2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada
 - US

Domestic Market Fundamentals:

- **Pulses cash market started improving in the beginning of April and recovery continues. Procurement drive** on MSP, restricted sales from central pool stocks and lower rabi crop size helped market to find balance from hefty surplus during last two years. Besides, import duty on chickpeas, lentils and peas supported by quantity restriction on moong, tur, urad and peas remained supportive to cash market fundamental. However, recovery is not enough to push pulses price to MSP level. Right now only pigeon pea is ruling around MSP level while masur, moong, urad and chana are still ruling lower. Recovery in pulses market is likely to continue as demand is expected to increase.
- **At weather front India may receive good rainfall this year as per IMD latest update amid previous concern** of El-Nino. However, Australian weather department has not cleared the chances of developing El-Nino factors. Good rainfall is very crucial for kharif crops in India. So, timely rains have lots of meaning for India and it plays an important role in price affecting factors in commodity market. Delayed monsoon or deficient rains directly affects crop size and resultantly price too. One week delay is considered to be a normal start in India.
- **In kharif season major pulses crops in India are tur, urad and Moong. Good rainfall would ensure good** start of planting throughout India. Under prevailing condition Agriwatch expects good planting as prices have started recovering just ahead of planting season. Its hints towards good coverage area in coming weeks.
- **Lower yield (around 20 %) for tur in Bihar and Jharkhand could not pressurize cash market. Apart from** lower arrival demand from Kanpur, Katni and Indore continues to increase. Currently, there is not much stock of tur in mills located in Katni region. As prices of local tur in cash market is higher, there is no parity for dal mills in this region. So, lemon tur is being processed to meet emerging demand. It impacted lemon tur price positively and it moved up by Rs 400 to Rs5500. However, some correction is expected at this level. As domestic crop size is lower, prices of tur is bound to move up further amid lower crop size report in Myanmar this year. Forward deal in Myanmar has been struck at \$720/25 per MT basis Indian port. Supply from Nimuch line is decreasing now. Besides, there is not much stock in Mumbai and Chennai right now. All these developments would push tur price up by Rs 400-500 from current level.
- **Chana may continue to trade steady to slightly firm as millers are expected to buy for stock purpose at current** price. In Delhi market chana is being traded at Rs 4300-4350. Weak demand amid eased supply side may restrict chana to have any major spike in the short term. There is some hope from Ramdan's demand and improved pace of procurement. However, it may not push up price beyond MSP level in any case in the near term. There is plenty of old stock with Nafed. If Nafed holds 10 lakh MT as buffer stock, there would be still marketable surplus of 7 lakh MT. It would cap uptrend. Chana cash market would move up beyond MSP, but not before June.
- **Agriwatch expects downward correction in moong market as buyers at higher level have started restricting** bulk purchase. In Jaipur market moong is being traded at Rs 6300-6450. It may move further up by Rs 100-150 and then decrease. There is no parity for export while new crop is expected from UP, Odisha and Bihar. Pressure from Nimar line is coming down. Besides, govt has stock of around 1.5lakh MT and attempt to sell at higher price may start again. Overall tone in the medium term remains firm. June onward it may move to Rs 7000. No big crop is due before August end. So, stake holders should buy at Rs100-200 downward correction.
- **Slight recovery in cash market was seen during the week under review. Demand for quality urad has improved** amid restricted release by stockiest. Besides, The DGFT has fixed import quota of urad at 1.5 lakh MT for the whole year starting from 1st April-2019. As demand for urad dal improves in summer season, prices are expected to move up slightly from current level. No big crop is due in Sep. Before this green urad would market from MP and UP but mostly would be consumed locally in Dhoya dal. Under prevailing market scenario urad price may move up by Rs 300 to 400 more from current level. Currently it is being traded at Rs 4550 to 4650 in Mumbai market.
- **In a latest development DGFT has re-set import quantity for the whole year at 6.5 lakh MT, starting** from 1st April-2019 to 31st March-2020. Out of total tur import quantity has been set at 2 lakh MT (excluding 1.75 lakh MT through G2G basis), Urad

and moong 1.5 lakh MT each and 1.5 lakh MT peas including Green and Kaspa. Peas quota can be increased to 2 lakh MT. This means there would be minimum import and it would remain supportive for domestic cash market in coming months.

- **As per latest update, lower imports has led to increase in prices of lentil by Rs 50 per quintal** at ports. Lentil vessel is being quoted at Rs 4050-4150 per quintal and container is being quoted at Rs 4200-4250 per quintal. Furthermore arrivals in domestic market is also low. Lentil stockiest are increasing their buying at a steady pace. All these factors are providing support to lentil market and as a result lentil prices have increased by Rs 100-150. Steady to firm sentiment may prevail in Lentil market in May and June.

International Market Update:

- **Production of lentil in Canada is expected to decrease by 0.38 % to 21 lakh MT in 2019-20**, against 20.92 lakh tonne in 2018-19. Yield for the year has been pegged slightly up by 5% to 1.47 MT per ha against 1.4 MT /ha last year. However, total supply is expected to decrease by 2.01 % from 29.80 to 29.20 lakh MT due to 4.92% lower production pegged for 2019-20. Export has been pegged 1 lakh MT higher at 18 lakh tonne in 2019-20. Carryout is likely to decline from 8.0 lakh Mt to 6.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 37 to 28 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 58.19 % to 1.30 lakh MT** in 2019-20, against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. Even total supply is expected to decrease by 0.57% from 3.50 to 3.48 lakh MT due to higher expected export in 2019-20. Export has been pegged at 1 lakh tonne, up by 0.10 lakh MT from 2018-19. Carryout is likely to decrease from 1.95 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 500 to 530 per MT in 2019-20.
- **Adverse weather condition at the point of crop growth stage in Myanmar has affected Tur and urad crop.** Despite good area coverage this year, production is likely to decline by 15 to 20 percent. Lower crop in India this year and weak prospects in Myanmar may push tur market further up in May. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year. Myanmar is offering new tur at \$770 in forward deal basis Indian ports. Old crop is being offered at \$660 per MT.
- **As per USDA pre sowing intention report dry pea area is expected to increase by 3% to 8.81 lakh acres** this year. Area may increase in Idaho, Montana, South Dakota, and Washington from last year. However, it may decline in Nebraska and North Dakota.
- **As per USDA report lentil area in US decline by 29 % from last year to 5.55 lakh acres in 2019.** Planted area is expected to decline in Montana and North Dakota while in Idaho and Washington it is expected to remain unchanged. If materialized, it will be the lowest area coverage since 2015.
- **As per the latest USDA seeding intention expected area coverage under chickpea in US may decline** by 40% to 5.19 lakh acres. Out of this small chickpeas area may be at 1.37 lakh acres large chickpea at 3.82 lakh acres. It would be the lowest since 2016.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against** 1148 thousand produced in 2017-18. Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- **As per statistics Canada land in pulses and specialty crops may decline in 2019-20 if farmers remain stick** with their seeding intentions. They intend to plant 8.82 million acres of pulses and special crops, down from 8.98 million last year and below the recent five year average of 9.52 million acres. The only crops showing an increase over last year are peas, which could climb from 3.615 to 4.035 million acres.
- **This year supply from Myanmar is expected to be lower due to lower crop size and quantity** restriction imposed by India. New tur crop in Myanmar is expected from June end. As old crop stock is lower this year, Myanmar is offering new

tur at \$770 and old at \$660 per MT. It is offering FAQ urad at \$580 and SQ at \$695 per MT. Chana Kabuli is being offered at \$690 basis Indian port. Moong Pakakuis being offered at \$800 per MT. red rajma is being offered at \$1100 per MT. As demand is increasing from other parts of world, prices may move further up from current level.

Monthly Outlook: -Pulses are likely to trade steady to slightly firm in May.

Pulses Supply & Demand:

(*All quantities in Lakh tonnes)	Urad (Kha-Rabi)		Moong (Kha-Rabi)		Tur		Chana		Masur

Note: Agriwatch 1st Adv Estimate For 2019-20 for Urad ,Moong & Tur & final estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to increase by 1.3 % from 24.58 to 24.90 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 35.15 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout would decrease slightly from 8.75 to 6.95 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So any unexpected spike is unlikely under prevailing condition.

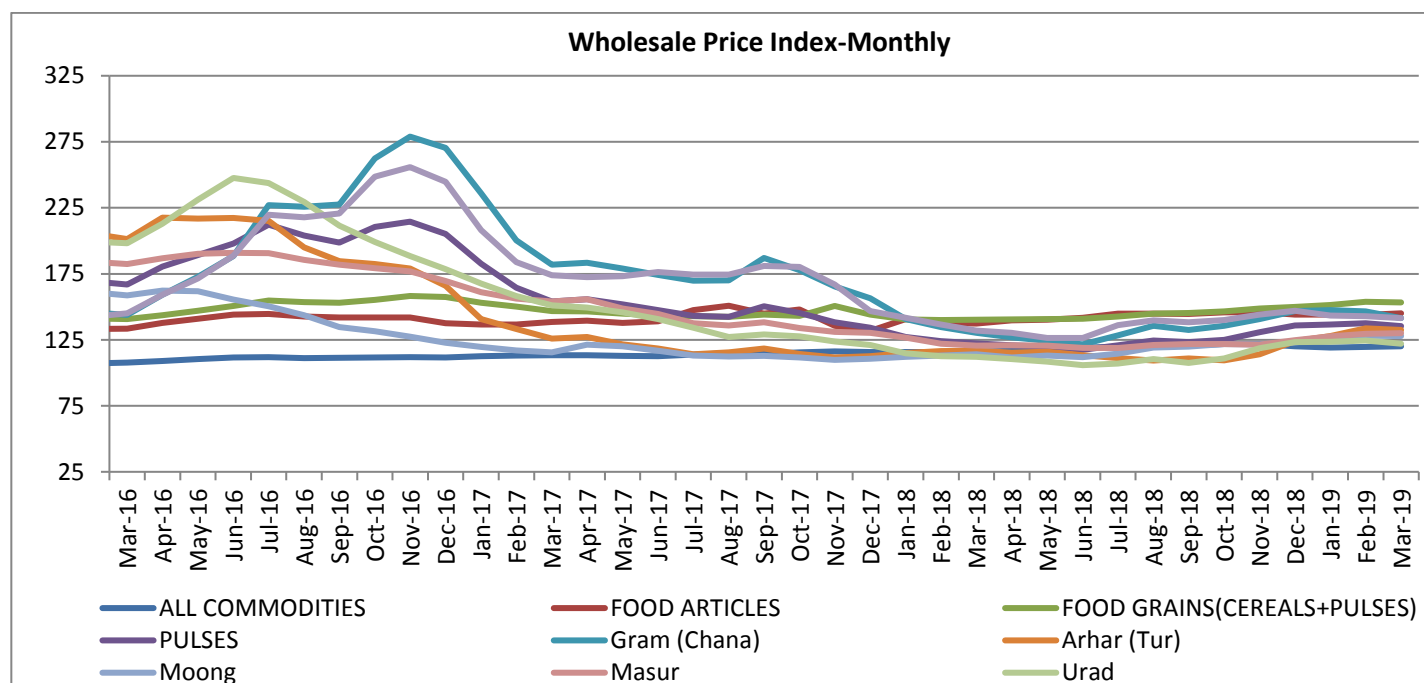

Moong: Moong production is likely to increase by 3.06 % from 20.26 to 20.88 lakh tonne in 2019-20. Import is expected to decline by 50 % to at 0.75 lakh tonne in new season. Total supply is expected to decrease from 29.02 to 27.15 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would pull carryout from 5.52 to 3.95 lakh tonne. So any major decline in moong price is unlikely in the new season.

Tur: Tur production is likely to increase by 15.84 % from 35.21 to 40.79 lakh tonne in the new season (2019-20). Import is expected to decrease by 0.50 lakh tonne to 3 lakh tonne due to restrictive import policy. Total supply would increase slightly from 46.78 to 49.07 lakh tonne due to expectation of higher production in new season. Export may increase from 0.5 to 0.70 lakh tonne due to likely export incentive. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.7 lakh tonne. Despite higher consumption, carry out would increase to 6.37 lakh tonne for next year. Market is expected to find balance now and price would improve further in the medium term.

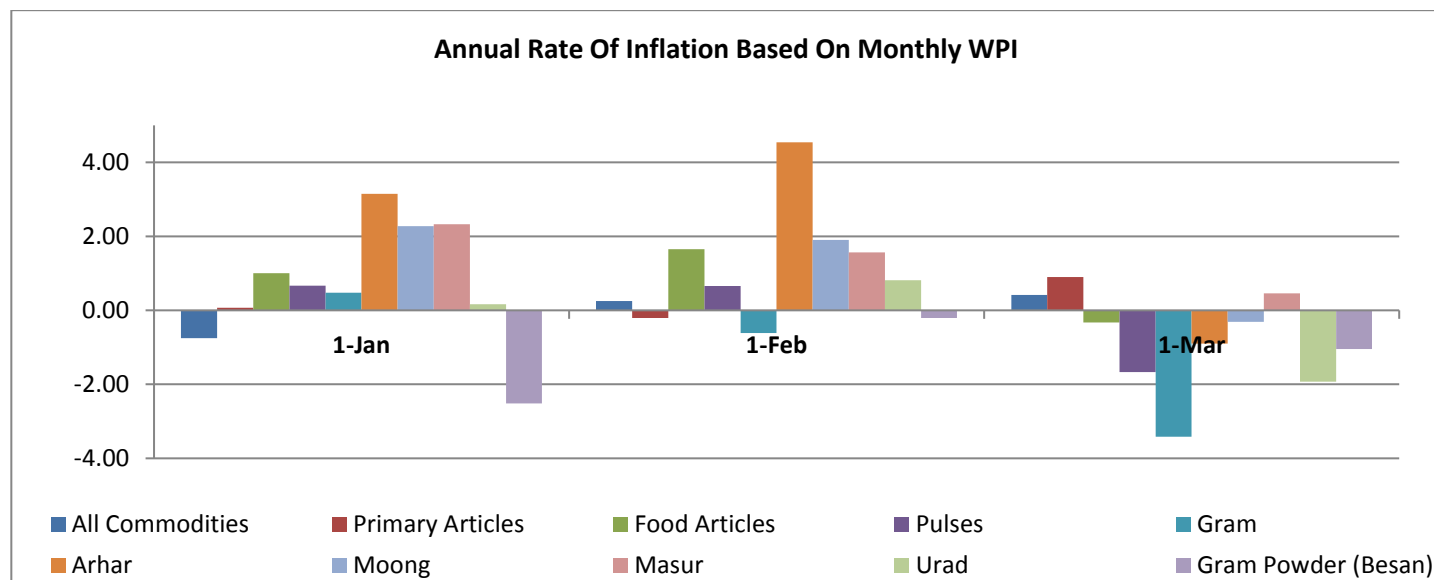

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5lakh tonne in new season. Lower production would drag down total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged almost same at 18.6 tonne in the new season.. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –March -2019:

Pulses WPI: Pulses WPI increased by 0.9 point from 136.7 in Jan to 137.6 in Feb-2019.

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Chana cash market continued to trade under pressure and is unlikely to move up in the month of May as bulk buyers have restricted buying analyzing trends in futures market. There is lots of stock in central pool and stock in cold is said to be double from last year. Demand remains restricted as mills are buying only to fulfil their immediate needs. Chana market may decrease further by Rs 100. At this price stake holders should buy. As old stock is ample,so any major spike in chana cash market is unlikely at this point of time. Even demand for Ramdan too could not help market to move up. Steady to weak sentiment might be seen in May-2019.

All India average price for Chana increased by 2.52 percent from Rs 4244 (March) to 4351 per qtl.in Apr-2019. Australian Chana (imported) price too increased by 2.71 percent from Rs 4156 to Rs 4269 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

.Prices are likely to stay steady to slightly weak in May due to:

- Weak demand from bulk users amid higher old stock
- Nafed stock with continuous auction despite lower crop size (87/88 lakh tonne)
- Cold stock doubled from last year
- Weak futures and stockists slower pace of buying in Mah, MP & Rajasthan.
- Stable demand for besan

Seasonality Index hints that Chana (gram) is likely to notice steady to weak movement in the Spot market in May-2019.

Chana Future Market Analysis:

Technical Commentary:

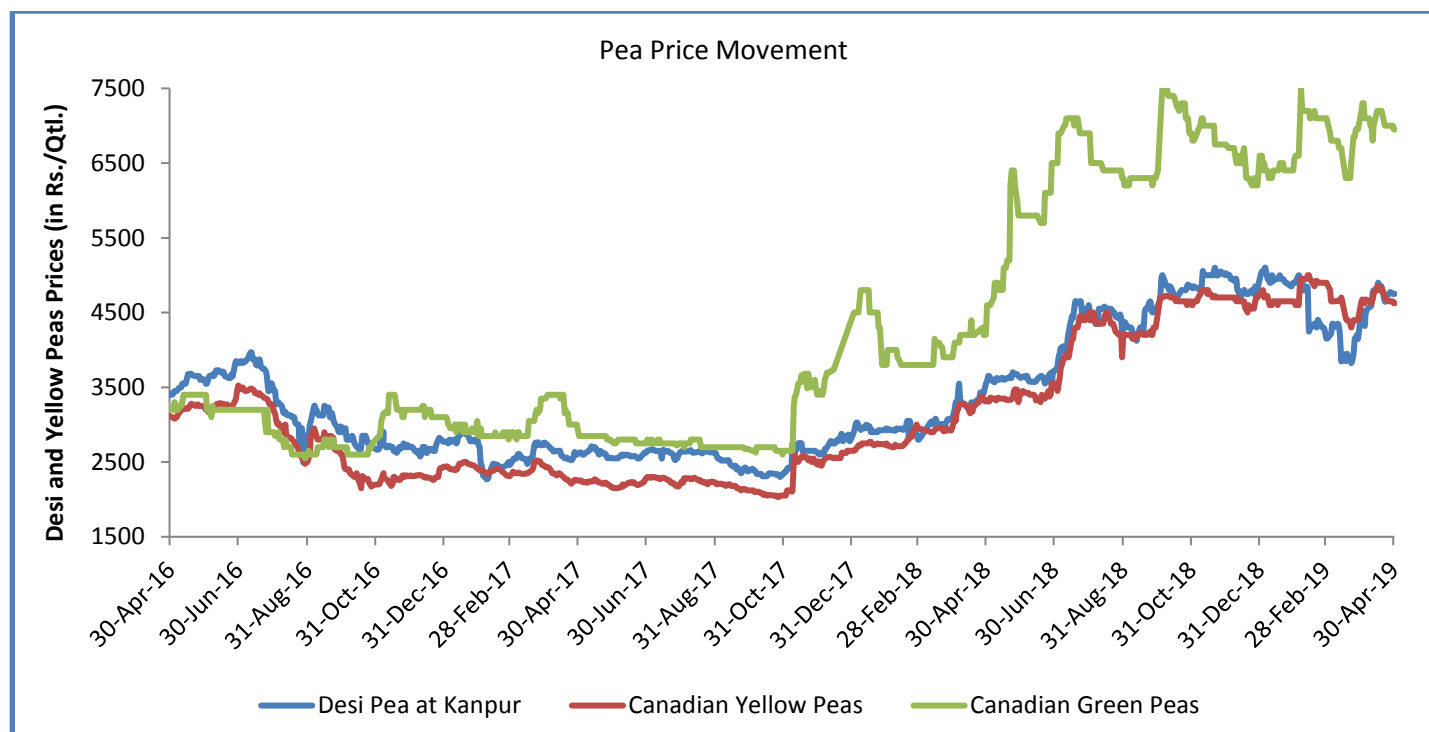

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

Strategy: Buy on Dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	June	4156	4104	4315	4650	4750
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	June	Buy on dip	4221	4400	4500	4125

Field Pea (Matar/Dry Pea):
Fundamental Analysis and Outlook:
Market Recap:

Pea market traded weak and would continue to trade weak due to poor demand at higher level despite import quota restriction at 1.5 lakh tonne for the whole year. However, govt. may increase it to 2 lakh MT in coming months. Earlier market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4600-4650, while in Kanpur market it is being traded at Rs 4600 per qtl. As chana price has started decreasing, pea too trades under pressure. However, arrival pressure from new crop is decreasing now. As, there would be shortage of imported crop, price would bound to move up taking clue from other pulses. Stake holders should buy on downward correction. Restriction on pea import at 1.5 lakh tonne till April-2020 and lower availability of imported stock may support pea market once again in the second half of the year. Improvement is expected June onward. If chana continues to trade weak, pressure would continue on pea price too. Weak trend may prevail in May.

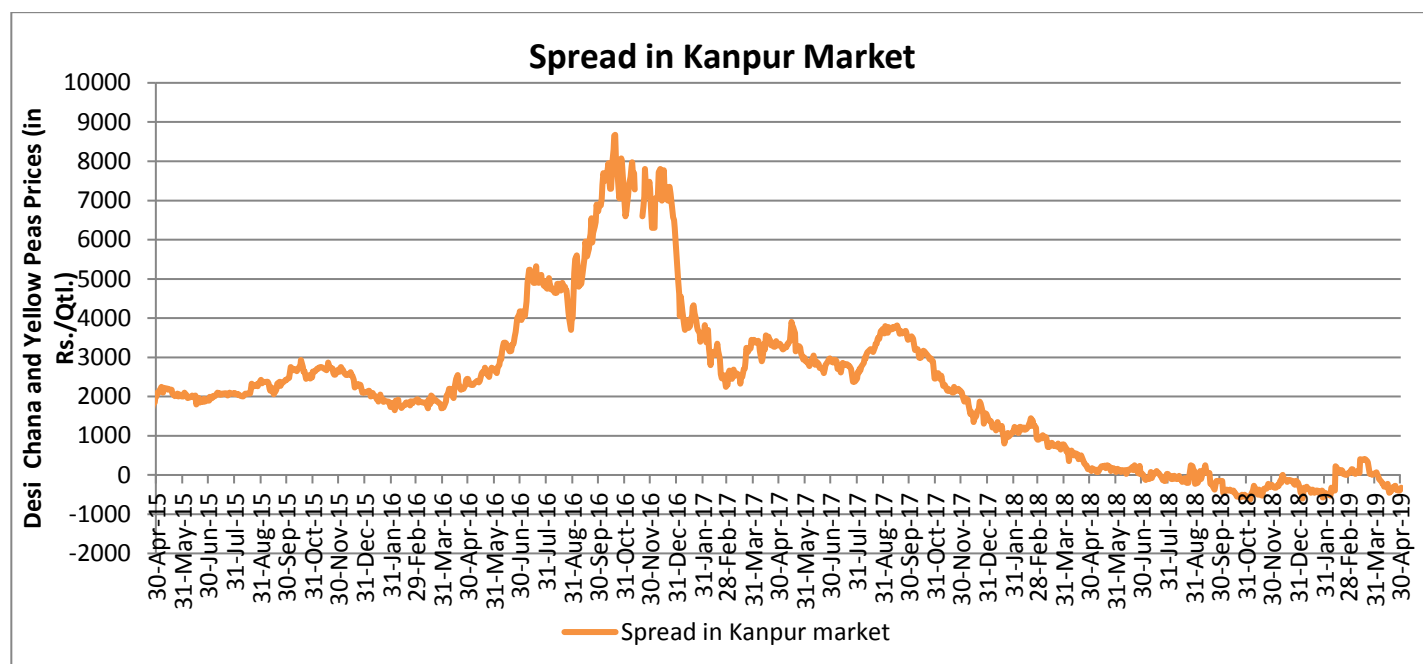

Price Dynamics:

In April-2019 market traded smartly up by around 13% due to restriction imposed on quantity at 1.5 lakh MT for the whole year. It moved from Rs4150 to Rs 4700. However market could not get support due to weak chana price despite lower stock at ports.

Pea market is expected to trade steady to slightly weak in May due to:-

- Weak demand for chana despite lower crop size this year
- Import quota might be increased from 1.5 lakh MT to 2 lakh MT
- Weak demand for pea dal
- Almost halted use for besan
- Stockists release at regular interval sensing weak market ahead

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone despite improvement in chana price. However, gap has contracted from Rs350 to Rs 250-300. Spread is expected to remain in the negative zone in May too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks..

Seasonality Index depicts that pea prices are likely to notice weak movement in May-2019.

Market Outlook For May-Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

Fundamental Analysis and Outlook:

Market Recap:

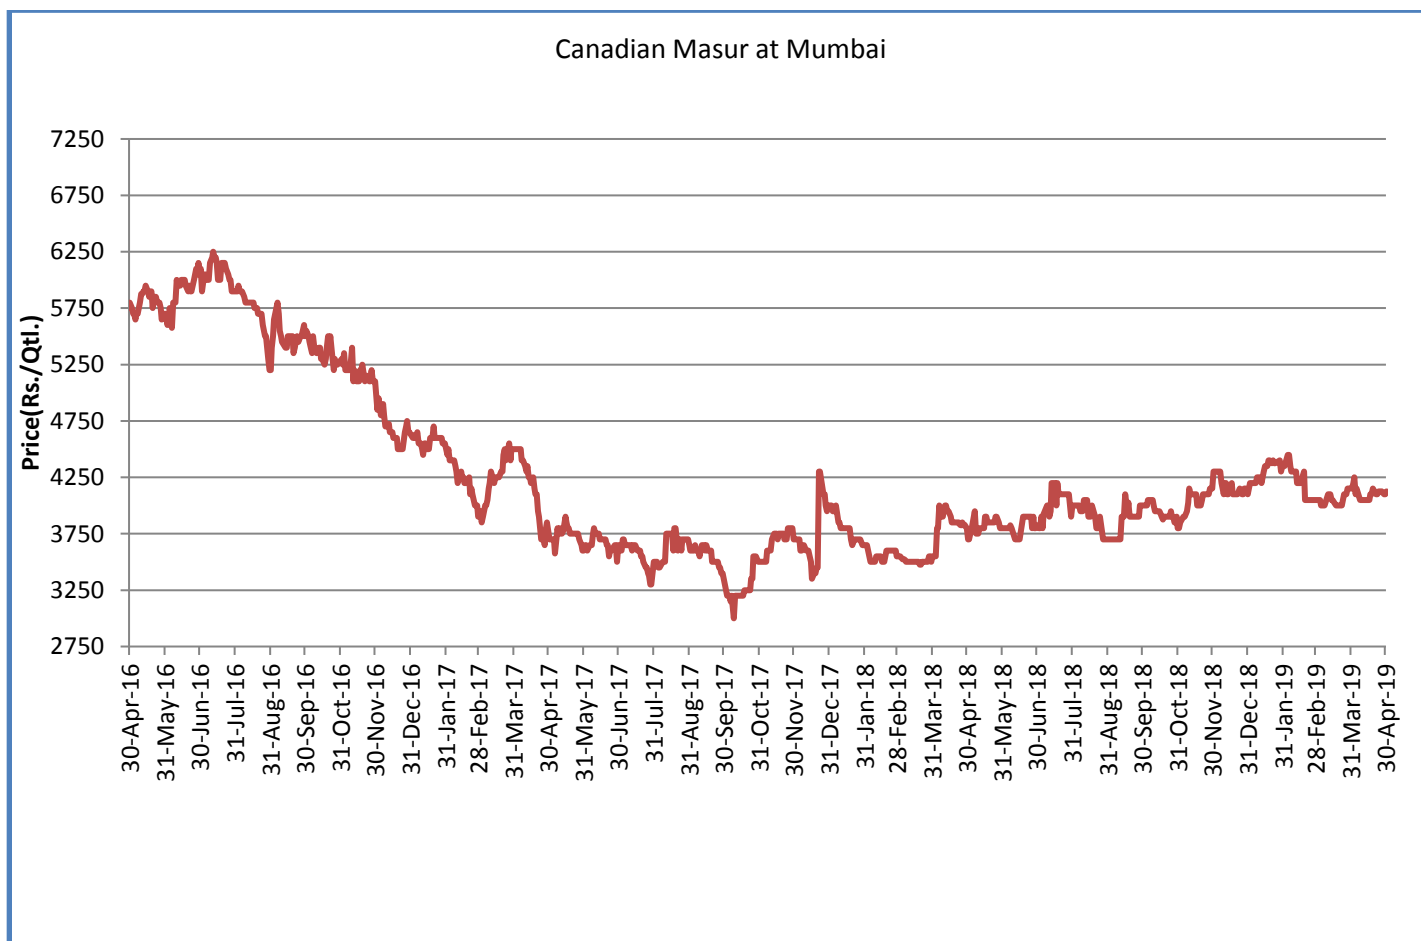

As per latest update, lower imports has led to increase in prices of lentil by Rs 50 per quintal at ports. Lentil vessel is being quoted at Rs 4050-4150 per quintal and container is being quoted at Rs 4200-4250 per quintal. Furthermore arrivals in domestic market is also low. Lentil stockiest are increasing their buying at a steady pace. All these factors are providing support to lentil market and as a result lentil prices have increased by Rs 100-150 per quintal in recent weeks. Lentil arrivals are not creating much pressure on prices. This would provide support to domestic market prices. However, higher stock in central pool may cap upward momentum to a certain extent. As prices of other pulses have started improving, lentil too may trade up again. Improvement in demand from Nepal and B'desh, may push lentil price up. Cash market may trade in the range of Rs4100-4350 in May.

Price Dynamics:

In April-2019, average price in key market Kanpur was up by 4.88 % to Rs 4252 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in May.

Firmness is expected due to:

- Improved demand & restricted release from Nafed godowns
- Lower availability of imported masur
- Lower crop size
- Firmness in other pulses market specially tur and urad

Seasonality Index depicts steady to slightly firm movement in May-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur traded firm due to poor arrival flow amid ongoing procurement drive at MSP which has increased this week. Total procurement by Nafed, has reached 2.75 lakh tonne. There is a common view in the market that tur price may go up by Rs200 more from current level as bulk users demand started improving.. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. Market is awaiting demand from bulk buyers.. Currently tur market is being traded at Rs 5050-5200 in Gulberga market. This week it may trade slightly up. Myanmar is offering new tur at \$770 per MT in forward deal. Old is being offered at \$680per MT.

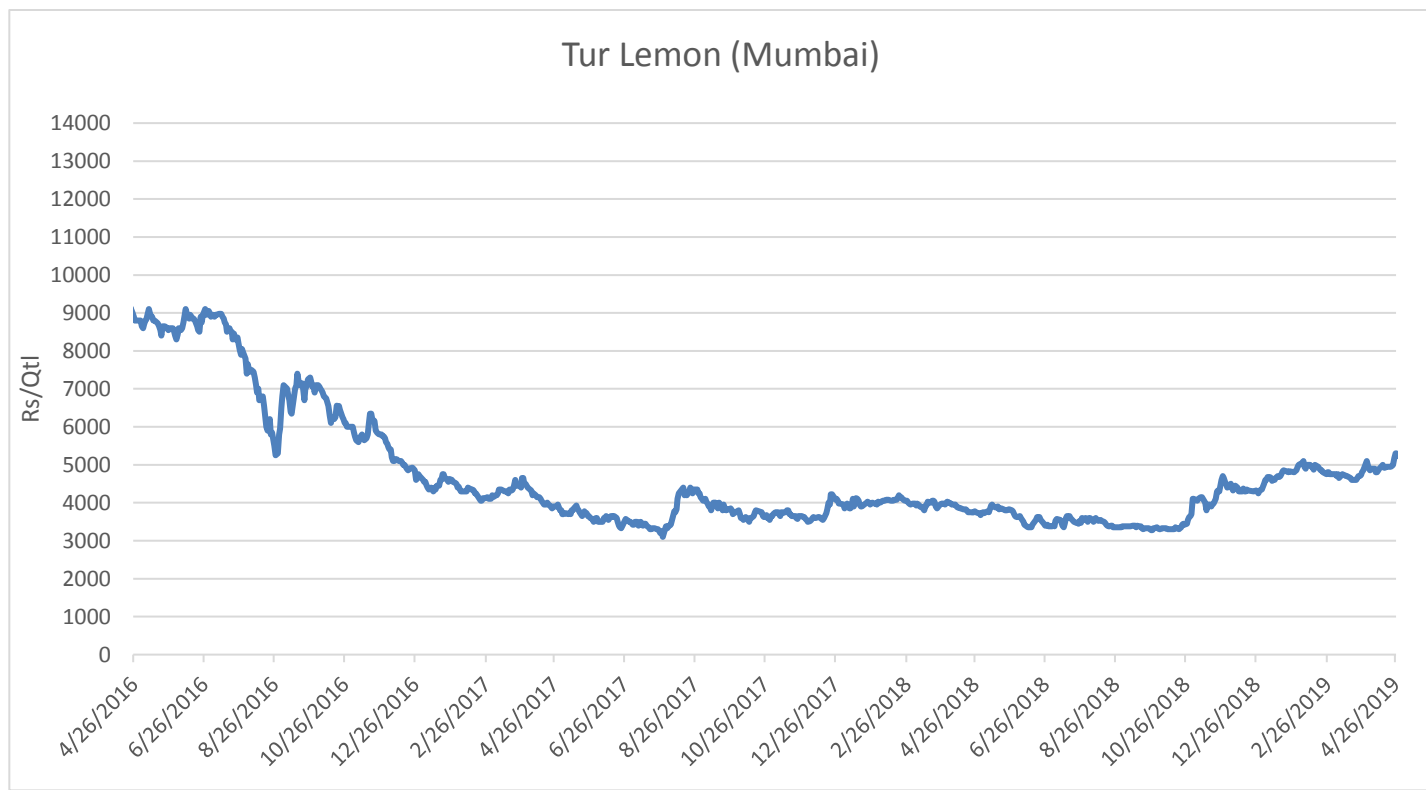

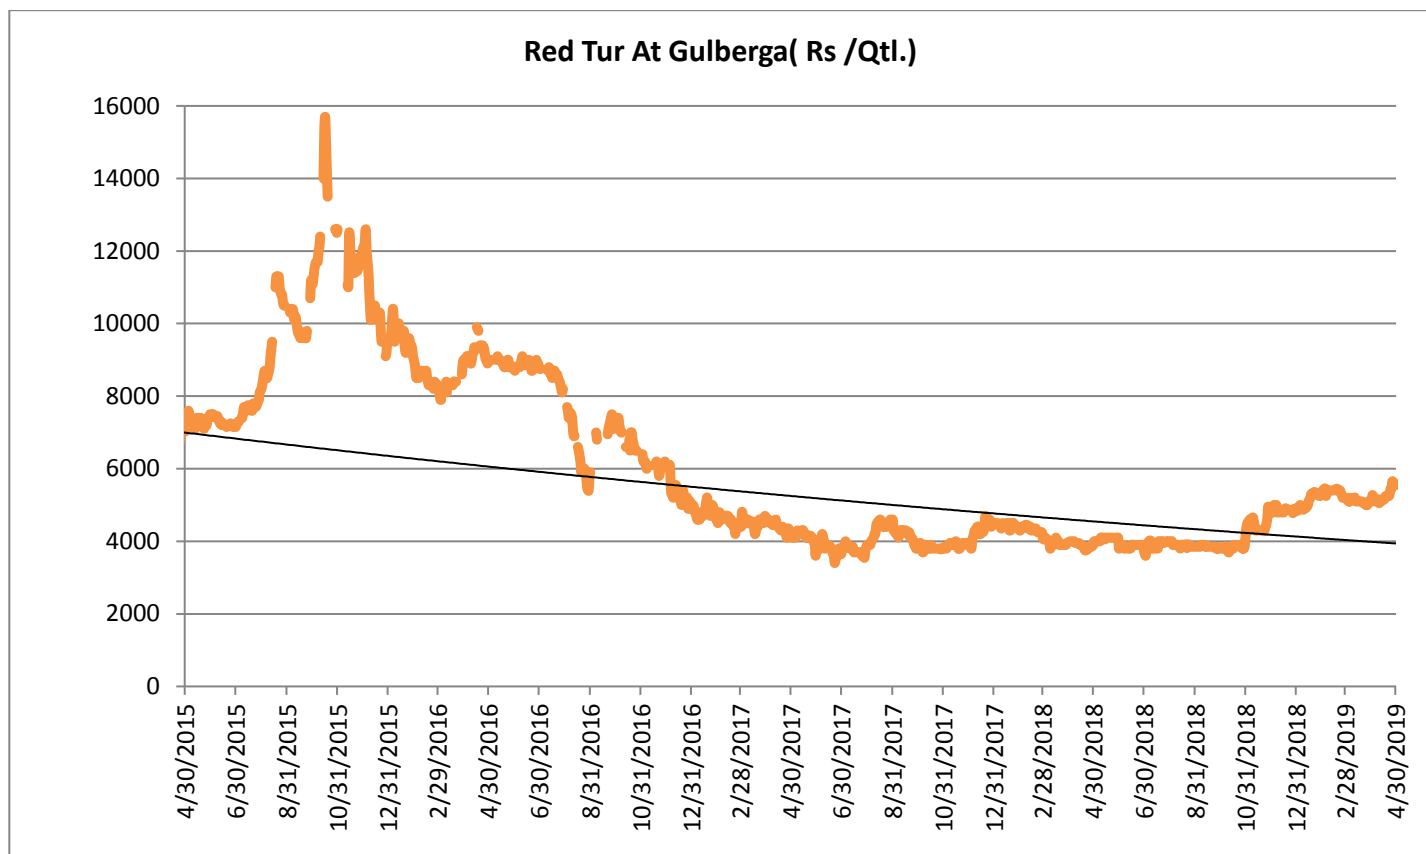

Market Recap:

Tur market is expected to stay steady to slightly firm on the back of decreasing arrival and import cap at 2lakh MT for the whole year. Besides, decreasing old stock too is supporting firm momentum. Restricted selling by stockists, even at higher level would remain supportive too. So buying at correction seems riskless.

Price Dynamics:

In April-2019, average price in Gulberga market was up by 3.6% from 5102 to 5286 per qtl. due to lower arrival and buying at MSP supported by lower crop size. In May market is likely to increase slightly due to

- *Decreasing arrival*
- *Lower stock of old crop*
- *Import cap at 2 lakh MT and*
- *Increasing holding by private trades*

Seasonality Index-depicts steady to slightly firm movement.

Market Outlook for May:

Fundamental remains supportive for Tur cash market in the near to medium term.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

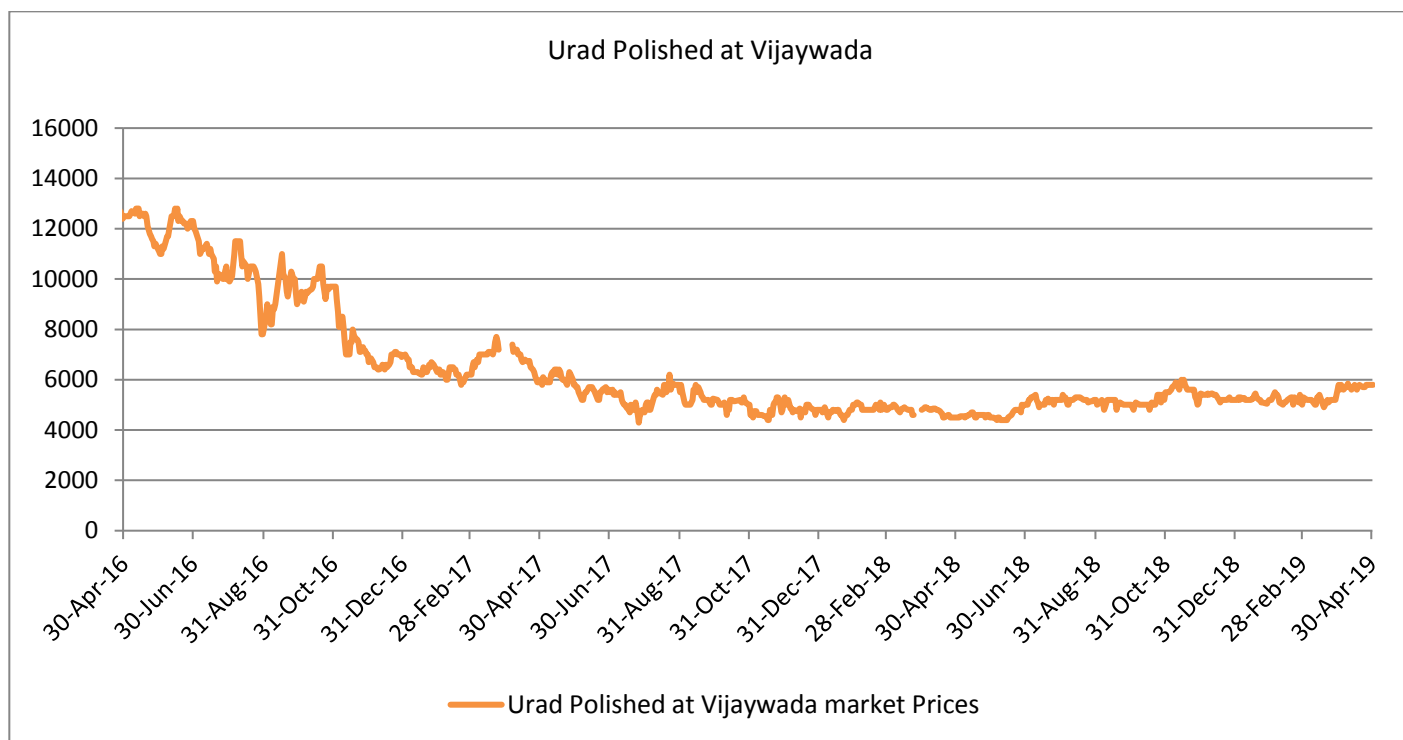

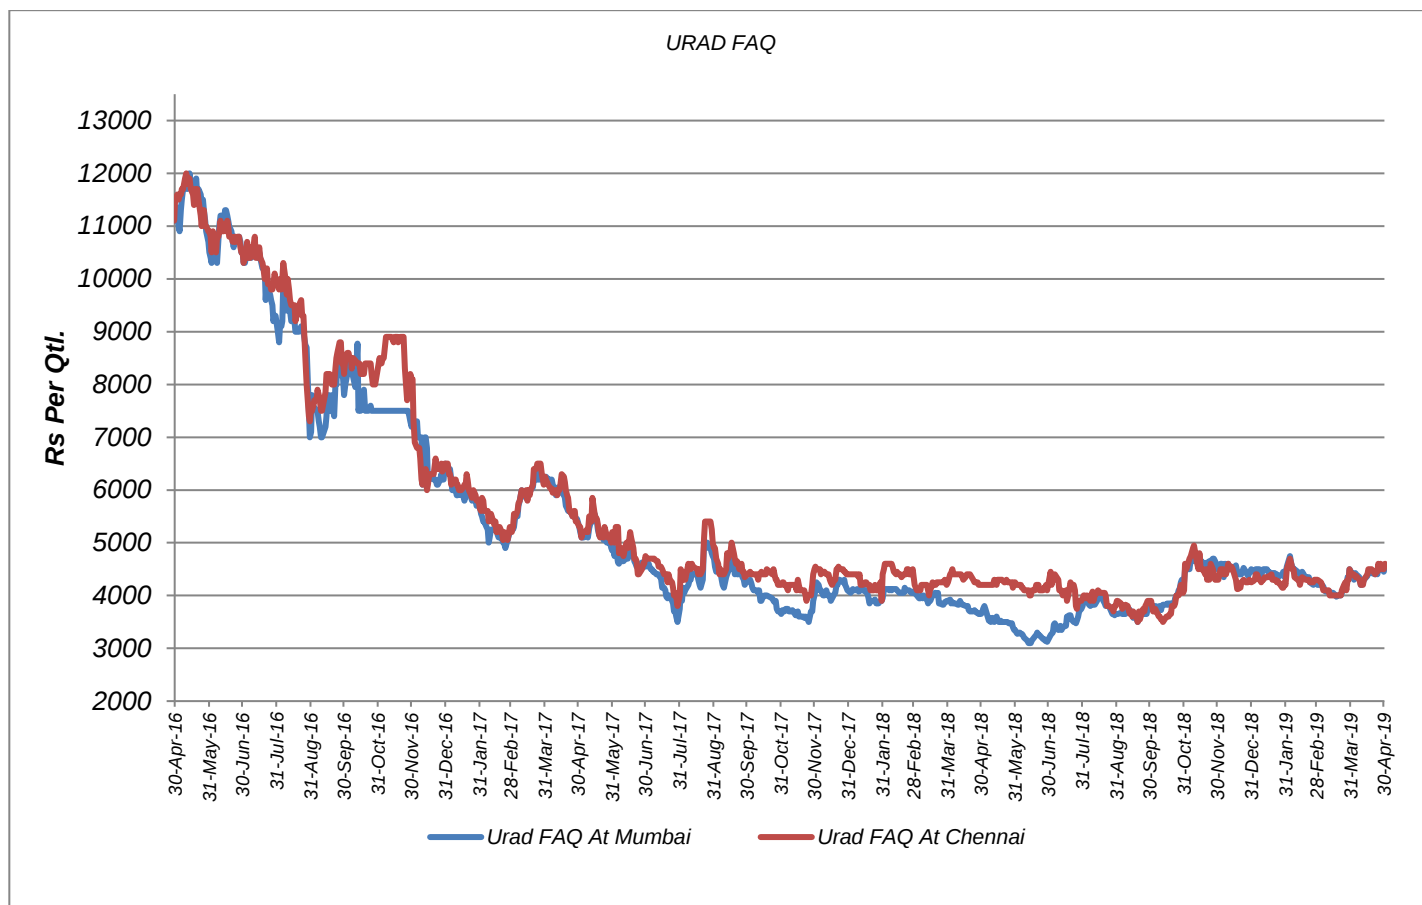

Market Recap:

Import restriction at 1.5 lakh tonne, starting from 1st April-2019 and lower crop size may help urad market to recover once again. In short to medium term, urad may trade up by Rs250 to 400 in coming weeks. Stockists have started holding stock as import flow would remain restricted. Burden of old crop too is decreasing and it may push urad price further up from current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private traders, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Urad may continue to trade at Rs4400-4750 per qtl in various markets in coming weeks. In Chennai market urad is being traded at Rs4400-4550 per qtl. Burma is offering FAQ urad at \$560 & SQ at \$670 per tonne. Buying at dip seems good at this point of time.

Price Dynamics:

In April, average prices in key markets including Mumbai/was up by 4.45 % percent to 4401 per qtl. In Chennai it is being traded at Rs 4450-4550. Prices may stay steady to slightly firm in May due to

- Procurement drive on MSP
- Lower rabi area
- Restricted import at 1.5 lakh MT for a whole year
- New big crop not before Sep
- No release of imported stock at port
- Higher quotes in Myanmar

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Market Outlook for May: Prices are likely to trade steady to slightly firm.

Fundamental Analysis and Outlook For Moong:

Market Recap:

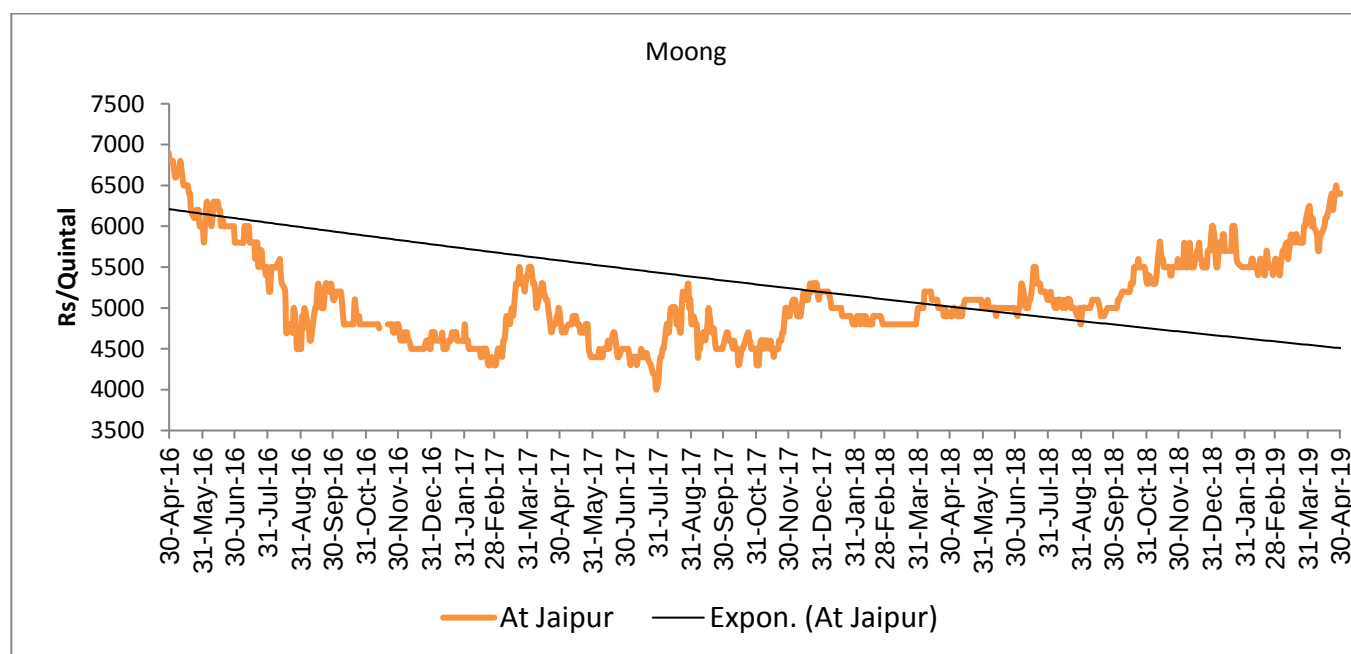

New crop of moong from UP and Bihar is expected to hit market not before May. So, cash moong market may move further up by Rs100-200, as old stock is decreasing and demand from mills have improved. Besides, import too is not possible, as there is no parity at current price. Moong in Jaipur market may touch 6400/6500 per qtl before arrival from UP. In the latest development, Nafed would start selling moong again in bulk volume and it may cap one way upward movement. Procurement too is on in restricted way from rabi crop. New crop from Nimar region has started hitting the market. After this crop from UP and Bihar is expected.

Price Dynamics:

New MY season for moong starts in Oct from Rajasthan and Maharashtra. This year poor crop size (40% lower) could not help market touch MSP, as Nafed continued to sell crop at lower price. In Jaipur market moong traded higher at Rs 6000 in March. It may move up to Rs 6400 in April. Right now demand for moong in central and north India is being fulfilled by Shekhavati-Jodhpur line. Supply from these lines may be affected as stock is decreasing now. Right now moong taken through tender is being traded at Rs5600-5700. Moong of Jodhpur line is being traded at Rs6000-6200. With increasing temperature demand for moong dal would increase and it may support price in coming weeks. Overall tone remains firm. Moong continue to trade in the range of Rs6100 to Rs6500 in Jaipur market. Myanmar is offering moong at \$710 per MT.

Market is expected to trade firm in May due to:

- Import restriction
- Lower stock in central pool
- Delay in new arrival for green urad
- Stock holding
- Improvement in demand

Seasonality Index depicts firm movement in the near term

Market Outlook for April: Steady to firm movement is expected in May with slight downward correction.
