

Pulses Monthly Research Report-March- 2019

Content

Pulses Sector-Highlights

- Domestic
- International
- Monthly Outlook

Supply & Demand

Pulses-Wise Summary

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada

Domestic Market Fundamentals:

- Rabi pulses sowing is almost over now except moong and urad. Overall rabi area is unlikely to match** last year's level as sowing is almost over now for chana, lentils and pea. Urad and moong sowing would continue. Rabi pulses area decreased by 5.74 % at 157.67 lakh ha against 166.58 lakh ha last year as on 22nd Feb-2019. Chana area is lagging by 10.02 % at 96.59 lakh ha against 107.57 last year. Farmers have covered 1.72 % lower area under lentil so far at 16.93 lakh ha against 17.25 lakh ha last year. Pea area is up by 11.36 % at 10.45 lakh ha. Urad area is lagging by 10.83 % at 9.71 lakh ha against 10.07 lakh ha last year. Moong area too is down by 6.12% at 8.55 lakh ha against 8.96 lakh ha so far.
- Despite lower crop size of chana this year, pressure is likely to continue on chana cash market as new** arrival from major growing regions like MP and Rajasthan is likely to increase from 15 March. Crop condition is good in MP and recent rains have greatly benefitted standing crop in UP. Crop size is expected to be around 85 to 88 lakh tonne as per trades estimates against govt.'s 2nd adv. Estimate of over 100 lakh tonne this year. Besides Nafed has around 18 lakh tonne stock in its custody. So, availability of chana would be higher against consumption of 90 to 92 lakh tonne. Nafed continues to sell chana while bulk buyers have restricted buying ahead of new arrival. Demand is weak. So, Agriwatch expects market to decrease further by 100 to 200 from current level. If govt.(Nafed) stops selling and procurement starts in major states, prices may recover to a certain extent. However, any big spike in chana market is unlikely. Chana in Delhi cash market might trade in the range of Rs 3900-4150 in the month of March.
- Tur traded weak with increasing arrivals in major markets amid slower pace of procurement** by various agencies. Total procurement by Nafed, has reached at 1.44 lakh tonne. Arrival pressure is likely to continue amid restricted buying by private trades. There is a common view in the market that tur price may go down by Rs 100-150 more from current level as bulk users demand remains sluggish at this point of time. However, any major (??) is unlikely as crop size is lower this year. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. As carryout is higher, any major jump from current level is unlikely. Market is awaiting demand. Currently tur market is being traded at Rs 5000-5200 in Gulberga market. This week it may trade slightly lower. Myanmar is offering tur at \$585 per MT. Total procurement from kharif-2018 has reached 144112.60 MT as on 27th Feb-2019. Overall tone remains weak.
- Urad market traded almost steady during the month under review. Slackened demand from mills and higher** production adv estimate amid higher carryout have capped market at current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Despite lower crop size from kharif, carryout is at higher side and it may restrict uptrend in coming weeks. With opening of weather, demand is likely to improve. With ongoing procurement drive, any major decline is unlikely. Urad may continue to trade at Rs 4100-4400 per qtl in various markets. In Chennai market urad is being traded at Rs 4200-4250 per qtl. Burma is offering FAQ urad at \$490 & SQ at \$600 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market in March too. Buying at dip seems good.
- Steady tone prevailed in cash moong market while demand remains sluggish during the month under** review. Higher old stock has capped market to get firmer at current level despite commencement of rabi procurement drive. Millers are engaged on need based buying only. So prices are expected to stay steady. There is no parity for export while Myanmar is offering moong at \$680 per MT. With opening of weather, demand is likely to improve. However, prices would continue to rule below MSP as bigger UP crop is expected from March end. Procurement drive remains slow. Moong in Jaipur market is being traded at Rs 5600 while in other market it is being traded at Rs 5200 to 5600 per qtl. Supply side seems at ease. By the end of this month new crop from UP may pressurize market further. Nafed has stock and its selling would cap market to move up in March.
- Given the fall in area sown and unfavorable weather condition for lentil, private traders as well as** government has predicted a fall in production. Lower imports and fall in production is likely to decrease the overall availability and lead to increase in prices of lentils during second half of 2019. However, as of now prices are under pressure due to fresh arrivals. Cash market may extend its loss by Rs 100 to 200 more in March.
- Pea market is likely to move steady under current conditions. In case government allows 1500 containers** that are at Indian ports, market will take downward correction of Rs 150-200 per quintal. However pea exporting country such as Canada has shifted their focus from India to China, given the abrupt changes in import policies of India..

International Market Update:

- **Recent rains and cold wave in Punjab region of Pakistan have greatly benefitted standing chana crop** and local production of chana in Chana Production In Punjab(Pak) Is Likely To Increase 3 to 5 Lakh Tonne Due To Improved Weather Condition. Punjab (Pak) is expected to increase by 2 lakh tonne from 3 to 5 lakh tonne this year. This means there would be no short supply of chana in Pakistan this year. Experts see chana consumption at 5.5 lakh tonne this year. So with carryout of around 0.6 lakh tonne supply side would remain at ease. Import volume would come down to one lakh tonne this year. Normally Pakistan imports 1.5 lakh tonne chana annually. Lower demand from Pakistan and India would continue to impact chickpea prices in global market.
- **Chickpea export from Argentina increased in Jan-2019 in comparison to Dec-2018 as per latest update** by Instituto Nacional de Estadística y Censos. It has exported 7,559 MT in Jan against 5233 MT in Dec. Thus total sales during the MY reached to 141309 MT. However, it is lower by 15% from last year. UAE brought 1,698 MT, followed by Spain at 1,098 MT. Others countries have brought 1,824 MT.
- **Canada & US are going to object import restriction imposed by India in WTO.** As per Commerce Ministry Official both the countries are against the quantitative cap on pulses imports. This is the second objection in WTO against India. Earlier, both the countries had objected under-reporting of market price support for five varieties of pulses under the minimum support
- **Chickpeas production in Canada is expected to decrease from 311 to 130 thousand tonne in 2019-20.** Area under chickpeas too may decline from 176 to 74 thousand ha in 2019-20. Import is expected to decline from 25 to 18 thousand tonne. Thus, total supply would decrease from 350 to 343 thousand tonne. However, export volume may increase from 90 to 100 thousand Tonne. Carryout stock is expected to decline from 195 to 175 thousand tonne in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT as per Statistics Canada and Agriculture.
- **Canada & US are going to object import restriction imposed by India in WTO.** As per Commerce Ministry Official, both the countries are against the quantitative cap on imports of pulses. This, is the second objection in WTO against India. Earlier, both the countries had objected under-reporting of market price support for five varieties of pulses under the minimum support price (MSP).
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area** and yields. Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area,** particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total, yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. There are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne.
- by AAFC at over 0.4 Mt, up over 35% from the previous year.

Monthly Outlook: -Pulses are likely to trade steady to slightly weak in March.

Pulses Supply & Demand:

(*All quantities in Lakh tonnes)	Urad (Kha-Rabi)		Moong (Kha-Rabi)		Tur		Chana		Masur	
Marketing Year (March to February)	2018-19	2019-20*	2018-19	2019-20*	2018-19	2019-20*	2018-19	2019-20*	2018-19	2019-20*

Note: Agriwatch 1stAdv Estimate For 2019-20 for Urad ,Moong & Tur & 2nd Adv estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to increase by 1.3 % from 24.58 to 24.90 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 35.15 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout would decrease slightly from 8.75 to 6.95 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So any unexpected spike is unlikely under prevailing condition.

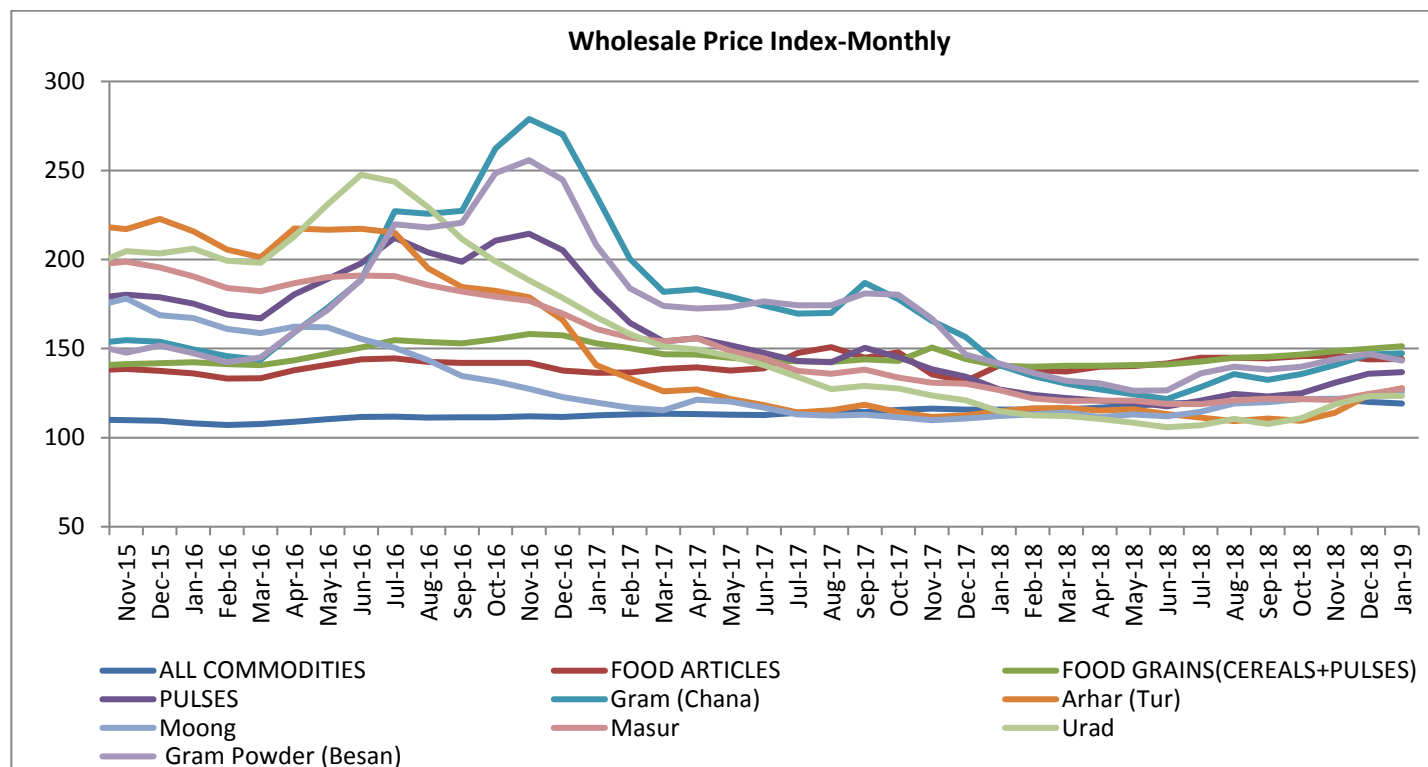

Moong: Moong production is likely to increase by 3.06 % from 20.26 to 20.88 lakh tonne in 2019-20. Import is expected to remain decline by 50 % to at 0.75 lakh tonne in new season. Total supply is expected to decrease from 29.02 to 27.15 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season.. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would drag down carryout from 5.52 to 3.95 lakh tonne. So any major decline in moong price is unlikely in the new season.

Tur: Tur production is likely to increase by 15.84 % from 35.21 to 40.79 lakh tonne in the new season (2019-20).. Import is expected to decrease by 0.50 lakh tonne to 3 lakh tonne due to restrictive import policy. Total supply would increase slightly from 46.78 to 49.07 lakh tonne due to expectation of higher production in new season. Export may increase from 0.5 to 0.70 lakh tonne due to likely export incentive. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.7 lakh tonne. Despite higher consumption carry out would increase to 6.37 lakh tonne for next year. Market is expected to find balance now and price would improve further in the medium term.

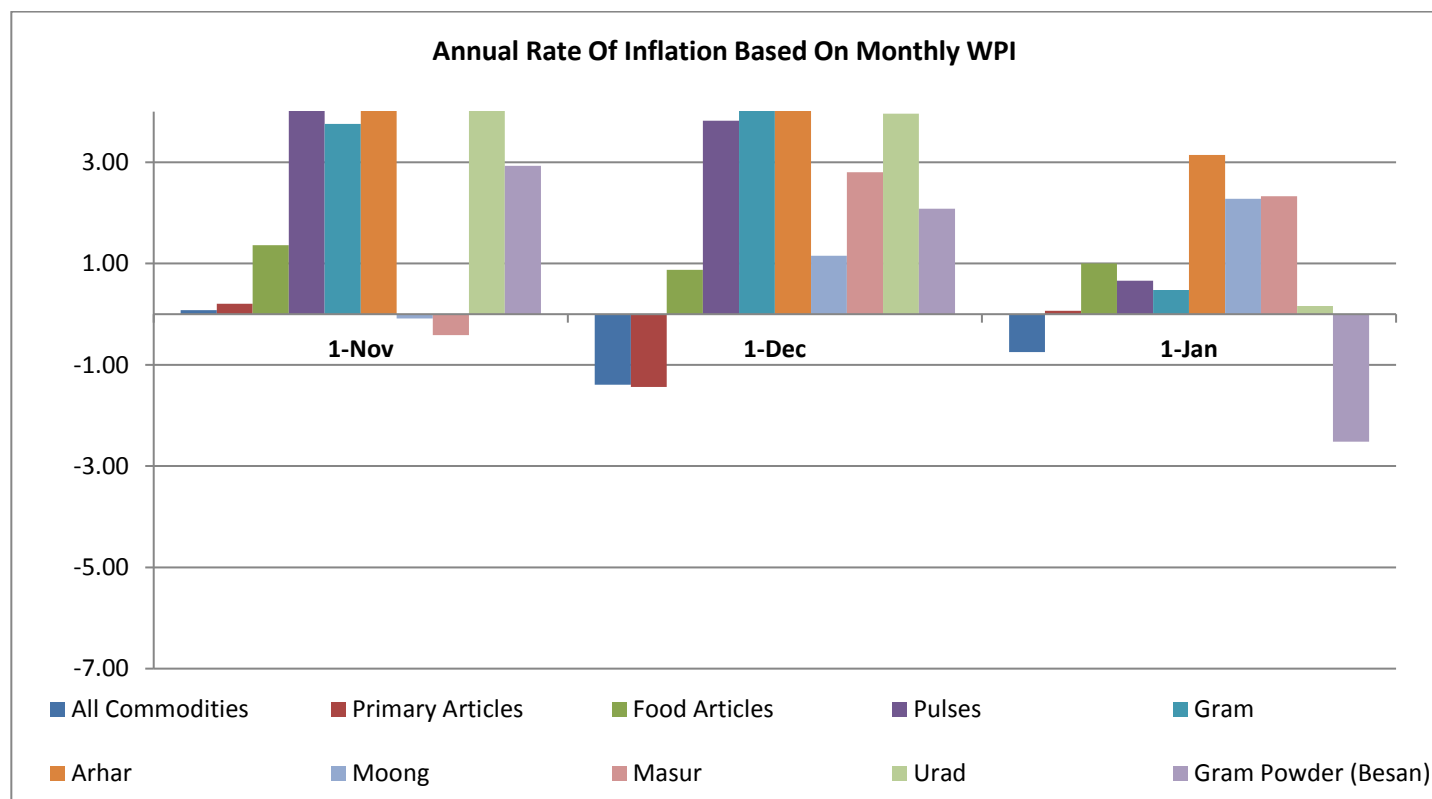

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year.. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5 lakh tonne in new season. Lower production would drag down total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged slightly almost same at 18.6 tonne in the new season.. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –Jan -2019:

Pulses WPI: Pulses WPI increased by 0.9 point from 135.8 in Dec to 136.7 in Jan-2019.

Chana (Chickpeas /Bengal Gram): Fundamental Analysis and Outlook:

Market Recap:

Pressure continues on chana market despite lower production estimate by various trade agencies, ranging from 8.5 to 9 MMT this year. Against it govt.'s 2nd Adv. estimate is over 10 MMT for the year. In any case, chana availability would be higher as the new season has started with hefty carryout of 20 lakh tonne against total demand including export would not be more than 94 lakh tonne. Selling from Nafed would continue as procurement from new crop would start from mid March in major producing states. It may support chana to a certain extent in the medium term. In Delhi market Chana may decrease to Rs 4000 level by March end. Agriwatch expects chana to move in the range of Rs 4000-to Rs4250 in normal condition. Crop condition is very good in MP and if weather remains clear for next 10-15 days, chana may decrease further. Stake holders should buy around Rs 4000 and can expect Rs400-500 increase from this level till the mid of the year.

All India average price for Chana decreased by 2.48 percent from Rs 4343(Jan) to 4235 per qtl. in Feb-2019. Australian Chana (imported) price too decreased by 2.69 percent from Rs 4266 to Rs 4151 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

.Prices are likely to stay steady to slightly weak in March due to:

- Weak demand despite higher MSP (Rs4620) for new crop
- Higher stock in central pool despite fear of lower crop size(87.78 lakh tonne)
- Nafed continued selling for bulk consumers below 4000.
- Weak futures& commencement of new arrival in Mah,MP & Rajasthan.
- Continuous import from African countries at cheaper rate.
- Improvement expected April onward, but any spike is unlikely in the near term.

Seasonality Index hints that Chana (gram) is likely to notice steady to weak movement in the Spot market in March-2019.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

Strategy: Sell On Rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	April	4000	3900	4130	4250	4400
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	April	Sell Below	4150	4000	3900	4240

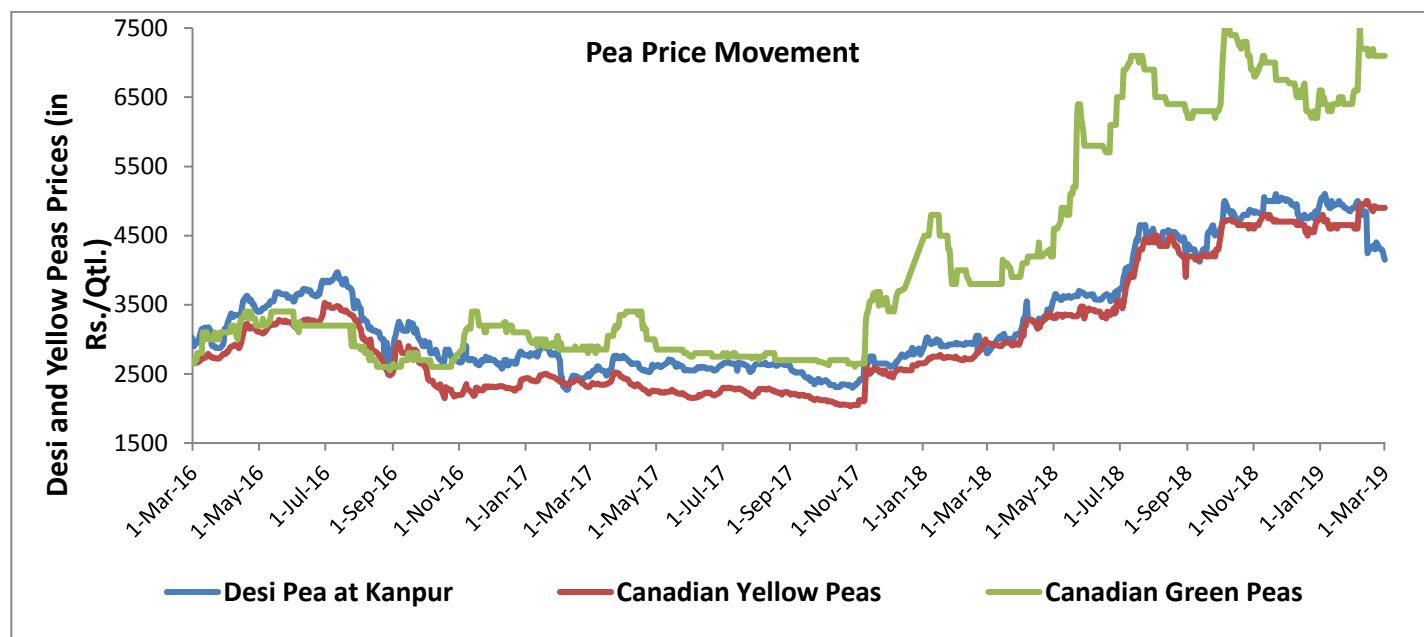

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Market Recap:

New pea arrivals in the markets of producing states have started increasing and demand remains normal at this point of time. Besides, Madras High Court decision to release imported pulses lying at ports with condition of applicable import duty and 10% bank guarantee is likely to push pea cash market down. Currently over one lakh tonne pea is available at various ports. Out of this stock around 44,000 MT is likely to release this week. These developments have alerted buyers and they restricted buying. Pea prices are likely to decrease by 200 -300 from current level. Imported pea from Canada. And Ukraine is being quoted at Rs 4750 and 4600 per qtl .respectively. Green pea is being quoted at Rs 6800-6900. It may decrease to 6500-6600 by March end. Demand for besan for mixing purpose is almost nil as chana is cheaper.

Overall area is up by 10.36% to 10.41 lakh ha so far. Overall tone seems weak.. Stake holders should sell on rise Medium term price movement would depend on govt.s move on import by the end of March-2019. If required govt has option to decrease import duty and increase quota for import.

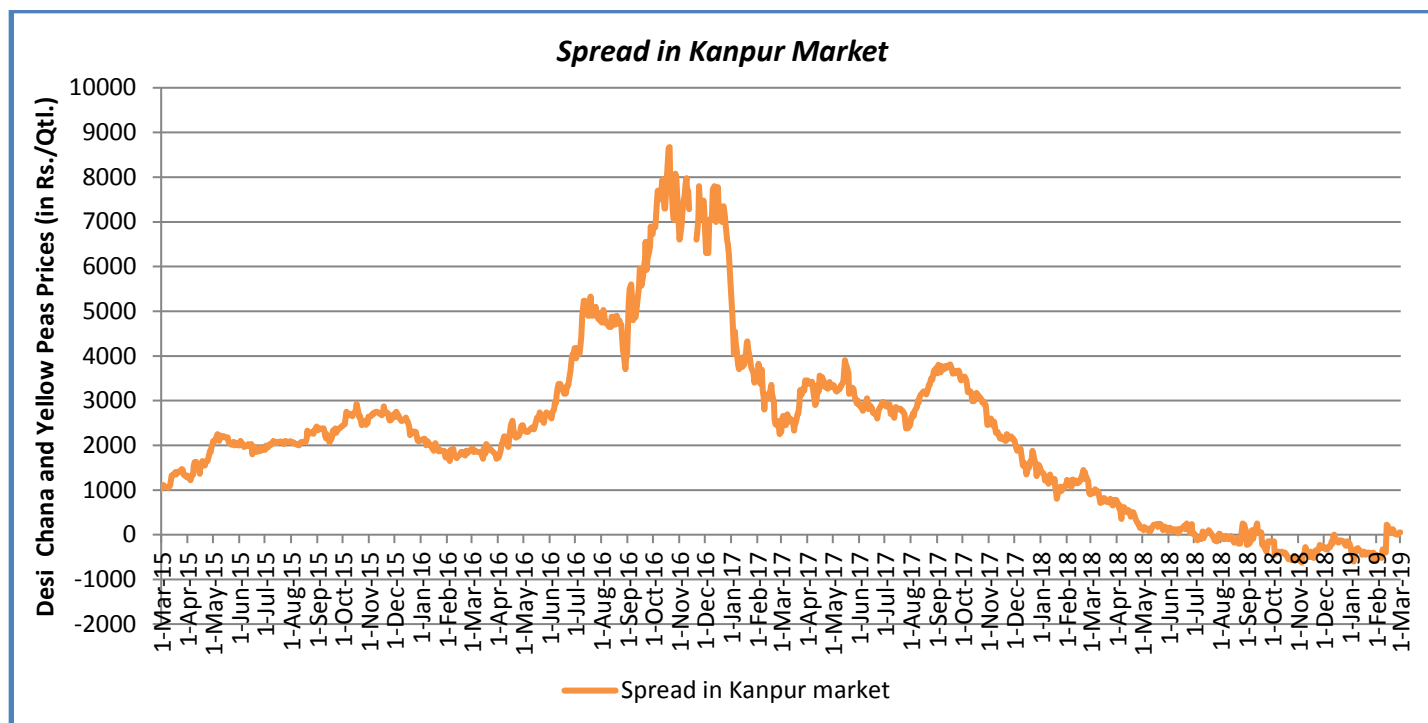

All India average price decreased by 2.93 % to Rs 5318 per qtl. in Feb. In Kanpur market, it traded up by 2.66% at Rs 4664 per qtl. Pressure would continue on cash pea market. Demand was affected at higher level. Steady to weak sentiment may prevail in March..

Price Dynamics:

In Feb-2019 market traded down due to release order of imported pulses and increasing arrivals in domestic market.. Pea market is expected to trade steady to slightly weak in March due to:-

- Release of imported stock and higher production size
- Bearish trend in other pulses market
- Weak demand at higher level

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone despite improvement in chana price. However, gap has contracted from Rs350 to Rs 250-300. Spread is expected to move in the negative range of 200 to 400 per quintal in the March on relative movement in Chana prices. Overall outlook seems steady to slightly weak due to increasing supply.

Seasonality Index depicts that pea prices are likely to notice weak movement in March-2019.

Market Outlook For March-Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

Fundamental Analysis and Outlook:

Market Recap:

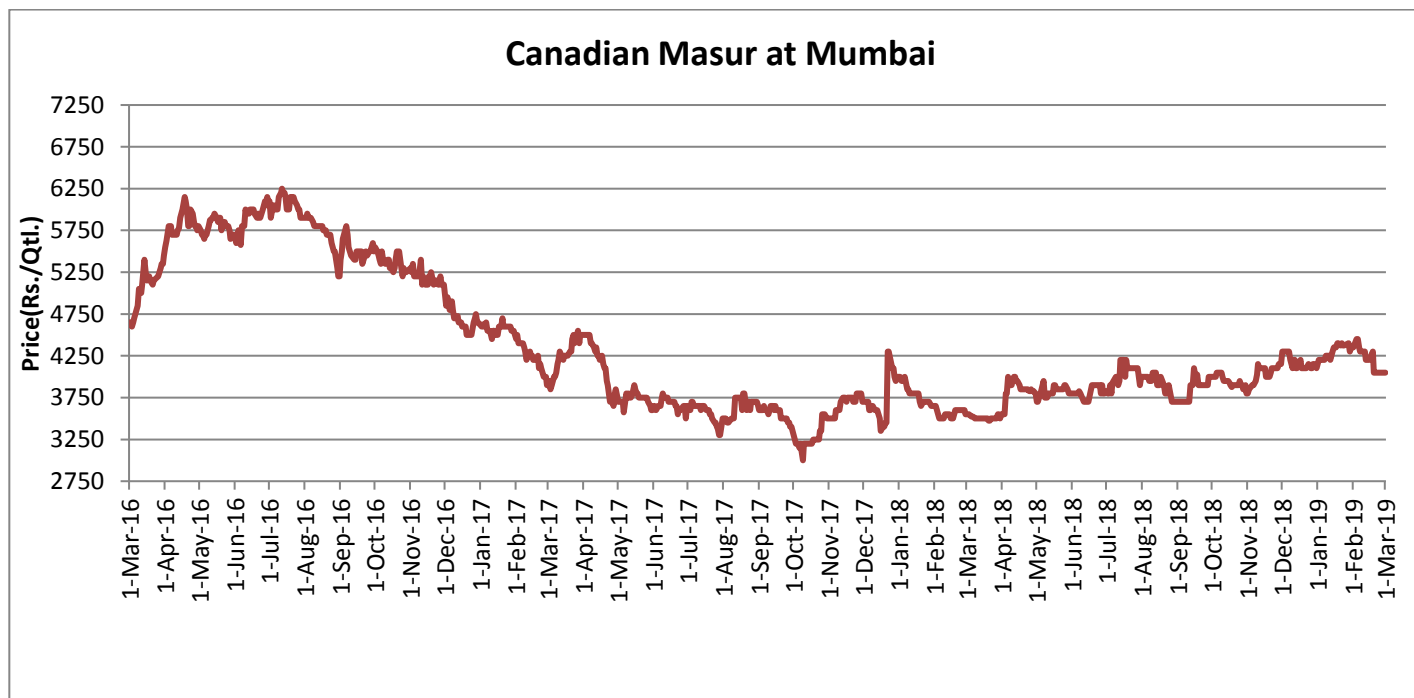

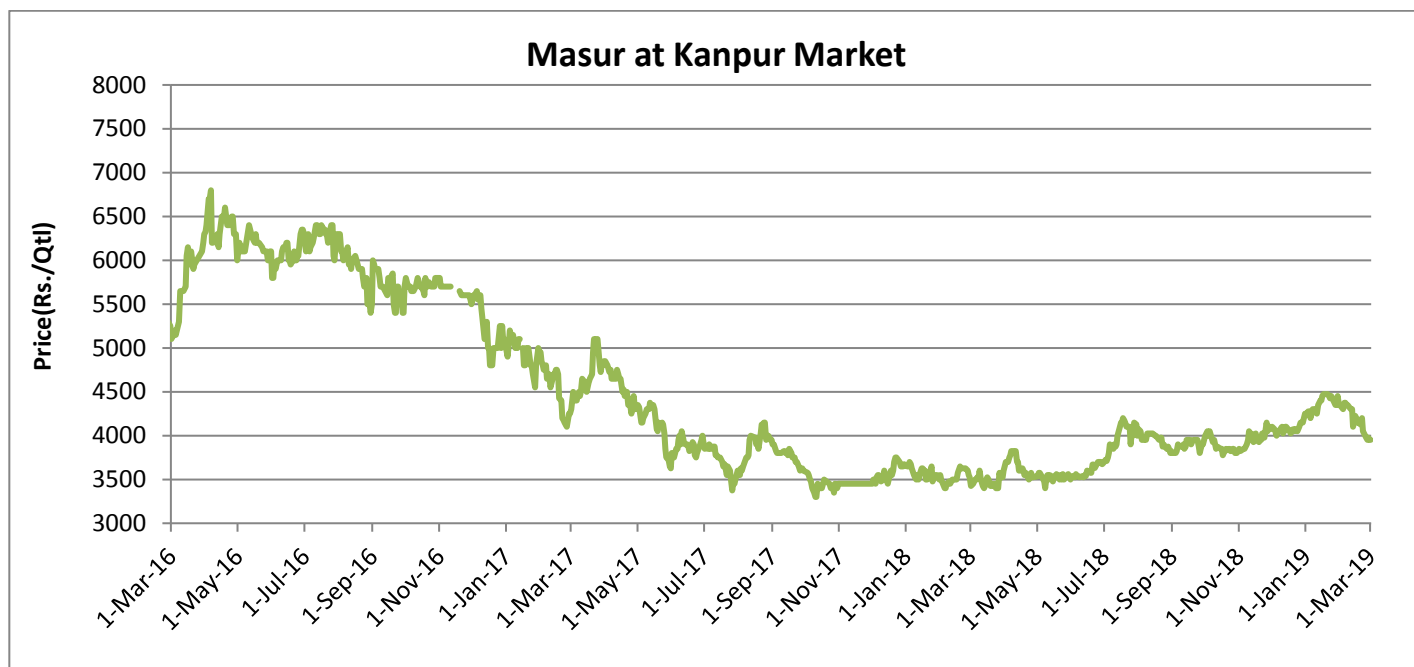

Given the fall in area sown and unfavorable weather condition for lentil, private traders as well as government has predicted a fall in production. Lower imports and fall in production is likely to decrease the overall availability and lead to increase in prices of lentils during second half of 2019. However, as of now prices are under pressure due to fresh arrivals.. With increasing new arrival in MP, Bihar and west Bengal lentil may trade lower in the month of March. It may decrease by Rs100-200 more from current level. Demand remains weak.

Price Dynamics:

In Feb-2019, average price in key market Kanpur was down by 4.37 % to Rs 4174 per qtl. MoM basis. Prices are likely to trade slightly weak in March due to new crop arriving in mandis.

Weakness is expected due to:

- Weak Demand & higher stock with Nafed
- Cheaper availability of other pulses.
- Millers interest in old stock
- Likely commencement of Nafed selling from April

Seasonality Index depicts steady to slightly weak movement in March-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur traded weak with increasing arrivals in major markets amid slower pace of procurement by various agencies. Total procurement by Nafed, has reached at 1.44 lakh tonne. Arrival pressure is likely to continue amid restricted buying by private trades. There is a common view in the market that tur price may go down by Rs100-150 more from current level as bulk users demand remains sluggish at this point of time. However, any major dip is unlikely as crop size is lower this year. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. As carryout is higher, any major jump from current level is unlikely. Market is awaiting demand. Currently tur market is being traded at Rs 5000-5200 in Gulberga market. This week it may trade slightly lower. Myanmar is offering tur at \$580 per MT. Total procurement from kharif-2018 has reached 144112.60MT as on 27th Feb-2019.

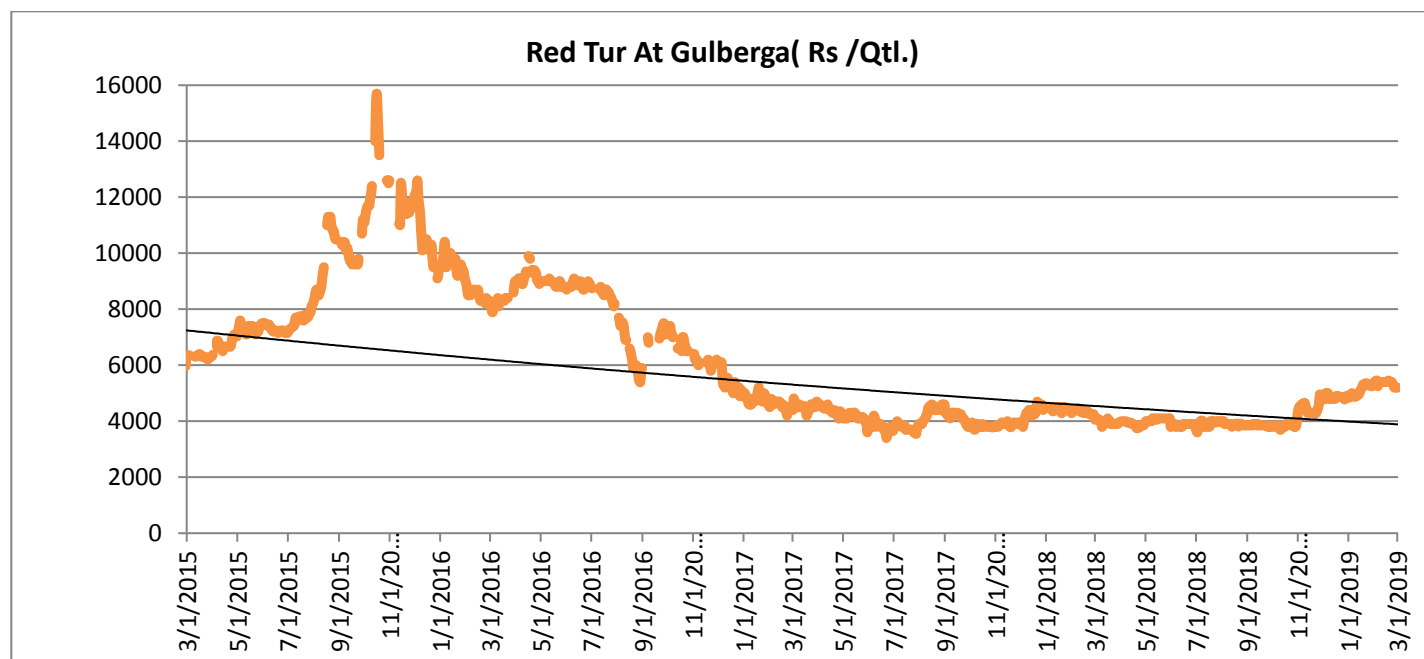

Market Recap:

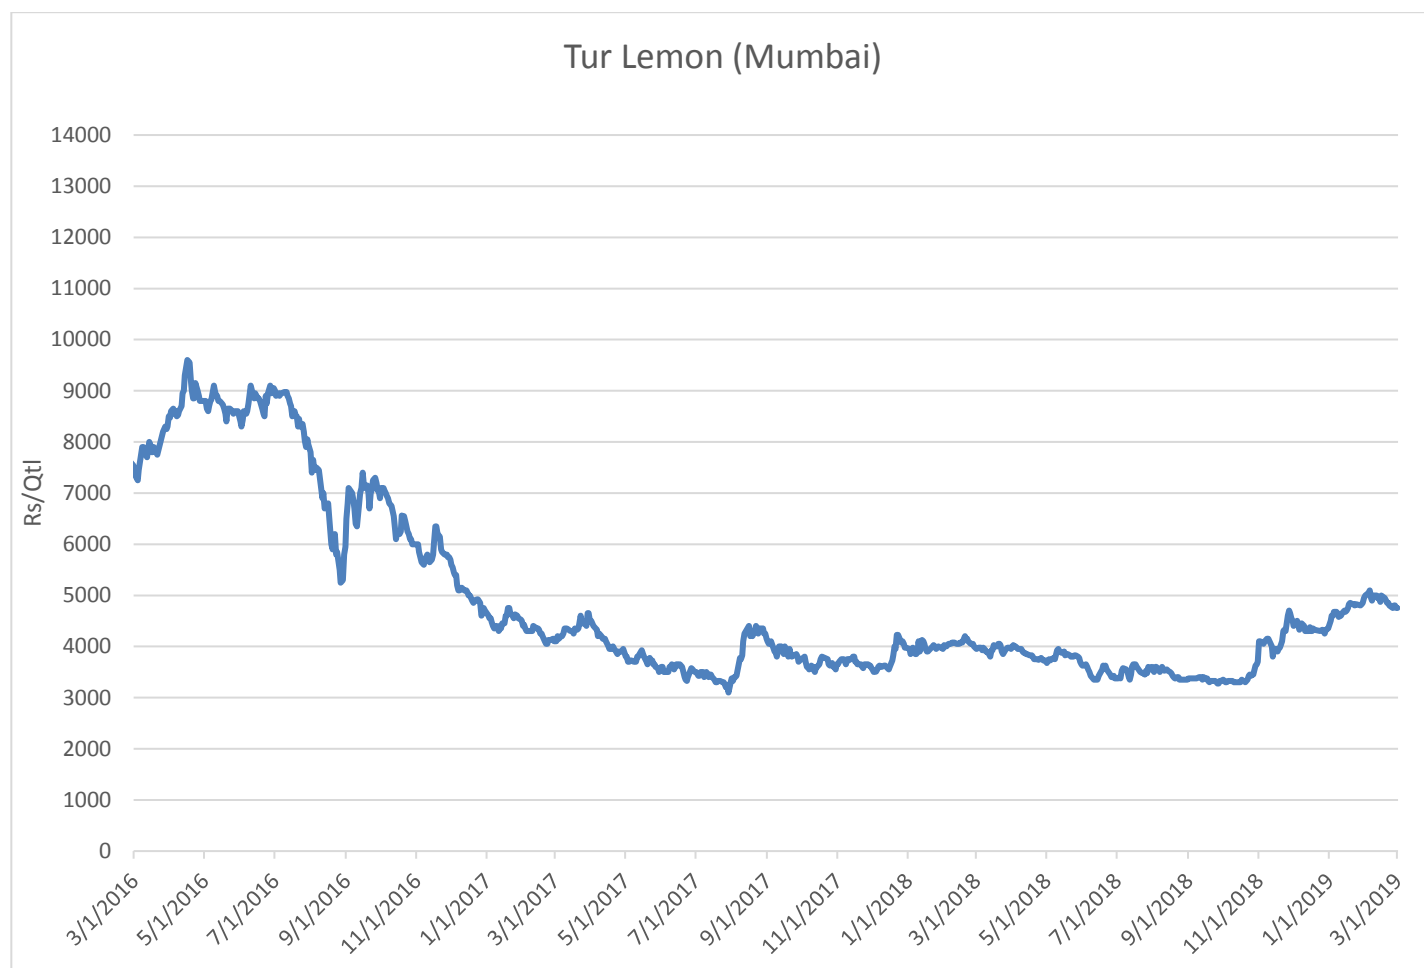

Tur market is expected to stay steady to slightly weak on the back of higher arrival and weak demand from bulkbuyers. Besides, old stock too is capping uptrend momentum. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Price Dynamics:

In Feb-2019, average price in Gulberga market was up by 4.63 % from 5114 to 5350 per qtl. due to good demand and lower crop size. In March market is likely to decrease slightly due to

- Increasing arrival
- Higher stock of old crop
- Weak demand from bulk users
- Cheaper availability in global market

Seasonality Index-depicts steady to slightly weak movement in March.

Market Outlook for March:

Fundamental remains supportive for Tur cash market in the medium term. Short term outlook is weak.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

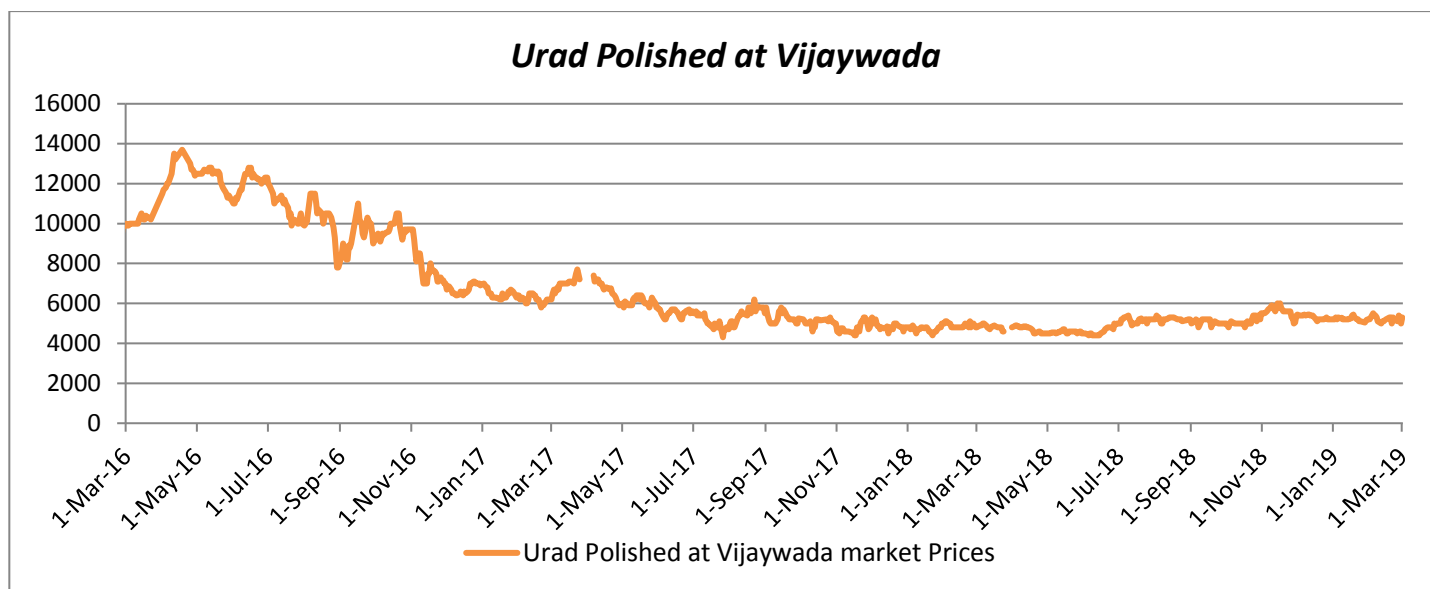

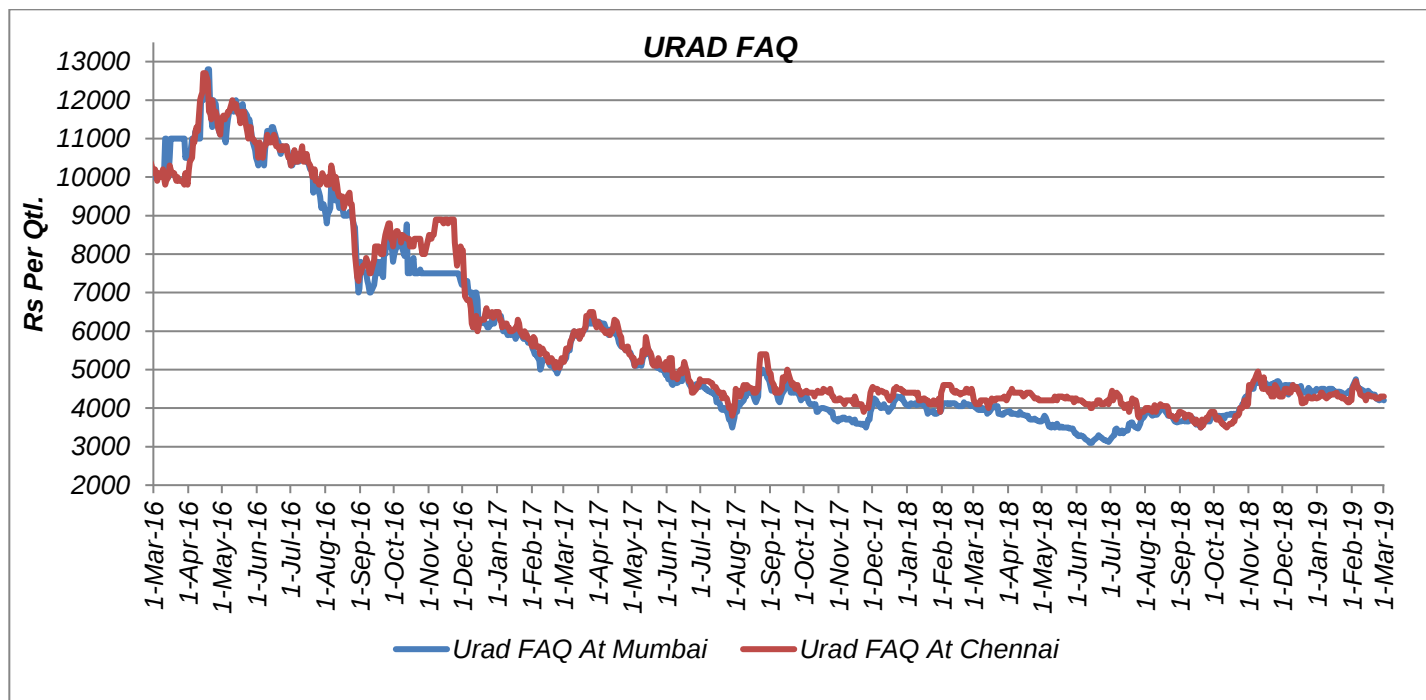

Market Recap:

Urad market traded almost steady during the week under review. Slackened demand from mills and higher production adv estimate amid higher carryout have capped market at current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Despite lower crop size from kharif, carryout is at higher side and it may restrict uptrend in coming weeks. With opening of weather, demand is likely to improve. With ongoing procurement drive, any major decline is unlikely. Urad may continue to trade at Rs4100-4400 per qtl in various markets. In Chennai market urad is being traded at Rs4200-4250 per qtl. Burma is offering FAQ urad at \$460 & SQ at \$570 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market.

Price Dynamics:

In Feb, average prices in key markets including Mumbai/was down by 0.22 % percent to 4367 per qtl. In Chennai it is being traded at Rs 4250-4350. Prices may stay steady to slightly firm in March due to

- Ongoing Procurement on MSP
- Lower rabi area
- Crop loss in Raj, Mah and AP
- Unfavorable weather condition for rabi crop
- Restricted import
- Likely commencement of buying by mills at lower level

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Market Outlook for March: Prices are likely to trade steady to slightly firm.

Fundamental Analysis and Outlook For Moong:

Market Recap:

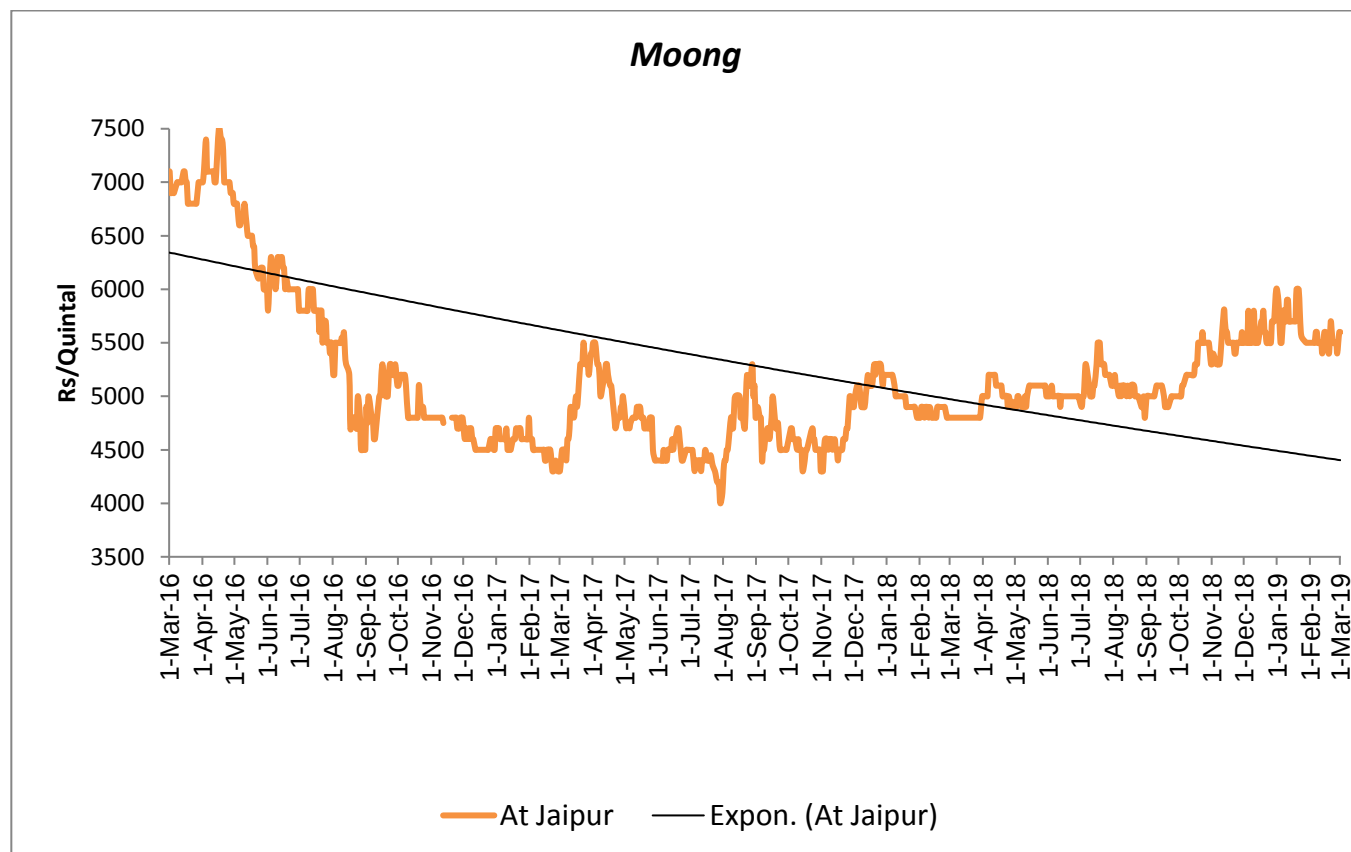

Steady tone prevailed in cash moong market while demand remains sluggish during the week under review. Higher old stock have capped market to get firmer at current level despite commencement of rabi procurement drive. Millers are engaged on need based buying only. So prices are expected to stay steady. There is no parity for export while Myanmar is offering moong at \$680 per MT. With opening of weather, demand is likely to improve. However, prices would continue to rule below MSP as bigger UP crop is expected from March end. Procurement drive remains slow. Moong in Jaipur market is being traded at Rs5600 while in other market it is being traded at Rs 5200 to 5600 per qtl. Supply side seems at ease.

Price Dynamics:

Demand for moong by bulk users is weak. There is no parity for export right now while old stock with Nafed continue to cap uptrend despite ongoing rabi procurement. Private buying remains restricted. Range bound movement might be seen in cash moong market.

Market is expected to trade range bound in March due to:

- Higher stock with Nafed
- Weak demand at higher level
- Private trades selling at higher level
- New crop is due from UP and Bihar
- No scope for export without incentive

Seasonality Index depicts range bound movement in the near term

Market Outlook for March: Steady to slightly weak movement is expected in March.

Pulses Wise Technical Outlook for March -2019: -

Chana:

Outlook –We expect prices to notice steady to slightly weak movement in March-2019. Weak demand & higher stock in central pool remain price affecting factors despite lower crop size. Import would remain halted due to higher duty and lower crop size in Australia. Buy on dip is good at end March-2019. Market may trade down due to:

- ❖ Weak demand
- ❖ Higher stock in central pool
- ❖ New arrival
- ❖ Limited buying by private trades
- ❖ Expected price band for Chana in Delhi is 4000 to 4250 levels in this month.

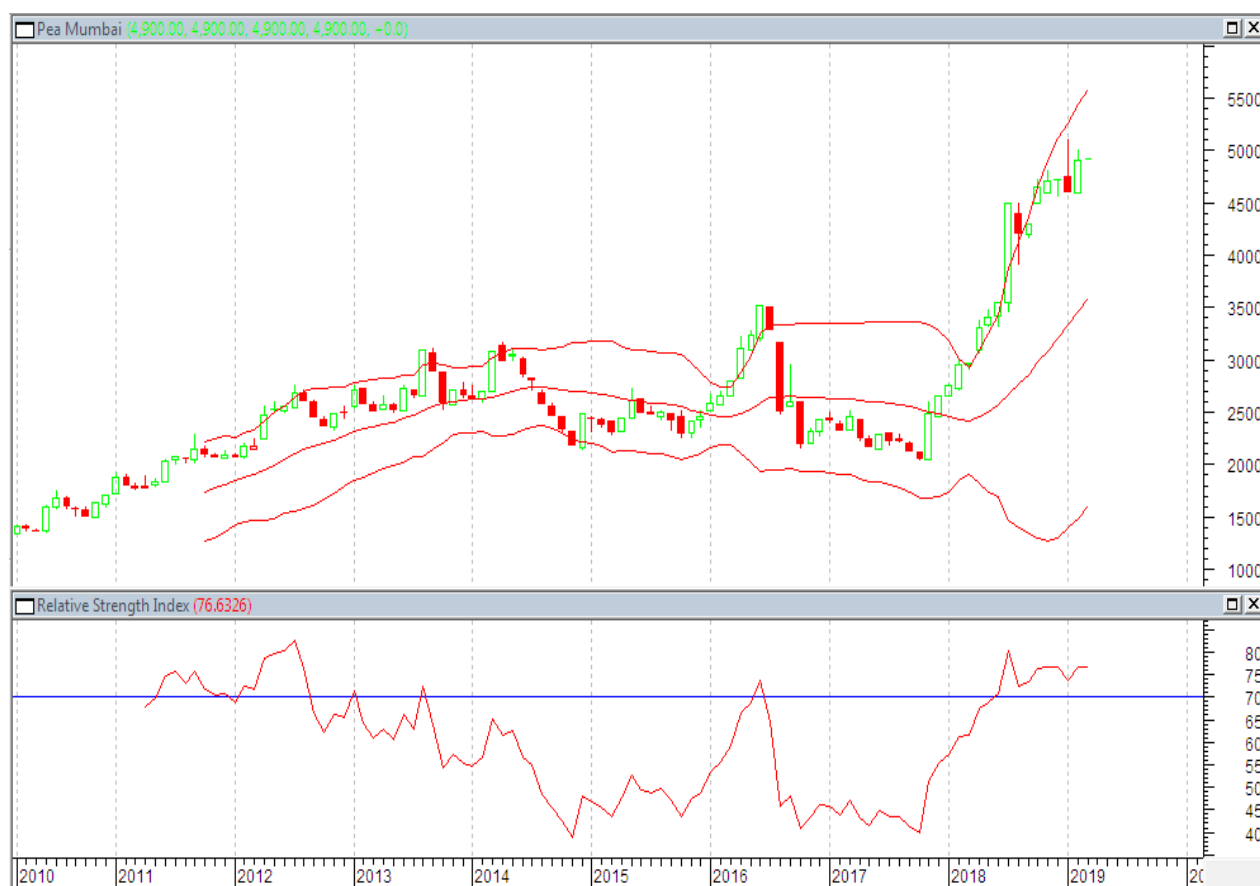

Trade Strategy: Sell on rise.

Trade Recommendations: Go short around 4200 with the first target of 4050 and second target 4000 with stop loss at 4250 level.

Support & Resistance
