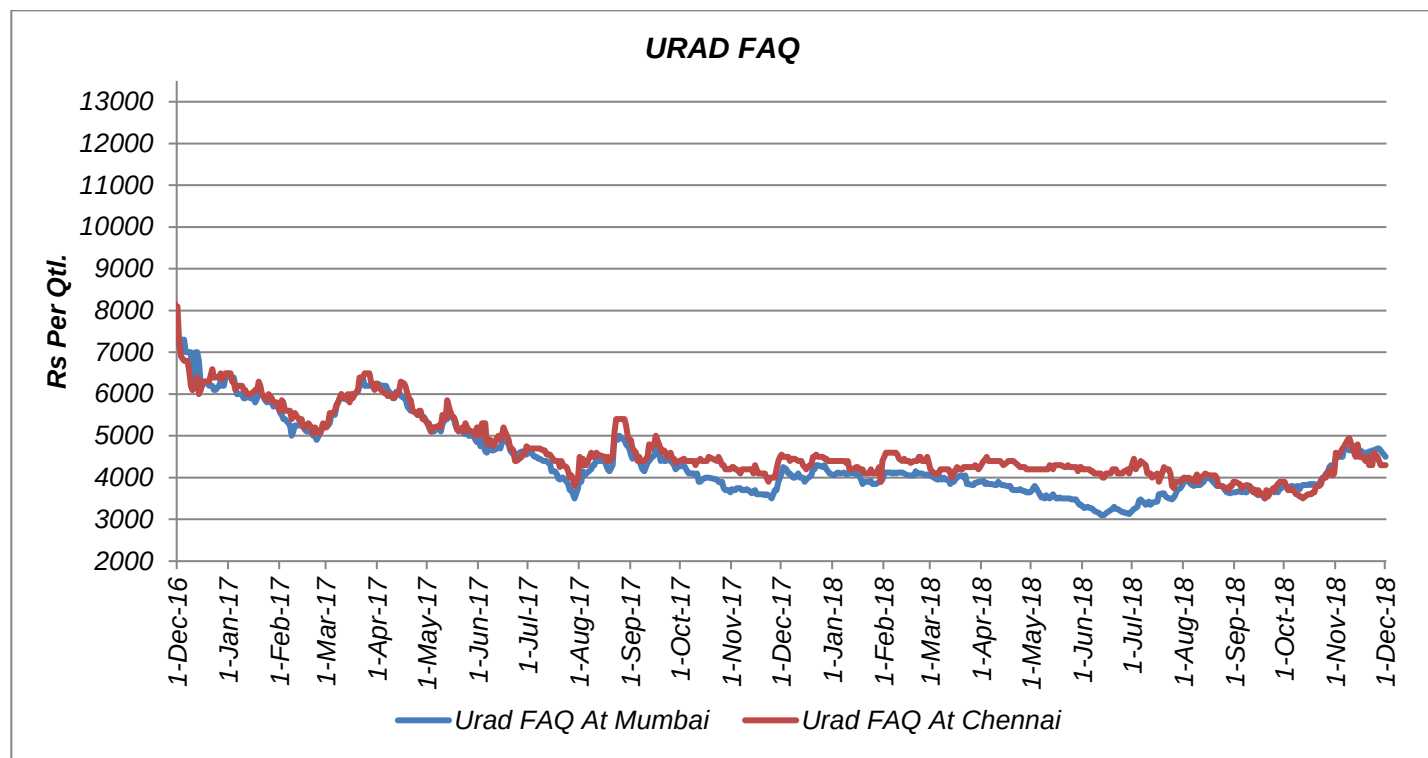

Market Recap:

Urad cash market traded lower due to imported stock and its selling at discounted price at ports. Besides, higher import than allocated quota too remains price impacting factor, despite good demand in domestic market. Now commerce ministry has decided to check imported urad brought on the back of stay order by Madras High Court. Importers took advantage of stay order and continued to import beyond limit set by the govt. So, further import in bulk volume is not possible now, as stern action may be taken against importers by commerce ministry. Re- hearing on this matter is expected on 17th Dec.. Lower production prospects in rabi season, rough weather condition and procurement drive may support urad cash market once again if Madras high court's decision goes in favor of govt. In Chennai market, Urad FAQ is being traded at Rs4250 to Rs4450 per qtl. Cash market may trade steady to slightly firm in Dec. Demand is good from mills.

Price Dynamics:

In Nov, average prices in key markets including Mumbai/was up by 17.82% percent, to 4627 per qtl. In Chennai it is being traded at Rs 4300-4350. Prices may stay steady to slightly firm in Dec due to

- Procurement on MSP
- Crop loss in Raj, Mah and AP
- Unfavorable weather condition for rabi sowing
- Fear of lower area coverage & higher quotes in Myanmar&
- Commencement of buying by mills

Seasonality Index depicts steady to slightly firm movement in the near to near to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad production for MY 2018-19 has been pegged at 18.81 lakh tonne against 19.19 lakh tonne 2017-18. In first adv estimate govt has projected 2.65 MMT urad production for 2018-19.

Market Outlook for Dec: Prices are likely to trade steady to slightly firm in Dec

Fundamental Analysis and Outlook For Moong:

Market Recap:

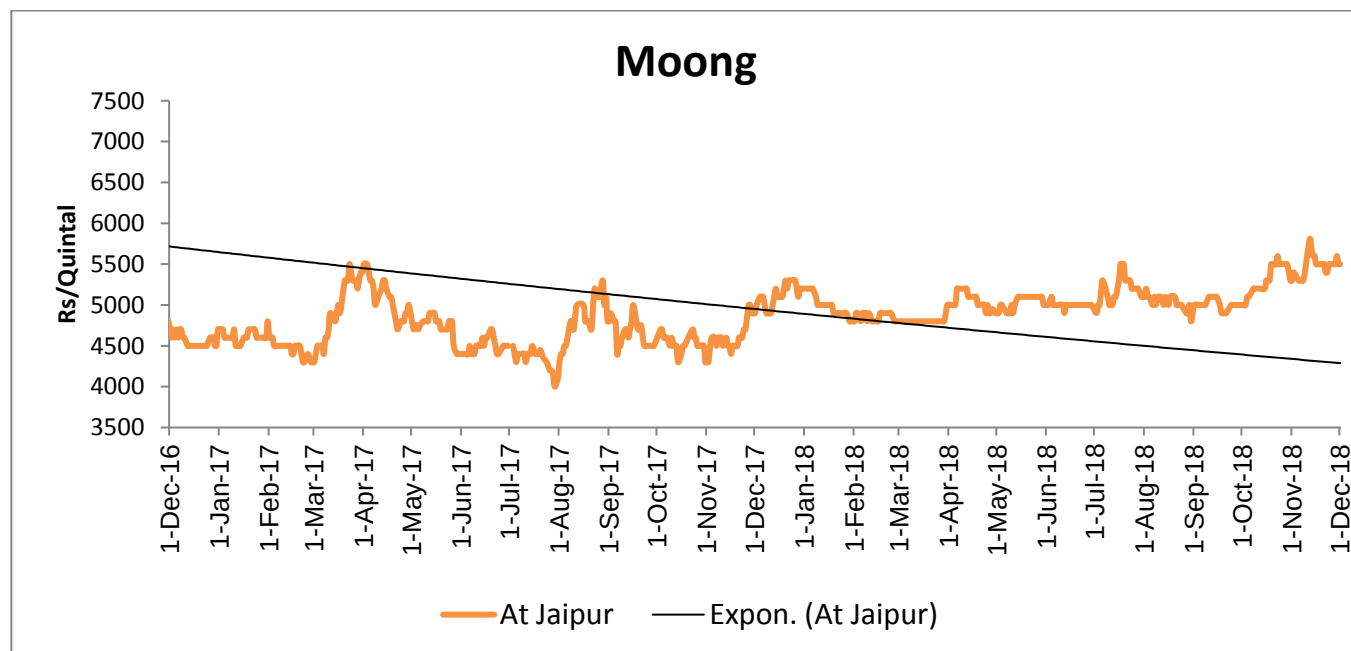

Moong market stayed steady due to lower supply in the cash market. Farmers and stockists are unwilling to sell stock at current price amid ongoing procurement drive in various states. Besides, New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Ujbekistan, is higher at around Rs 7600-7700 and Rs 6600-6700 per qtl respectively. Availability of moong in Myanmar too is lower. So, millers are active in local market. However, Agriwatch expects market to decrease by Rs100-150 from current level, as mill may restrict buying for some time. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs5200-5250 while Jodhpur line is being traded at 5500-5600. Moong in Jaipur market is being traded at Rs 5400. Overall tone in moong market remains firm.

Price Dynamics:

Urad cash market traded lower due to imported stock and its selling at discounted price at ports. Besides, higher import than allocated quota too remains bearish factor despite good demand in domestic market. Now commerce ministry has decided to check imported urad brought on the back of stay order by Madras High Court. Importers took advantage of stay order and continued import beyond limit set by govt. So, further import in bulk volume is not possible now, as stern action may be taken against importers by commerce ministry. Lower production prospects in rabi season, rough weather condition and procurement drive may support urad cash market once again. In Chennai market, Urad FAQ is being traded at Rs4250 to Rs4450 per qtl. Cash market may trade steady to slightly firm in coming weeks. Demand is good from mill.

Higher MSP, crop loss, decision to stop selling from Nafed stock and procurement drive would continue to lend support to cash moong market. Burma offers Moong At \$770-775 per tonne. Prices may stay steady to slightly firm due to

- Procurement drive
- Poor quality of new moong
- Active buying by mills &
- Restricted arrivals
- Costly import

Seasonality Index depicts steady to slightly firm movement in the near term

Market Outlook for Dec: Steady to slightly firm movement is expected in Dec after a slight downward correction.

Pulses Wise Technical Outlook for December -2018: -

Chana:

Outlook –We expect prices to notice steady to slightly firm movement in the medium term. Improvement in demand is likely at current level. Import would remain halted due to lower crop size in Australia and higher import duty. Buy on dip.

- ❖ Chart depicts steady to slightly firm movement in Dec.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4500to 4850 levels in this month.

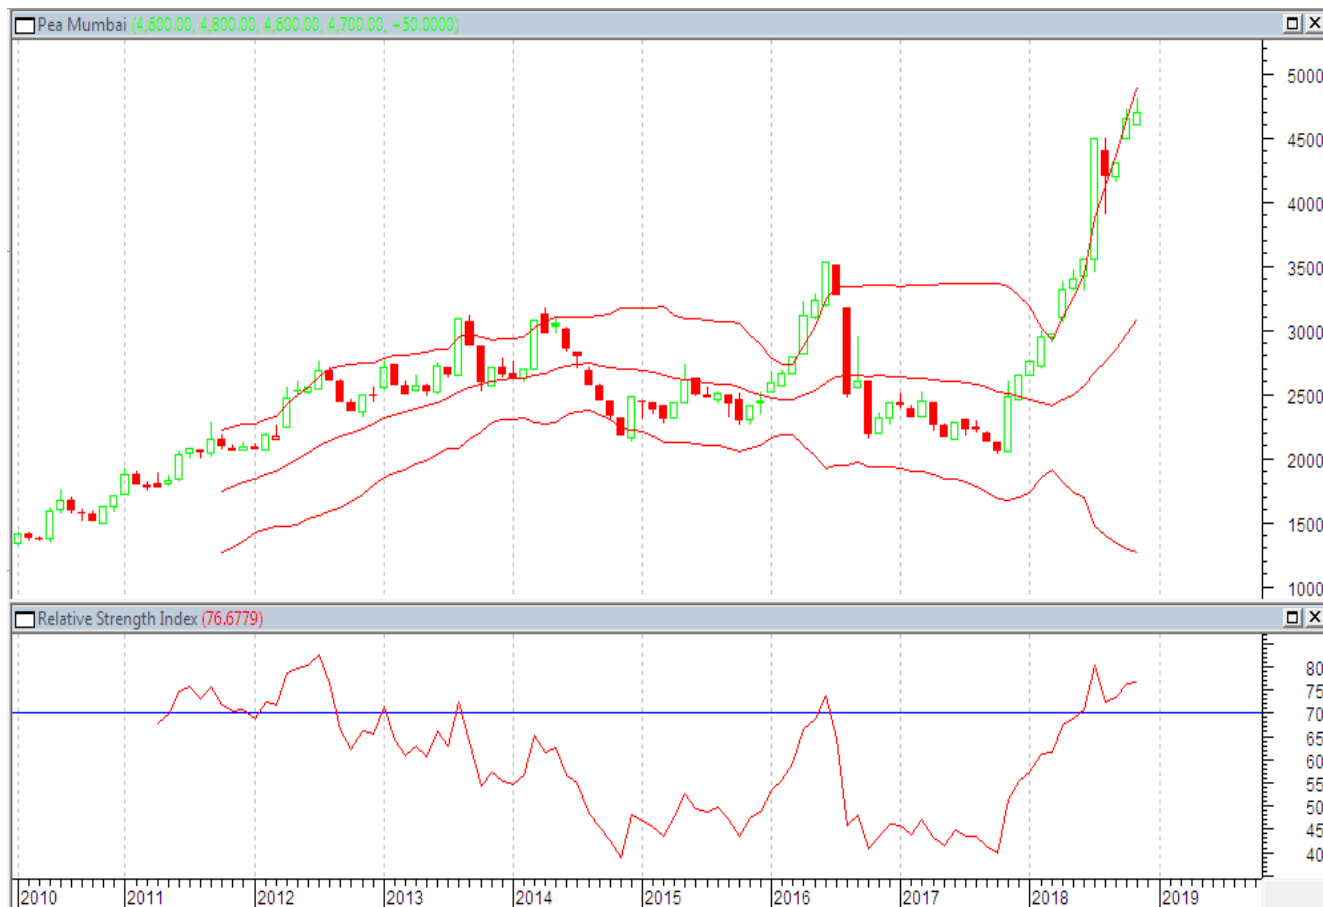

Trade Strategy: Buy on dip.

Trade Recommendations: Go long around 4550 with the first target of 4750 and second target 4850 with stop loss at 4450 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4250	4500	4600	4800	5000

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightly weak movement in this month taking clue from weak demand despite decreasing stock at ports. Costly import would keep market supported. Any major dip is unlikely.

- Candlestick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4600- 5000 in this month.

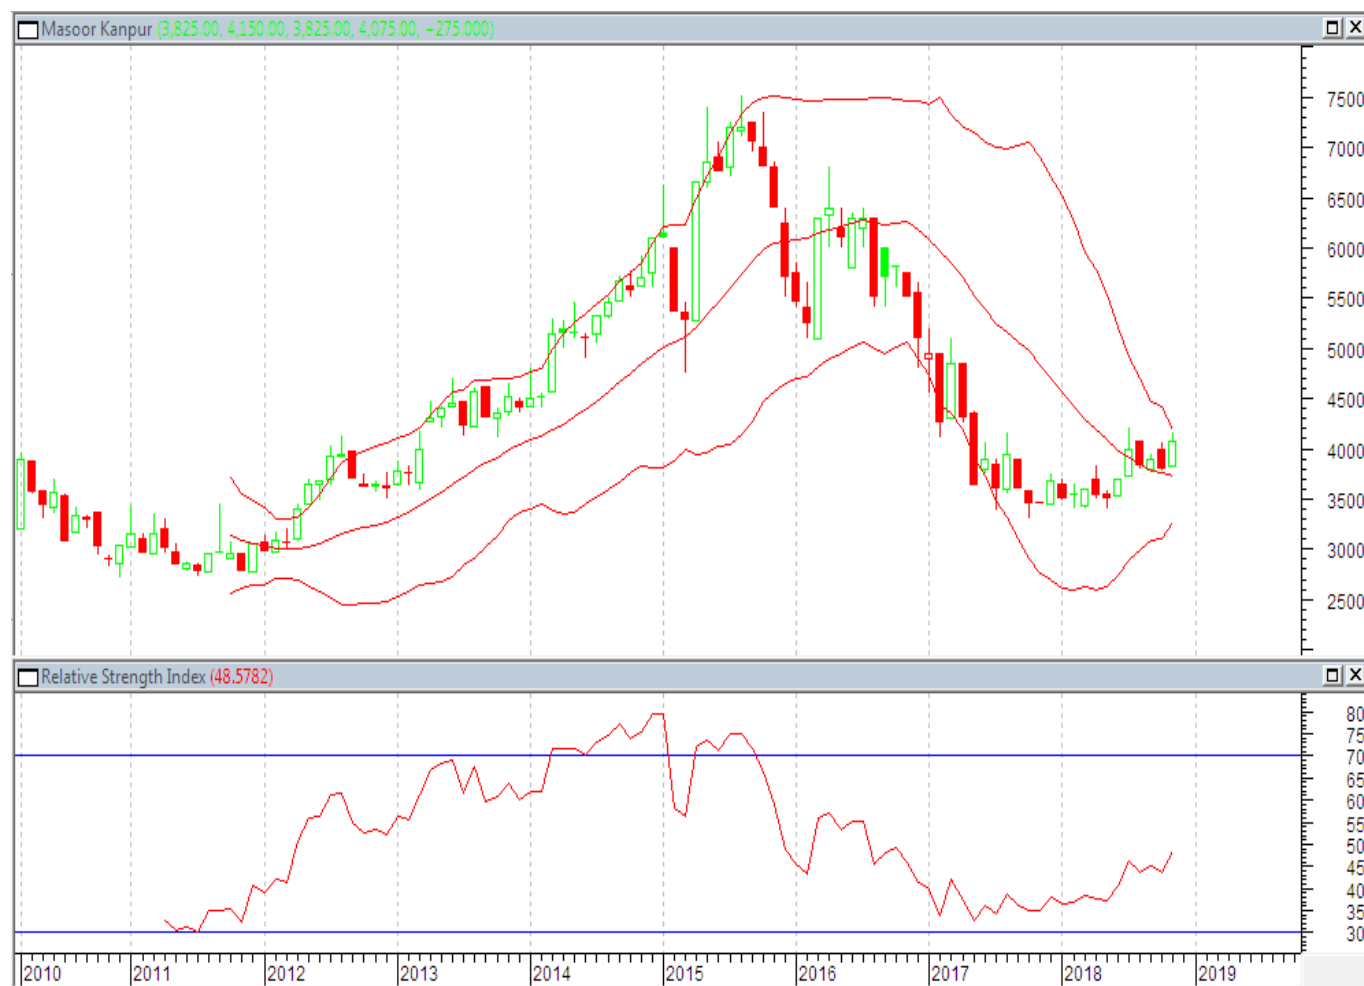

Strategy: Buy on dip

Trade Recommendations: Go long around 4600 with the first target of 4750 and second target 4800 with stop loss at 4500 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4350	4500	4700	4850	5000

Masoor :

Desi Masoor (at Kanpur) Spot Market Monthly Chart:

Outlook –Steady to firm movement is likely to be noticed this month.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3900-4250

Strategy: Buy on dip

Trade Recommendations: Buy around 3900 with the first target of 4150 and second target 4250 with stop loss at 3850 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3650	3850	4075	4250	4400

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to show firm movement in the coming week.

- Candlestick chart denotes firm movement in the market.
- Oscillator RSI is moving up in neutral region.
- Expected price range is 4500-5200

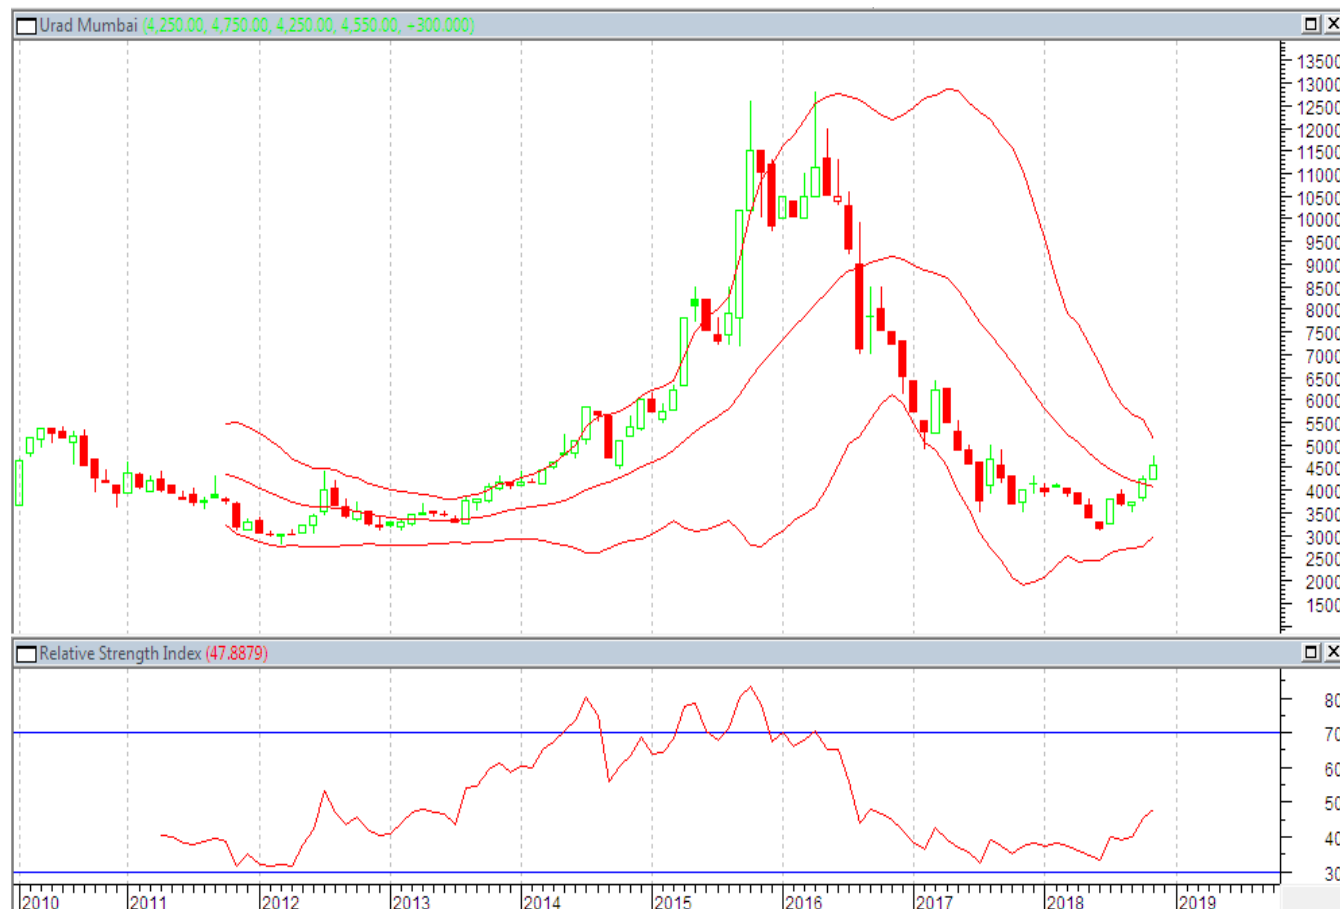

Strategy: Buy on dip

Trade Recommendations: -Go long around 4650 with the first target of 4850 and second target 5000 with stop loss at 4550 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4050	4200	4800	4700	4850

Urad

Urad FAQ- Burma Origin (at Mumbai) Spot Market Monthly Chart

Outlook – We expect steady to slightly firm momentum in the coming week.

- Candlestick chart shows steady to firm movement in the market.
- RSI is moving up in neutral region.
- Expected price range is 4350-4850

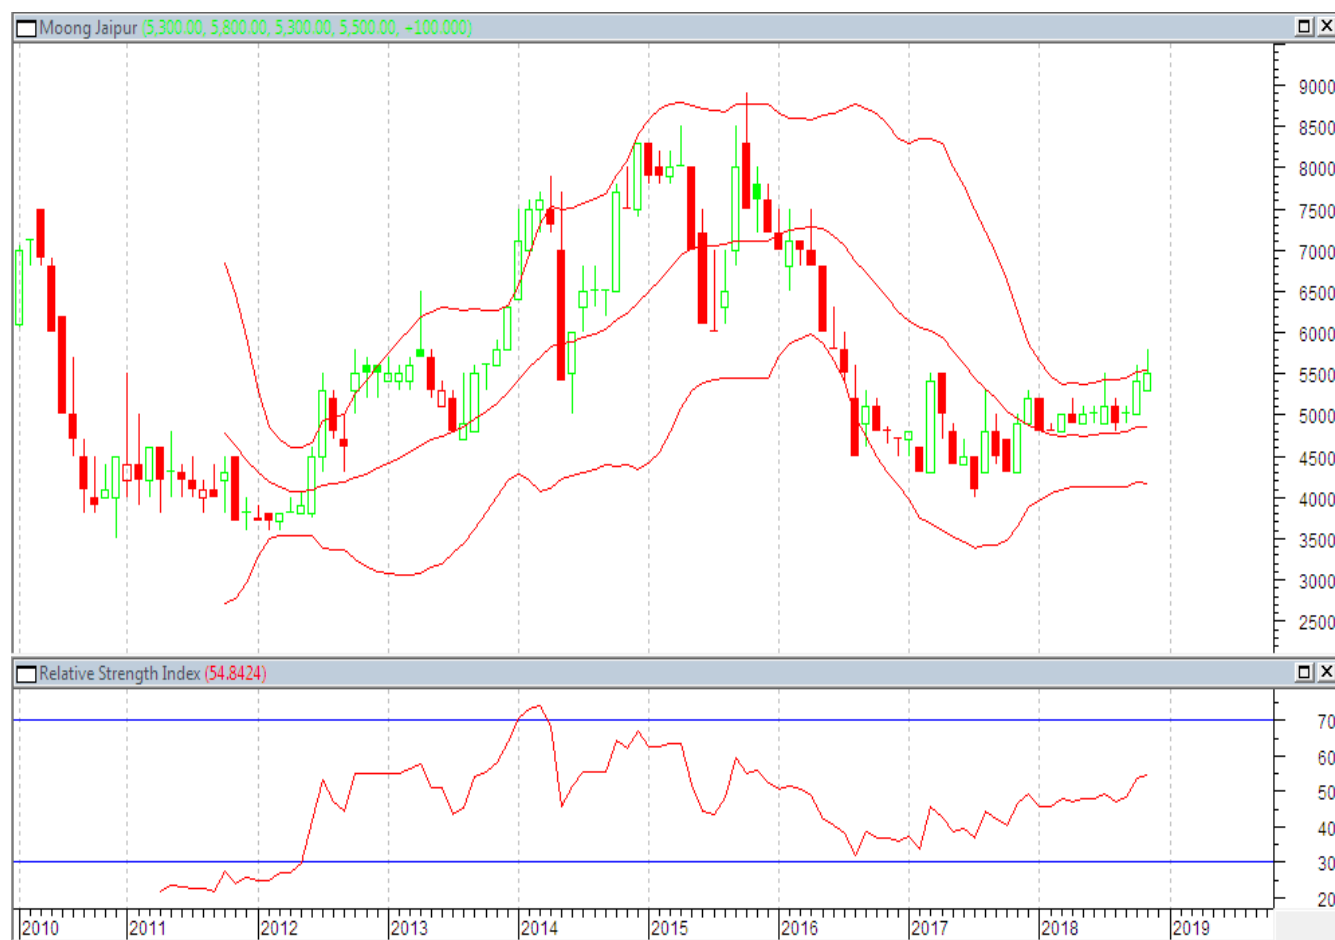

Strategy: Buy on dip

Trade Recommendations: Go long near 4450 for a target of 4650 and 4750 keeping stop-loss at 4350

Supports & Resistances
