

Pulses Monthly Research Report-January- 2019

Content**Pulses Sector-Highlights**

- Domestic
- International
- Monthly Outlook

Supply & Demand**Pulses-Wise Summary**

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- Rabi pulses area decreased by 6.44 % at 143.56 lakh ha against 153.44 lakh ha last year as on 4th Jan-2019.** Chana area is lagging by 10.86 % at 92.89 lakh ha against 104.21 last year. Farmers have covered 2.14 % lower area under lentil so far at 16.61 lakh ha against 16.97 lakh ha last year. Pea area is up by 10.21% at 10.10 lakh ha. Urad area is lagging by 10.17 % at 6.16 lakh ha against 6.86 lakh ha last year. Moong area too is lower by 0.44 % at 3.65 lakh ha against 3.67 lakh ha so far. Overall rabi area is unlikely to match last year's level as sowing has entered in last phase now. See sowing table on page no 6 for details.
- As per the latest updates by Agriculture Ministry the govt has procured 89 lakh tonne pulses and oilseed** under price support scheme from 2015-16 to dec -2018 against 8 lakh tonne purchased between 2010-11 to 2013-14. Procurement quantity is likely to increase as procurement process is still on. MSP operation was initiated in states like Tamil Nadu, Andhra Pradesh, Bihar and Uttar Pradesh. State & Center fund ratio is 50% each. Despite massive procurement, prices for pulses are ruling below MSP, as supply side seems at ease. Agriwatch expects prices to improve in the second half of the year.
- Continued cold wave in parts of chana growing region in MP is likely to affect standing crop of chana**, which are in flowering stages. In Maharashtra, moisture stress is still affecting late sown crop. Area under chana is almost 10 % lower and farmers in AP are unwilling to sell new crop at prevailing market price. Chana prices have decreased due to weak demand from mills and weak futures. However, fundamental for chana remains firm in the medium term and market is expected to start recovering by end Jan once again. Nafed would reserve 4 lakh MT chana stock for PDS in MP. Nafed has 15.64 lakh tonne chana in stock in MP. Buyers and sellers are inactive right now as demand for dal is weak. So stake holders should buy after a dip of Rs100-150 more from current level. As crop size would be lower (83 lakh tonne), good return might be expected in second half of the year.
- Tur market is expected to trade steady to slightly firm on lower crop size of new crop**, active buying by private trade and declining old stock with bulk users. Procurement in Telangana at MSP is on and Nafed has procured 10361.30 MT so far. Procurement in other states is yet to begin. It will remain supportive to tur market in the medium term. In Gulberga market tur is being traded at Rs 4775 per qtl. Arrival has decreased as farmers are unwilling to sell below MSP. So, firm momentum might be seen in cash tur market. Buying at current level seems riskless.
- Moong market is likely to trade steady to slightly firm in the weeks ahead. Procurement continues and Nafed** in various states has procured 2.65 lakh MT as on 3rd Jan-2019. It has procured 208366.47 MT in Rajasthan, 29136.74 MT in Karnatka, 13375.31 MT in Telangana and 12804.27 MT in Maharashtra including moong procured by Markfed too. Rest of the quantity was purchased in other states. As demand is weak, prices are likely to stay steady in coming weeks. Now new crop would be available from mid Mar, so any dip is unlikely in cash moong market. Selling from central pool would remain halted till procurement. Buying on dip seems good at current level.
- Weak demand from bulk users, over 1lakh MT import in Nov and slower pace of procurement pressurized cash market despite lower production, rains affected kharif crop. Besides, higher carryout too negate the effect of lower crop. Cash urad market is likely to trade steady to firm this month. Lower rabi area too remains supportive for cash urad market. Fresh demand from retail and bulk users are expected from Jan end. By then, Agriwatch expects market to improve once again. Govt has allowed urad dal export but its immediate impact is unlikely. Increasing fear of lower rabi production and procurement drive may help market to recover by the end of this month.
- Crop size of lentil is expected to be lower due to lower seeding, deficient rains and low soil moisture.** Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED has sold 25706.27 MT of masoor at an average price of Rs 3529.79 per quintal until 1st Jan-2019. NAFED has balance of 169597.85 tonnes in Madhya Pradesh and Uttar Pradesh MP has 161612.61MT stock while UP has 7985.10MT. NAFED may decide to restrict selling, sensing declining stock in domestic market and for supporting domestic price. Agriwatch expects lentils to remain in uptrend mode in near future.
- Peas sowing area is running higher by 10.21 to 10.10lakh ha. With imposition of import restriction till March-2019,** short supply is likely till mid Feb. It may push up pea price to a certain extent in coming weeks. If chana prices moves up, it would support pea price. New crop is expected from mid Feb. So overall trend steady to firm. Imported stock is declining fast. Chana price is ruling almost Rs200-300 per qtl higher than chana and it may cap any spike in pea price in domestic market. So, movement in chana price would remain price affecting factor for pea in India.

International Market Update:

- **Chickpea production in Canada is expected to increase from 1.02 lakh tonne to 3.11 lakh tonne** in 2018-19 due to higher yield and area. Area too is expected to reach from 68 to 179 thousand ha with expected yield of 1.77 MT per ha. Export is expected to come down from 48 to 25 thousand MT in 2018-19. Due to higher production, total supply is expected to increase from 1.51 to 3.37 lakh tonne. Export is expected to decrease from 1.16 to 1 lakh tonne in 2018-19. Domestic use would increase from 34 to 67 thousand tonnes. Carry-out stocks are expected to rise sharply. The average price for all grades of chickpeas is forecast to fall sharply, due to higher world and Canadian stocks.
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18.** Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.
- **Lentil production in Canada is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **Supply increased slightly due to large carry-in stocks. Export has been forecast to increase to 18 lakh tonne.** To-date Mexico, United Arab Emirates and India are the top export markets. Imports are expected to be lower than the previous year due to the above average grade distribution. Carry-out stocks are expected to fall due to the increase in exports. The overall average price is forecast to fall below the levels achieved in 2017-18 due to weaker world demand, larger domestic carry-out stocks and an above average proportion of grade distribution at the No.1 or 2 grade.
- **In the US, the area seeded to lentils for 2018-19 was forecast by the USDA at less than 8 lakh acres, down nearly 30% from 2017-18** due to lower area seeded in Montana. With estimates of average yields, 2018-19 US lentil production is estimated by the USDA to rise to 4 lakh tonne, up 18% from the 2017-18 level.
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area,** particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. The are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Area seeded to dry peas for 2017-18 in US is estimated by the USDA at 9 lakh acres due to a decrease in area in Montana.** With estimates of below average yields, US dry pea production is estimated by USDA to fall marginally to just over 6 lakh MT. US dry peas are expected to compete in Canadian export markets like China and the Philippines.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.
- **Global lentil market traded firm despite restricted trading activities due to year end holiday season.** Demand prospects remains good for new year. Exporters are expecting better demand from bulk users. Middle East would remain good prospective buyers. By the end of November, bulk movement to Turkey and other Middle East destinations totaled 38,200 metric tons (MT). During the same four month period this season, movement totaled 48,500 MT.
- **Despite improvement of planting area during rabi season in India global pea market traded firm.** Below average rainfall in December, rabi sowing may end up with previous year's level, except Chana. There is a possibility that farmers may increase sowing in first week of Jan, as cold wave in last five -six days and dew drop at night have maintained moisture level at average level. However, with such a large portion of the crop being sown late, weather conditions between January and March may be more critical in determining how much is actually produced.

Monthly Outlook: -Pulses are likely to trade steady to slightly firm in Jan.

Pulses Supply & Demand:

(*All quantities in Lakh tonnes)	Urad (Kha-Rabi)MY S to A)		Moong (Kha-Rabi) (MY-S to A)		Tur (MY-D to N)		Chana(MY-M to F)		Masur (MY-M to F)	
Marketing Year varies crop wise	2017-18	2018-19*	2017-18	2018-19*	2017-18	2018-19	2018-19	2019-20	2018-19	2019-20
Opening Stocks	8.70	8.97	8.21	7.26	9.65	8.07	11.9	14.5	7.09	2.89
Production /Fresh arrival	25.47	24.58	19.25	20.26	38.67	36.21	94.56	83.32	12.0	11.5

Exports	0.2	0.3	0.2	1	0.25	0.5	2	1	0.2	0.1
Consumption	26.5	27.5	21.5	23.5	42	43.5	92	93.5	19	20
Total Use(Export + Consumption)	26.7	27.8	21.7	24.5	42.25	44	94	94.5	19.2	20.1
Ending Stocks (Total Supply - Total Use)	8.97	8.25	7.26	4.52	8.07	2.78	14.5	9.8	2.89	1.79

Note: Agriwatch 1stAdv Estimate For 2018-19 for Urad ,Moong & Tur & preliminary estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to decline by 3.49 % from 25.47 to 24.58 lakh tonne due to lower crop area by 8.97% to 40.37 lakh ha.Import is expected to increase by one lakh tonne to 2.5 lakh tonne including G2G import. Total supply would increase slightly from 35.67 to 36.05 lakh tonne in 2018-19.Export would increase to 0.3 lakh tonne due to export incentive. Consumption would increase from 26.7 to 27.8 lakh tonne in 2018-19. So, carryout would decrease slightly from 8.97 to 8.25 lakh tonne.As carryout is higher, supply side is expected to be at comfortable level this year too. So any unexpected spike is unlikely under prevailing condition.

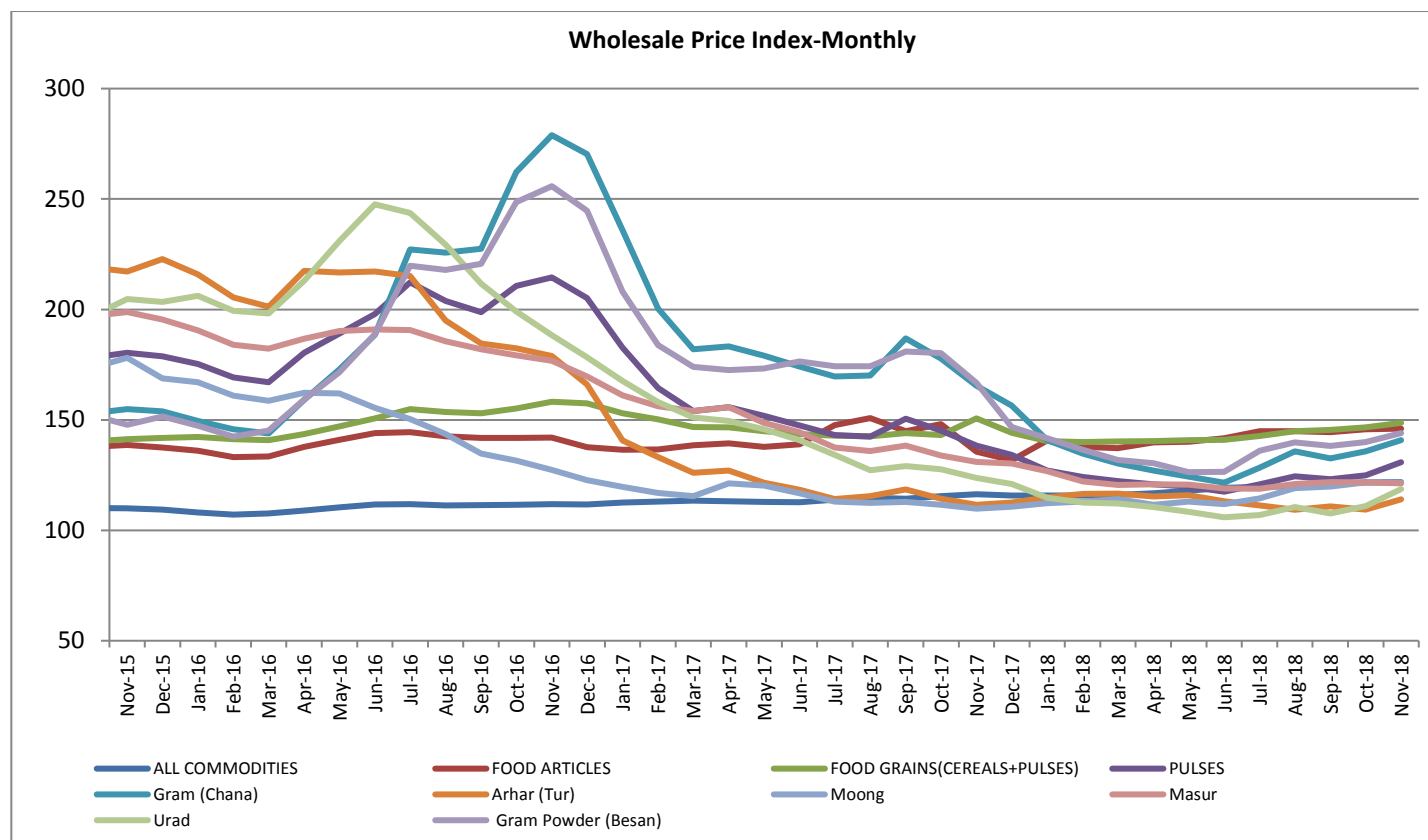

Moong: Moong production is likely to increase by 5.24 % from 19.25 to 20.26 lakh tonne due to higher crop area by 7.41% to 34.36 lakh ha in kharif season. Import is expected to remain same at 1.5 lakh tonne as last year. Total supply is expected to increase from 28.96 to 29.02 lakh tonne in 2018-19.As there is a demand from overseas market amid export incentive, export is likely to increase from 0.2to 1lakh tonne this year. Consumption would increase from 21.5 to 23.5 lakh tonne. Total usage is expected to touch 24.5 lakh tonne. Increase in export and consumption figure this year would drag down carryout from 7.26 to 4.52 lakh tonne .So any major decline in moong price is unlikely.

Tur:Tur production is likely to decrease by 6.36 % from 38.67 to 36.21 lakh tonne due to higher moisture stress during growth stage. Import is expected to increase by 2 lakh tonne to 2.5 lakh tonne due to cheaper availability in Myanmar. Total supply would decrease slightly from 50.32 to 46.78 lakh tonne due to lower production size. Export may increase from 0.25 to 0.50 lakh tonne due to export incentive. Consumption may increase from 42 to 43.5 lakh tonne in 2018-19 due to cheaper availability of dal. With export ,total consumption has been pegged at 44 lakh tonne. Higher consumption would drag down carry out to 2.78 lakh tonne for next year. Market is expected to find balance now and price would improve.

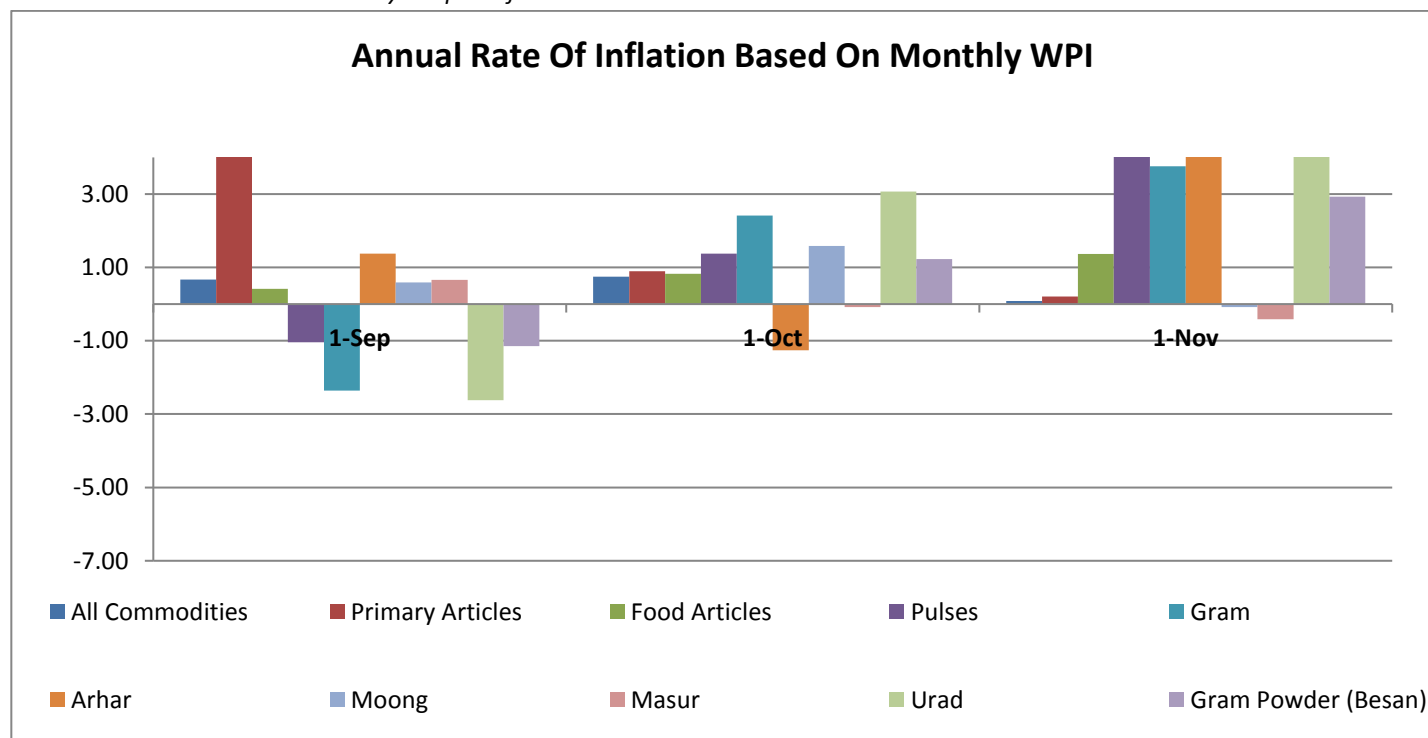

Chana: Higher carry in of 14.5 lakh tonne and 83.32 lakh tonne production for MY2019-20 amid 6.5 lakh tonne expected import total supply would decrease from 108.5 to 104.3 lakh tonne in new season, starting from Mar-2019. As chana price is ruling lower in domestic market India is expected to export only 1 lakh tonne chana/dal in new season. Consumption has been pegged at 93.5 lakh tonne , so total usage is expected to increase to 94.5 lakh tonne this year. Due to lower production, new season would start with 14.5 lakh tonne as carry in. Supply side is at comfortable level and Nafed has enough stock(23 lakh tonne) to take care of any spike in chana price. However, higher MSP (Rs4620) for next crop would keep market well supported at current level. Planting area (starting from Oct end) would influence chana price in domestic market. It is lagging by 15.13 % to 70 .46 lakh ha so far. It was 83.03 lakh ha last year by end Nov-2018. Sowing has entered in last phase now.

Masur: MY 2018-19 started with 7.09 lakh tonne amid 12 lakh tonne production. New season starting from Mar is likely to start with 2.89 lakh tonne as carryout Import. Import is likely to increase as crop size is expected lower for MY 2019-20 and touch 7.5lakh tonne in new season. lower production would drag down total availability at 21.89 lakh tonne. It would drag down total supply from 25.92 to 22.09 Lkh tonne. Export would increase slightly from 0.11 to 0.2 lakh tonne this year. Consumption has been pegged slightly up from 19 to 20lakh tonne in MY 2019-20. So , prices is expected to move up further. Import would remain costly at 40% duty.

Agri Commodity Indices –Nov -2018:

Pulses WPI: Pulses WPI increased by 5.9 point from 124.9 in Oct to 130.8 in Nov-2018.

Chana (Chickpeas /Bengal Gram): Fundamental Analysis and Outlook:

Market Recap:

Chana cash market traded lower taking clue from weak futures. However, lower area coverage has helped market to recover to some extent. Sentiment still remains weak as south Indian demand from central and north India is expected to decrease with commencement of new chana in AP. Market is likely to stay steady to slightly weak and may trade at Rs4450-4550 in Delhi market. Arrival is lower and sellers are unwilling to sell at current level. As there is much stock in central pool, any spike is unlikely despite lower incoming crop. New crop in central India is only two months away so stakeholders should release stock at every improvement. There is a common perception in the market that market would move up in second half of the new year as impact of lower crop size would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period.

All India average price for Chana decreased by 0.44 percent from Rs 4536 (Nov) to 4516 per qtl.in Dec. Australian Chana(imported crop) price too decreased by 0.81percent from Rs 4568 to Rs4531 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

.Prices are likely to stay steady to slightly weak in Jan due to:

- Weak demand despite higher MSP (Rs4620) for new crop
- Higher stock in central pool despite fear of lower crop size(83.30 lakh tonne)
- Liquidity crunch affecting bulk users to go for bulk buying
- Weak futures & new crop at hands
- Continuous import from African countries at cheaper rate
- Improvement expected Jan onward, but any spike is unlikely in the near term

Seasonality Index hints that Chana (gram) is likely to notice steady to weak movement in the Spot market in Jan-2019.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed above 9 and 18 days EMAs

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	April	4300	4320	4446	4600	4750
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	April	Buy on dip	4305	4500	4600	4200

Market Outlook for April -2019

Overall sentiment seems weak.

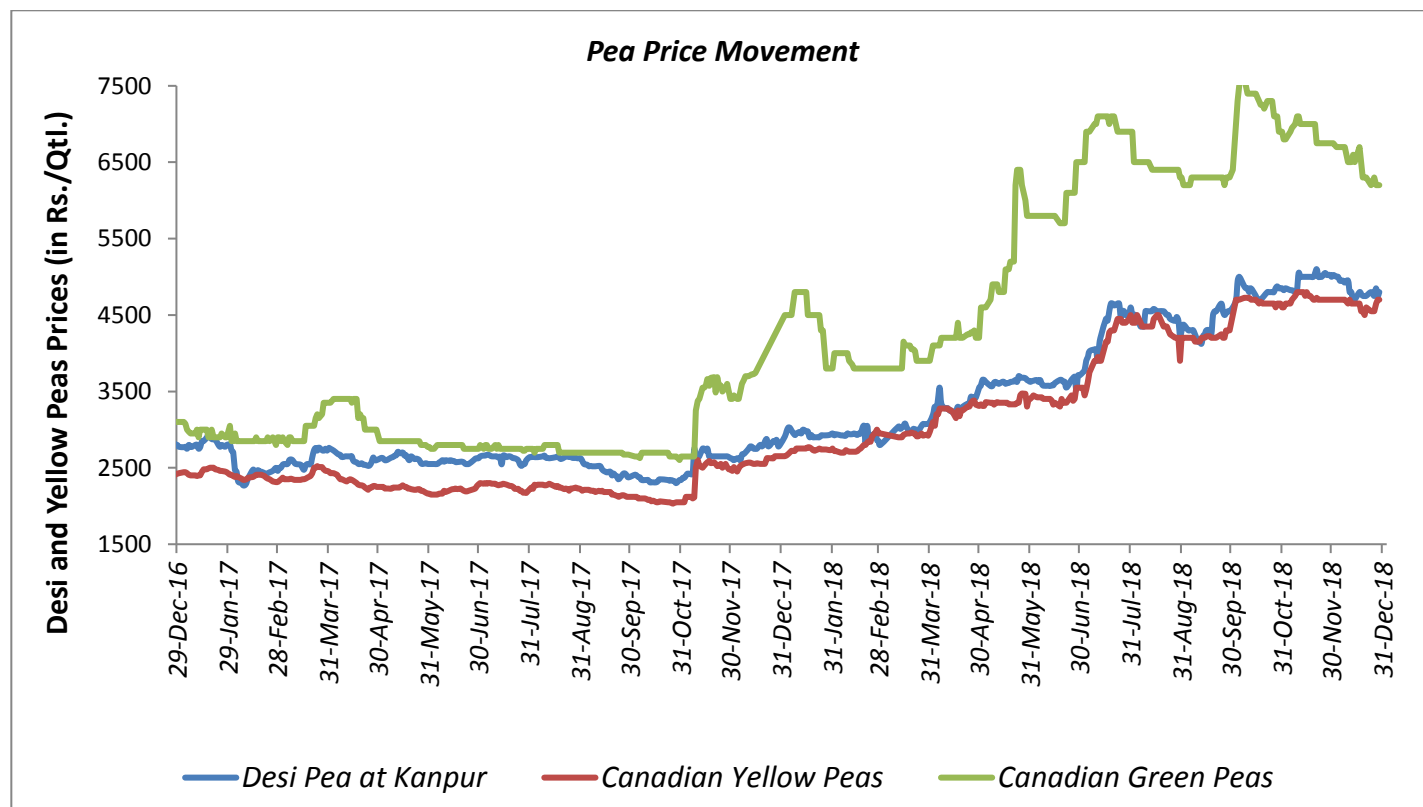

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Market Recap:

Pea prices could not sustain its upward momentum. Stock is lower at port and import remains restricted. No import is possible till March-2019. Demand decreased at higher level and decrease in chana price too pressurized pea market. Stock available in domestic market and at ports is said to be lower than consumption, till Jan. Prices may move up by Rs 100 more from current level as stock is depleting fast in domestic market. Further firmness in pea market depends on chana price movement. Overall area is up by 10.21% to 10.10 lakh ha so far. Overall tone seems firm until new crop hits the market. Stake holders should buy on dip and retain stock as chana price is expected to move up once again by the end of this month.

All India average price decreased by 3.76 % to Rs 5325 per qtl.in Dec. In Kanpur market, it traded weak by 3.46% to Rs 4842 per qtl. Higher import cost, import restriction till Mar and lower stock in domestic market may remain supportive in the near to medium term. However, demand was affected at higher level. Steady to weak sentiment may prevail in Jan too.

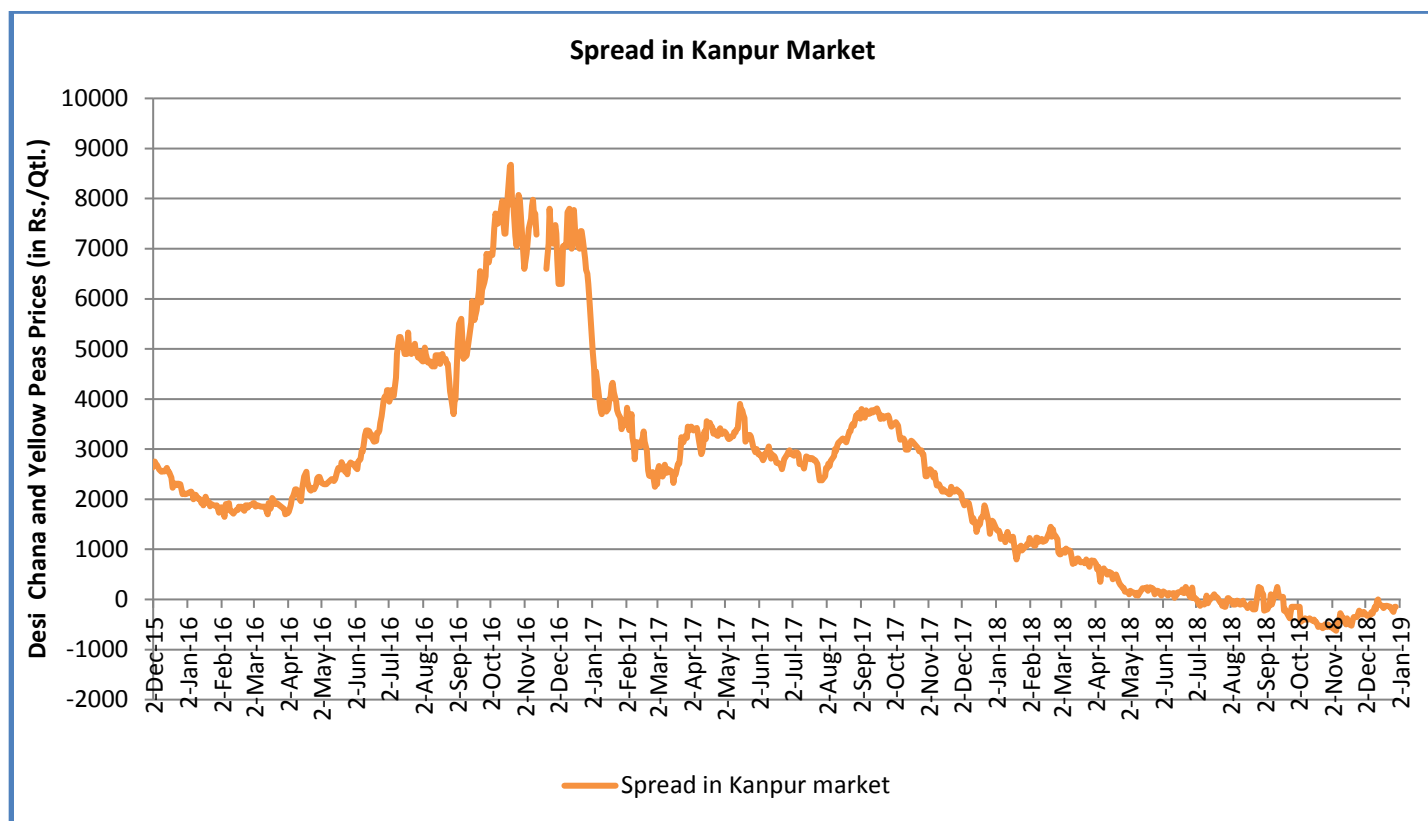

Price Dynamics:

In Dec-2018 market traded down due to weak demand and higher availability of other pulses at cheaper price. Pea market is expected to trade steady to slightly weak in Jan due to:-

- Weak demand at higher level despite import restriction
- Other pulses dal availability at cheaper price
- Higher area coverage
- New crop is one and a half month away

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone despite improvement in chana price. However, gap has contracted from Rs500 to Rs 250-300. Spread is expected to move in the negative range of 200 to 350 per quintal in the Jan on relative movement in Chana prices. Overall outlook seems steady to slightly weak due to weak demand.

Seasonality Index depicts that pea prices are likely to notice range bound movement in Jan-2019.

Market Outlook For Jan-Steady to slightly weak movement is expected.

Masoor (Lentils/Masoor):

Fundamental Analysis and Outlook:

Market Recap:

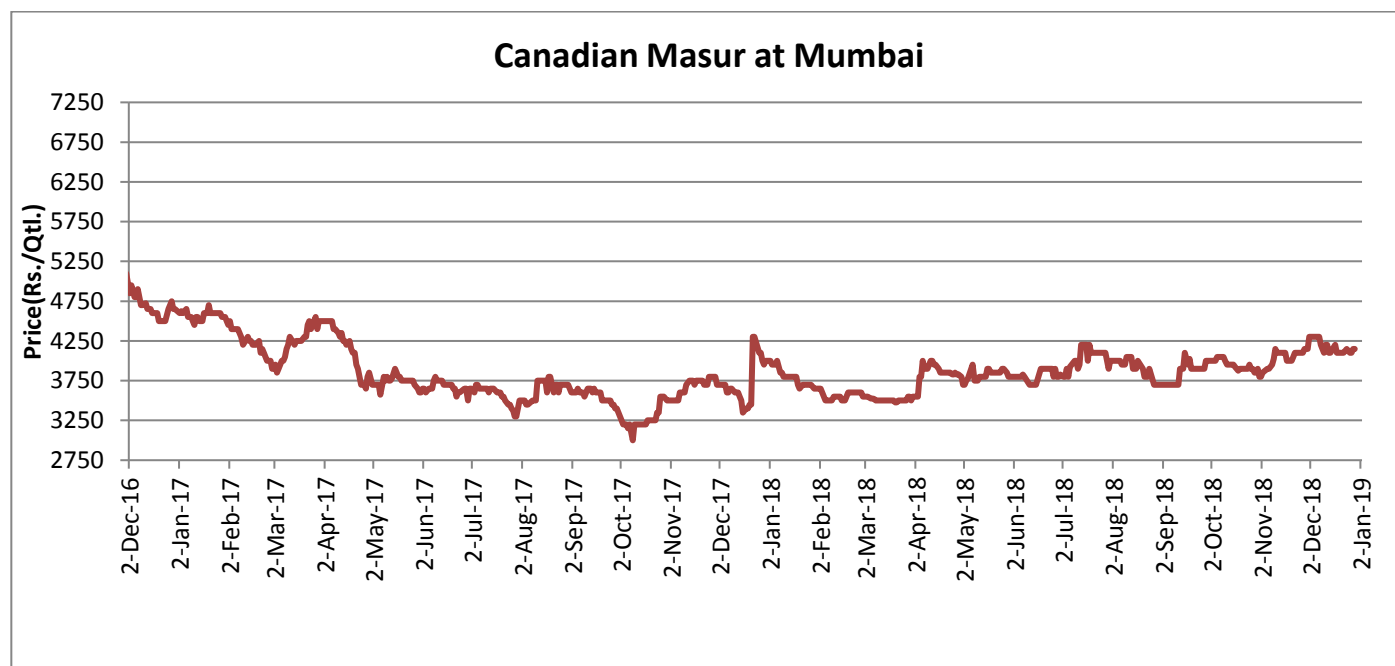

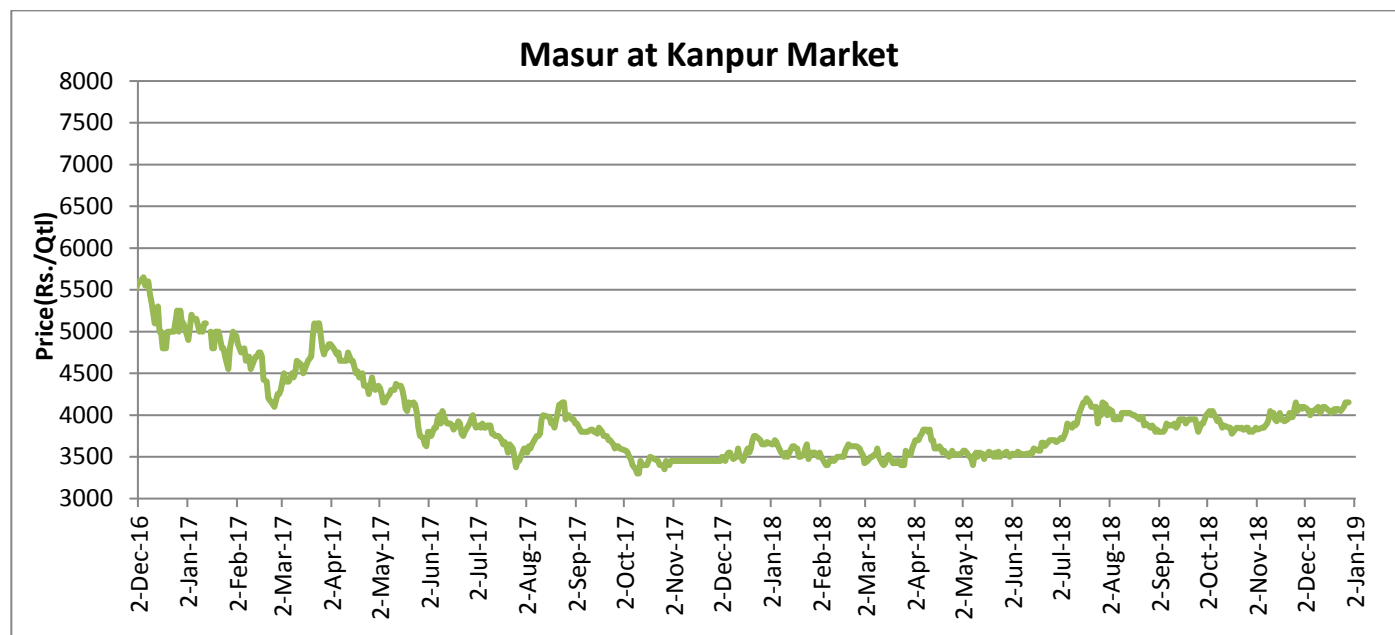

Crop size of lentil is expected to be lower due to lower seeding, deficient rains and low soil moisture. Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED has sold 25706.27 MT of masoor at an average price of Rs 3529.79 per quintal until 1st Jan-2019. NAFED has balance of 169597.85 tonnes in Madhya Pradesh and Uttar Pradesh MP has 161612.61MT stock while UP has 7985.10MT. NAFED may decide to restrict selling sensing declining stock in domestic market and for supporting domestic price.. Agriwatch expects lentils to remain in uptrend mode in near future.

Price Dynamics:

In Dec-2018, average price in key market Kanpur was up by 2.43 % to Rs 4073 per qtl. MoM basis. Prices are likely to trade slightly firm in Jan.

Firmness is expected due to:

- Higher MSP (Rs 4475 per qtl) for new crop
- Likely lower production due to dry condition
- Declining stock
- Nafed restricted selling &
- Costly import at 40 % duty

Seasonality Index depicts range bound to slightly firm movement in Jan-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Govt has allowed export for Tur dal and it would support cash market from Jan end. As new arrivals in major markets are increasing, prices of tur may stay steady at current level. Private buyers are active and procurement drive is yet to begin, so Agriwatch expects firmness from mid Jan, supported by lower crop size this year. Currently dal demand is weak and is expected to improve by Jan end. In Gulberga market tur is being traded at Rs 4800-4900 per qtl. It may decrease by Rs 100 with increasing arrivals. However, with commencement of procurement, it would cross 5000 by mid Jan.

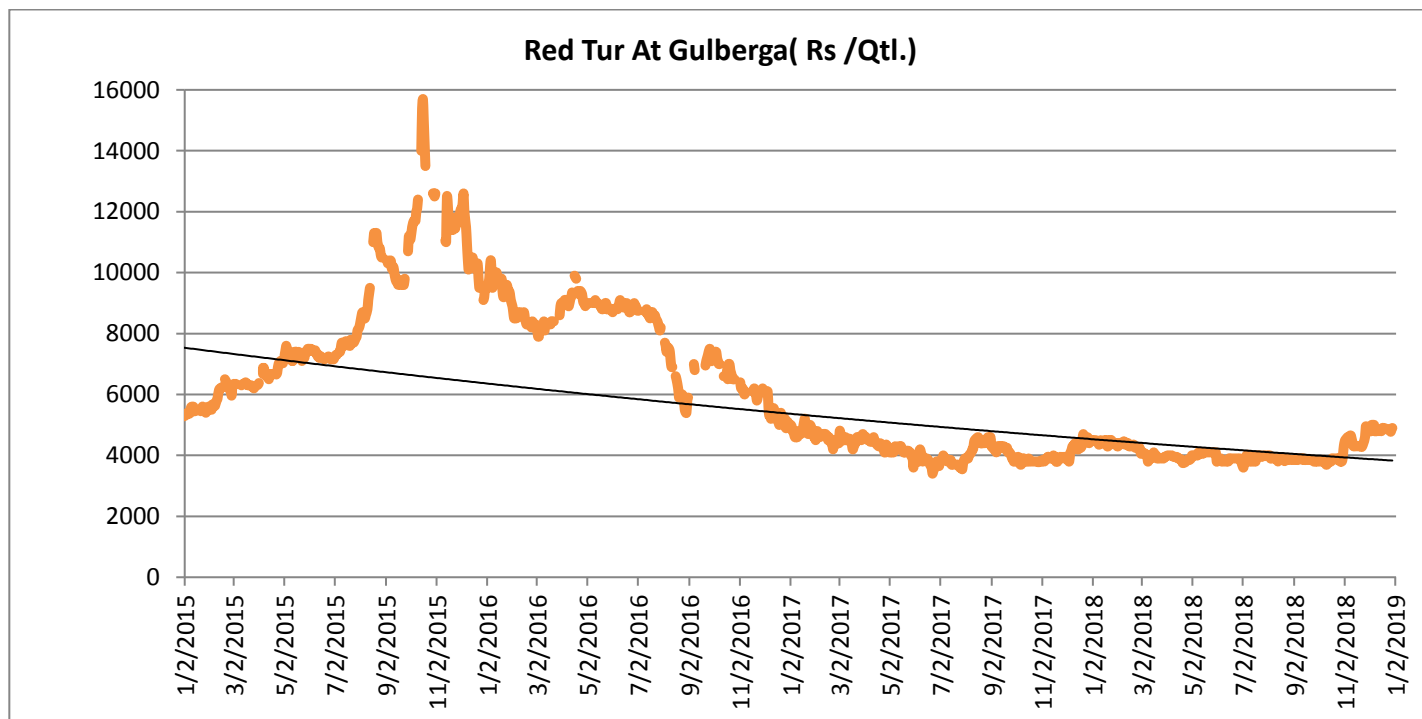

Market Recap:

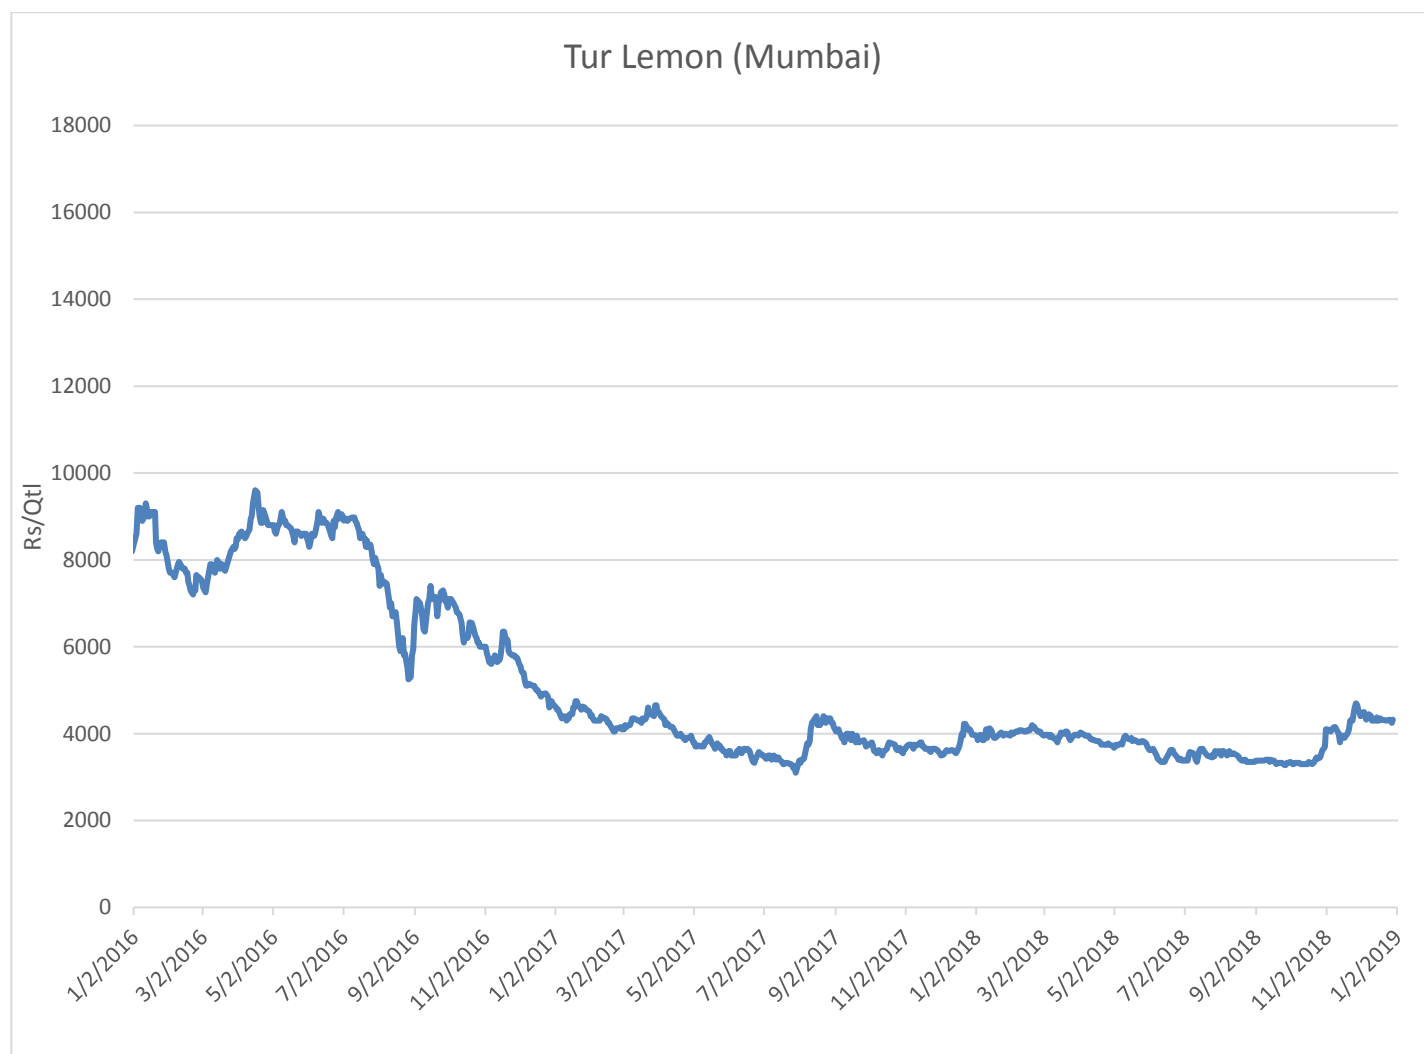

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Price Dynamics:

In Dec-2018, average price in Gulberga market was up by 8.47 % from 4482 to 4860 per qtl. due to good demand and lower crop size. In Jan market is likely to improve due to

- Higher MSP
- Lower crop size
- Festive demand and likely higher procurement ahead of Lok Sabha Election year
- Comparatively lower stock in mills.

Seasonality Index-depicts steady to slightly weak movement in Jan

Market Outlook for Jan:

Fundamental remains supportive for Tur cash market and outlook seems firm.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

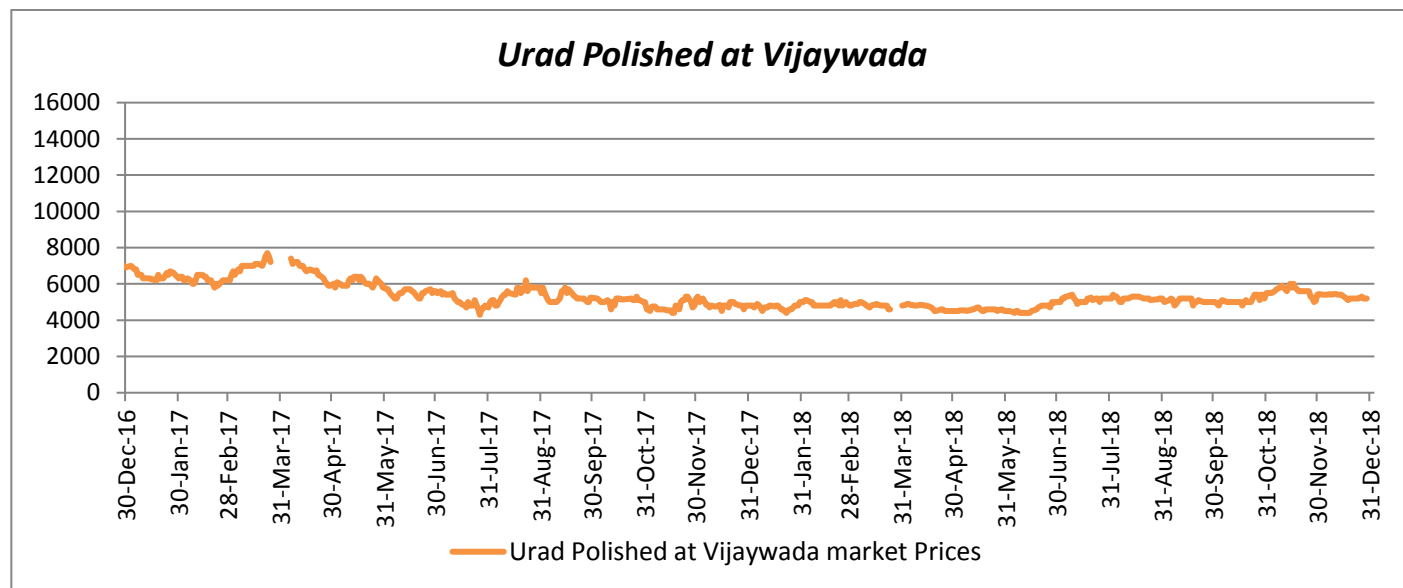

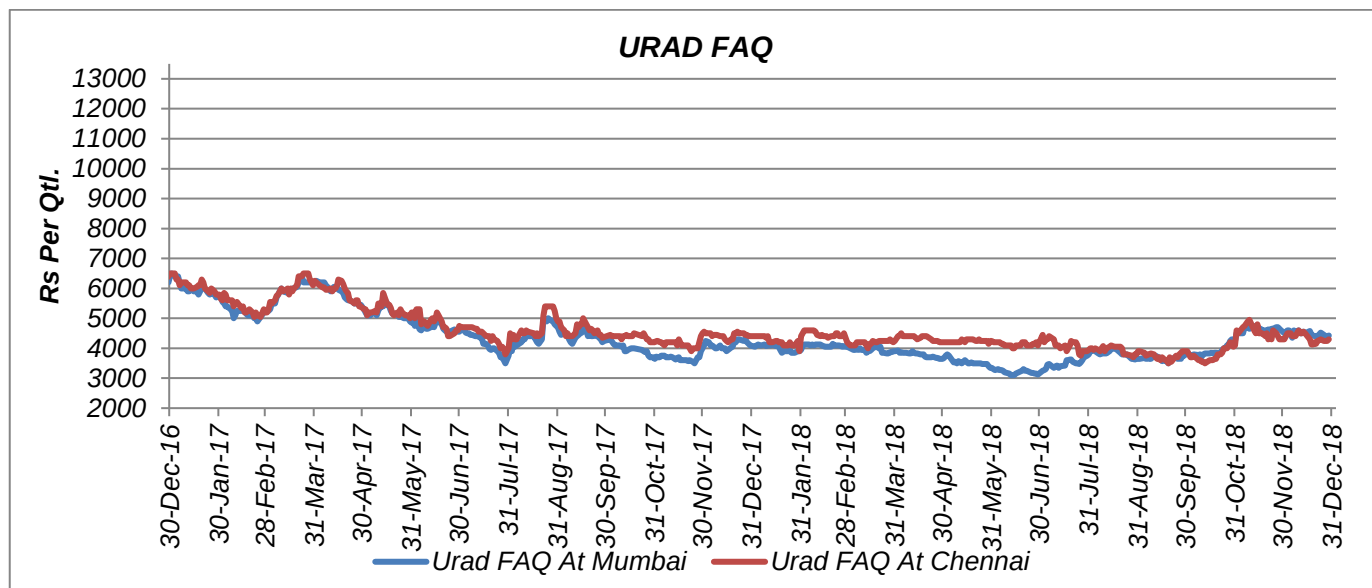

Market Recap:

More than one lakh tonne import in Nov & around 2 lakh tonne combined in Oct- Nov impacted urad cash market negatively during last two weeks despite 8.95% lower rabi acherage. Higher import and weak demand distorted market sentiment and it decreased by Rs 200 in cash market to Rs 4300-4400 per qtl. Now, market is expected to adjust excess supply from imported stock and may find balance once again in coming weeks. This week it may trade range bound and as soon as demand improves, it would move up once again.

Price Dynamics:

In Dec, average prices in key markets including Mumbai/was down by 0.55 % percent to 4483 per qtl. In Chennai it is being traded at Rs 4300-4350. Prices may stay steady to slightly firm in Jan due to

- Ongoing Procurement on MSP
- Lower rabi area
- Crop loss in Raj, Mah and AP
- Unfavorable weather condition for rabi sowing
- Restricted import
- Likely commencement of buying by mills at lower level

Seasonality Index depicts steady to slightly firm movement in the near to near to medium term.

Production:

According to the Agriwatch preliminary estimates, Kharif Urad production for MY 2018-19 has been pegged at 18.81 lakh tonne against 19.19 lakh tonne 2017-18. In first adv. estimate govt has projected 2.65 MMT urad production for 2018-19.

Market Outlook for Jan: Prices are likely to trade steady to slightly firm in Jan-2019

Fundamental Analysis and Outlook For Moong:

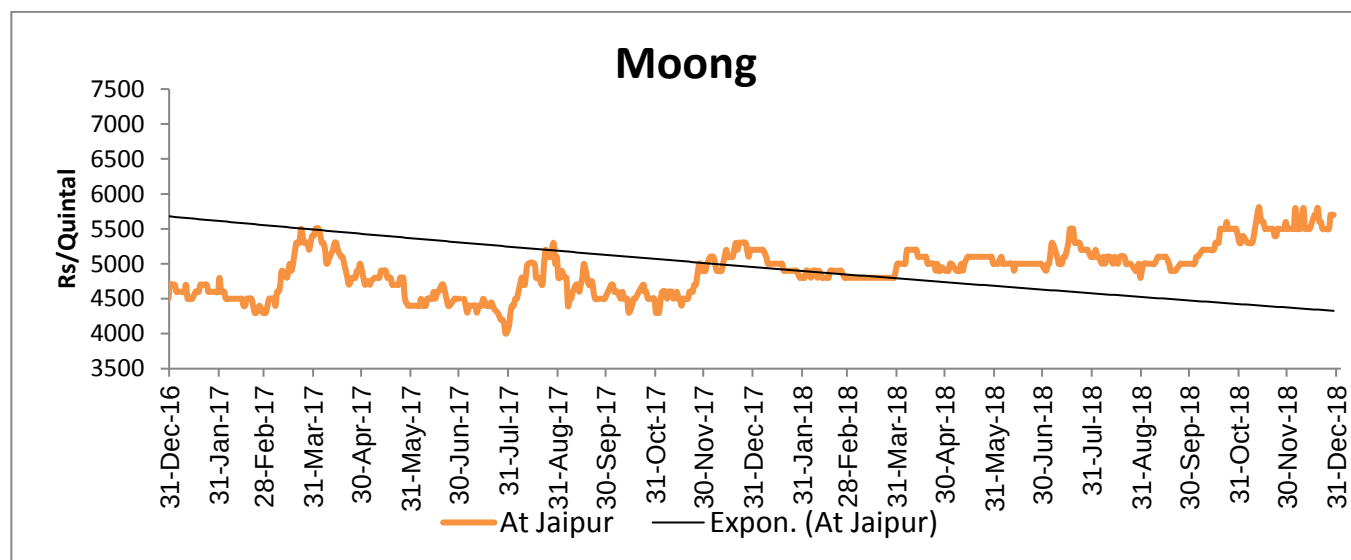

Market Recap:

Demand for moong and dal was registered weak during review month and it affected firm sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from Jan end. Besides, area under rabi moong is up by 5.42 % to 3.08 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly firm tone may prevail in cash moong market in Jan. Myanmar has decreased CiF quote from \$760 to \$730 in last one week despite lower availability in Burma.

Price Dynamics:

Moong market is likely to trade steady to slightly firm in the weeks ahead. Procurement continues and Nafed in various states, has procured 2.65 lakh MT as on 3rd Jan-2019. It has procured 208366.47 MT in Rajasthan, 29136.74 MT in Karnataka, 13375.31 MT in Telangana and 12804.27 MT in Maharashtra including Markfed procurement. The remaining quantity was purchased in other states. As demand is weak, prices are likely to stay steady in coming weeks. Now new crop would be available from mid Mar, so any dip is unlikely in cash moong market. Selling from central pool would remain halted till procurement. Market is expected to move up slightly in Jan due to:

- Procurement drive
- Decreasing arrival
- Active buying by mills &
- Restricted selling from central pool stock
- Costly import

Seasonality Index depicts steady to slightly firm movement in the near term

Market Outlook for Jan: Steady to slightly firm movement is expected in Jan after a slight downward correction.

Pulses Wise Technical Outlook for Jan -2019: -

Chana:

Outlook –We expect prices to notice steady to slightly weak movement in Jan-2019. Weak demand & higher stock in central pool remains price affecting factors despite lower crop size. Import would remain halted due to higher duty and lower crop size in Australia. Buy on dip is good at end Jan-2019. Market may trade down due to:

- ❖ Weak demand
- ❖ Higher stock in central pool
- ❖ New arrival
- ❖ Limited buying by private trades due to money crunch
- ❖ Expected price band for Chana in Delhi is 4350 to 4650 levels in this month.

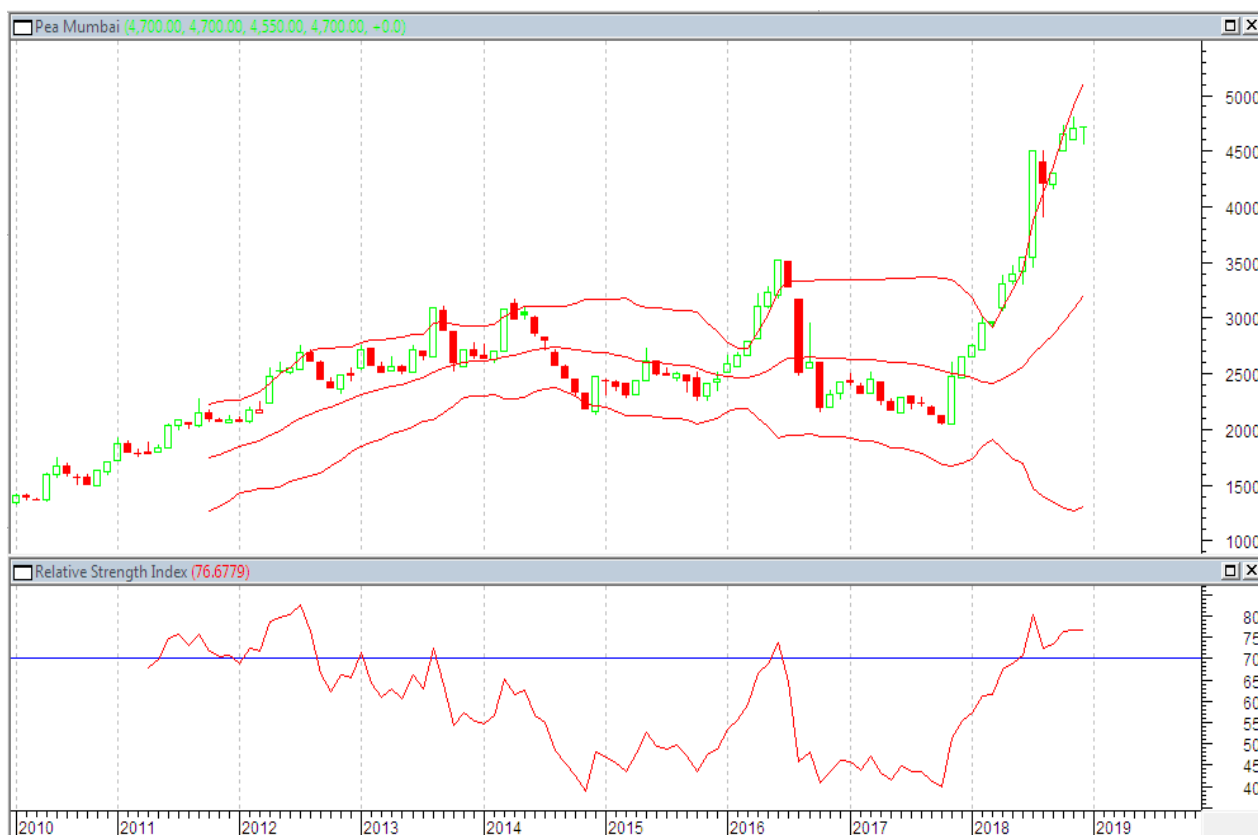

Trade Strategy: Buy on dip.

Trade Recommendations: Go long around 4350 with the first target of 4500 and second target 4600 with stop loss at 4300 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4250	4350	4450	4600	4700

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightly weak movement in this month taking clue from weak demand despite decreasing stock at ports. Costly import would keep market supported. Any major dip is unlikely.

- Candlestick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4600- 5000 in this month.

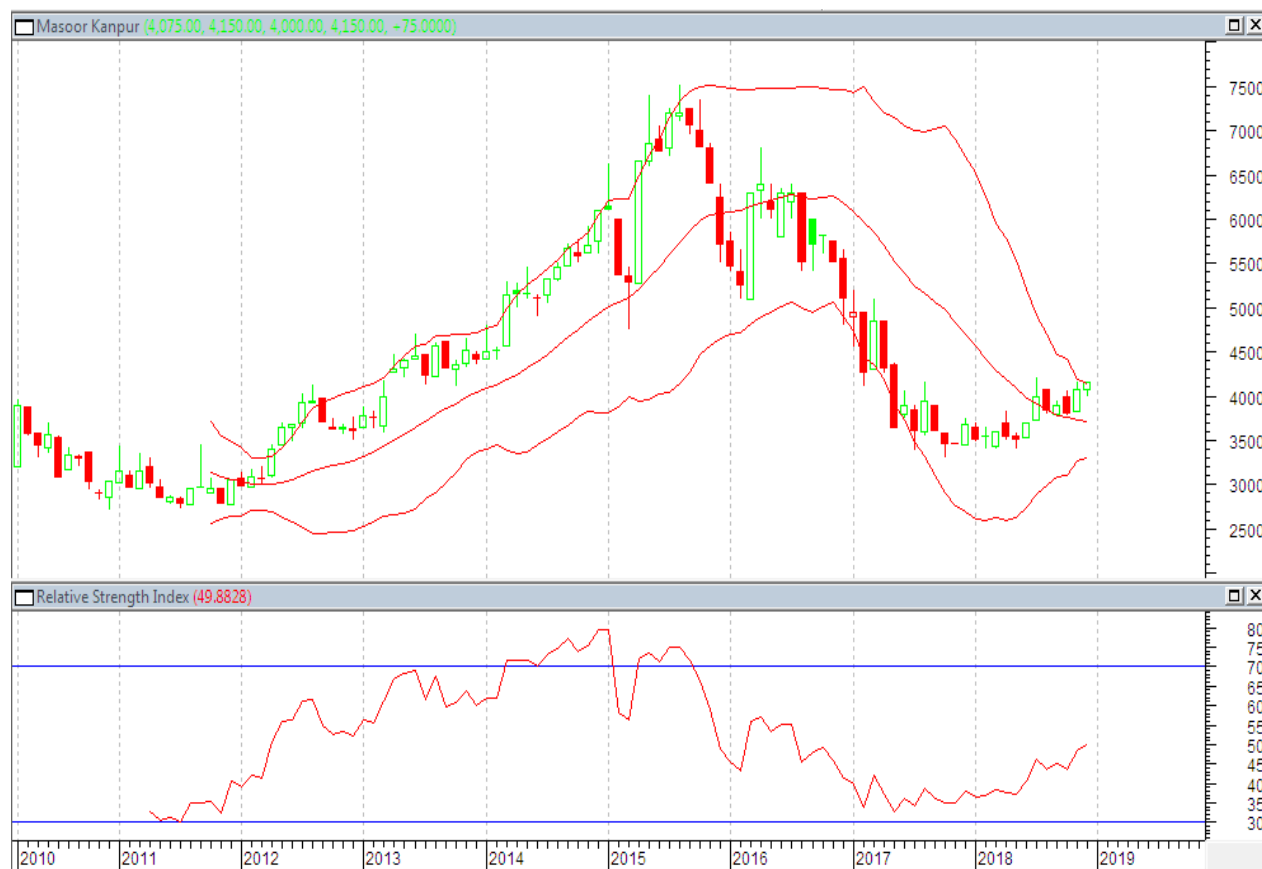

Strategy: Buy on dip

Trade Recommendations: Go long around 4600 with the first target of 4800 and second target 4900 with stop loss at 4500 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4350	4500	4700	4900	5000

Masur :

Desi Masur (at Kanpur) Spot Market Monthly Chart:

Outlook –Steady to firm movement is likely to be noticed this month.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3900-4300

Strategy: Buy on dip

Trade Recommendations: Buy around 3900 with the first target of 4150 and second target 4250 with stop loss at 3850 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3800	3900	4150	4350	4450

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to show firm movement in the coming week.

- Candlestick chart denotes firm movement in the market.
- Oscillator RSI is moving up in neutral region.
- Expected price range is 4500-5200

Strategy: Buy on dip

Trade Recommendations: -Go long around 4650 with the first target of 4850 and second target 5000 with stop loss at 4550 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4050	4200	4900	4700	4850

Urad

Urad FAQ- Burma Origin (at Mumbai) Spot Market Monthly Chart

Outlook – We expect steady to slightly weak momentum in this month.

- Candlestick chart shows steady to weak movement in the market.
- RSI is moving down in neutral region.
- Expected price range is 4350-4850

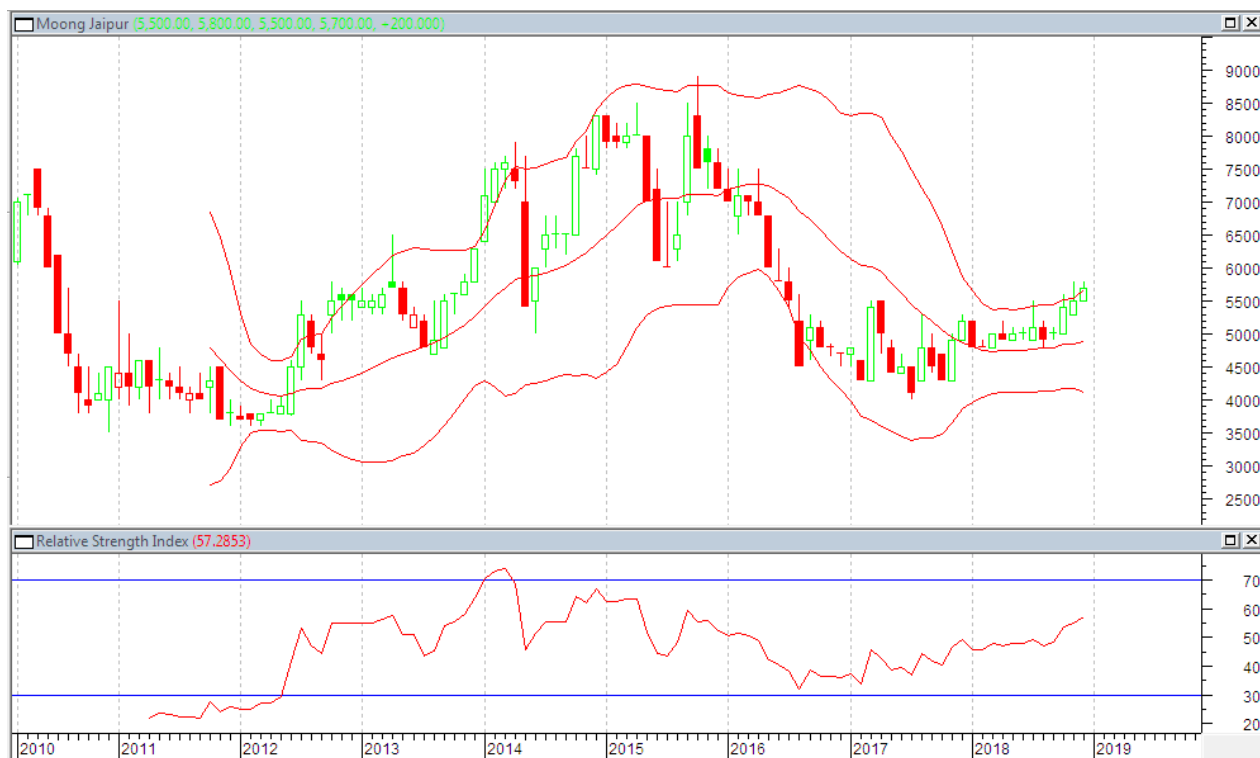

Strategy: Buy on dip

Trade Recommendations: Go long near 4350 for a target of 4500 and 4600 keeping stop-loss at 4300
