- International
- Monthly Outlook

Supply & Demand**Pulses-Wise Summary**

- Chana
- Matar
- Masoor
- Tur
- Urad
- Moong

Appendix

1. Pulses Wise Technical Outlook For Month
2. Indian Pulses- Wise Import- Monthly Analysis
3. Inflation
4. Seasonality Index
5. Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
6. Pulses Snapshot
7. Sowing Progress
 - India
 - Australia
 - Canada
 - US

Domestic Market Fundamentals:

- **As per the latest update of agriculture ministry kharif pulses sowing is running behind by 49.6% to 67000 ha** against 133000 ha as on 7th June-2019. Actually, moisture stress and delayed monsoon rains have slowed down the kharif sowing activities throughout the country. Monsoon is expected to hit Kerala by 10th of June. With commencement of rains planting activities may find momentum. Planting of tur is running behind by 50% to only 5000 ha, Urad planting is lagging behind by 43.5% to 9000 ha, Moong planting is lagging behind by 74.5% to 14000. Planting of Kulthi is yet to begin.
- **In a big blow to monsoon 2019 El Nino indices have further strengthen this week and its probability is around 70% to 75 %** through June and 55 to 60 % through the rest of monsoon months. The onset of monsoon is unlikely to be powerful. So, it would continue to be stressful for farm community this year.
- **DGFT has allowed 6.5 lakh MT pulses import for millers. Millers can import 2 lakh MT tur, 1.5 lakh MT Urad, 1.5 lakh MT moong and 1.5 lakh MT pea till 31st March 2020.** Allotment for pea is still awaited. All importers have to submit a report regarding import quantity till 7th April-2020.
- **There is gossip in the market that some big groups have sold tur in forward months in large quantity.** So, tur market is expected to stay steady in June and once the pressure gets released, market may move up again. Besides, availability of tur at Mumbai and Chennai ports is decreasing fast and import from Myanmar in bulk quantity is unlikely due to lower crop size there. Besides, Quota for applicants will be declared on 10th & 11 June and quota allocation is expected by June end. Lower domestic crop, delayed beginning of planting and stockiest's holding may remain supportive to the market fundamentals. It is being traded at Rs 5900-6000 in Gulberga market. Tur may move up further by Rs 500 from current level but in July. However, Nafed still has 5.63 lakh MT old stock and 2.75 lakh MT new crop. Thus total stock comes to 8.38 lakh MT. It may help market to restrict upward momentum beyond a certain level. Govt.'s plan to rebuild pulses buffer stock of 16 lakh MT would also be a price limiting factor. Overall sentiment in tur market remains firm. In any unexpected spike, govt. has option to remove import quota, fixed at 2 lakh MT right now, plus 1.75 lakh MT.
- **Urad may move further up from current level as there is no crop in near future. Arrival of green urad** is expected in UP from next week. However, it is a small crop. It would be consumed locally in dhoya dal. Crop from Shivpuri and Katni line has been exhausted now. Supply from Kota and Chandausi line is tight and it may push up urad price once again. With fixed import quota of 1.5 lakh MT, urad import flow would be limited too while stock at port is decreasing. It may push up urad price by Rs 300-450 more from current level in coming weeks. In Mumbai market urad FAQ is being traded at Rs 4900-5000. SQ is being traded at Rs 5900-6000 per qtl. Delayed monsoon rain may disturb commencement of planting in southern Indian states. Agriwatch expects demand-supply gap to widen further.
- **Moong market traded lower due to new arrival and poor demand for dhoya dal. New moong in MP was traded** at Rs 6400-6500. Arrival was registered at 6 to 7 motors. Moong sourced from Jodhpur is in strong hands. As arrival pressure decreases, moong may trade up by Rs 200 from current level. Nafed still has 1.77 lakh MT in stock. Out of total 1.63 lakh MT is old stock while 14506 MT has been procured from summer crop. As procurement is on, stock would increase. New crop is coming from UP, MP and Bihar. So range bound movement might be seen in moong. New crop would hit market by August end. So any big jump is unlikely in cash moong market. It may continue to trade in the range of Rs 6200-7000, depending on market and quality of the crop. There is no parity for moong import as Myanmar is offering moong at \$830 per MT.
- Arrivals of chana in all major producing markets were seen limited amid weak futures helped market to decrease slowly. It moved down by Rs 100 to Rs 4575-4600 in Delhi market. Price of dal and besan too moved proportionally. Arrival got slowed down from Bikaner line as there is no parity at this level. However, buyers in Kanpur are active in M.P. So any major downward trend is unlikely despite ample stock in private as well as public hands. Total stock of chana with Nafed is 22.45 lakh MT. Out of total old stock share is 16.25 lakh MT while new share is 6.17 lakh MT. It would increase further as govt had allowed to buy till 6th June-2019. As stockiest are unwilling to sell, chana is bound to move up again. In June chana in Delhi market may trade in the range of Rs 4450-4650. At this level buyers are expected to be active again.
- **As per latest update, lower imports have led to increase in prices of lentil by Rs 50 per quintal** at ports. Lentil vessel is being quoted at Rs 4050-4150 per quintal and container is being quoted at Rs 4200-4250 per quintal. Furthermore, arrivals in domestic market is also low. Lentil stockiest are increasing their buying at a steady pace. All these factors are providing support to lentil market and as a result lentil prices have increased by Rs 100-150. Steady to firm sentiment may prevail in Lentil market in June.

International Market Update:

- Pakistan's import of pulses declined to \$432.546 million in July-April, down by 2.3 percent**, official figure says. Fall in pulses import now stands at \$10.19 million in July-May 2018-19 from \$442.736 million in July-April 2017-18, Pakistan Bureau of Statistics shows. In term of quantity, pulses import surged by 30 percent or 183, 889 metric tons to 801,843 metric tons in July-April 2018-19 from 617,954 metric tons in July-April 2017-18. As per the latest update by Pakistan Bureau of Statistics, pulses import in Pakistan increased by 30% to 801843 MT during July to April-2018-19 against 617954 MT in July- April -2017-18. In April -2019 Pakistan imported 76833 MT against 59386 MT in April-2018. Pakistan's import increased by 29.38 % in April-2019.
- Production of Chickpeas in Canada is expected to decrease by 58.19 % to 1.30 lakh MT** in 2019-20, against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. Even total supply is expected to decrease by 0.57% from 3.50 to 3.48 lakh MT due to higher expected export in 2019-20. Export has been pegged at 1 lakh tonne, up by 0.10 lakh MT from 2018-19. Carryout is likely to decrease from 1.95 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 500 to 530 per MT in 2019-20.
- Production of lentil in Canada is expected to increase by 0.38 % to 21 lakh MT in 2019-20**, against 20.92 lakh tonne in 2018-19. Yield for the year has been pegged slightly up by 5% to 1.47 MT per ha against 1.4 MT /ha last year. However, total supply is expected to decrease by 2.01 % from 29.80 to 29.20 lakh MT due to 4.92% lower production pegged for 2019-20. Export has been pegged 1 lakh MT higher at 18 lakh tonne in 2019-20. Carryout is likely to decline from 8.0 lakh Mt to 6.35 lakh MT in 2019-20. Stock to use ratio, is expected to decline from 37 to 28 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- Adverse weather condition during crop growth stage in Myanmar has affected Tur and urad crop**. Despite good area coverage this year, production is likely to decline by 15 to 20 percent. Lower crop in India this year and weak prospects in Myanmar may push tur market further up in May. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year. Myanmar is offering new tur at \$770 in forward deal basis Indian ports. Old crop is being offered at \$660 per MT.
- As per USDA, pre-sowing intention report, dry pea area is expected to increase by 3% to 8.81 lakh acres** this year. Area may increase in Idaho, Montana, South Dakota, and Washington from last year. However, it may decline in Nebraska and North Dakota.
- As per USDA report lentil area in US declined by 29 % from last year to 5.55 lakh acres in 2019**. Planted area is expected to decline in Montana and North Dakota while in Idaho and Washington it is expected to remain unchanged. If materialized, it will be the lowest area coverage since 2015.
- As per the latest USDA seeding intention, expected area coverage under chickpea in US may decline by 40% to 5.19 lakh acres**. Out of this, small chickpeas area may be at 1.37 lakh acres, large chickpea at 3.82 lakh acres. It would be the lowest since 2016.
- Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18**. Fava bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too, has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- As per statistics Canada land in pulses and specialty crops may decline in 2019-20 if farmers stick to their seeding intentions**. They intend to plant 8.82 million acres of pulses and special crops, down from 8.98 million last year and below the recent five-year average of 9.52 million acres. The only crops showing an increase over last year are peas, which could climb from 3.615 to 4.035 million acres.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak in June..

Pulses Supply & Demand:

Note: Agriwatch 1st Adv Estimate For 2019-20 for Urad ,Moong & Tur & final estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to increase by 1.3 % from 24.58 to 24.90 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 35.15 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout would decrease slightly from 8.75 to 6.95 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So, any unexpected spike is unlikely under prevailing condition.

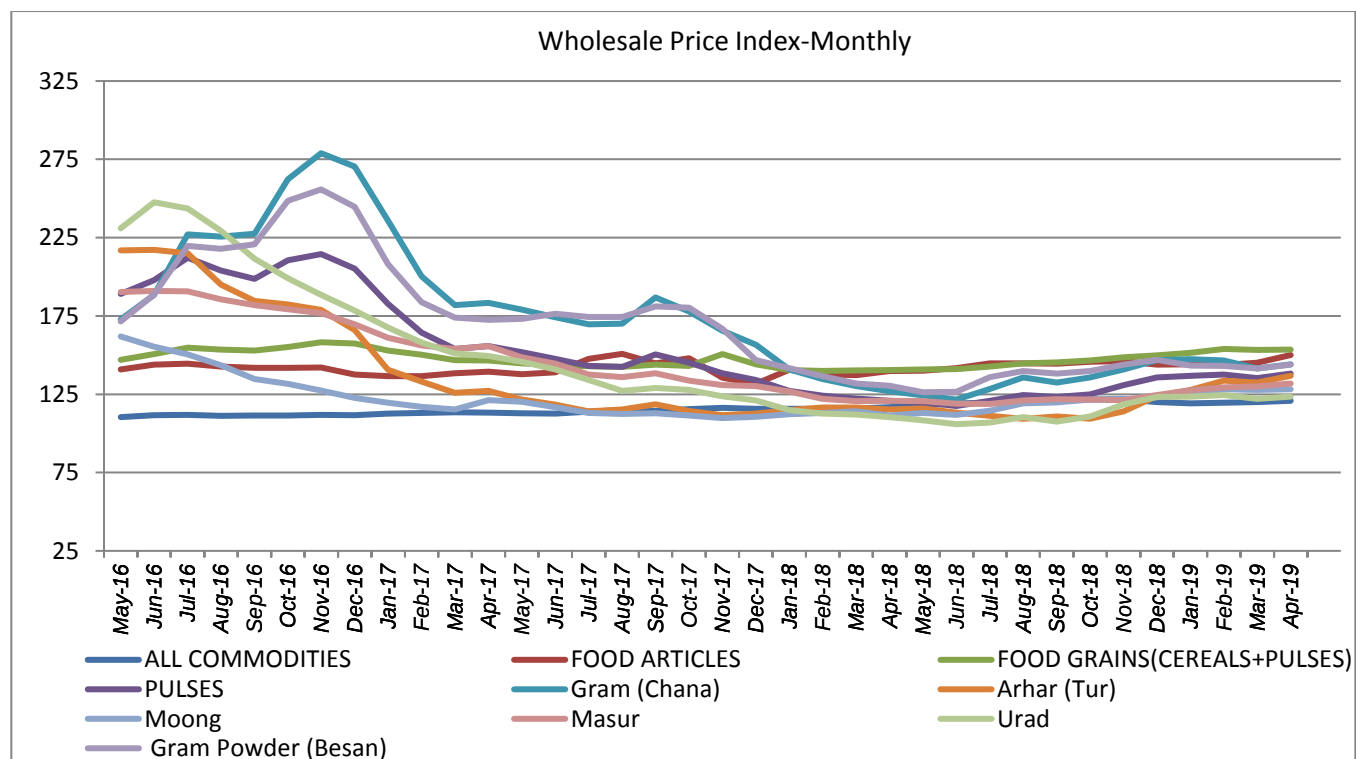

Moong: Moong production is likely to increase by 3.06 % from 20.26 to 20.88 lakh tonne in 2019-20. Import is expected to decline by 50 % to 0.75 lakh tonne in new season. Total supply is expected to decrease from 29.02 to 27.15 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would pull carryout from 5.52 to 3.95 lakh tonne. So, any major decline in moong price is unlikely in the new season.

Tur: Tur production is likely to increase by 15.84 % from 35.21 to 40.79 lakh tonne, in the new season (2019-20). Import is expected to decrease by 0.50 lakh tonne to 3 lakh tonne due to restrictive import policy. Total supply would increase slightly from 46.78 to 49.07 lakh tonne due to expectation of higher production in new season. Export may increase from 0.5 to 0.70 lakh tonne due to likely export incentive. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.7 lakh tonne. Despite higher consumption, carry out would increase to 6.37 lakh tonne for next year. Market is expected to find balance now and price would improve further in the medium term.

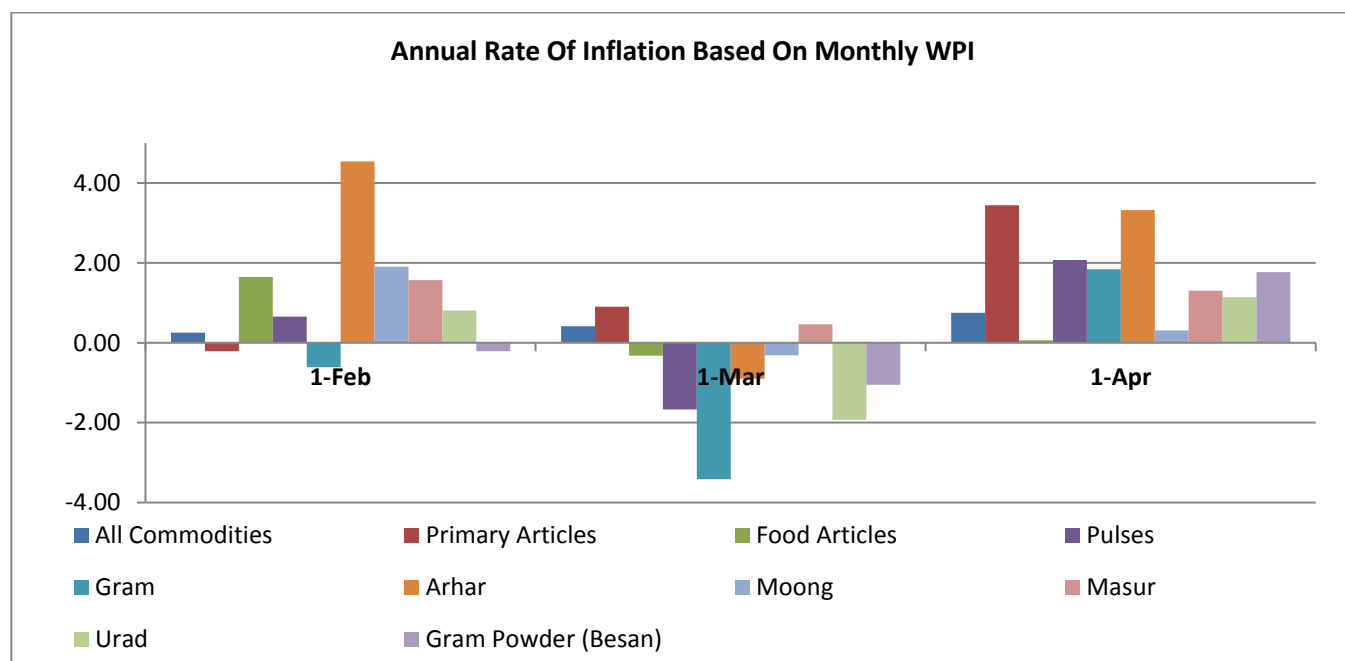

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5 lakh tonne in new season. Lower production would drag down total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged almost same, at 18.6 tonne in the new season. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –April -2019:

Pulses WPI: Pulses WPI increased by 2.8 point from 135.3 in Mar to 138.1 in Apr-2019

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Chana cash market continued to trade under pressure and is unlikely to move up in the month of June despite restricted arrivals in markets and slower release by Nafed. Even futures too traded lower. As per markets source chana may trade range bound in June. There is lot of stock in central pool and stock in cold is said to be double from last year. Demand remains restricted as mills are buying only to fulfil their immediate needs. Chana market may decrease further by Rs 100. At this level stake holders should buy as it may move up again At this price, stake holders should buy. Quality of chana stored out in Nafed godowns is affected and it may push up quality chana price up. There is not much stock in global market too and higher import duty would not allow import in bulk quantity. It may help market to recover in span of time. Stockiest should wait till mid-July.

All India average price for Chana decreased by 3.48 percent from Rs 4443 (April) to 4373 per qtl.in May-2019. Australian Chana (imported) price too decreased by 3.82 percent from Rs 4443 to Rs 4273 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics:

.Prices are likely to stay steady to slightly weak in June due to:

- Weak demand from bulk users
- Higher old stock and weak futures
- Continuous auction despite lower crop size (87/88 lakh tonne)
- Cold stock doubled from last year
- Stockiest slower pace of buying in Mah, MP & Rajasthan.

Seasonality Index hints that Chana (gram) is likely to notice steady to weak movement in the Spot market in June-2019.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

Strategy: Buy on Dip

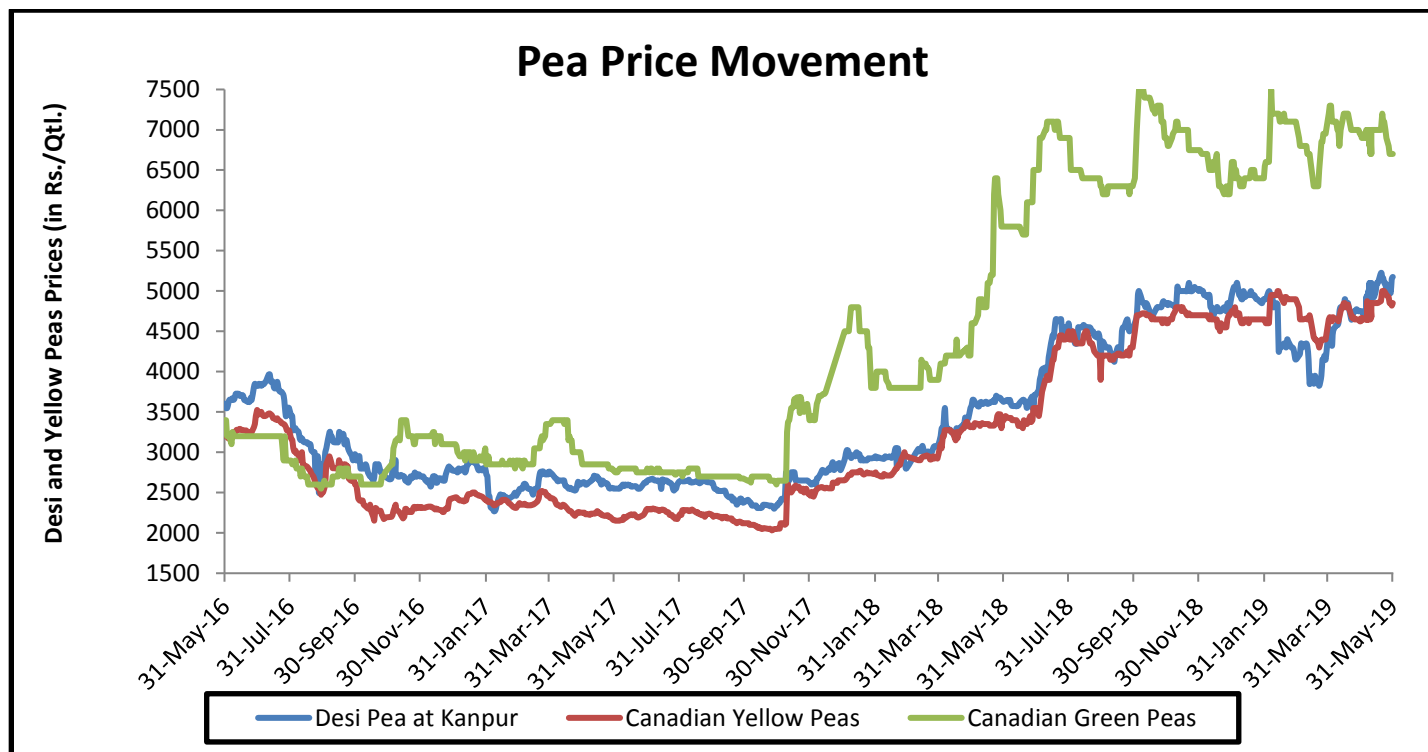

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	July	4445	4384	4534	4650	4750
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	July	Buy on dip	4475	4575	4650	4430

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Market Recap:

Pea market traded weak and would continue to trade weak due to poor demand at higher level despite import quota restriction at 1.5 lakh tonne for the whole year. However, govt. may increase it to 2 lakh MT in coming months despite decision still on hold.. Earlier market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 5000-5050, while in Kanpur market it is being traded at Rs 4900-4950 per qtl. As chana price has started decreasing, pea too would trade under pressure. However, arrival pressure from new crop is decreasing now. As, there would be shortage of imported crop, price would bound to move up taking clue from other pulses in span of time. Stake holders should buy on downward correction. Restriction on pea import at 1.5 lakh tonne till April-2020 and lower availability of imported stock may support pea market once again in the second half of the year. Improvement is expected June onward. If chana continues to trade weak, pressure would continue on pea price too. Weak trend may prevail in June.

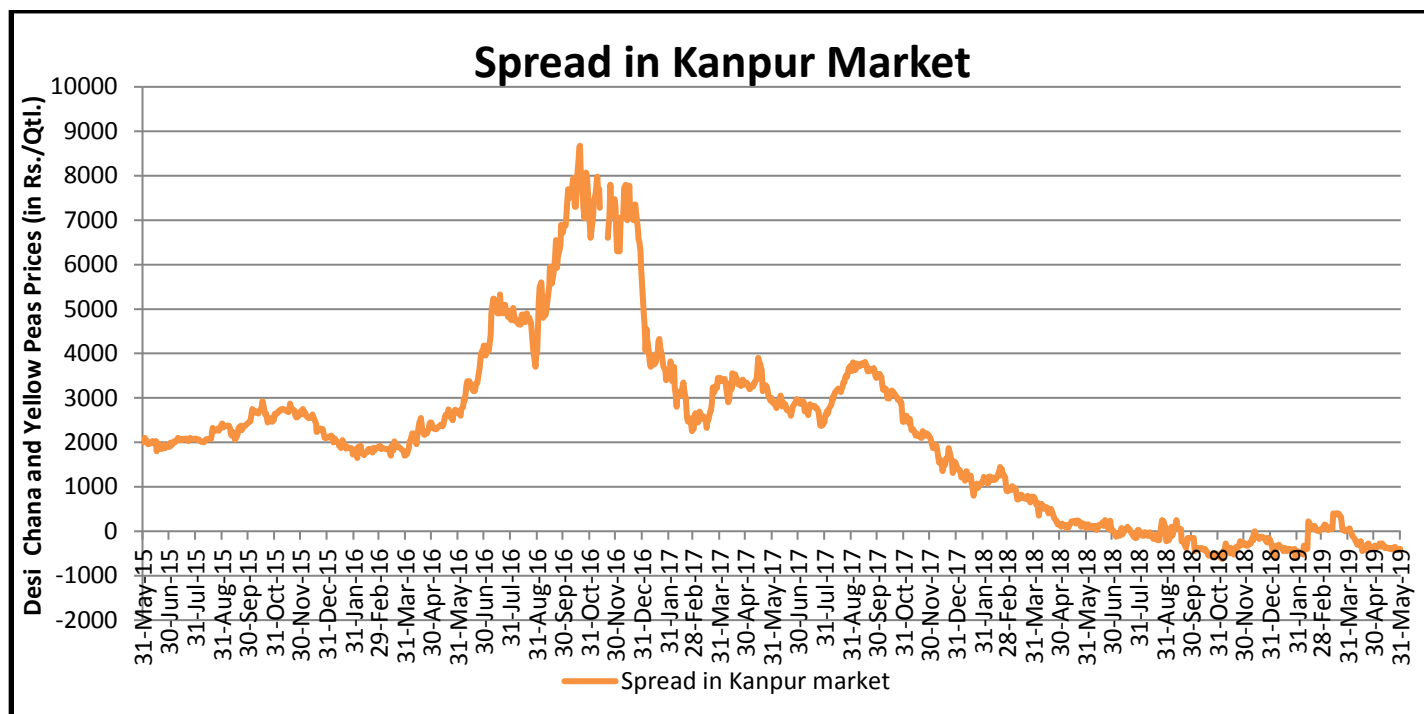

Price Dynamics:

In May-2019 market Kanpur traded smartly up by 7 % due to restriction imposed on quantity at 1.5 lakh MT for the whole year and short supply at ports. It moved up from Rs 4661 to Rs 4986. Even Canadian pea moved up by 2.87 % to 4816. However, green pea market market decreased by 2.12% to 6920. Overall tone remains weak taking clue from cash chana market.

Pea market is expected to trade steady to slightly weak in June due to:-

- Weak demand for chana despite lower crop size this year
- Fixed import quota at 1.5 lakh MT and lower use in mixing for besan.
- Weak demand for pea dal due to higher price for pea dal
- Stockists holding in producing region and chana available at lower price.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone despite improvement in chana price. However, gap has increased from Rs350 to Rs 400 Spread is expected to remain in the negative zone in June too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks.

Seasonality Index depicts that pea prices are likely to notice weak movement in June-2019.

Market Outlook For June-Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

Fundamental Analysis and Outlook:

Market Recap:

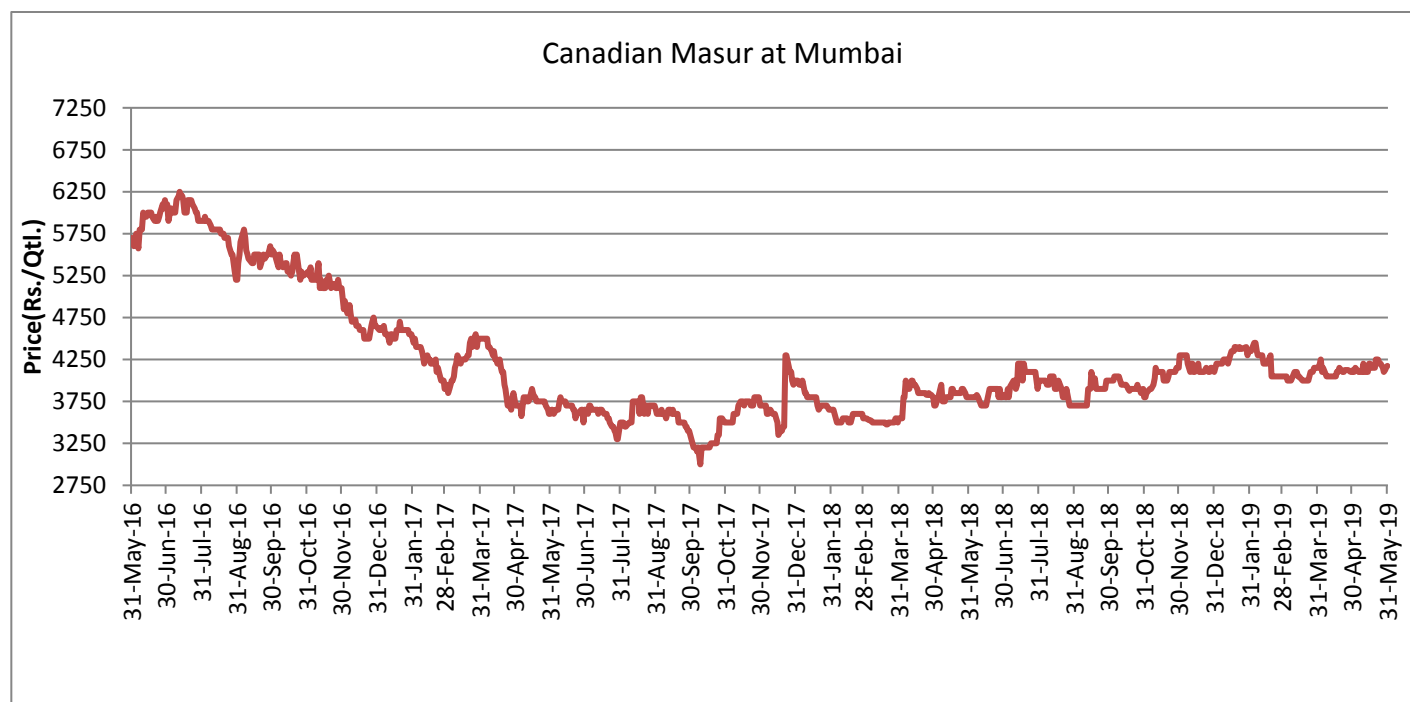

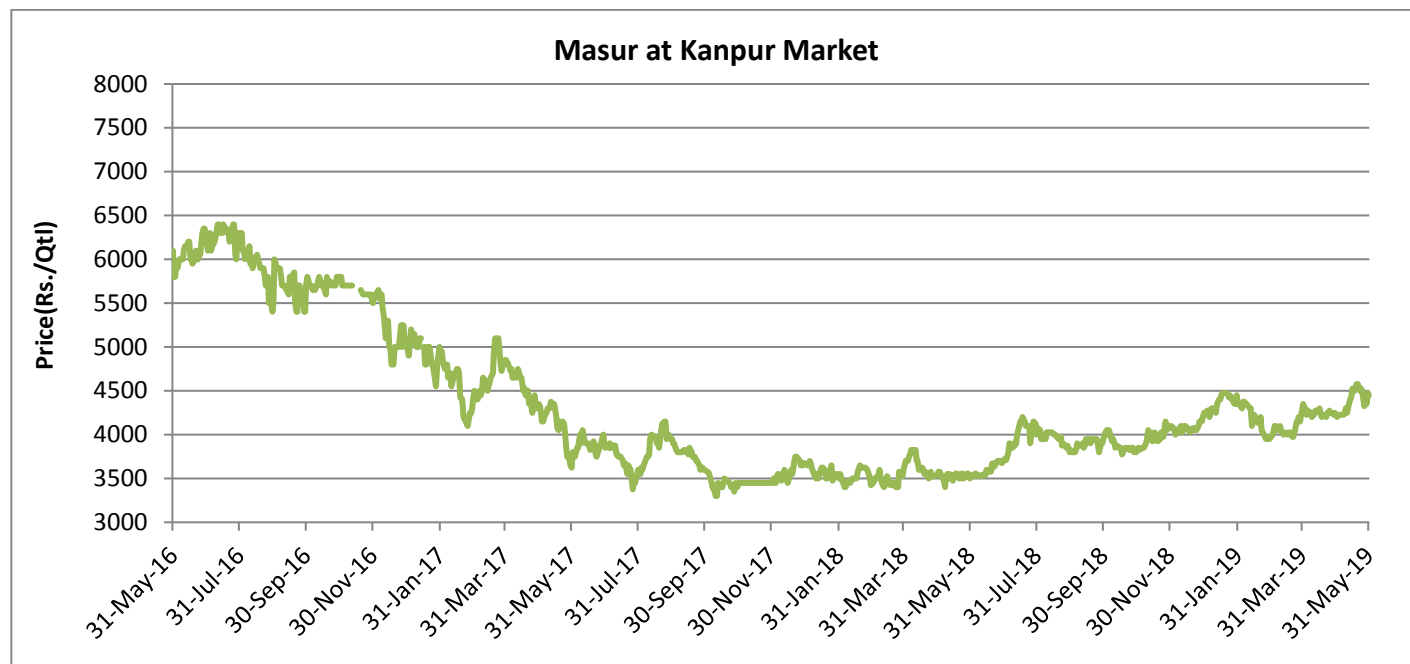

As per latest market updates stock of masur have started declining at ports and offtake by millers in consuming regions has increased. Stockiest are unwilling to sell at current price as they are aware of firm market in coming months. Besides, other pulses prices have improved and it has helped cash market to recover. As demand for masur dalis expected to increase in coming months, price is expected to move up. Lentil vessel is being quoted at Rs 4150-4250 per quintal and container is being quoted at Rs 4250-4350 per quintal. Slower release by Nafed too would help market to gain. However, higher stock in central pool may cap upward momentum to a certain extent. As prices of other pulses have started improving, lentil too may trade up again. Improvement in demand from Nepal and B'desh, may push lentil price up. Cash market may trade in the range of Rs4250-4450 in June.

Price Dynamics:

In May-2019, average price in key market Kanpur was up by 3.05 % to Rs 4383 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in June.

Firmness is expected due to:

- Improved demand & restricted release from Nafed godowns
- Lower availability of imported masur
- Lower crop size and domestic stock
- Firmness in other pulses market specially tur and urad
- Slower import pace

Seasonality Index depicts steady to slightly firm movement in June-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Despite downward correction in tur market firmness is expected to start once again as impact of selling in forward months by punters is likely to end soon. Despite availability of stock in central pool and in private hands, supply side is started contracting and it may push up tur price once again. Fear of lower kharif planting too would impact tur price in coming months and may move up further. Import has been restricted at 2lakh MT while govt would import 1.75 lakh MT. Besides, there is a scope of more import through G2G basis if prices moves beyond 6000 level. In Gulberga market tur is being traded at Rs5950-6000. overall tone remains firm. It may decrease Rs 100 more. At this level stockiest should buy again. Agriwatch estimate for tur production is 36.21 lakh tonne for the Market is awaiting demand from bulk buyers.. Myanmar is offering new tur at \$765-770 per MT in forward deal. Old is being offered at \$670per MT.

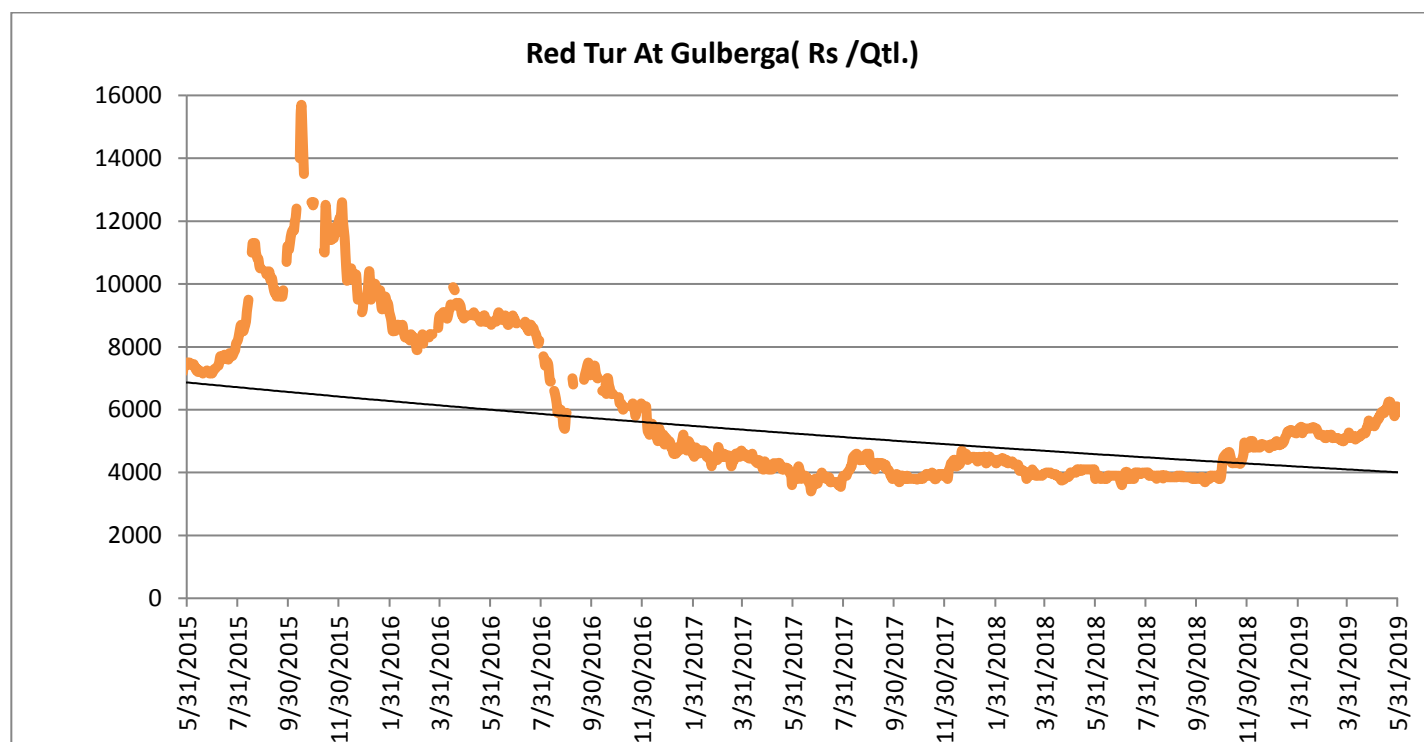

Market Recap:

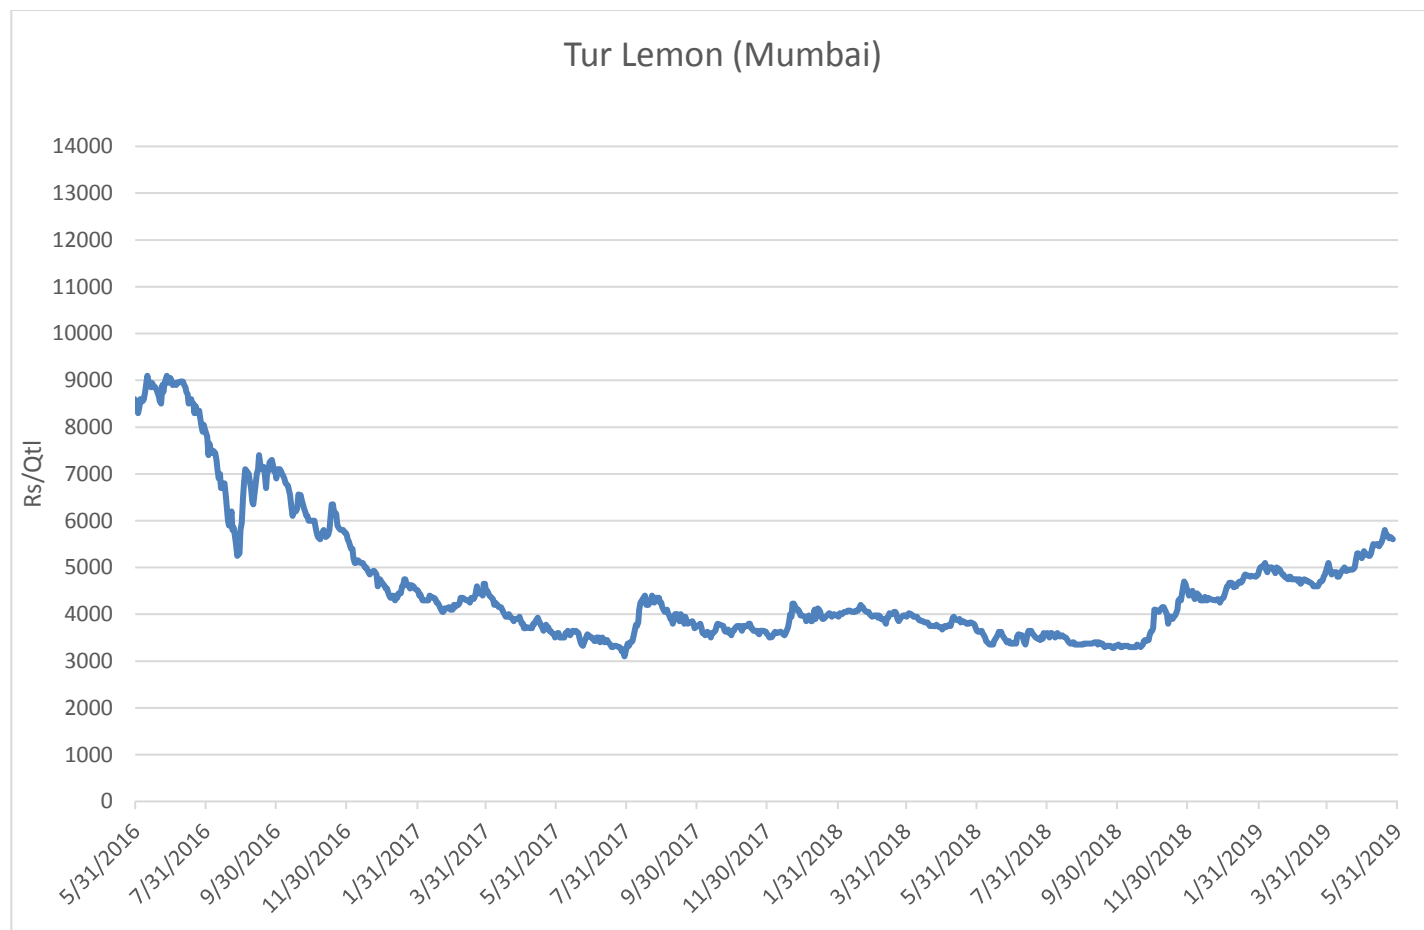

Tur market is expected to stay steady to slightly weak on the back of lower demand on higher level despite decreasing arrival and import cap at 2lakh MT for the whole year. Restricted selling by stockiest, fear of lower area due to moisture stress in the field would remain supportive for cash tur market. So buying at correction seems riskless.

Price Dynamics:

In May-2019, average price in Gulberga market was up by 12.19 % from 5273 to 5916 per qtl. due to lower arrival and buying at MSP supported by lower crop size. June onward market is likely to increase slightly due to

- Decreasing arrival
- Lower stock of old crop
- Import cap at 2 lakh MT
- Fear of lower crop due to lower rainfall in the beginning of monsoon and
- Increasing holding by private trades

Seasonality Index-depicts steady to slightly firm movement.

Market Outlook for June:

Fundamental remains supportive for Tur cash market in the near to medium term.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

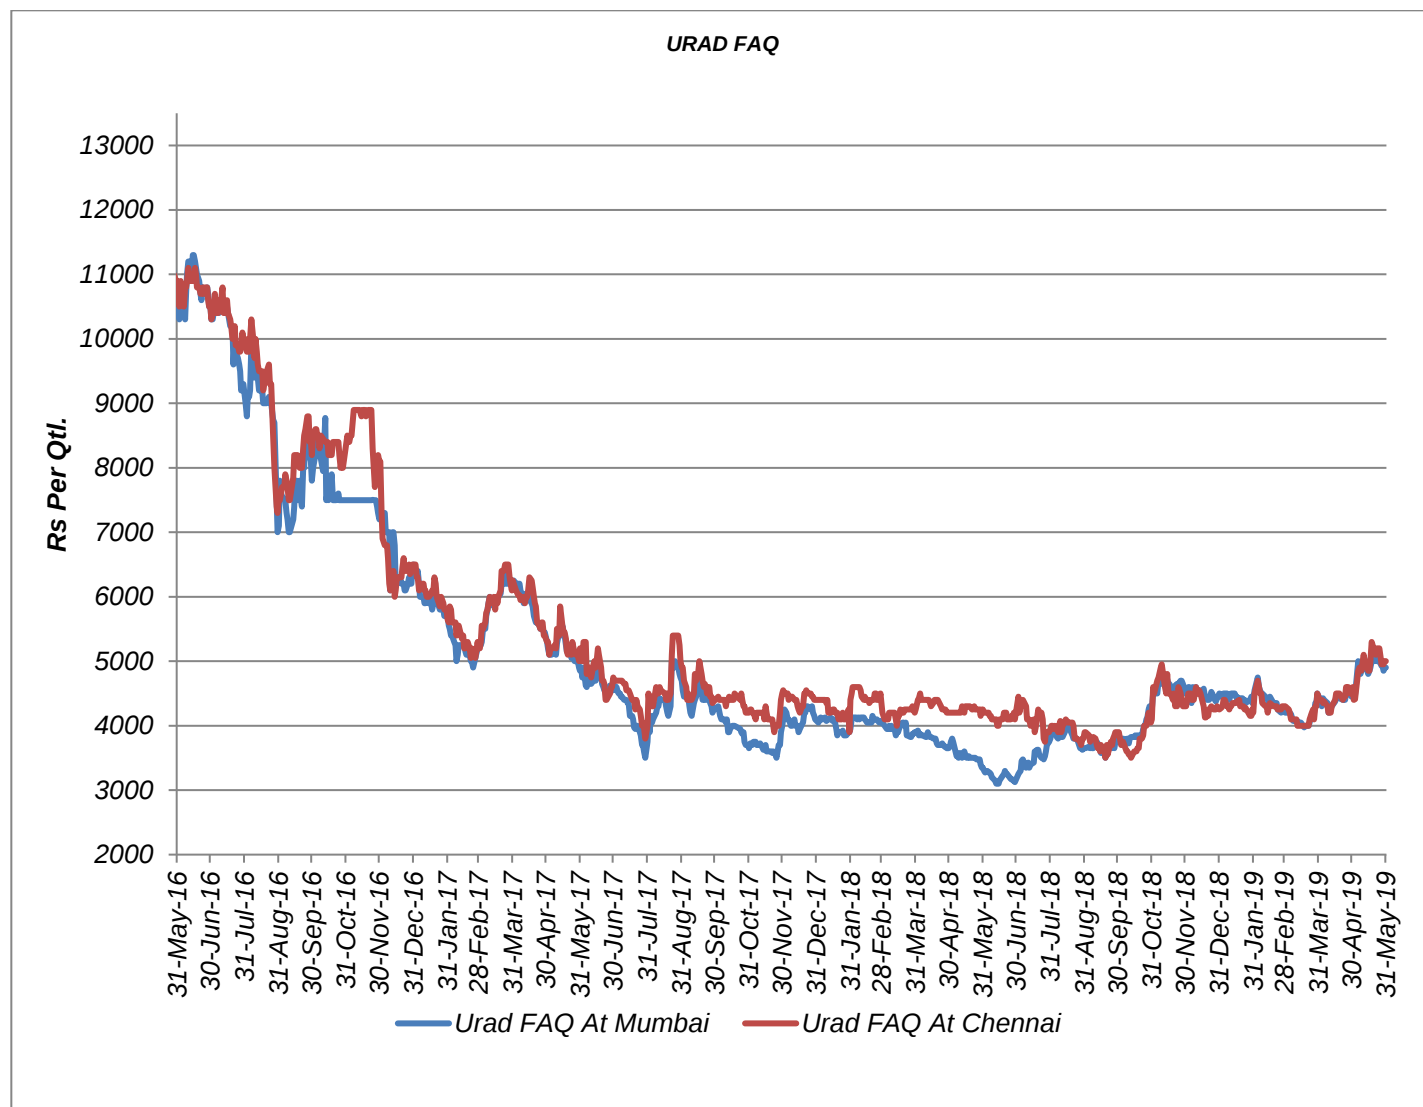

Market Recap:

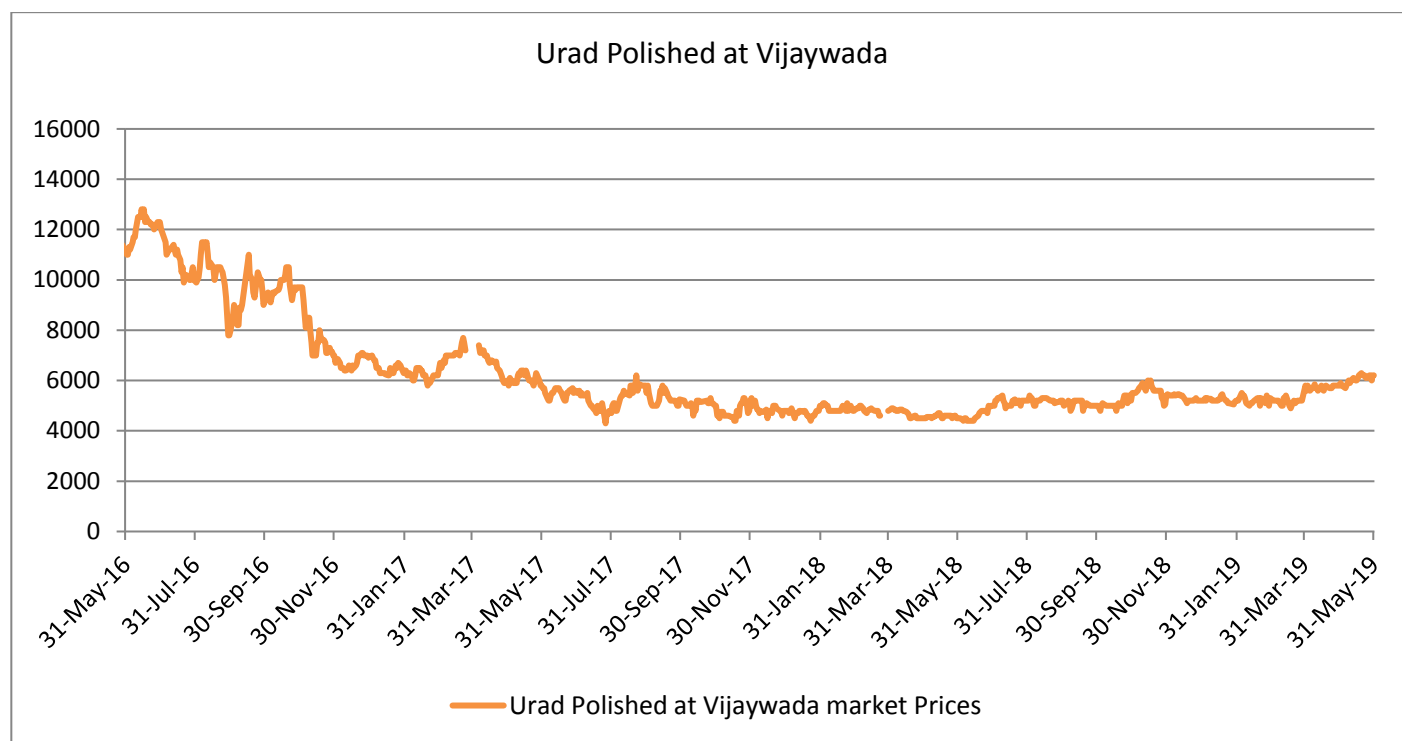

Despite availability of urad stock prices of urad is bound to go up due to higher demand for dal and stockiest unwillingness to sell at current prevailing price. Import would remain restricted while new crop is 2-3 months away. So, prices are expected to move up once again. If kharif planting remains restricted, it would support urad price further. Import restriction at 1.5 lakh tonne, starting from 1st April-2019 to March-2020 and lower crop size may help urad market to recover. In the short to medium term, urad may trade up by Rs250 to 400 in coming weeks. Stockiest have started holding stock as import flow would remain restricted. Burden of old crop too is decreasing, and it may push urad price further up from current level. Urad may continue to trade at Rs4800-5000 per qtl in various markets in coming weeks. In Chennai market urad is being traded at Rs 4900-5000 per qtl. Buying at dip seems good at this point of time.

Price Dynamics:

In May, average prices in key markets including Mumbai/was up by 11.67 % percent to 4918 per qtl. In Chennai it is being traded at Rs 5000-5050. Prices may stay steady to slightly firm in June due to

- Procurement drive on MSP
- Growing fear of lower kharif area
- Restricted import at 1.5 lakh MT for a whole year
- New big crop not before Sep
- No release of imported stock at port
- Higher quotes in Myanmar

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Market Outlook for June : Prices are likely to trade steady to slightly firm.

Fundamental Analysis and Outlook For Moong:

Market Recap:

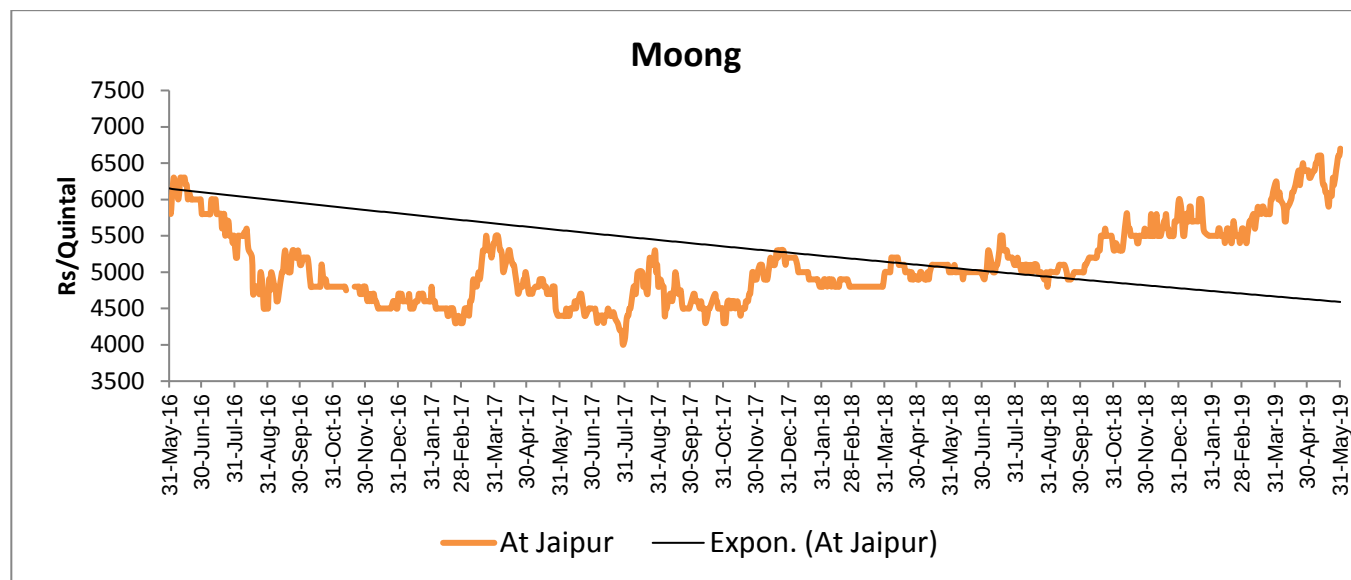

Moong market traded lower due to new arrival and poor demand for dhoya dal. New moong in MP was traded at Rs 6300-6400. Arrival was registered at 6 to 7 motors. Moong sourced from Jodhpur is in strong hands. As arrival pressure decreases, moong may trade up by Rs 300 from current level again.

Price Dynamics:

Pressure was seen on cash moong market with the commencement of new arrival. However, lower stock for quality crop and good demand at current level would not allow moong market to decrease beyond a certain level. Arrival from Summer crop in Bihar, MP and UP would start declining from mid-June. It would help market to improve once again. Once the pressure from summer crop decreases, moong would trade firm again. It is being traded at Rs 6500-6900 in Delhi market

Market is expected to trade firm in June onward due to:

- Import restriction
- Lower stock in central pool
- Decreasing pace of arrival
- Stock holding
- Improvement in demand

Seasonality Index depicts firm movement in the near term

Market Outlook for May: Steady to weak movement is expected in June..
