- Inflation
- Seasonality Index
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- Pulses Snapshot
- Sowing Progress
- India
- Australia
- Canada
- US

Domestic Market Fundamentals:

- **DGFT has removed the condition of adv. authorization for pulses import. This means now importers** need not to have adv. authorization letter from DGFT for pulses import. DGFT has already increased tur import quota from 2 lakh MT to 4 lakh MT. Importers have to import 2 lakh MT before Oct. It has already impacted tur price in domestic market.
- **June ended with 30 to 32 % lower rainfall during monsoon season and it affected overall pulses sowing area** by 61.36% to 3.42 lakh ha as on 28.06.2019. It was 8.85 lakh ha last year till corresponding date. However, monsoon is back again and it has started covering more states. Sowing activities are likely to improve with recent rains in growing belts. If it continues,
- farmers would cover their lower acreage in coming weeks. Major problem surfaced with moong sowing, as main sowing time is about to come to an end and its area may decrease. Other pulses like tur, urad has 20 to 30 days more time for planting.
- **In a latest development, Govt. has increased MSP of pulses for kharif season 2019-20. Increase is considered** marginal. Kharif pulses include tur, moong and urad. For Arhar, the increase was 2.2 per cent (RS125 per qtl.) from Rs 5,675 a quintal to Rs 5,800 per quintal. The MSP of moong was increased by 1.07 per cent (Rs 75 per qtl) from Rs 6,975 to Rs 7,050 a quintal while that of urad was increased by 1.78 per cent (Rs100 per qtl) from Rs 5,600 to Rs 5,700 a quintal.
- **The govt.'s main procurement agency Nafed, still has over 4 million tonne pulses stock, it remains to be** seen how much quantity is procured in on going kharif season under MSP oppression. If prices of pulses drop further, govt. may procure pulses under PM-ASHAA program.. However, market participants are not sure about quantity. In the 2018-19 rabi procurement season, the government's purchase under PM-ASHAA, was less than 10 per cent of the total production. If govt. infuses much fund for this scheme, procurement quantity may increase. However, pressure to release old stock would also increase. It would continue to affect pulses price in local market.
- **Tur market would continue to trade range bound despite lower production this year and lower availability** in global market. Tur import quota has been increased from 2 to 4 lakh MT for private trades, while additional 1.75 lakh MT would be imported from G2G basis. It would ease supply side in domestic market. Besides, if prices continue to move up beyond Rs 6000 level, govt. would start selling additional 2 lakh MT from buffer stock. buffer stock of around 5 to 6 lakh MT tur is still available. So, Agriwatch expects market to trade in the range of Rs 5800-6200 in July. It may move further up if rainfall in Jul and Aug decreases below 20% of long-term average. Right now, tur is being traded at Rs 5750-5850 in Gulberga market, near at MSP.
-
- **Chana cash market did not behave as per normal expectation as traded weak in June and there is no hope for any major** recovery in July too. Nafed has ample stock(over 2 MMT), old and new combined, and it would continue to sell through auction in coming months as it has to vacate storage for new kharif crop, expected from August end. Besides, in monsoon season demand for chana and its dal decreases, as availability of green vegetables and mango increases. Apart from this, farmers and traders still have chana stock which is double that of last year. So, any major recovery in Chana market is unlikely in July. Even futures is indicating downward trend. Chana in July, may trade in the range of Rs 4100-4400 in Delhi market. July onward market may improve to a certain extent due to expected festive demand for Chana products. Higher availability would continue to cap uptrend in chana market.
- **As there is no parity for moong import and there is a shortage of quality crop, moong market is likely to** recover once again. Govt has increased MSP for moong from Rs6975 to Rs 7050 and it would prefer to buy higher quantity of moong under PM Ashaa programme this year. Besides, kharif area is likely to decrease by 15 to 20 % as sowing time is about to end in many states. No import parity, lower stock availability in central pool and stockiest unwillingness to release stock at current price, remain supportive to moong market fundamental in coming weeks. Moong in Jaipur market would continue to trade in the range of Rs6000-6500 in July. It may move further up in coming months.
- **Urad market is likely to trade under pressure as sale from Nafed godowns continues. There is still** ample stock in central pool. Govt has increased MSP for urad from Rs5600 to Rs 5700. However, it would not have much impact on price, in the short term. Higher import and availability of imported stock would remain price affecting factors for urad in July, despite lower area coverage so far. Buyers have restricted buying due to uncertain outlook in cash market. Carryout for this season too is higher. So, Urad would continue to trade in the range of Rs 4500-4800 in July. Some improvement might be seen in Aug end when procurement starts.
- **Normal demand and continuous imports of lentil kept market steady to slightly weak during past days. Although** lentil crop was weak this year, stock position in domestic market and imports are keeping prices under pressure. Lentil container and

vessel at port are being quoted at Rs 4050-4100 per quintal and Rs 3950-4000 per quintal respectively. Lentil mill quality at Kanpur is moving in range of Rs 4325-4400 per quintal.

- **As per trade Sources, India has exported 1759.89 MT of Lentil at an average FoB of \$826.86 per tonne** during the month of May-2019. India has exported around 10627.46 tonnes of lentils during April'18-March'19. Vessel (Ocean Makmur) with around 37114.00 tonnes of lentils has arrived at Mundra port. So availability is likely to increase.

International Market Update:

- **Lentil export from Canada posted smart gain in the month of May against April-2019.** Canada had exported 136,393 MT lentil in April while the figure increased to 181,848 MT in May, higher by 335 from April-2019. Total export during this MY was registered at 164,556 MT against 127,603 MT last year till May. Pakistan emerged as the biggest buyers in May, buying 43,007 MT, followed by India, buying 40,134 MT. Even Turkey purchased 14,651 MT in May-2019.
- **Import flow from overseas market remains at lower ebb due to restriction on quantity** and excess stock with Nafed. However, lentil, tur and pea import may increase in the third quarter of the year.
- **Dry pea area is expected to increase by 20% in US to 10.3 lakh acres in 2019** as per estimate by USDA. Harvested area too is up by 20% from 2018 to 9.72 lakh acres. Planted area is up in all states except Nebraska and South Dakota. In Montana, as of June 23, blooming reached 24%, ahead of last year's 21% but well behind the 5-year average of 53%. As of June 23, blooming reached 15% in North Dakota, well behind both last year and the 5-year average.
- **Pea Export from Lithuania in April-2019 declined sharply in comparison to previous month (March).** It declined from 28,592 MT (March) to 22,097 MT in April-2019. This MY total export was registered at 94,984 MT, down by 26 % from last year till corresponding months. France bought 13,950 MT, followed by Germany (2,281 MT) & Latvia (2,260 MT)
- **Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha in 2019-20.** The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year, due to higher area coverage. Despite higher production, supply side would increase marginally as carryout is lower. Demand from China and B'desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.
- **Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20 due to higher area coverage** in Montana. Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.
- **US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres** from the previous year. This is largely due to an expected fall in area in Idaho, North Dakota and Washington. Assuming normal yields. Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for US is EU, Pakistan and Canada.
- **Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20 due to the sharp decline** in farm gate lentil prices, in the second half of the 2018-19 crop year. Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout, supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase in 2019-20.
- **Lentil Production in US is expected to decline by 29% to 0.55 million acres in 2019-20.** The main reason behind this, is lower area coverage in Montana and North Dakota. Production of lentil is expected to decline to 0.3 MMT in 2019-20, sharply lower from 2018-19. The main US export markets for lentils are EU, Canada, India and Mexico.
- **Chickpeas export from Australia increased sharply by over 90% to 43,962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So Buyers are in no hurry to buy.

Pulses Supply & Demand:

Note: Agriwatch 1stAdv Estimate For 2019-20 for Urad ,Moong & Tur & final estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to increase by 1.3 % from 24.58 to 24.90 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 35.15 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout would decrease slightly from 8.75 to 6.95 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So, any unexpected spike is unlikely under prevailing condition.

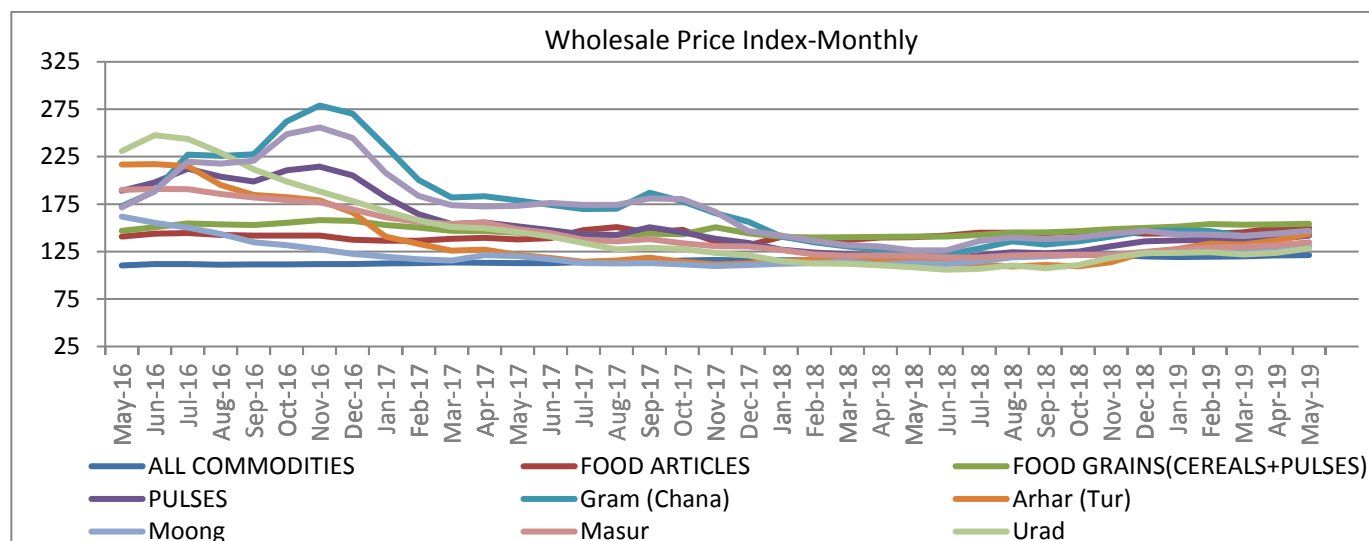

Moong: Moong production is likely to increase by 3.06 % from 20.26 to 20.88 lakh tonne in 2019-20. Import is expected to decline by 50 % to at 0.75 lakh tonne in new season. Total supply is expected to decrease from 29.02 to 27.15 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would pull carryout from 5.52 to 3.95 lakh tonne. So, any major decline in moong price is unlikely in the new season.

Tur: Tur production is likely to increase by 15.84 % from 35.21 to 40.79 lakh tonne, in the new season (2019-20). Import is expected to decrease by 0.50 lakh tonne to 3 lakh tonne due to restrictive import policy. Total supply would increase slightly from 46.78 to 49.07 lakh tonne due to expectation of higher production in new season. Export may increase from 0.5 to 0.70 lakh tonne due to likely export incentive. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.7 lakh tonne. Despite higher consumption, carry out would increase to 6.37 lakh tonne for next year. Market is expected to find balance now and price would improve further in the medium term.

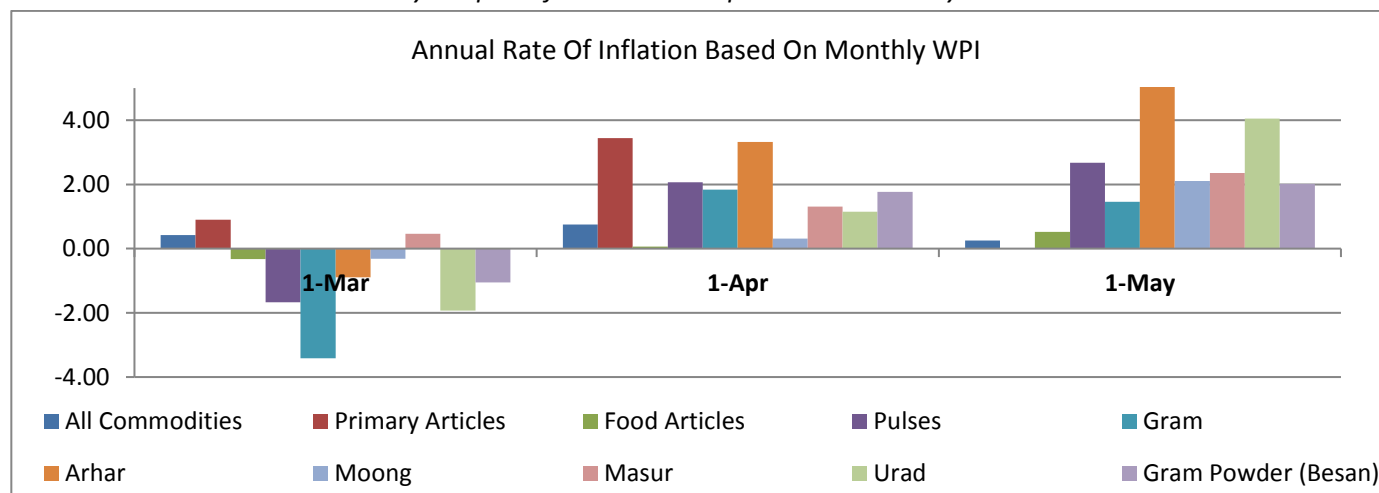

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5 lakh tonne in new season. Lower production would drag down total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged almost same, at 18.6 tonne in the new season. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –May -2019:

Pulses WPI: Pulses WPI increased by 3.7 point from 138.1 in April to 141.8 in May-2019

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

There is no respite for chana and it continued to reel under pressure against all expectation. Higher stock in central pool, Nafed willingness to sell it continuously through auction, as kharif procurement drive is hardly two and half months away from now, weak demand and bearish futures remain price affecting facts for chana cash market. There is lot of stock in central pool (over two MMT) and stock in cold too, is said to be double from last year. Demand remains restricted as mills are buying only to fulfil their immediate needs. Chana market may decrease further by Rs 100-150. At this level stake holders should buy as it may move up again by Rs 200. Quality of chana stored out in Nafed godowns, is affected and it may push up quality chana price up but not before Aug-Sep. Festive season has begun and demand for chana products may improve. However, any major spike in Chana market is unlikely. Stockiest should continue to release stock at every rise of Rs 100.

All India average price for Chana decreased by 2.81 percent from Rs 4531 (May) to 4403 per qtl.in June-2019. Australian Chana (imported) price too decreased by 1.12 percent from Rs 4443 to Rs 4393 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics: Prices are likely to stay steady to slightly weak in July due to:

- Nafed willing to sell through auction at regular intervals
- Weak demand from bulk users/mills
- Higher stock in central pool/ and in private/farmers hands
- Weak futures and
- Govt's strategy to regulate market, keeping market well supplied
- Private stockiest decreasing retaining capacity due to liquidity crunch

Seasonality Index hints that Chana (gram) is likely to notice steady to firm movement in the Spot market in July-2019.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

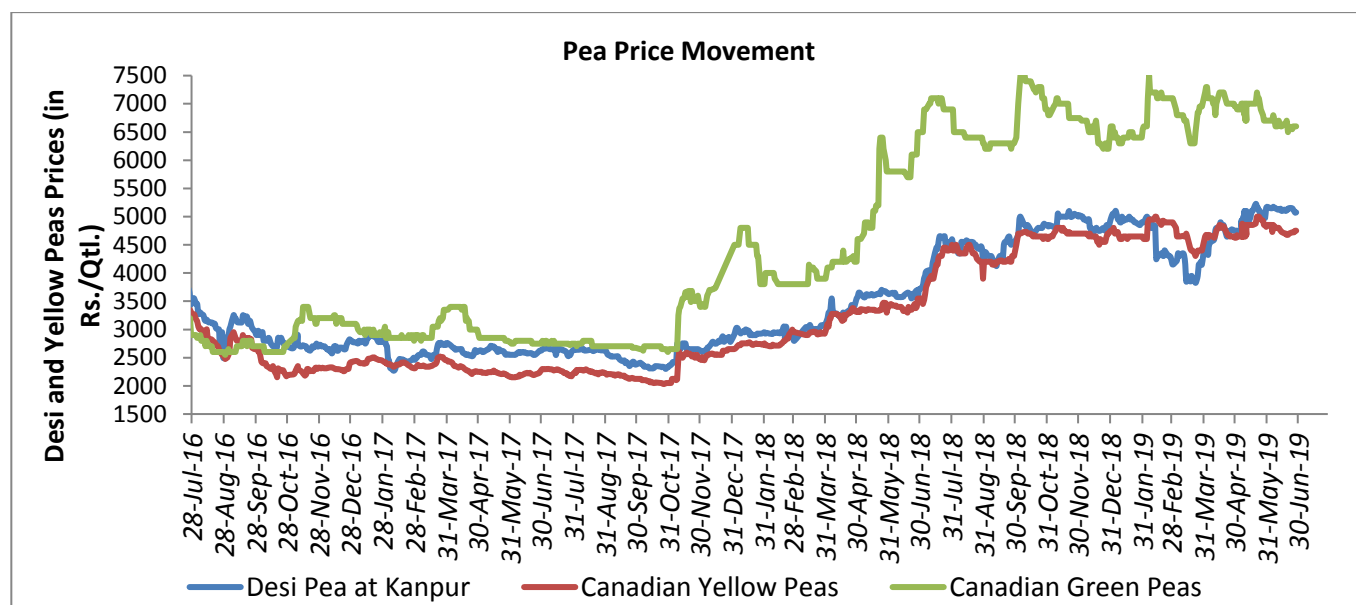

Strategy: Buy on Dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Aug	4214	4174	4225	4440	4509
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Aug	Buy on dip	4200	4350	4400	4110

Field Pea (Matar/Dry Pea): Fundamental Analysis and Outlook:

Market Recap:

Pea market continued to trade weak and pressure is likely to continue due to weak chana market. Prices had improved in the middle of June but could not sustain at higher level due to bearish tone in chana despite lower stock at port. Import remains restricted for consumption grade pea at 1.5 lakh MT. It may be increased to 2 lakh MT in coming months. In a new development, govt. has allowed pea import for seed purpose. It would not impact price much if used for same purpose. Pea in Mumbai market is being traded at Rs. 4700-4750, while in Kanpur market it is being traded at Rs 5000-5050 per qtl. As chana price has started decreasing, pea too would trade under pressure. Arrival in local mandis has decreased. As, there would be shortage of imported crop, price would bound to move up taking clue from other pulses in span of time. Stake holders should buy on downward correction. Restriction on pea import at 1.5 lakh tonne till April-2020 and lower availability of imported stock may support pea market once again from Aug. If chana continues to trade weak, pressure would continue, on pea price too. Weak trend may prevail in July.

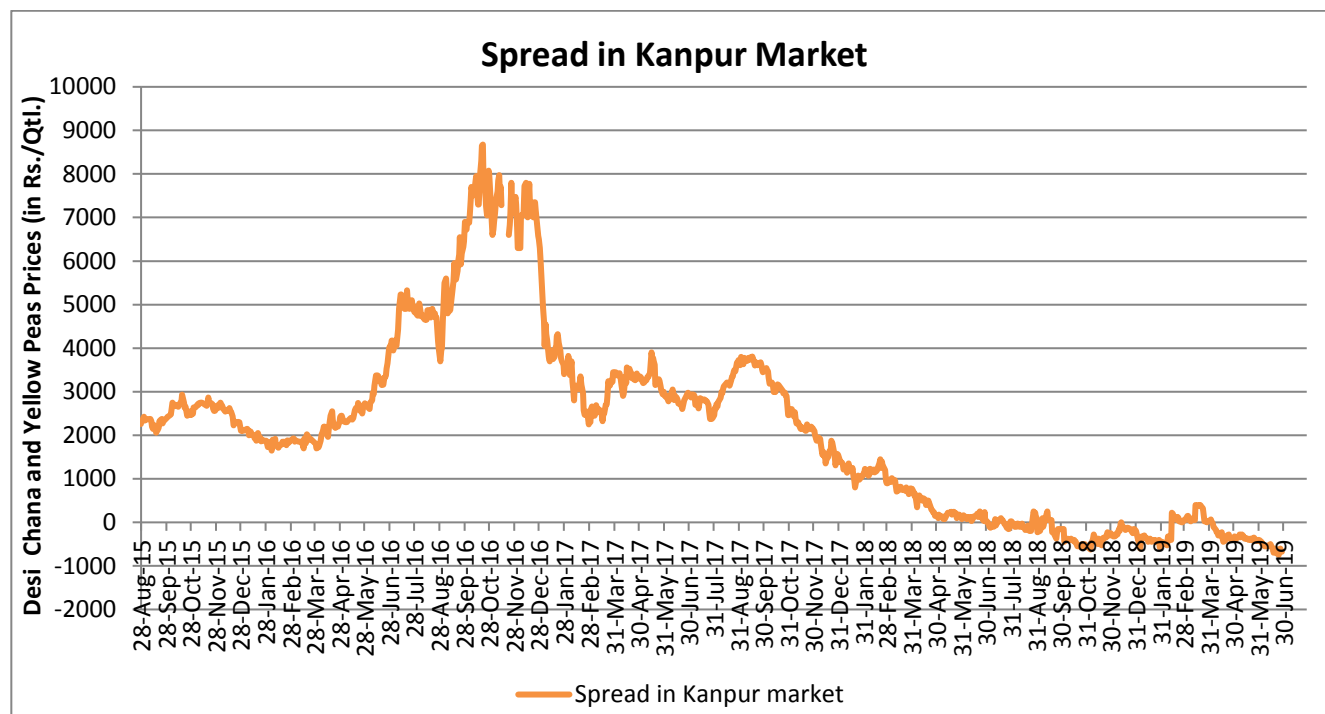

Market recap:

Pea market traded under pressure despite lower stock at port. However, Kanpur market traded slightly up from 4978 to 5136 per qtl due to increased holding by private trades. Overall, all India average declined by 0.56 to Rs5514 per qtl in June. In Mumbai market, pea traded at Rs 4760, down from Rs4810 in May. Pressure is likely to continue in July as chana trades bearish. Stake holders should retain stock as stock at port is dwindling now and demand for festive season is about to begin.

Price Dynamics: Pea market is expected to trade steady to slightly weak in July due to:-

- Weak demand for chana despite lower crop size this year
- Fixed import quota at 1.5 lakh MT and lower use in mixing for besan.
- Weak demand for pea dal due to higher price for pea dal
- Despite Stockiest holding in producing offtake from mills is weak and availability of chana at lower price.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs400 to Rs 650. Spread is expected to remain in the negative zone in July too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks.

Seasonality Index depicts that pea prices are likely to notice slight improvement in July-2019.

Market Outlook For July-Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

Fundamental Analysis and Outlook:

Market Recap:

Continuous import and willingness of nafed, to start selling in domestic market amid restricted buying by millers, have restricted lentil price to move towards MSP level. Demand in local market is weak. As imported lentil is cheaper, any spike in cash lentil market despite lower stock in domestic market, is unlikely in the near term. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Range bound movement is expected in lentil market in July. Lentil vessel is being quoted at Rs 4125-4150 per quintal and container is being quoted at Rs 4250 per quintal. In Kanpur market it is being traded at Rs4375 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs4250-4450 in June.

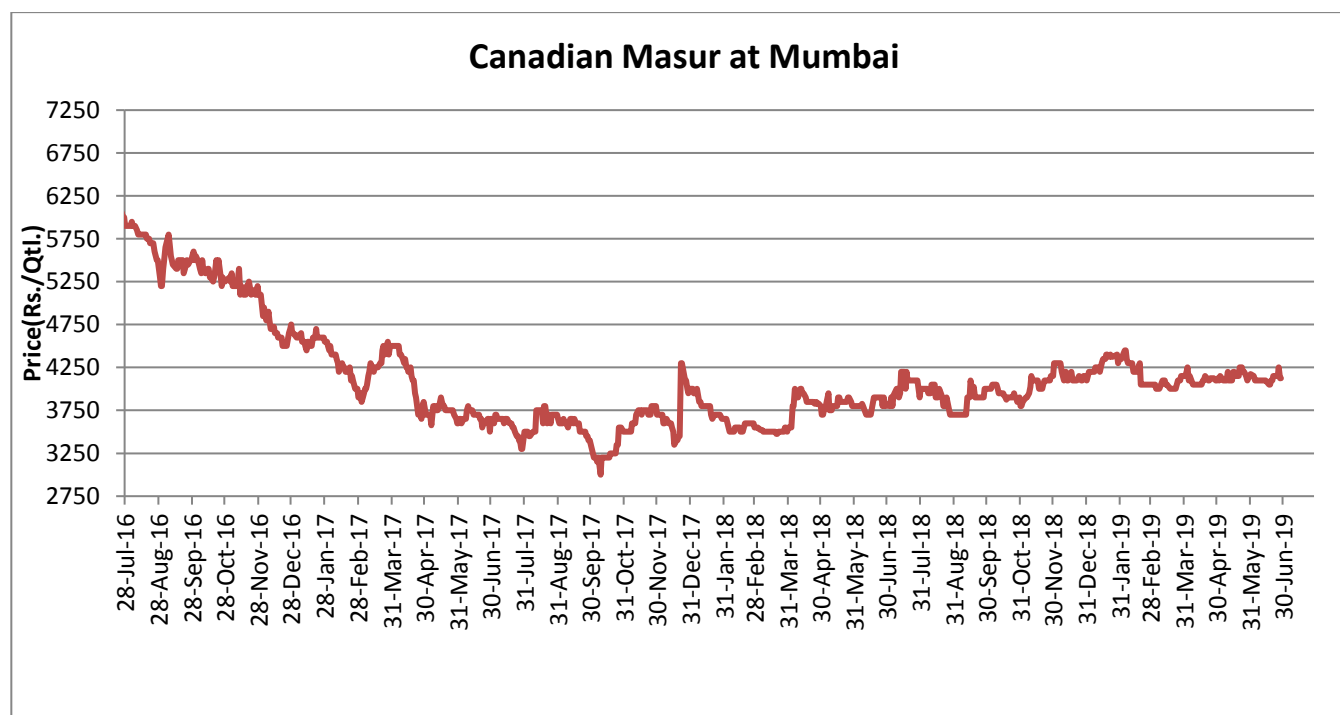

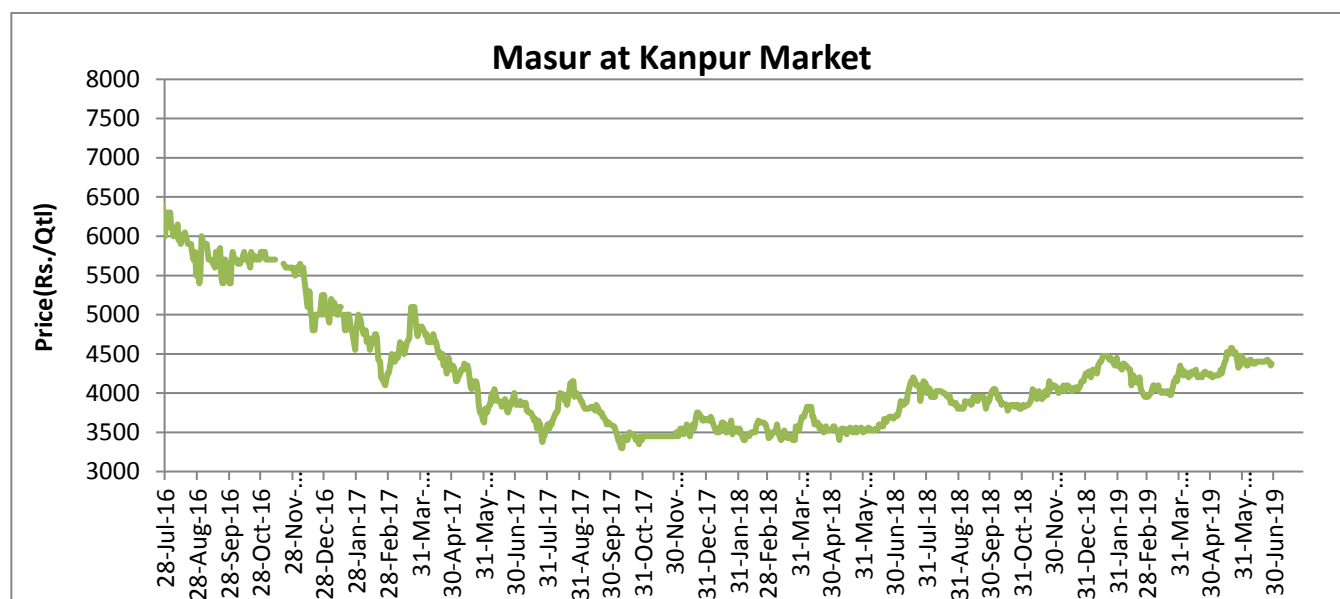

Price Dynamics:

In June-2019, average price in key market Kanpur was up slightly by 0.05 % to Rs 4394 per qtl. MoM basis. Prices are likely to trade range bound in July.

Range bound movement is expected due to:

- Weak demand from bulk buyers
- Nafed intension to start selling
- Import flow at comparatively lower price
- Weakness in other pulses market specially tur, chana and urad

Price Trend In Cash Market:

Seasonality Index depicts steady to slightly weak movement in July-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur cash market traded up in the beginning of June and crossed 6000 level in Gulberga market. Lower crop size and fear of lower acreage this year too due to delayed monsoon, helped market to trade continuously up from MSP. However, govt decision to allow additional 2lakh MT import over and above 2 lakh MT allowed previously and decision of selling 2 lakh MT from buffer stock weakened upward momentum in the market. Prices decreased by Rs350-450 in last 15 days. However, demand from mills is likely to improve and tur may improve again in July and continue to rule above 5675(MSP) in Gulberga market. Besides, some support is expected from higher MSP for 2019-20 crop. MSP of tur has been increased by Rs 125 to Rs 5800. In July tur market is expected to trade at Rs 5500-6000. As rains started in main growing region, sowing activities are likely to pick up and farmers may make up for lower coverage. Availability is expected to remain at ease. So, any major jump in market is unlikely in July. Myanmar is offering new tur at \$760-765 per MT in forward deal.

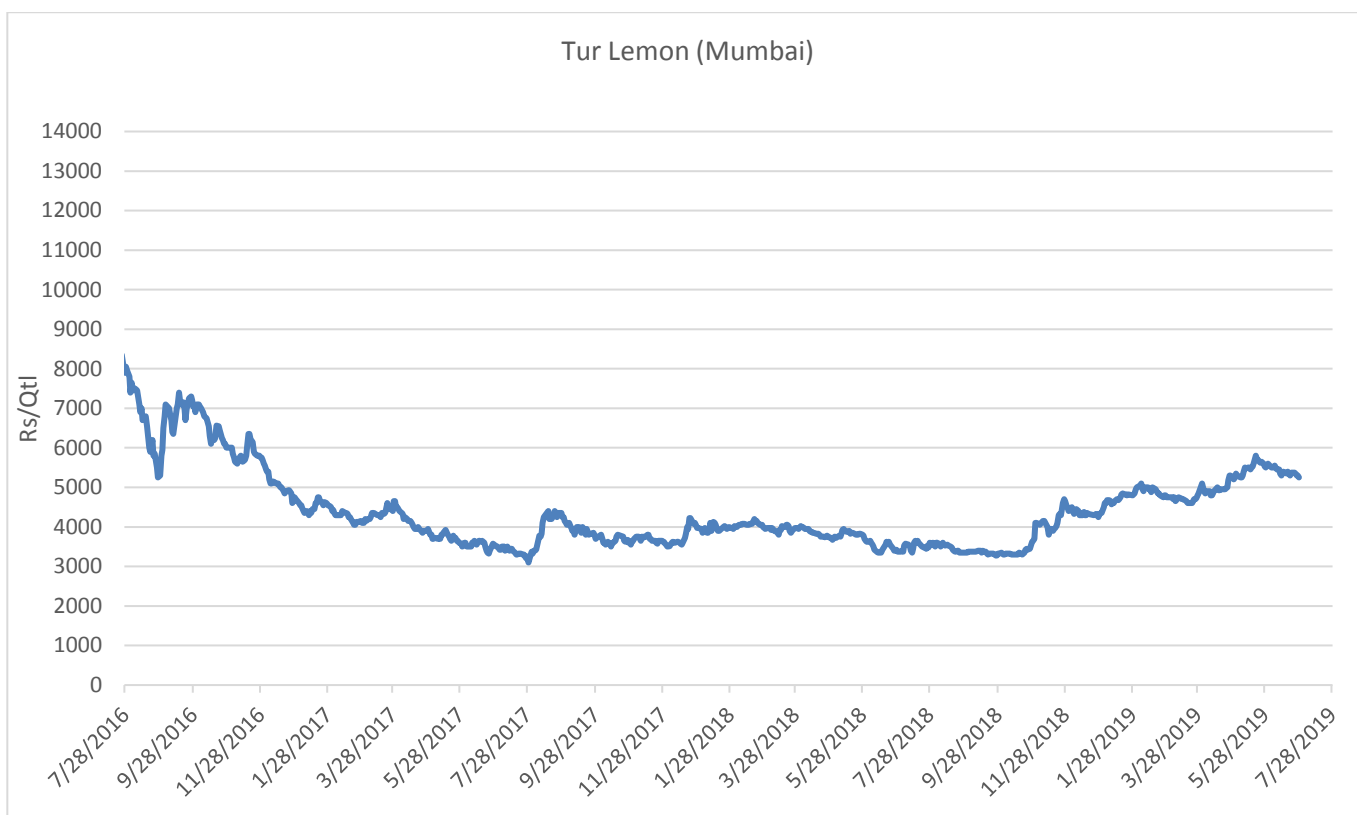

Market Recap:

Tur market is expected to stay steady to slightly weak on the back of lower demand on higher level. Availability would increase as enhanced import quota from 2 to 4 lakh MT. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. Restricted selling by stockiest, fear of lower area due to moisture stress in the field would remain supportive to cash tur market in the medium term.

Price Dynamics:

In June-2019, average price in Gulberga market was down by 2.38 % from 5916 to Rs 5775 per qtl. due to higher import quota, decision of selling from buffer stock and good monsoon rains in producing regions in July. Tur price in July is likely to move down slightly due to

- Higher import quota
- Sale from buffer stock
- Rains in sowing regions
- Weak demand from mills and
- Hope for improvement in sowing area due to higher MSP

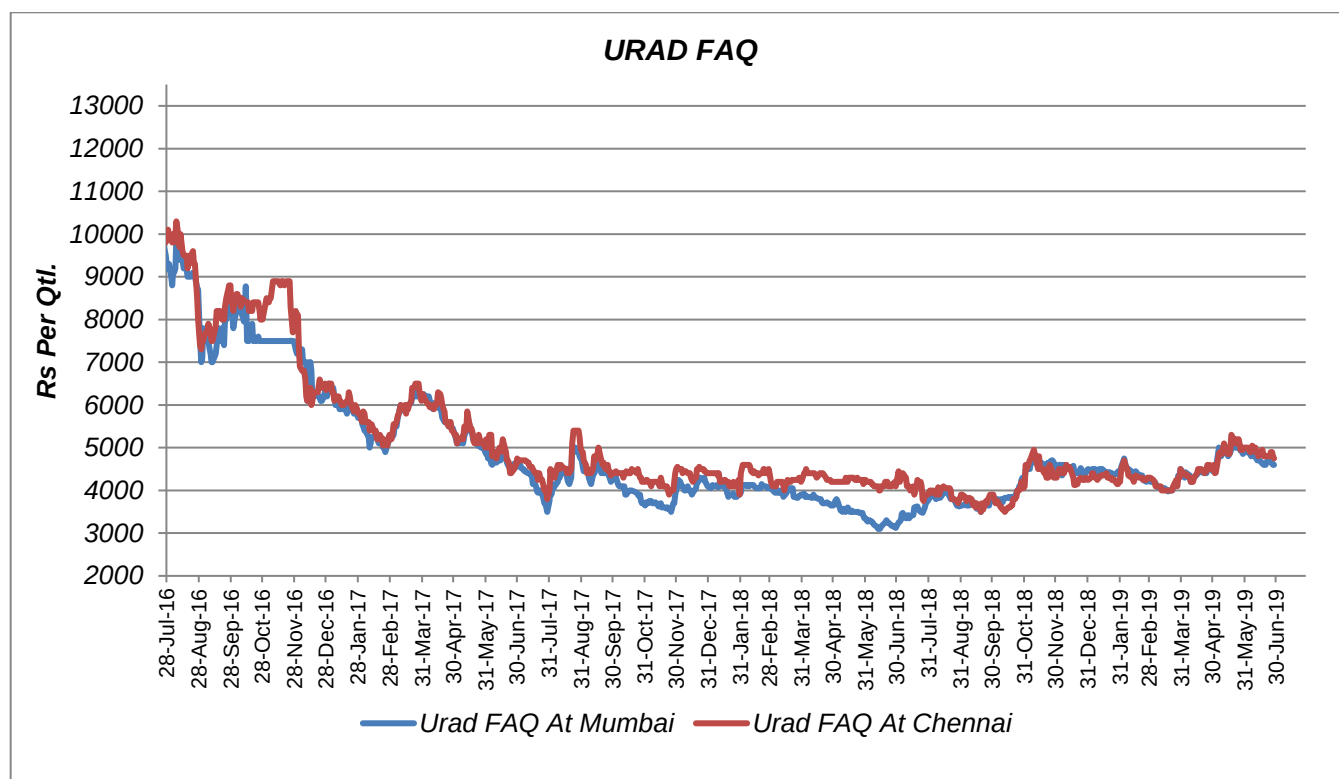

Market Recap:

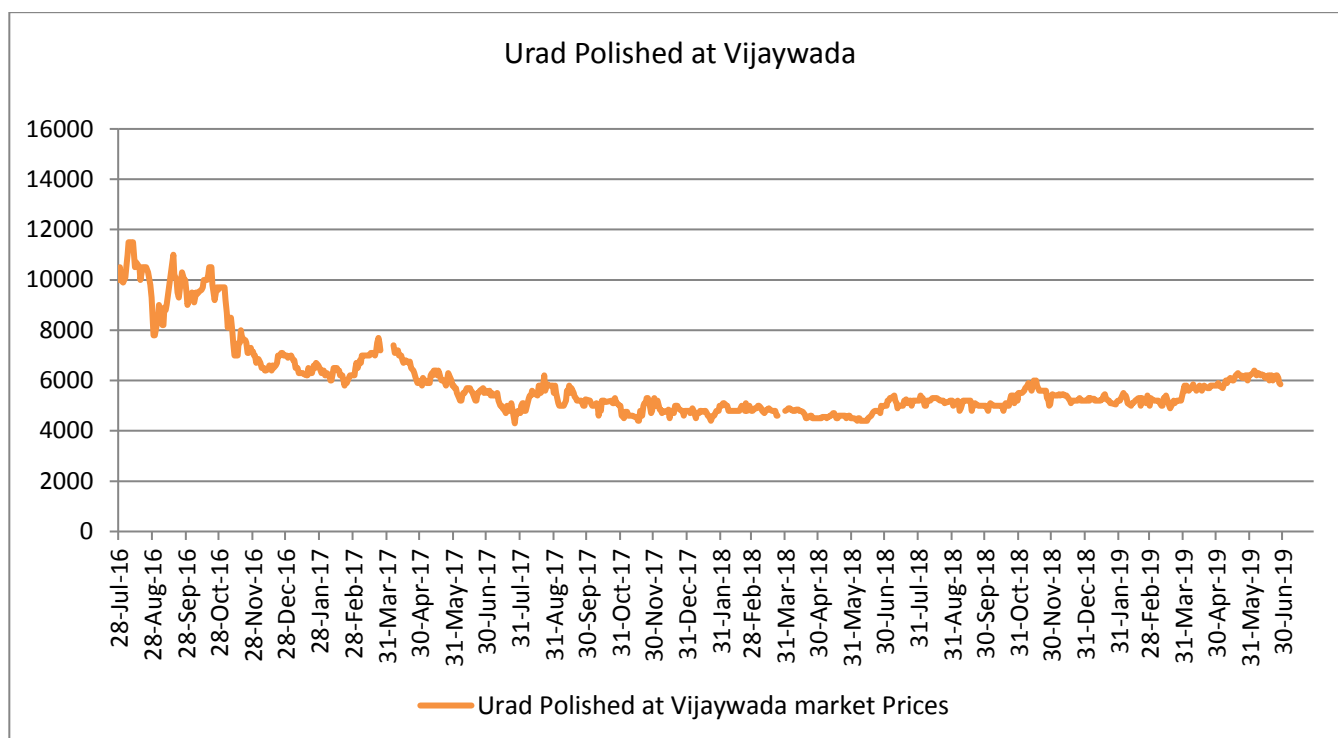

Urad area is likely to decline despite higher MSP for 2019-20 crop. MSP has been increased from Rs5600 to Rs 5700. Farmers are preferring coarse cereals to urad and moong this year. So, any major decline in urad price is unlikely despite higher import and carryout out stock. Buyers should buy urad at decreased level and hold it. Import would remain restricted at 1.5 lakh MT. So, at current price there is no risk in Urad. Right now, demand is weak. In the short to medium term, urad may trade up by Rs250 to 400. Stockiest have started holding stock as import flow would remain restricted. Burden of old crop too is decreasing, and it may push urad price further up from current level. Urad may continue to trade at Rs4500-4850 per qtl in various markets in coming weeks. In Chennai market urad is being traded at Rs 4750-4775 per qtl. Buying at dip seems good at this point of time.

Price Dynamics:

In June, average prices in key markets including Mumbai/was down by 2.54 % percent to 4800 per qtl. In Chennai it is being traded at Rs 4750-4800. Prices may stay steady to slightly firm in July due to

- Higher MSP and ongoing procurement drive
- Fear of lower acreage
- Import restriction at 1.5 lakh MT for a whole year
- New big crop not before Sep
- Lower pace of import
- Higher quotes in Myanmar

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Market Outlook for July : Prices are likely to trade firm after a slight correction.

Fundamental Analysis and Outlook For Moong:

Market Recap:

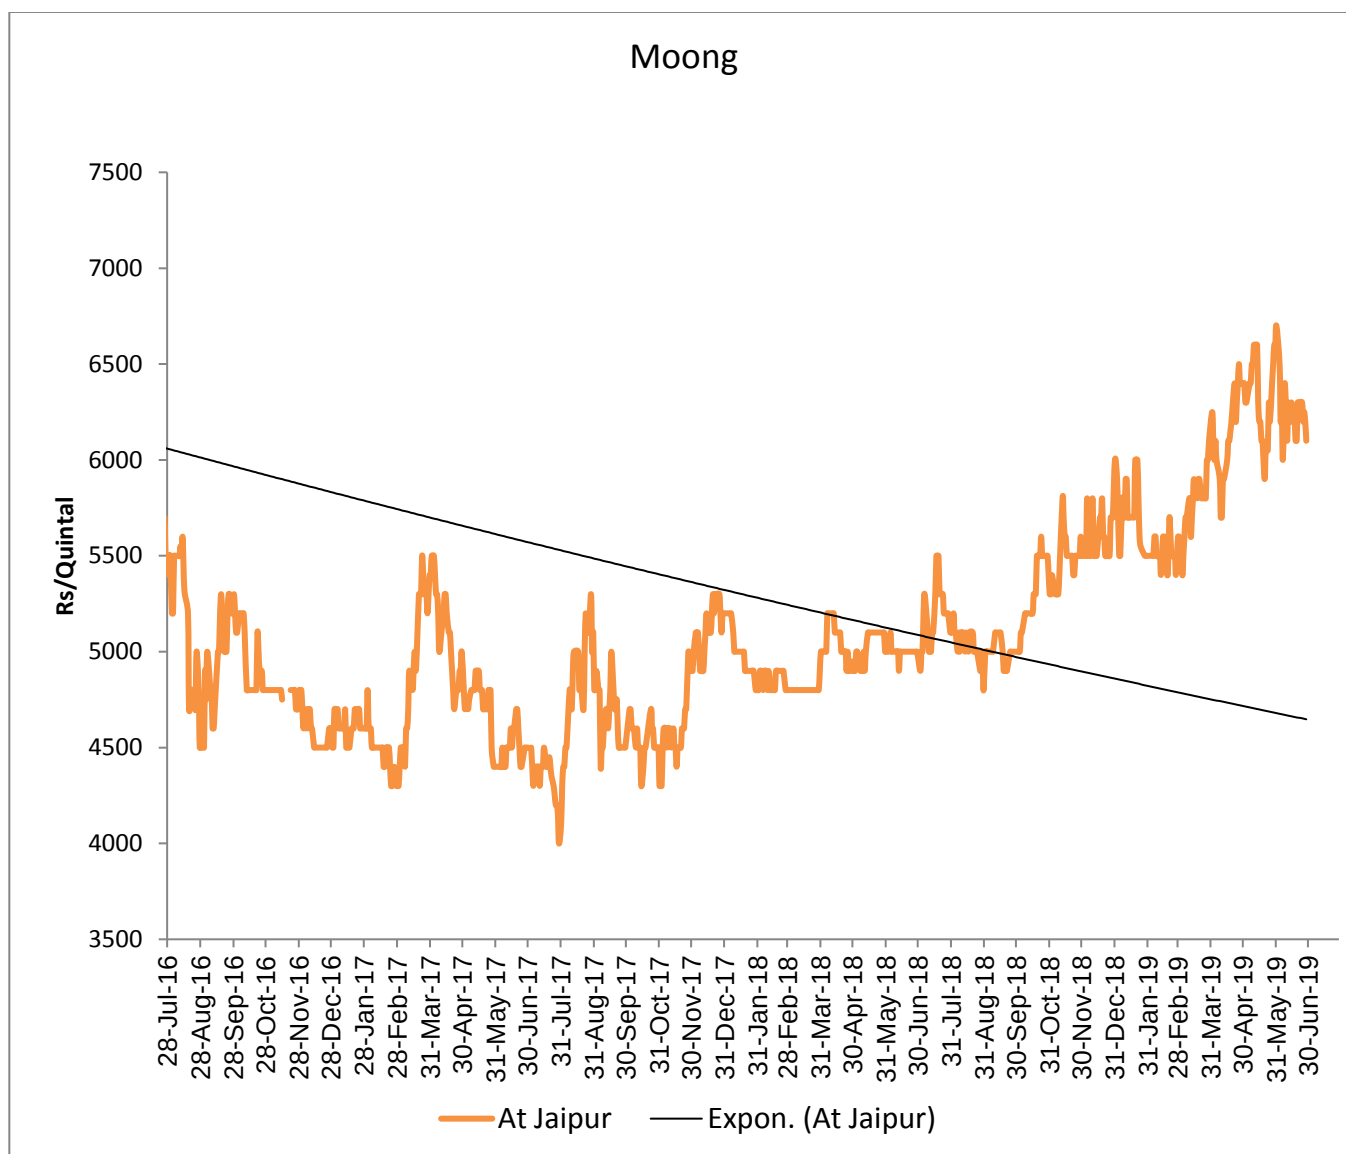

As there is no parity for moong import and there is a shortage of quality crop, moong market is likely to recover once again. Govt has increased MSP for moong from Rs6975 to Rs 7050 and it would prefer to buy higher quantity of moong under PM Ashaa programme this year. Besides, kharif area is likely to decrease by 15 to 20 % as sowing time is nearing end, in many states. No import parity, lower stock availability in central pool and stockiest unwillingness to release stock at current price remain supportive to moong market fundamental in coming weeks. Moong in Jaipur market would continue to trade in the range of Rs6000-6500 in July. It may move further up in coming months.

Price Dynamics:

Pressure on moong market is likely to come to an end as arrival pressure from summer moong is decreasing. Area is likely to decrease by 10 to 15 % this kharif season while import would remain restricted at 1.5 lakh MT Stockiest have started holding stock again. For new season MSP for moong has been set at Rs7050. So moong cash market is likely to move up again.

Market is expected to improve in July due to:

- Import restriction
- Lower stock in central pool
- Decreasing pace of arrival
- Stock holding
- Higher MSP and Lower acreage

Seasonality Index depicts firm movement in the near term

Market Outlook for July: Steady to slightly firm movement is expected.

Pulses Wise Technical Outlook for July -2019: -

Chana:

Outlook –We expect prices to notice steady to weak movement in July-2019. Market may trade down due to:

- ❖ Weak demand
- ❖ Higher old stock
- ❖ Stable demand for besan despite higher price for pea
- ❖ Sluggish buying by private trades
- ❖ Expected price band for Chana in Delhi is 4200 to 4500 levels in this month.

Trade Strategy: Sell on rise

Trade Recommendations: Go short around 4450 with the first target of 4200 and second target 4150 with stop loss at 4550 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4250	4550	4650

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightly weak movement in this month taking clue from lower chana price and weak demand at higher level.

Technical analysis:

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4600- 4900 in this month.

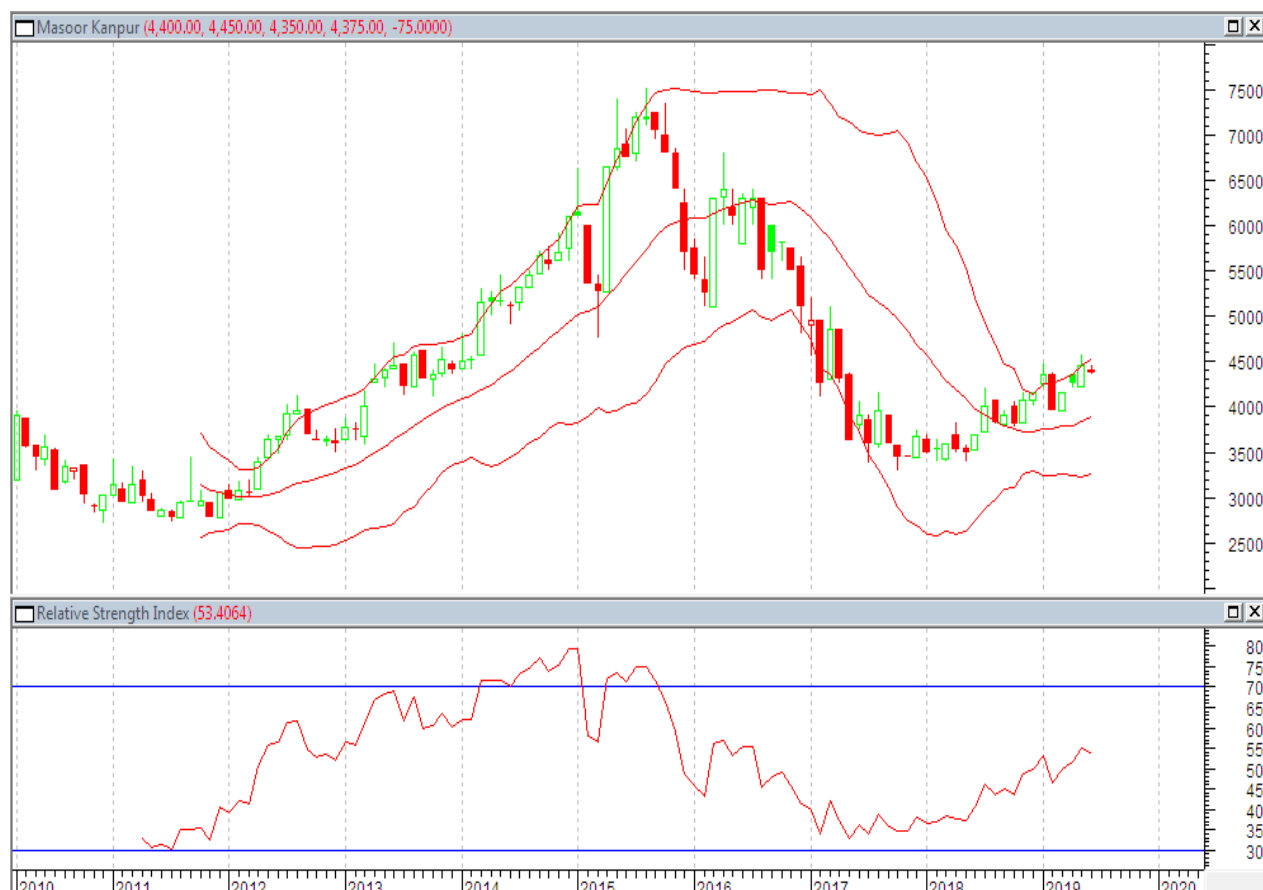

Strategy: Buy on dip

Trade Recommendations: Go long around 4650 with the first target of 4850 and second target 4900 with stop loss at 4500 level

Support & Resistance				
S2	S1	PCP	R1	R2
4450	4550	4750	5000	5100

Masur :

Desi Masur (at Kanpur) Spot Market Monthly Chart:

Outlook –Steady to weak movement is likely to be noticed this month.

- Chart depicts steady to weak movement in the market.
- RSI oscillator is moving down in neutral region.
- Expected price range is 4200-4600

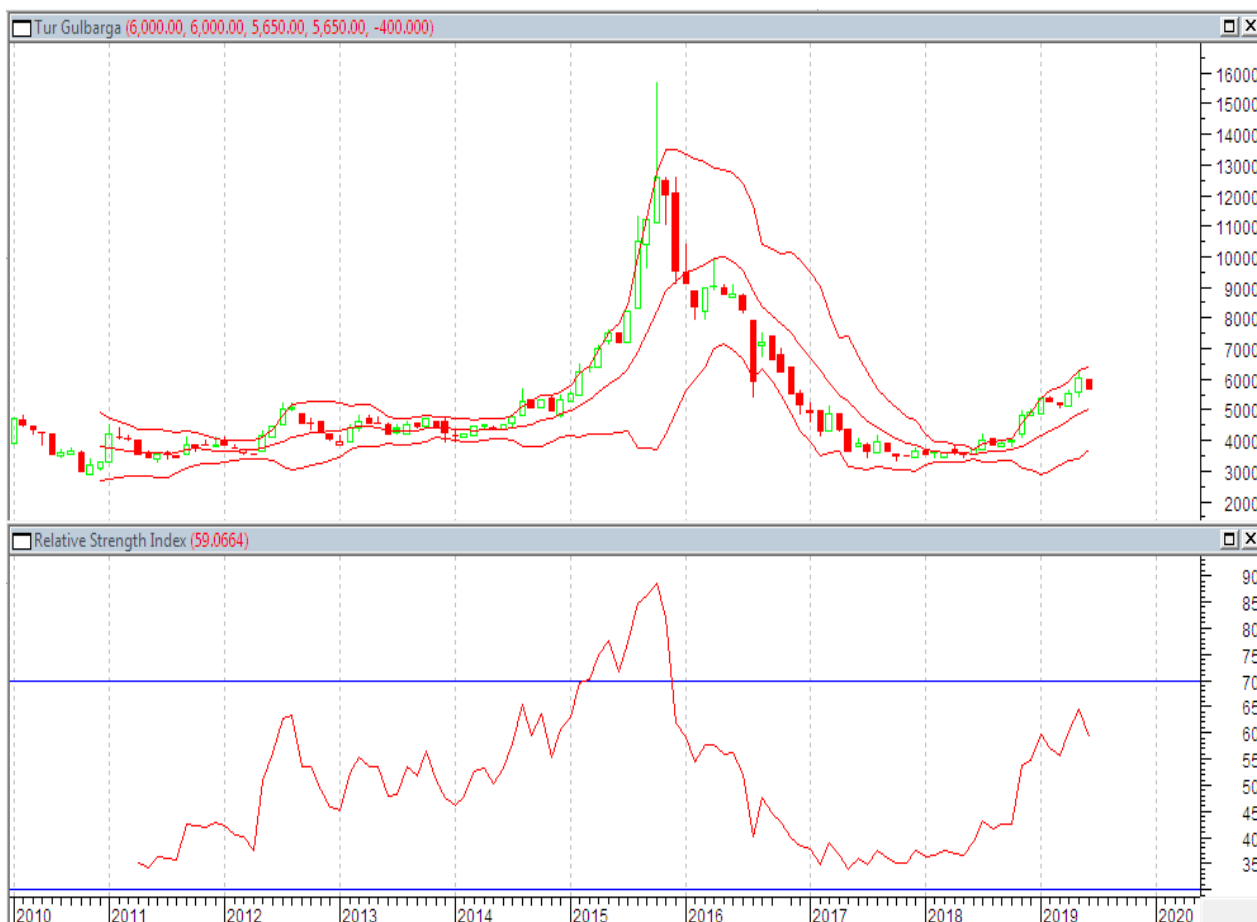

Strategy: Buy on dip

Trade Recommendations: Buy around 4300 with the first target of 4500 and second target 4550 with stop loss at 4200 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4250	4375	4550	4650

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to show weak movement..

- Candlestick chart denotes weak movement in the market.
- Oscillator RSI is moving down in neutral region.
- Expected price range is 5500-5900

Strategy: Buy on dip

- **Trade Recommendations:** -Go long around 5600 with the first target of 5750 and second target 5800 with stop loss at 5500 level.
-
