

**Pulses Monthly Research Report-February- 2019**

**Content****Pulses Sector-Highlights**

- Domestic
- International
- Monthly Outlook

**Supply & Demand****Pulses-Wise Summary**

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

**Appendix**

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
  - India
  - Australia
  - Canada

**Domestic Market Fundamentals:**

- **Overall rabi area is unlikely to match last year's level as sowing is almost over now for chana, lentil and pea.** Urad and moong sowing would continue. Rabi pulses area decreased by 5.74 % at 153.35 lakh ha against 162.70 lakh ha last year as on 01<sup>st</sup> Feb-2019. Chana area is lagging by 10.02 % at 96.35 lakh ha against 107.08 last year. Farmers have covered 1.72 % lower area under lentil so far at 16.90 lakh ha against 17.19 lakh ha last year. Pea area is up by 11.36 % at 10.41 lakh ha. Urad area is lagging by 10.83 % at 7.63 lakh ha against 8.56 lakh ha last year. Moong area too is down by 6.12% at 6.81 lakh ha against 7.25 lakh ha so far.
- **Recovery in chana market in the beginning of Feb seems a temporary phenomenon because standing crop in major growing states like Rajasthan, UP and MP are recovering from moisture stress condition.** Recent rains are said to be beneficial for the standing crop and yield recovery is expected to improve. New crop is due in MP and Rajasthan and would hit market by mid Mar, followed by UP. Crop in these regions may compensate yield loss in AP, Karnataka and Maharashtra to a great extent. So production size may improve from 83 to 89 to 90 lakh tonne under normal condition.. Besides, there is 20 lakh tonne chana in central pool and huge carryout from last year's crop would continue to suppress chana price in cash market. In Delhi market chana may come down to Rs 4150-4200. Overall tone in chana cash market seems bearish. Buyers/stockists should sell on rise. In February cash market may trade in the range of Rs4200 to Rs4400 in Delhi.
- **Even cash tur market may trade slightly lower despite strong fundamental. Stockists are releasing old stock at higher price.** Millers are purchasing new tur as per their immediate demand. Under prevailing condition tur may trade lower by Rs100 to 150 more from current level. New arrival from Maharashtra and Karnataka continues. In Maharashtra , Telangana and AP procurement under PSS(price support scheme) continues. It would cap market to move down beyond a certain level. Tur in Gulberga market is being traded at Rs 5100-5400. As procurement on MSP(5675 per qt.) would continue till March-any major dip in tur market is unlikely. So buying around 5000 seems riskless. It may give good return in the second half of the year. Burma is offering Tur at \$610 per MT basis Indian port. However, till March import is unlikely to occur due to new incoming crop.
- **Import of Urad is not possible till 31<sup>st</sup> March as per DGFT decision. However, some importers are trying to get stay order.** Overall, view is that now Clarence at port would be difficult till March-2019. As demand in local market is weak and there is plenty of stock available in domestic market and govt's godown, any major jump in Urad market is unlikely despite weak production scenario from rabi crop. So, stake holders should sell old stock when market improves by Rs300 to 400 hundred. Selling from govt. 's godown continues through tender. Urad in various market is being traded at Rs 4200 to Rs 4600 per qtl in various market. So any big jump is unlikely in cash urad market. Burma is offering FAQ Urad at \$460 & \$580 per MT. Stake holders should sell on rise. Demand is weak.
- **Moong market is likely to trade steady to slightly firm in the month of February. No new crop is due till March.** So any major decline in moong market is unlikely despite ample availability of old crop in central pool and cash market. Demand from mills is weak. At current price moong may extend its loss by Rs 200 more. It may trade in the range of Rs 5400 to Rs 6000 in Jaipur market. Stake holders should not hold stock for a longer time. With ending of rabi procurement drive, it may slip once again. Myanmar is offering moong at \$680 per MT. New crop would start hitting from UP and Bihar from March end. Millers have covered their one and a half months need while demand is weak. So buy and sell strategy seems good for moong.
- **New crop of lentil started hitting the markets of Bina,Sagar and Khurai in MP region.. However, lower crop size and limited old stock would not allow market to fall beyond a certain level.** There is no good report from Pratap Ganj line of Rajasthan. Crop in these regions have suffered moisture stress. So yield may decrease by 15 to 20 percent from normal. Stake holders should buy new crop for better gains in coming months. Overall crop size may be 20-25 percent lower this year. Besides , there is no shipment expected before March-2019. So masur may move up further after new crop pressure decreases. Stake holders may expect good price from April end. Right now lentils being traded at Rs4000 to Rs4400 in various markets.
- **Pea market may trade steady to slightly up due to import restriction and lower stock at ports. Besides, local crop is smaller and it would not fulfill actual requirements.** New crop will be available from Feb end and supply side would remain a ease till May. After that policy regarding Import would be a price driving factor. Any major spike in pea market is unlikely in the near term, so buy and sell strategy seems good rather than to hold stock for a longer period. Currently , Pea white, Canada is being traded at Rs4750 to Rs4900 in Mumbai Ans Green at Rs 7200.
- **In Mumbai Kabuli chana from Ethiopia and Sudamn is being traded at Rs Rs4275 and Rs 4225 per qtl, respectively, while Burmesse Kabuli is being quoted at Rs4525.** As new crop is almost under maturity phase, any major jump is unlikely in Kabuli chana market in the near term. Demand remains weak.

#### International Market Update:

- **Global chickpea market traded almost steady and is expected to move slightly up on increasing buyers need and unwillingness to sell by stockists. Quality issues with Argentina's crops is still there and worries about the pending size of the crop in Mexico remain supportive to the cash market fundamental. However, market participants expect global inventories to remain large relative to prospective demand through at least the end of the calendar year.**
- **Lentil markets traded firm tone on the back of strong opening season export pace and a relatively positive demand outlook. By the end of November, Canada's lentil exports pushed ahead of last year, totalling just over 588,000 metric tons (MT) between August and November, compared to around 510,000 during the same period last season.**
- **Chickpea production in Canada, is expected to increase from 1.02 lakh tonne to 3.11 lakh tonne in 2018-19 due to higher yield and area. Area too is expected to reach from 68 to 179 thousand ha with expected yield of 1.77 MT per ha. Export is expected to come down from 48 to 25 thousand MT in 2018-19. Due to higher production, total supply is expected to increase from 1.51 to 3.37 lakh tonne. Export is expected to decrease from 1.16 to 1 lakh tonne in 2018-19**
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18. Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.**
- **Chickpea export from Russia increased from 9104(Oct) to 19,326 metric tons in Nov. However, it was down by 28% in this calendar year at 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They bought 6,167,4,668 and 2,547 MT so far.**
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct. This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.**
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields. Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19**
- **In the US, the area seeded to lentils for 2018-19, was forecast by the USDA at less than 8 lakh acres, down nearly 30% from 2017-18 due to lower area seeded in Montana. With estimates of average yields, 2018-19 US lentil production is estimated by the USDA to rise to 4 lakh tonne, up 18% from the 2017-18 level.**
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area, particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total, yellow pea production may touch 30 lakh tonne, while green pea at 4 lakh tonne. There are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.**
- **Area seeded to dry peas for 2017-18 in US is estimated by the USDA at 9 lakh acres due to a decrease in area in Montana. With estimates of below average yields, US dry pea production is estimated by USDA to fall marginally to just over 6 lakh MT. US dry peas are expected to compete in Canadian export markets like China and the Philippines.**
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.**
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18. Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.**

**Monthly Outlook:** -Pulses are likely to trade steady to slightly firm in Feb.

#### Pulses Supply & Demand:

(*All quantities in Lakh tonnes)	Urad (Kha-Rabi) MY S to A)		Moong (Kha-Rabi) ( MY-S to A)		Tur (MY-D to N)		Chana(MY-M to F)		Masur ( MY-M to F)

<b>Total Supply (O S+ Production+ Imports)</b>	35.67	<b>36.05</b>	28.96	<b>29.02</b>	50.32	<b>46.78</b>	112.6	<b>110.46</b>	22.09	<b>21.89</b>
Exports	0.2	0.3	0.2	1	0.25	0.5	2	1	0.2	0.1
Consumption	26.5	27.5	21.5	23.5	42	41	90	93.5	19	20
Total Use( Export + Consumption)	26.7	27.8	21.7	24.5	42.25	41.5	92	94.5	19.2	20.1
Ending Stocks (Total Supply - Total Use)	8.97	8.25	7.26	4.52	8.07	5.28	20.64	15.96	2.89	1.79

Note: Agriwatch 1<sup>st</sup>Adv Estimate For 2018-19 for Urad ,Moong & Tur & preliminary estimate for Chana and Masur for MY 2019-20.

**Urad:** Urad production is likely to decline by 3.49 % from 25.47 to 24.58 lakh tonne due to lower crop area by 8.97% to 40.37 lakh ha. Import is expected to increase by one lakh tonne to 2.5 lakh tonne including G2G import. Total supply would increase slightly from 35.67 to 36.05 lakh tonne in 2018-19. Export would increase to 0.3 lakh tonne due to export incentive. Consumption would increase from 26.7 to 27.8 lakh tonne in 2018-19. So, carryout out would decrease slightly from 8.97 to 8.25 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So any unexpected spike is unlikely under prevailing condition.

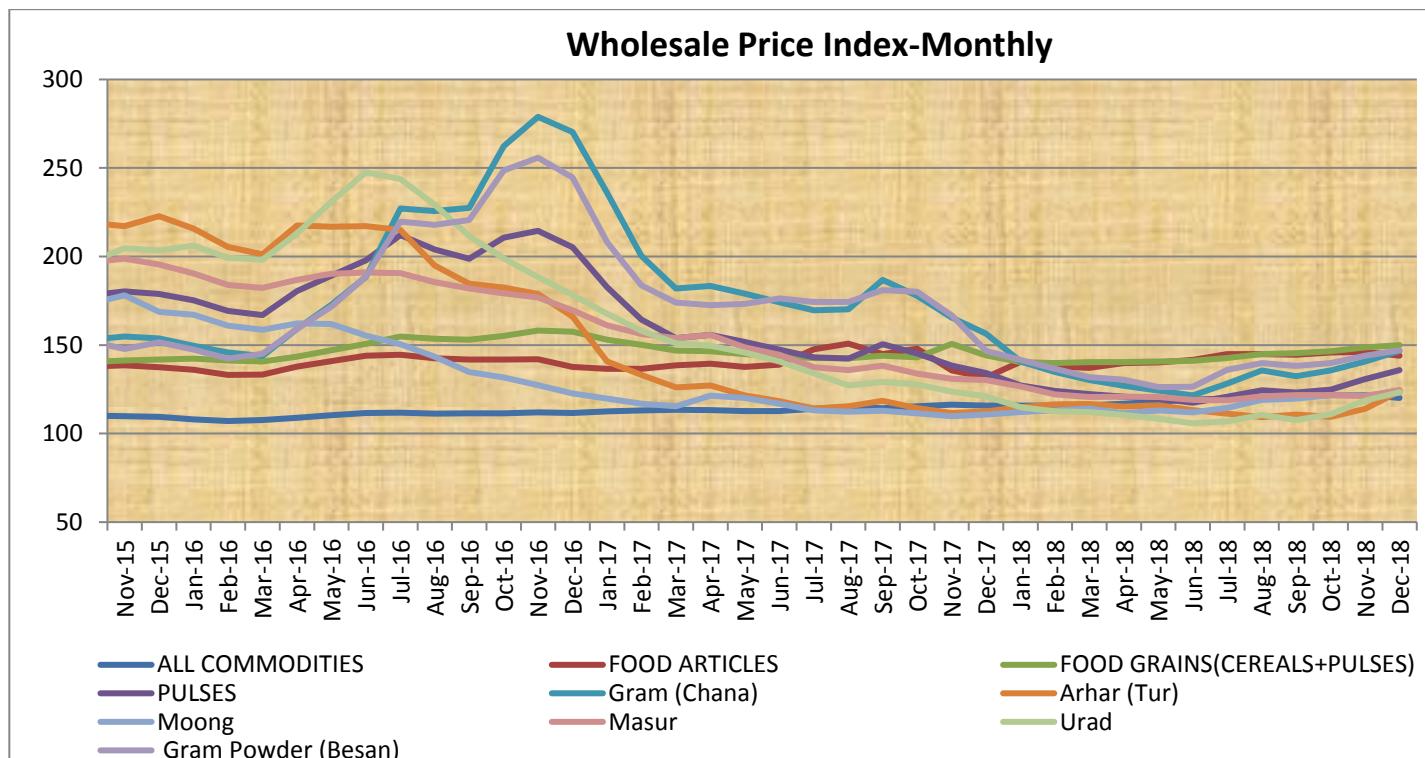

**Moong:** Moong production is likely to increase by 5.24 % from 19.25 to 20.26 lakh tonne due to higher crop area by 7.41% to 34.36 lakh ha in kharif season. Import is expected to remain same at 1.5 lakh tonne as last year. Total supply is expected to increase from 28.96 to 29.02 lakh tonne in 2018-19. As there is a demand from overseas market amid export incentive, export is likely to increase from 0.25 to 0.50 lakh tonne this year. Consumption would increase from 21.5 to 23.5 lakh tonne. Total usage is expected to touch 24.5 lakh tonne. Increase in export and consumption figure this year would drag down carryout from 7.26 to 4.52 lakh tonne. So any major decline in moong price is unlikely.

**Tur:** Tur production is likely to decrease by 6.36 % from 38.67 to 36.21 lakh tonne due to higher moisture stress during growth stage. Import is expected to increase by 2 lakh tonne to 2.5 lakh tonne due to cheaper availability in Myanmar. Total supply would decrease slightly from 50.32 to 46.78 lakh tonne due to lower production size. Export may increase from 0.25 to 0.50 lakh tonne due to export incentive. Consumption may increase from 42 to 43.5 lakh tonne in 2018-19 due to cheaper availability of dal. With export, total consumption has been pegged at 44 lakh tonne. Higher consumption would drag down carry out to 2.78 lakh tonne for next year. Market is expected to find balance now and price would improve.

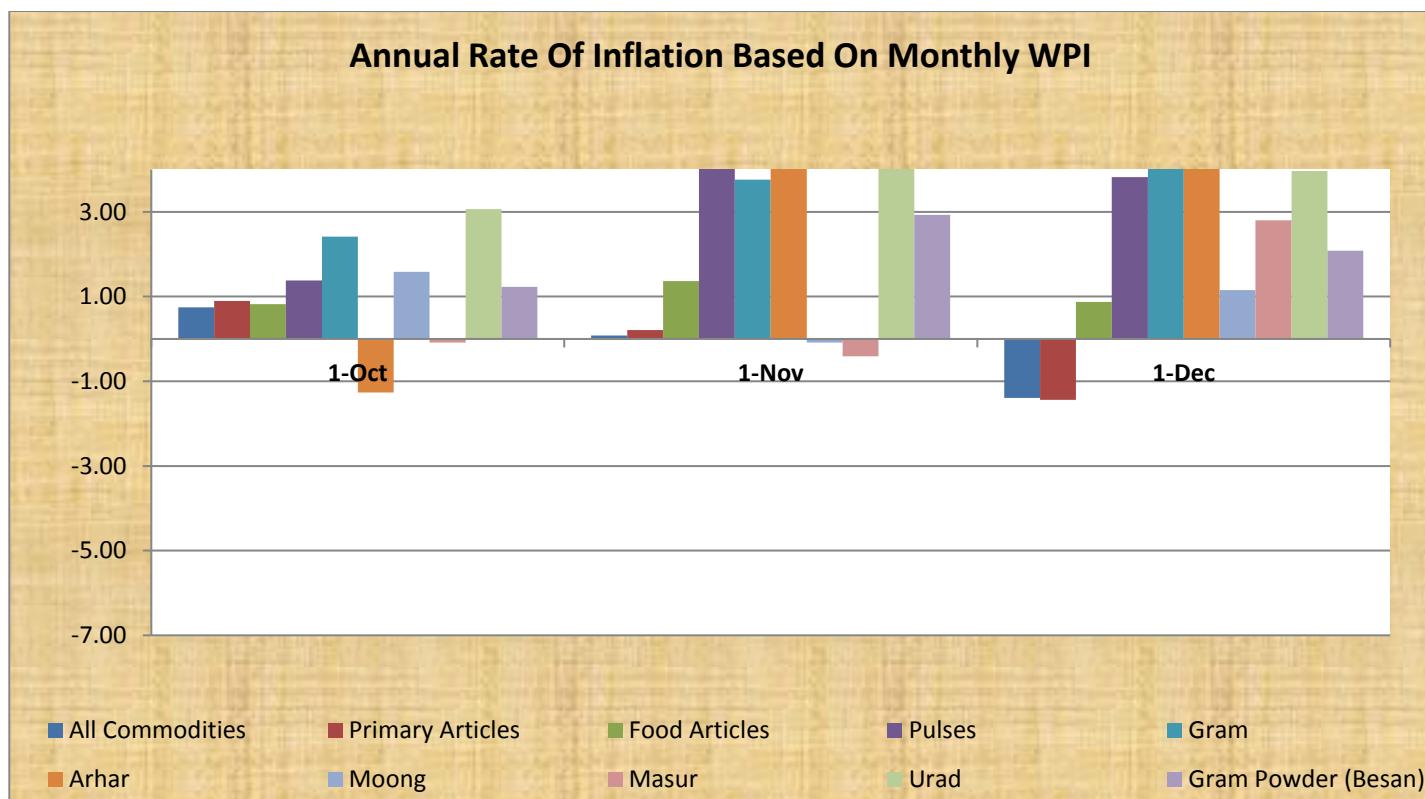

**Chana:** Chana production is likely to decline from 97.38 to 85.82 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year would start with hefty carry in of 20.64 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 85 lakh tonne. Total availability would decrease slightly from 112.6 to 110.5 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 92 to 94.5 lakh tonne.

**Masur:** MY 2018-19 started with 7.09 lakh tonne amid 12 lakh tonne production. New season starting from Mar is likely to start with 2.89 lakh tonne as carryout Import. Import is likely to increase as crop size is expected lower for MY 2019-20 and touch 7.5 lakh tonne in new season. Lower production would drag down total availability at 21.89 lakh tonne. It would drag down total supply from 25.92 to 22.09 Lkh tonne. Export would increase slightly from 0.11 to 0.2 lakh tonne this year. Consumption has been pegged slightly up from 19 to 20 lakh tonne in MY 2019-20. So, prices is expected to move up further. Import would remain costly at 40% duty.

**Agri Commodity Indices –Dec -2018:**

Pulses WPI: Pulses WPI increased by 5 point from 130.8 in Nov to 135.8 in Dec-2018.

**Chana (Chickpeas /Bengal Gram):  
Fundamental Analysis and Outlook:**

## Market Recap:

Overall Chana area decreased by 10.02 % to 96.35 lakh ha against 107.08 lakh ha last year. Major decrease in area was seen in Gujarat (41%), Maharashtra (33.5 %), Karnataka (11.3 %), AP(12.0%) and MP(3.3%). Area in Rajasthan is almost similar as last year. However, area under chana has increased in Chhattisgarh, Bihar and UP by 8.2, 1.9 & 4 % respectively. Sowing is almost over now and total area is lower by 10% as projected by Agriwatch in Nov. As weather turns favorable last week, production is likely to improve in MP, Raj and Chhattisgarh this year. There is a common perception in the market that cash market would move up in second half of the year as impact of lower crop size due to lower area would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period. Nafed continues to sell stock to release old stock burden. Arrival from major producing states like Rajasthan and MP would increase from Feb end. Pressure may be seen once again. Current firmness is unlikely to sustain.

All India average price for Chana decreased by 3.91 percent from Rs 4516 ( Dec) to 4339 per qtl. in Jan-2019. Australian Chana( imported) price too decreased by 6.33 percent from Rs 4531 to Rs 4244 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

## Price Dynamics:

Prices are likely to stay steady to slightly weak in Feb due to:

- Weak demand despite higher MSP (Rs4620) for new crop
- Higher stock in central pool despite fear of lower crop size(85.38 lakh tonne)
- Improving crop condition in MP, UP and Rajasthan due to recent rains.
- Weak futures & commencement of new arrival in Mah, Karnataka, AP and Telangana
- Continuous import from African countries at cheaper rate.
- Improvement expected April onward onward, but any spike is unlikely in the near term.

**Seasonality Index** hints that Chana (gram) is likely to notice steady to weak movement in the Spot market in Feb-2019.

## Chana Future Market Analysis:

#### Technical Commentary:

- Increasing price & OI hint firm market.
- RSI is moving up in neutral region, hints caution to bears..
- Prices closed above 9 and 18 days EMAs

#### Strategy: Buy on dip

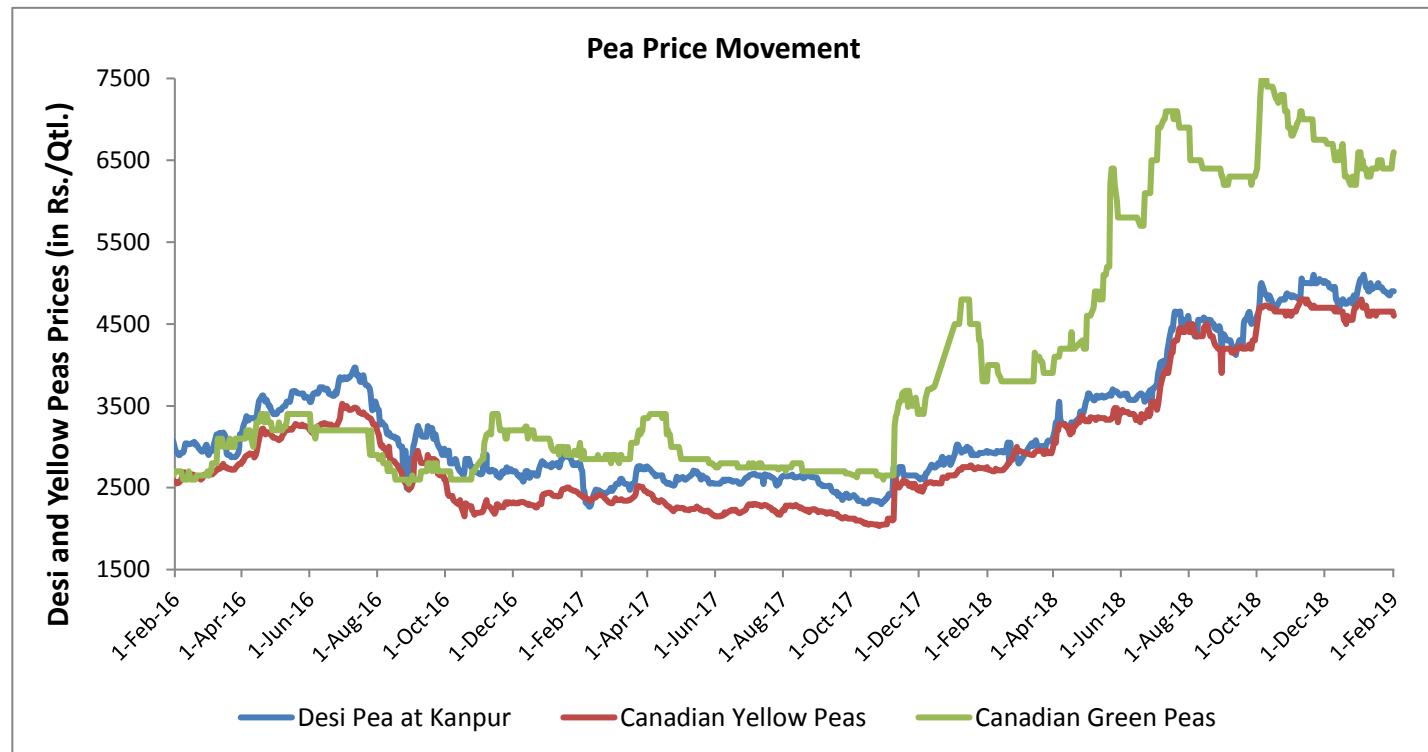

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	March	4100	4000	4273	4400	4500
<b>Monthly Trade Call*</b>			Call	Entry	T1	T2	SL
Chana	NCDEX	March	Buy on dip	4200	4350	4450	4110
.							

#### Field Pea (Matar/Dry Pea):

#### Fundamental Analysis and Outlook:

### Market Recap:

Pea prices get firmer due to import ban till 31<sup>st</sup> March-2019. Stock is lower at port. So any major dip in pea market is unlikely despite new crop is at hand. Availability of other pulses and weak demand would not allow pea market to move one way up. Stock available in domestic market and at ports is said to be lower than consumption, till March. Prices may move up by Rs 100 more from current level as stock is depleting fast in domestic market. Further firmness in pea market depends on chana price movement. Overall area is up by 10.36% to 10.41 lakh ha so far. Overall tone seems firm until new crop hits the market. Stake holders should buy on dip and retain stock. Medium term price movement would depend on govt.'s move on import by the end of March-2019.

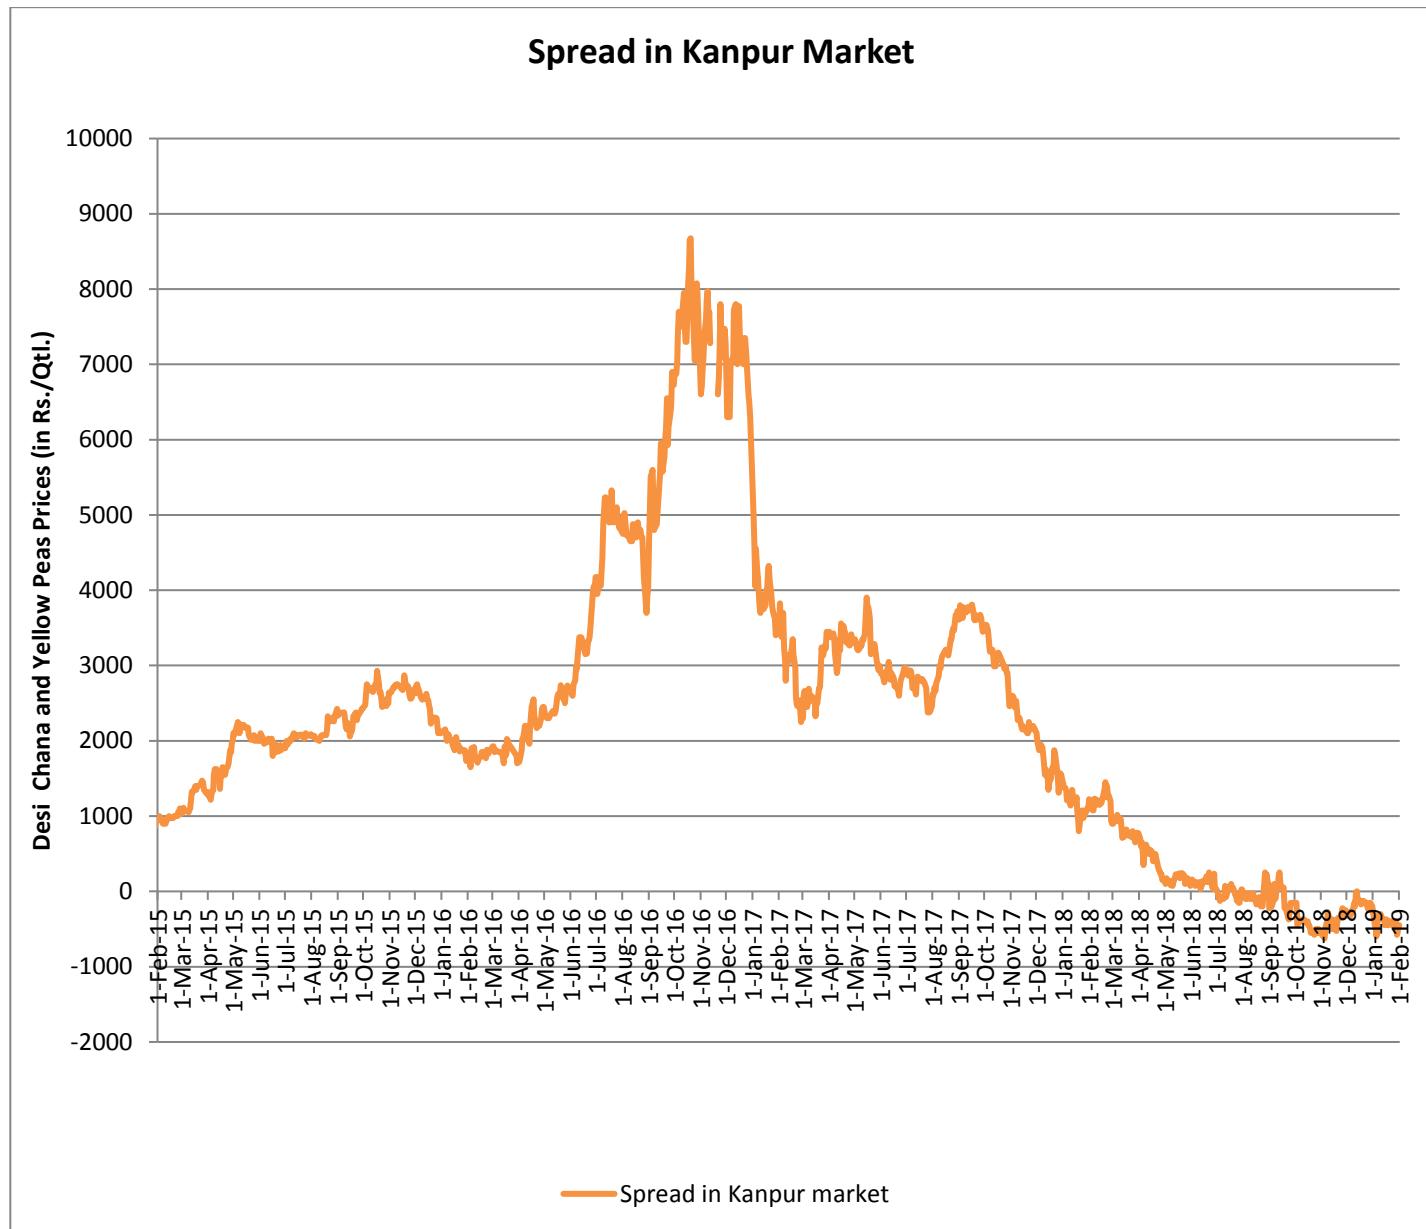

All India average price increased by 0.26 % to Rs 5343 per qtl. in Jan. In Kanpur market, it traded up by 1% at Rs 4955 per qtl. Higher import cost, import restriction till Mar and lower stock in domestic market may remain supportive in the near to medium term. However, demand was affected at higher level. Steady to weak sentiment may prevail in Feb too.

### Price Dynamics:

In Jan-2019 market traded up due to import ban and decreasing stock at port. Pea market is expected to trade steady to slightly firm in Feb due to:-

- Lower stock and import restriction
- Improvement in other pulses price
- Lower domestic crop size
- And expectation of improvement in demand

### Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone despite improvement in chana price. However, gap has contracted from Rs500 to Rs 350-450. Spread is expected to move in the negative range of 300 to 450 per quintal in the Feb on relative movement in Chana prices. Overall outlook seems steady to slightly firm due to poor stock.

**Seasonality Index** depicts that pea prices are likely to notice range bound movement in Feb-2019.

**Market Outlook For Feb**-Steady to slightl firm movement is expected.

**Masoor (Lentil/Masoor):**

## Fundamental Analysis and Outlook:

### Market Recap:

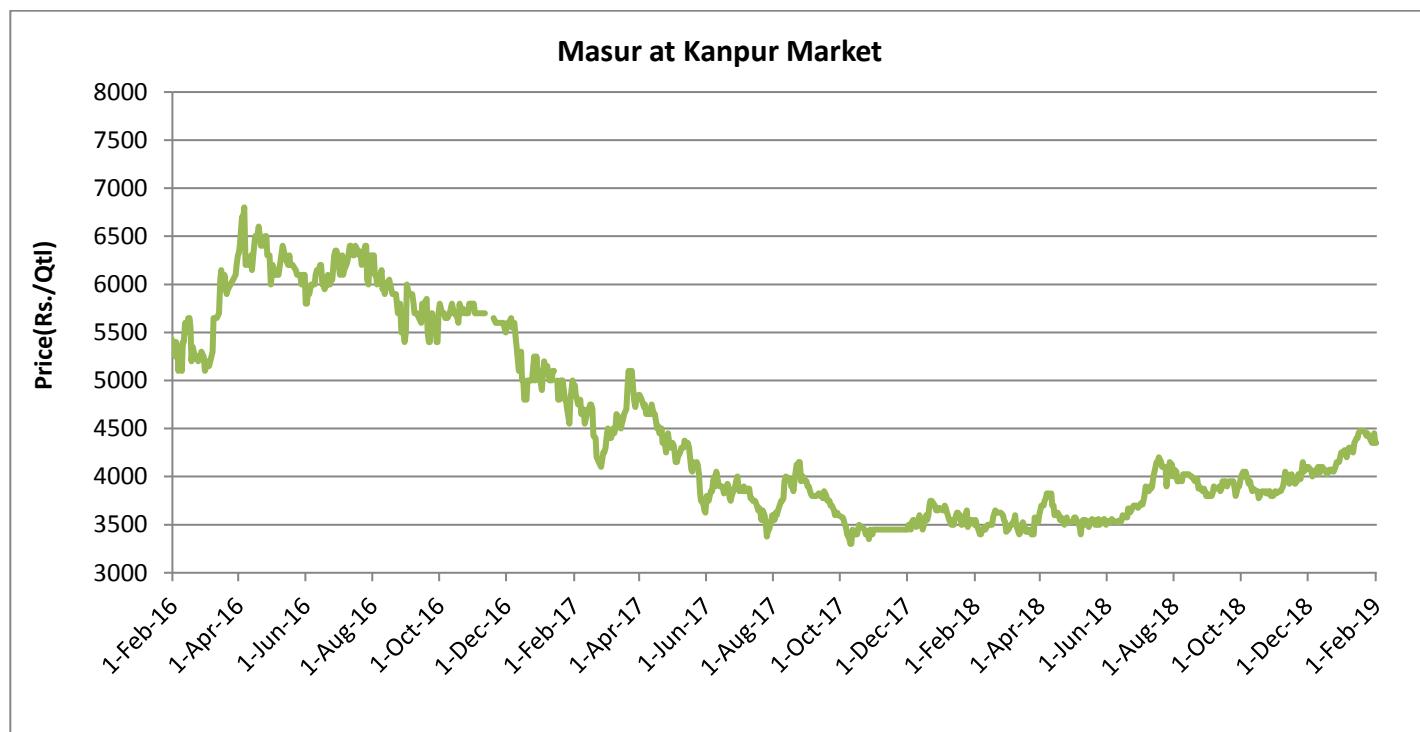

Recent rains in major growing belt of MP and UP has provided much respite to standing lentil crop. So some down ward correction might be seen in lentil cash market. Increasing cold wave in masur growing belt has started affecting standing crop and if it continues this week too it will impact yield negatively . Weak demand at this point of time may cap uptrend for some times. Market is trading steady currently, but may move down further if one -two spell of rains occur this week too.. Demand is weak, but may improve with opening of weather in masur growing belt. Steady to slightly weak tone may prevail this month with beginning of new arrival in Sagar,Binao of MP. Overall medium term out look remains firm.

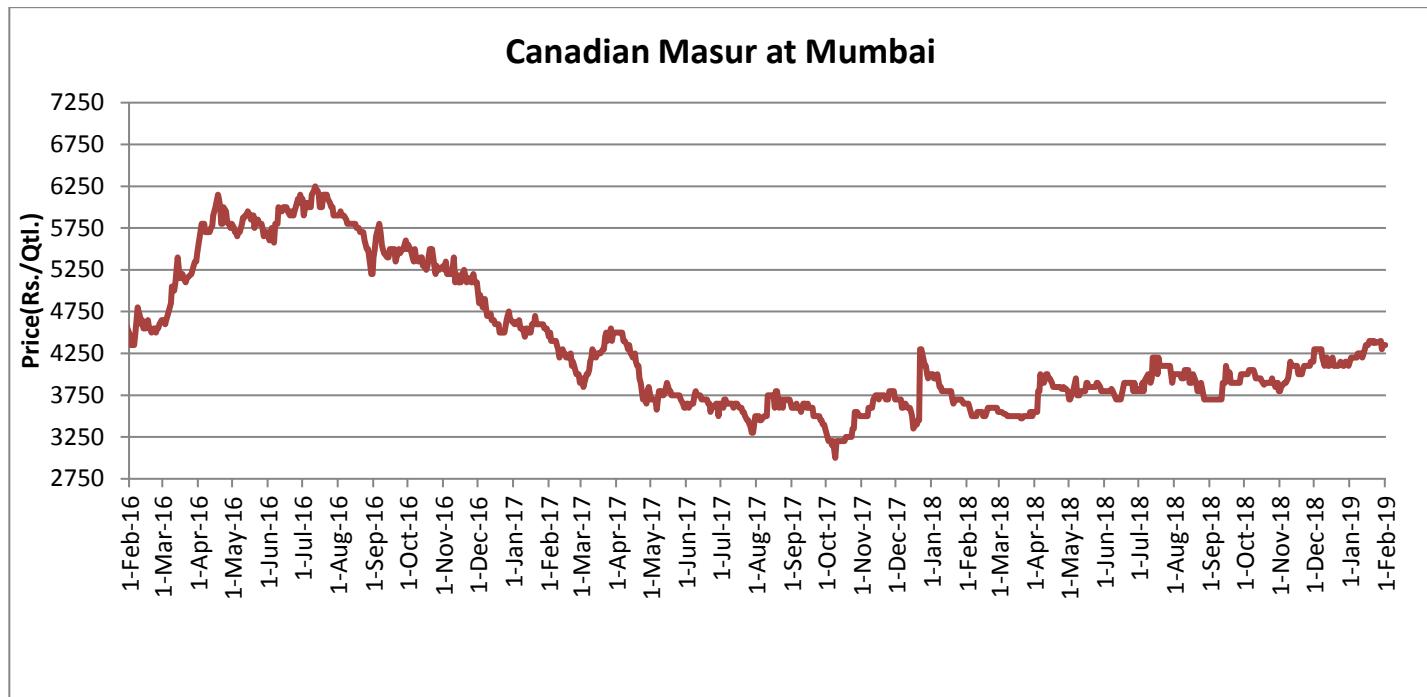

### Price Dynamics:

In Jan-2019, average price in key market Kanpur was up by 6.98 % to Rs 4365 per qtl. MoM basis. Prices are likely to trade slightly firm in firm despite new crop at hand.

#### Firmness is expected due to:

- Higher MSP (Rs 4475 per qtl) for new crop
- Likely lower production due to dry condition
- Declining stock
- Nafed restricted selling &
- Costly import at 40 % duty

**Seasonality Index depicts steady to slightly firm movement in Feb-2019.**  
**Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):**

#### Fundamental Analysis and Outlook:

Import ban on pulses import till 31st March-2019 and small grain size of tur in Myanmar encouraged domestic buyers/millers to buy more tur from mandis and it helped market to move up by Rs200-250 in major cash markets. Besides, procurement on MSP is expected from next week and it would remain supportive for tur market in coming weeks. Currently, millers in Jalgaon are active in Gulberga and Marathwara line. Tur of Amravati line are being traded at Rs 5100-5250 per qtl. Early crop of Katni line is almost over now. Stock of lemon tur is decreasing. so Market may move further up By Rs 200 more from current level. Overall inner tone remains strong. At MSP level one down ward correction of Rs200 is expected. Besides, lower crop size (36.21 lakh tonne) against 38.67 lakh tonne last year may also help market to trade firm.

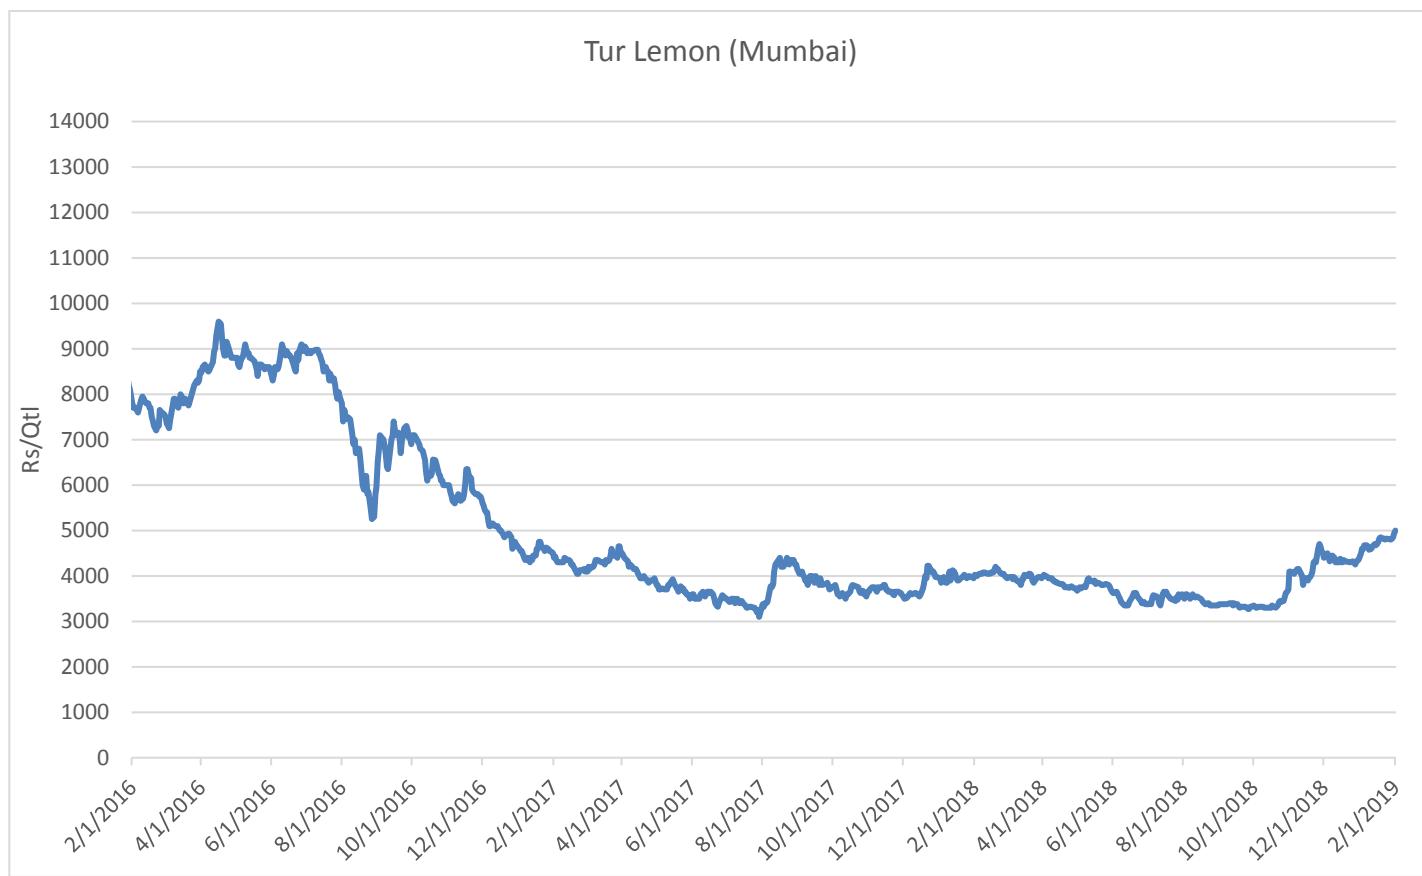

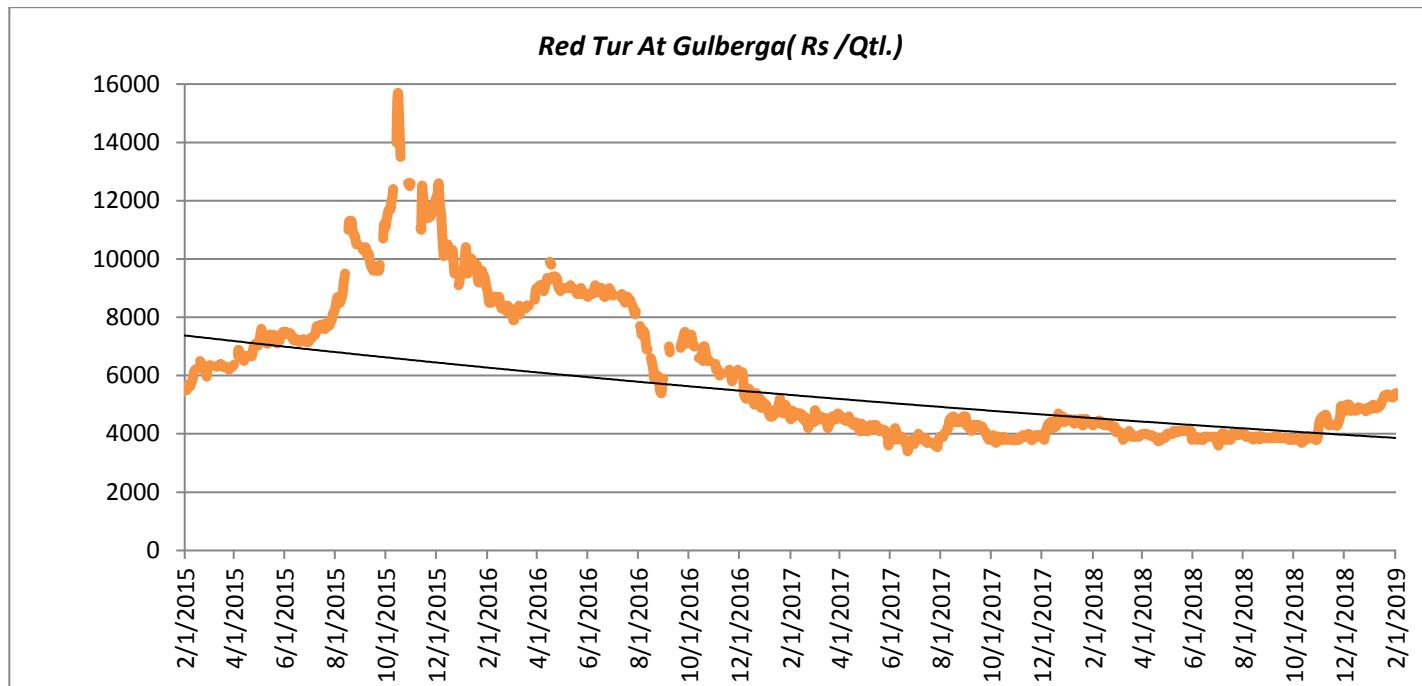

#### Market Recap:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at \$610 per MT at Indian ports. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

#### Price Dynamics:

In Jan-2019, average price in Gulberga market was up by 5.20 % from 4860 to 5113 per qtl. due to good demand and lower crop size. In Feb market is likely to improve due to

- Higher MSP
- Lower crop size
- Festive demand and likely higher procurement ahead of Lok Sabha Election year
- Comparatively lower stock in mills.

**Seasonality Index**-depicts steady to slightly firm movement in Feb.

#### Market Outlook for Feb:

Fundamental remains supportive for Tur cash market and outlook seems firm.

## Urad (Black Matpe/Black Gram)

### Fundamental Analysis and Outlook:

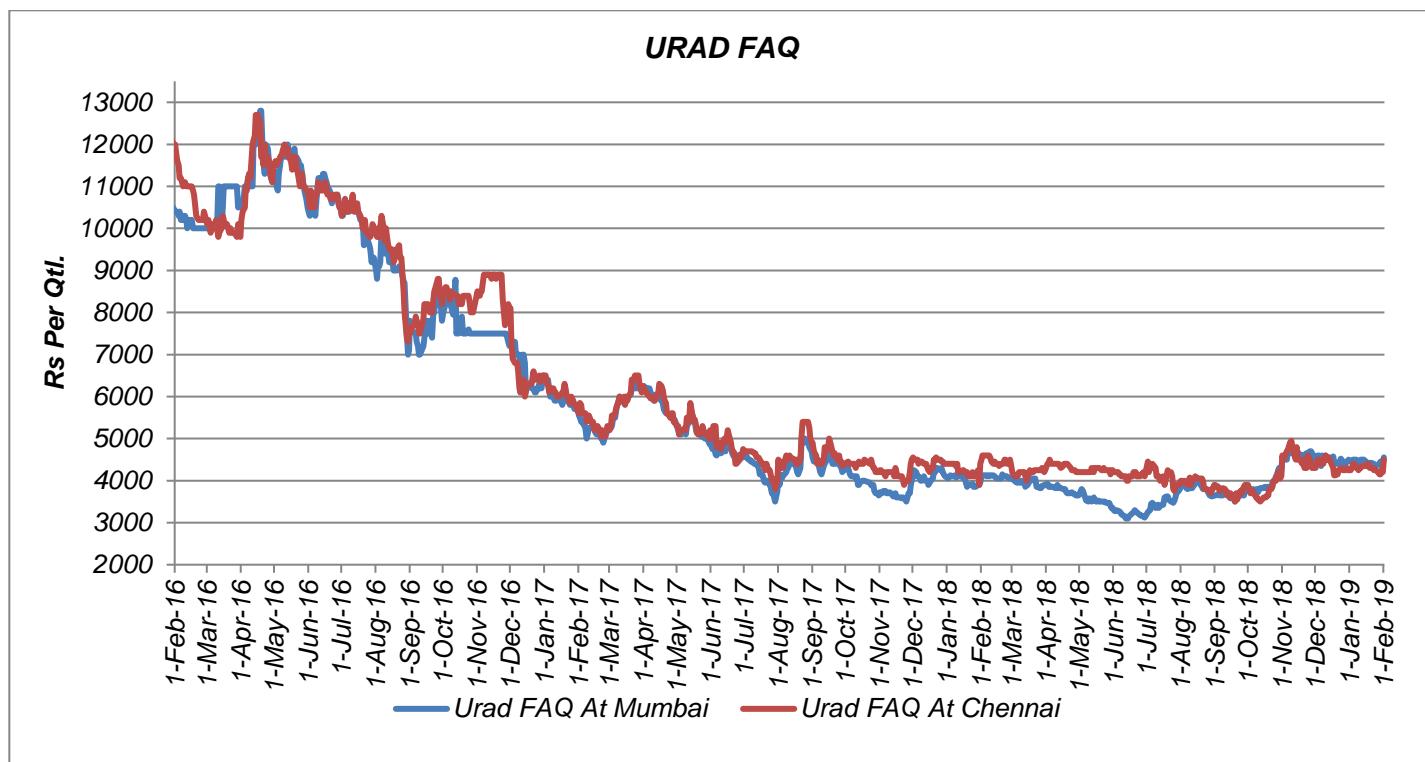

#### Market Recap:

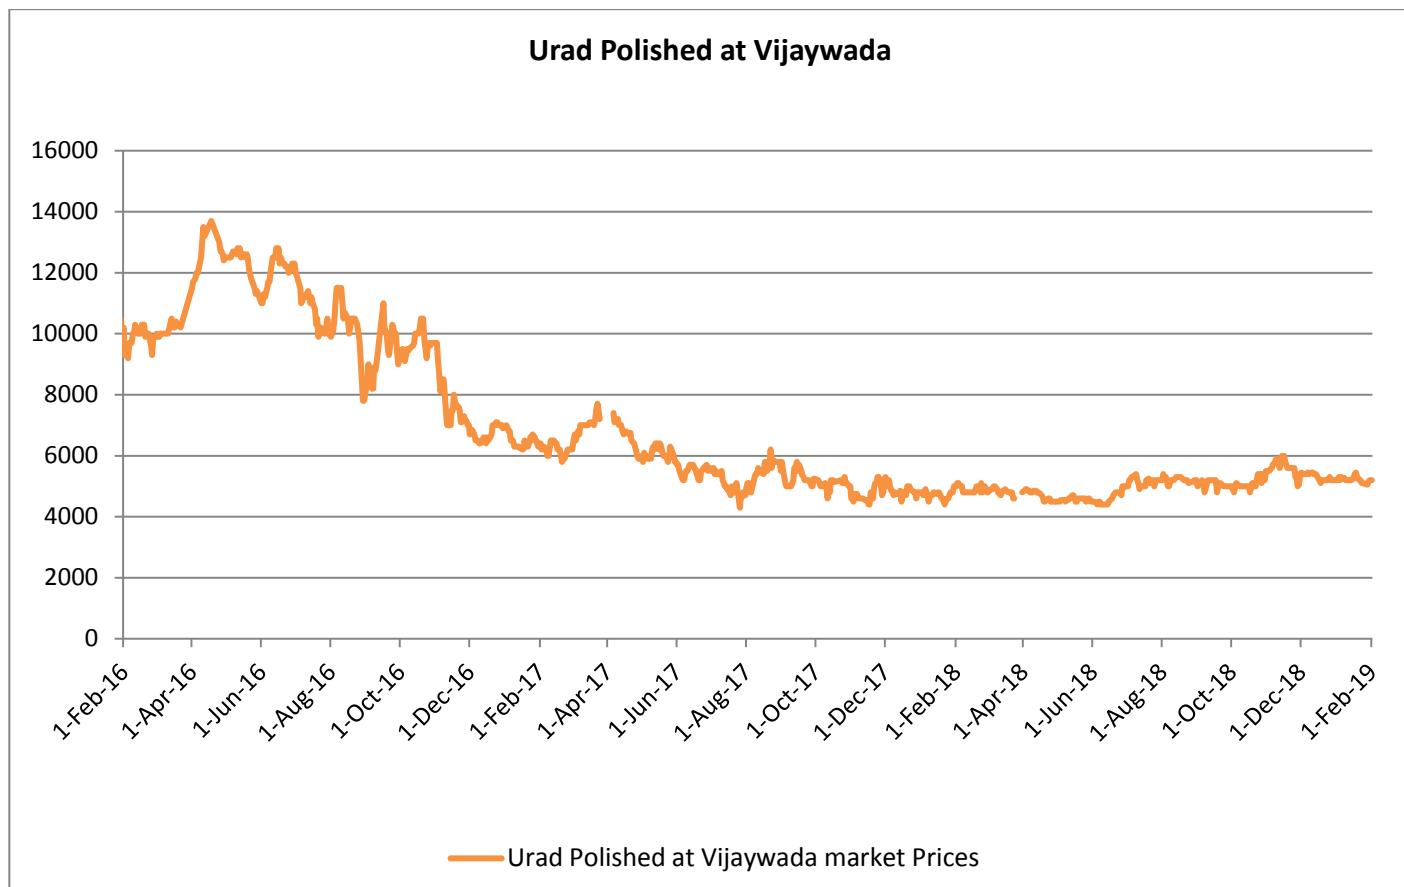

Import ban and lower crop size have helped market to recover to Rs 4500-4600 and SQ at Rs 5400-5500 per qtl. There is no crop in domestic market right now and more upward momentum may continue. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. . Burma is offering urad FAQ and SQ at \$480 and \$565 per MT basis Cif at Indian ports as demand from India has decreased considerably this week.

#### Price Dynamics:

In Jan, average prices in key markets including Mumbai/was down by 1.22 % percent to 4308 per qtl. In Chennai it is being traded at Rs 4500-4550. Prices may stay steady to slightly firm in Feb due to

- Ongoing Procurement on MSP
- Lower rabi area
- Crop loss in Raj,Mah and AP
- Unfavorable weather condition for rabi crop
- Restricted import
- Likely commencement of buying by mills at lower level

**Seasonality Index** depicts steady to slightly firm movement in the near to near to medium term.  
**Production:**

According to the Agriwatch preliminary estimates, Kharif Urad production for MY 2018-19 has been pegged at 18.81 lakh tonne against 19.19 lakh tonne 2017-18. In first adv. estimate govt has projected 2.65 MMT urad production for 2018-19.

**Market Outlook for Jan:** Prices are likely to trade steady to slightly firm in Feb-2019

#### Fundamental Analysis and Outlook For Moong:

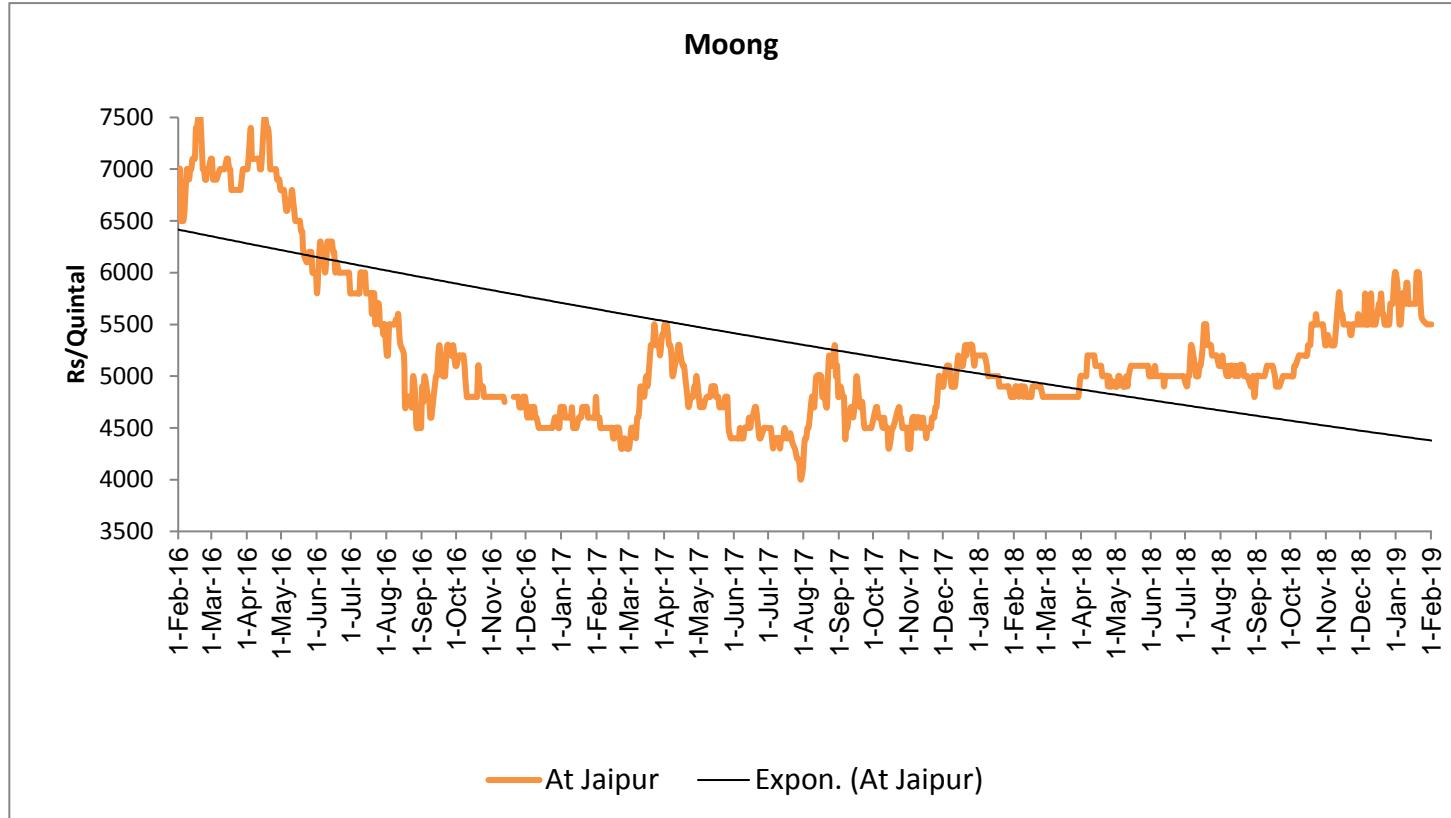

##### Market Recap:

Demand for moong and dal was registered weak during review week and it affected firm sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from jan end. Besides, area under rabi moong is down by 6.12 % to 6.81 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevail this week in cash moong market. Myanmar too has decreased CiF quote from \$690 to \$680 in last one week despite lower availability in Burma.

##### Price Dynamics:

Moong market is likely to trade steady to slightly firm in the weeks ahead. Procurement continues and Nafed in various states, has procured 2.65 lakh MT as on 3rd Jan-2019. It has procured 208366.47 MT in Rajasthan, 29136.74 MT in Karnataka, 13375.31 MT in Telangana and 12804.27 MT in Maharashtra including Markfed procurement. The remaining quantity was purchased in other states. As demand is weak, prices are likely to stay steady in coming weeks. Now new crop would be available from mid Mar, so any dip is unlikely in cash moong market. Selling from central pool would remain halted till procurement. Market is expected to move up slightly in Jan due to:

- Procurement drive
- Decreasing arrival
- Active buying by mills &
- Restricted selling from central pool stock
- Costly import

*Seasonality Index depicts steady to slightly firm movement in the near term*

**Market Outlook for Feb:** Steady to slightly firm movement is expected in Feb after a slight downward correction.

### Pulses Wise Technical Outlook for Jan -2019: -

**Chana:**

**Outlook** – We expect prices to notice steady to slightly weak movement in Feb-2019. Weak demand & higher stock in central pool remains price affecting factors despite lower crop size. Import would remain halted due to higher duty and lower crop size in Australia. Buy on dip is good at end Feb-2019. Market may trade down due to:

- ❖ Weak demand
- ❖ Higher stock in central pool
- ❖ New arrival
- ❖ Limited buying by private trades due to money crunch
- ❖ Expected price band for Chana in Delhi is 4150 to 4450 levels in this month.

**Trade Strategy:** Buy on dip.

**Trade Recommendations:** Go long around 4150 with the first target of 4350 and second target 4450 with stop loss at 4100 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4250	4350	4200	4600	4700

**Pea:**

## Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

**Outlook** - We expect prices to notice steady to slightly firm movement in this month taking clue from lower stock and import restriction.. Costly import would keep market supported. Any major dip is unlikely.

- Candlestick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4600- 5000 in this month.

**Strategy:** Buy on dip

**Trade Recommendations:** Go long around 4700 with the first target of 4900 and second target 5000 with stop loss at 4600 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4350	4500	4750	4900	5000

**Masur :**

**Desi Masur (at Kanpur) Spot Market Monthly Chart:**

**Outlook** –Steady to firm movement is likely to be noticed this month.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 4000-4500

**Strategy:** Buy on dip

**Trade Recommendations:** Buy around 4300 with the first target of 4450 and second target 4500 with stop loss at 4250 level.

Support & Resistance
